

## Rhino Mobile Work Center

Initially designed around the needs of aerospace composite repair and LO professionals, the Rhino is a robust mobile work center that can be outfitted to suit many fabrication and maintenance specialties.

The Rhino is available in 3 standard configurations or can be customized to meet your specific needs.

Locked and secured the Rhino is a compact mobile storage unit for tools and consumables.

- 8 large 6" casters support up to 2500 lbs
- Heavy duty tie down rings
- Integrated fork lift guides
- Closed dimensions 62w x 44d x 40h

The Rhino opens to reveal storage space that can be customized for various jobs.

The wings have divided storage along the bottom and room for up to 4 rolls of composite fabrics or films.

The body of the Rhino has 7 large drawers for tools, an optional 3 position hose reel, and shelves behind locked doors.

Hose reel and shelves

Fabric roll storage  
50" length

Electrical connections  
and charging station

Drawers 40w x 26d

Shelf  
Divided  
storage bins

Once open, the wings swing 180 degrees to support a flip top 10' x 2' self healing work surface.

3 position hose reel and storage shelf
