Upper Shelves for Workbenches

Standard One Shelf

Standard Two Shelves

Adjustable Two Shelves

Adjustable Three Shelves

Standard shelves are 16-ga. steel with 2″ high backstops. Shipped assembled. To Order: Please specify color: beige or gray.

Models with two shelves have a lower shelf and two removable dividers to organize your work.

Adjustable shelves are made of 14-ga. steel with 1 3/4″ high backstops. All shelves can be positioned at any angle and can be reversed so the backstop is at the front to hold books and literature. Color is gray. Shipped unassembled.

Workbench Pegboards

Keep tools visible and organized above your workbench. Mount posts to the top of your workbench (there are four 3/8" dia. holes per footplate for mounting to the workbench; hardware included), connect panels to the posts, and add the accessories you need. Pegboard holes are 5/16" square and are on 1 1/2" centers. Panels are mounted with 7" of clearance above workbench. Made of 20-ga. steel. Color is gray.

Bin box rails are not compatible with 24" or 48" wide pegboards.

Steel Tables

Style A have a reversible top, allowing you to have a work surface with or without a 2" high lip around the edge. They have 11-ga. steel frames and the tops are made of 16-ga. steel. Color is green. Shipped unassembled. *Mobile models* have swivel casters with brake and 2" dia. rubber wheels.

Styles B&C have an 11-ga. steel frame and a 12-ga. steel top. Color is gray. Shipped assembled. *Mobile models* have swivel casters with brake and 3" dia. rubber wheels.

Style C include a 13" Wd. × 15" Dp. × 5" Ht. 40-lb. capacity drawer.

Styles D&E have an 11-ga. steel frame and 12-ga. steel top. Color is gray. Shipped assembled. *Stationary models* have one 9/16" dia. hole per footplate for mounting to the floor (fasteners not included). *Mobile models* have swivel casters with brake and 3" dia. plastic wheels.

Style F have a welded 7-ga. steel frame, 12-ga. steel top, and shelf. Color is gray. Shipped assembled. *Stationary models* have a 9/16" dia. hole per footplate for mounting to the floor (fasteners not included). *Mobile models* have swivel casters with brake and 3" dia. plastic wheels.

Maple- and Composite-Wood-Top Tables

Stationary with Maple Top

Stationary with Composite-Wood Top

Metal components are gray. Shipped assembled.

With Maple Top—Not only good looking, these tables are nonconductive and impact resistant. They have a 1¾″ thick maple top that has a clear-coated finish. Frame is 11-ga. steel.

Stationary models have leveling feet that allow you to adjust height.

Mobile models have swivel casters with brake and 3″ dia. rubber wheels.

With Composite-Wood Top—Reduce vibration and deaden sound from tools. All have a 1⅜″ thick composite-wood top with a clear-coated finish. Frame is 18-ga. steel.

Stationary models have one ⅜″ dia. hole per foot plate for mounting to the floor (fasteners not included).

Mobile models have four swivel casters (two with brake) with 4″ dia. rubber wheels.

With Composite-Wood Top with Shelf and Drawer—These tables are just like the composite-wood-top tables above, except they come with a 250-lb. capacity shelf and a 15″ Wd. × 20″ Dp. × 6″ Ht. drawer that has a capacity of 100 lbs.

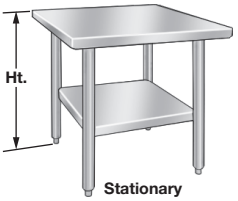
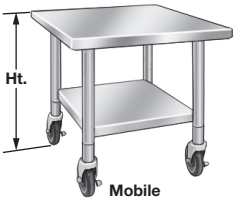
Narrow-Width Stainless Steel Tables



Stationary



Mobile

Offering good corrosion resistance, these tables are often used in corrosive environments and food service applications. All tables have a welded 18-ga. stainless steel frame, 16-ga. stainless steel top, and shelf for added storage space. Tables meet NSF/ANSI standards. Shipped assembled.

Stationary models have leveling feet to compensate for uneven floors.

Mobile models have four swivel casters with brake and 5″ dia. polyurethane wheels.

Ultra-Flat Extra Heavy Duty Tables

When precision is important, choose these tables that are ground to a flatness tolerance of 0.002″ per foot. They have an all-welded 3-ga. steel construction and the legs are steel angle iron with cross bracing for added strength. The bottom of each leg has two tapped holes (1/2″-13 and 5/8″-11) and one drilled hole (17/32″ dia.) for mounting to the floor (fasteners not included). Color is gray with an unpainted top. Shipped assembled.

Vibration-Damping Marble-Top Tables

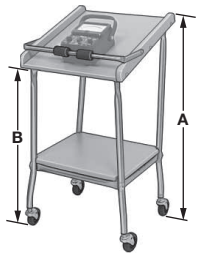
Also known as balance tables, these tables provide superior vibration control for sensitive equipment. They offer excellent resistance to impact, thermal shock, stains, and harsh chemicals. Both are made of 3″ thick nonporous, molded marble. They come with a black 2″ dia. cast iron cross brace that strengthens the legs. Color is white. Shipped unassembled.

Overall Size Wd.	Dp.	Ht.	O'all Cap., lbs.		
35″	24″	31″	1,000	4820T31	$1,278.01
35″	24″	36″	1,000	4820T32	1,353.19

Mobile Slope-Top Instrument Tables

The sloped top positions your multimeters, oscilloscopes, and other instruments at a convenient height and viewing angle. All surfaces are nonconductive, nonmarring, and heat resistant. Legs and frame are made of 18-ga. galvanized steel tubing. Each top has 1 1/4″ high side stops and an adjustable support arm with rubber bumpers to hold your instruments in place. All tables have a 75-lb. capacity removable lower shelf and four swivel casters with 3″ dia. rubber wheels. Shipped unassembled.

The top and shelf are either 3/4″ thick UV-coated birch plywood with a light woodgrain finish or 5/8″ thick light gray plastic laminate over particleboard. Birch plywood is slightly stronger than plastic laminate, but plastic laminate is easier to clean.



Top Size, Wd. × Dp.	Ht. (A)	Ht. (B)	O'all Cap., lbs.	Birch Plywood Top and Shelf		Plastic-Laminate Top and Shelf	
15 1/2″ × 19″	34″	28″	150	9031T14	$109.09	9031T16	$105.45
23″ × 19″	34″	28″	150	9031T15	127.27	9031T17	121.00

Laminate-Top Tables

All tables have a plastic-laminate top and a steel frame. Shipped unassembled.

Fixed-height tables have a 16-ga. chrome-plated frame. *Gray tops* have a gray frame. *Light brown woodgrain* and *dark brown woodgrain tops* have a black frame.

Fixed-height tables with shelf have an 18-ga. frame. The shelf has a 100-lb. capacity. *Gray* and *dark brown woodgrain tops* have a black frame. *Light brown woodgrain tops* have a brown frame.

Adjustable-height tables adjust in 1″ increments. They have a 14-ga. frame and leveling glides. *Gray tops* have a dark blue frame. *Light brown woodgrain tops* have a black frame.

Adjustable-height tables with modesty panel adjust in 1″ increments. They have an 18-ga. frame with chrome-plated steel feet and a black modesty panel for privacy (except tables with light brown woodgrain tops have a beige modesty panel). Legs have adjustable leveling glides.

To Order: Please specify top color: gray, light brown woodgrain, or dark brown woodgrain (unless noted).

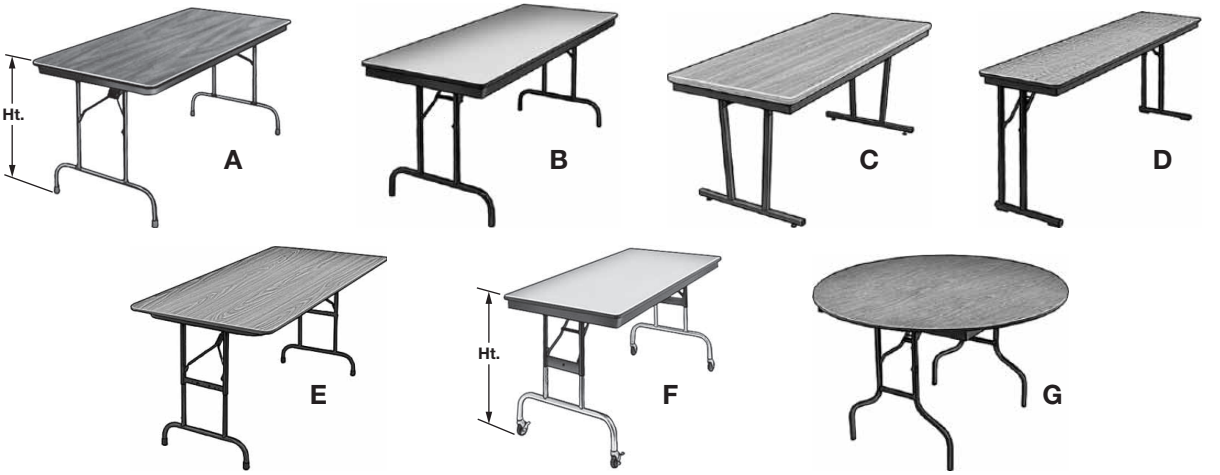
Laminate-Top Folding Tables



All have a plastic-laminate top, steel frame and steel legs with foot glides. Shipped assembled.

To Order: Please specify color from choices below (unless otherwise indicated).

- Gray top with black frame and legs.
- Light brown woodgrain top with brown frame and legs.
- Dark brown woodgrain top with black frame and legs.

Style A—Dark brown woodgrain tops have a brown frame and legs. Gray tops have a gray frame and legs.

Style C—Often used for conference rooms. The plastic feet adjust to compensate for uneven floors.

Style E—Adjust in 1″ increments. Dark brown woodgrain tops have a brown frame and legs. Gray tops have a gray frame and legs.

Style F—Tables roll where you need them and adjust in 1″ increments. All come with four swivel casters (two with brake) with 3″ dia. rubber wheels. The lower portion of the legs are chrome plated.

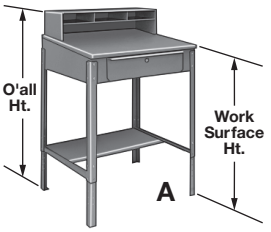
Picnic Table Frames

Build a picnic table with your own wood top and benches. These frames can also be used as a replacement frame for our wood-top and aluminum-top picnic tables. Mounting hardware included.

Galvanized Steel Frame Only	9814T26	$335.32

Capacities listed are based on an evenly distributed load.

Stand-Up-Height Workstations



(A-G) Stationary Workstations

All have a drawer directly below the writing surface.

Style A are gray.

Standard workstation has a 75-lb. capacity lower shelf and a drawer that includes a lock and two keys. Shipped unassembled.

Heavy duty workstation has a 130-lb. capacity lower shelf and a drawer that includes a lock and two keys. The work surface height can be lowered in 1″ increments to 36¾″. Shipped assembled.

Style B has three additional file drawers and a 75-lb. capacity lower shelf. One drawer is 13″ Wd.×20″ Dp.×5½″ Ht; the other two are 13″ Wd.×20″ Dp.×12″ Ht. All drawers have recessed drawer pulls and include a lock and two keys. Color is gray. Shipped assembled.

Style C Color is gray.

Standard workstation has a lower cabinet with an interior shelf that adjusts on 3″ centers. Drawer and cabinet door include a lock and two keys. It has a 32″ Wd.×28″ Dp.×28″ Ht. cabinet. Shelf capacity is 350 lbs. Shipped unassembled.

Heavy duty workstation has a lower cabinet with an interior shelf that adjusts on 4″ centers. Drawer and cabinet door include two locks and four keys. It has a 35″ Wd.×30″ Dp.×30″ Ht. cabinet. Shelf capacity is 130 lbs. Shipped assembled.

Style D has a top cabinet and lower shelf. Drawer and cabinet door have recessed drawer and door pulls; include locks with two keys. The cabinet is 31½″ Wd.×14″ Dp.×18″ Ht. and has a fixed 300-lb. capacity shelf. Color is beige. Shipped unassembled.

Style E has three additional 12″ Wd.×22½″ Dp.×9″ Ht. file drawers. All drawers have pull handles and include a lock and two keys. This workstation also has a 250-lb. capacity lower shelf. Color is gray. Shipped assembled.

Style F is fully welded and has a 950-lb. capacity lower shelf. Drawer has a padlock hasp (padlock not included; max. shackle dia. is 7/16″). Each leg has one ¾″ dia. mounting hole (fasteners not included). Color is gray. Shipped assembled.

Style G is fully welded and has a lower cabinet with a 2,250-lb. capacity interior shelf that adjusts on 2″ centers. The drawer and cabinet door both have a padlock hasp (padlock not included; max. shackle dia. is 7/16″ for the drawer and ½″ for the cabinet door). The cabinet is 36″ Wd.×28″ Dp.×36″ Ht. Legs have ¾″ dia. mounting holes. Color is gray. Shipped assembled.

(H-K) Mobile Workstations

Style H workstations have a lift-up top with an interior storage compartment; top includes a lock and two keys. Workstation also has a lower shelf and comes with four swivel casters (two with brake) that have 5″ dia. plastic wheels. Shipped assembled.

Standard workstation is gray. Shelf capacity is 100 lbs.

Harsh environment workstation is made of stainless steel and is good for corrosive and sanitary environments. Shelf capacity is 125 lbs. Meets NSF/ANSI standards.

Style J is fully welded and has two drawers and a cabinet. Drawers and cabinet door include locks and two keys. Cabinet is 23″ Wd.×20″ Dp.×20½″ Ht. and has a fixed shelf with a capacity of 50 lbs. A ½″ lip on the front of the writing surface keeps items from rolling off the desk. Comes with four swivel casters that have 3″ dia. rubber wheels. Color is gray. Shipped assembled.

Style K has a drawer and lower shelf. The drawer has a padlock hasp (padlock not included; max. shackle dia. is 7/16″). Shelf has a capacity of 950 lbs. Comes with four casters (two rigid; two swivel) that have 6″ dia. rubber wheels. Has a floor lock to keep workstation in place. Color is gray. Shipped assembled.

Adjustable-Height Office Workstations

Mix and match components to create a workstation that can be reconfigured as your needs change. Desk height can be adjusted in 1″ increments. They include removable modesty panels for privacy (one on rectangular desks; two on corner desk). Tops are plastic laminate, and legs are chrome-plated steel. Shipped unassembled. **To Order:** Please specify top color: gray, light brown woodgrain, or dark brown woodgrain.

Corner desk connects two rectangular workstations. The two connecting sides are 30″ deep; angled front is 25″ wide.

Computer keyboard tray is 23″ Wd. × 12″ Dp. and is made of ¾″ thick plastic laminate. Mounting fasteners included. Color is black.

CPU holder adjusts from 5½″ to 9¼″ wide and 14¾″ to 20½″ high. Made of steel. Mounting fasteners included. Color is black.

Drawer cabinet is 15″ Wd. × 19½″ Dp. × 19½ Ht. It has two 100-lb. capacity drawers: 13″ Wd. × 16″ Dp. × 7″ Ht. and 13″ Wd. × 16″ Dp. × 12″ Ht. The drawer cabinet also comes with a lock and two keys. Made of steel. Mounting fasteners included. **To Order:** Please specify color: black or beige.

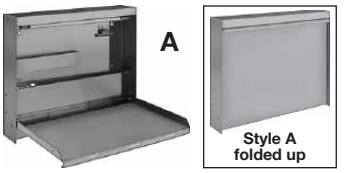
Wall-Mount Workstations



Now you can have a writing surface without sacrificing an inch of floor space. *Harsh environment workstations* are stainless steel for use in corrosive and sanitary environments.

Style A can be pulled down when needed, then folded up and out of the way. Workstations protrude 3⅜″ from the wall when folded. They have 1″ side stops, a spring clip for holding papers, and built-in pockets for storing forms, cards, and pencils. They have two 3⁄16″ dia. holes for wall mounting. Mounting fasteners included. Shipped assembled.

Standard workstation has an 18-ga. steel work surface. **To Order:** Please specify color: beige, gray, or white.

Harsh environment workstation has an 18-ga. stainless steel work surface.

Style B has a top that lifts to access a storage compartment. Top includes a lock for added security.

Standard workstation is 20-ga. steel and has two ½″ dia. holes on the back and one 9⁄32″ dia. hole in each brace for wall mounting (mounting fasteners not included). Lock comes with one key. Color is gray. Shipped unassembled.

Harsh environment workstation is 20-ga. stainless steel. There are two 3⁄16″ dia. holes in the back and two 9⁄32″ dia. holes in each brace for wall mounting (mounting fasteners not included). Lock comes with two keys. Shipped assembled.

Style C has a locking drawer below the work surface for storage. The drawer measures 24″ Wd. × 28″ Dp. × 3½″ Ht., has a capacity of 100 lbs., and comes with a lock and two keys. The work surface is 18-ga. steel. Mounting fasteners included. Color is gray. Shipped assembled.

Adjustable-Height Mobile Computer Workstations

Knob Adjustable

Bolt Adjustable

Air Adjustable

Work in a sitting or standing position—adjust the height on these units for your comfort. All have four swivel casters (two with brake). Shipped unassembled.

Knob-adjustable workstation has a platform that is angled and adjustable. Casters have 2″ dia. plastic wheels. Frame is black steel; monitor platform is black plastic laminate.

Bolt-adjustable workstation adjusts in 1″ increments to raise and lower the monitor platform. Includes a pull-out keyboard tray and a mouse platform that pulls out on either side of the keyboard tray. The CPU holder adjusts from 8″ to 10″ wide and can be used on the left or right side. Unit also has one fixed shelf and one adjustable shelf. Casters have 3″ dia. rubber wheels. Frame is gray steel and monitor platform is black plastic laminate.

Air-adjustable workstation has an air cylinder that raises and lowers monitor platform to the desired height. Monitor platform includes a cutout for routing cords. Casters have 2½″ dia. plastic wheels. Frame is black steel and monitor platform is brown woodgrain plastic laminate.

Cabinet-Style Computer Workstations

Protect your computer while working. The top compartment has a plastic window that shields your monitor while providing a clear view of the screen. A pull-out tray holds your keyboard. Workstations are made of 20-ga. steel, have louvered cutouts that provide ventilation to keep equipment cool, and have cut-outs for routing cords. Shipped assembled. **To Order:** Please specify color: beige, blue, or gray.

Tabletop workstation has one lock on the compartment door and one on the keyboard tray. Locks are keyed alike. Two keys are included.

Mobile workstation has one shelf in the lower compartment that adjusts in 2½″ increments to accommodate your CPU and printer. Each of the following components has one lock: top compartment door, keyboard tray, bottom compartment door, and rear access door. All locks are keyed alike. Two keys are included. Unit has four swivel casters (two with brake) with 4″ dia. rubber wheels.

Heavy Duty Stand-Up-Height Computer Workstations

Made of 12-ga. welded steel, these workstations protect your computer from the demands of tough warehouse and plant environments. A plastic window in the top compartment shields your monitor while providing a clear view of the screen. The monitor platform is perforated to keep equipment cool. The bottom compartment has two shelves that adjust on 2″ centers. To keep the air inside clean and circulating, workstations come with a fan/filter assembly that has a 3-ft. cord with two-prong plug. A pull-out tray holds your keyboard and can be secured with a padlock (not included; max. shackle dia. is 7⁄16″). Units come with a seven-outlet surge suppressor outlet strip that has a 6-ft. cord with three-prong plug. Doors have a locking handle that accepts a padlock (not included; max. shackle dia. is ½″). The top door is secured by a latch that can only be opened when the bottom doors are unlocked. Color is gray. Shipped assembled.

Stationary workstation has four 6″ high steel legs with one ¾″ dia. mounting hole per leg for mounting to the floor (mounting fasteners not included).

Mobile workstation has two swivel and two rigid casters with 6″ dia. rubber wheels. Also comes with a floor lock.

Manually Adjustable Stools

(A) Steel Stools—Legs are bolt adjustable in 1″ increments and have leveling steel glides. Base and footrest are steel; color is gray.
(B) Iron Stools with Wood Seat—Legs are bolt adjustable in 1″ increments, and the seats are wood. Base and feet are iron; color is green.
(C) Easy-Carry Three-Legged Stools with Mesh Fabric Seat—Lightweight and collapsible, these stools can be carried anywhere the job takes you. They are stable on a variety of surfaces, including dirt. Base is made of heavy duty aluminum. Includes a drawstring storage bag.
(D) Steel Swivel Stools with Composite-Wood Seat—All have plastic glides and are knob adjustable. Base and footrest are steel; color is gray.
(E&F) Harsh Environment Stainless Steel Swivel Stools with Rubber Seat—Adjust the height of these stools by turning the seat. They are made of stainless steel for corrosion resistance. They resist stains, grease, water, and most chemicals. The middle of the seat has a nonslip black rubber pad. *Style E* have rubber glides. *Style F* have swivel casters with 2″ dia. rubber wheels.

Manually Adjustable Stools with Backrest

(A) Steel stools with composite-wood seat have legs that are bolt adjustable in 1″ increments and have steel leveling glides. Backrest adjusts up, down, forward, and backward. Base and footrest are steel; color is gray.

(B) Steel swivel stools with composite-wood seat are knob adjustable, have plastic glides, and have a steel backrest that is nonadjustable. Base and footrest are steel; color is gray.

(C) Steel stools with padded vinyl seat have steel leveling glides and a backrest that adjusts up, down, forward, and backward. Base and footrest are steel. Legs adjust in 1″ increments. Color is gray.

(D) Steel swivel stools with padded vinyl seat have steel leveling glides and a backrest surface that adjusts up, down, forward, and backward. Base and footrest are steel. Stool adjusts by turning the seat. **To Order:** Please specify seat color: gray (with gray frame) or red (with beige frame).

(E) Iron stools with wood seat have legs that are bolt adjustable in 1″ increments. Seat and backrest are wood. Backrest is nonadjustable. Base is iron, and footrest is steel; color is green.

(F) Steel swivel stools with wood seat have a locking pin assembly below the seat to adjust seat height; seat locks in place. Backrest is wood and adjusts up, down, forward, and backward. Base and footrest are steel; color is black. *Stationary stools* have nickel-plated steel glides. *Mobile stools* have swivel casters with 2″ dia. plastic wheels.

(G&H) Steel swivel stools with fabric seat and with vinyl seat are knob adjustable and the backrest is vinyl and adjusts up, down, forward, and backward. Base and footrest are steel. Fabric seat provides extra comfort; vinyl seat is easy to clean. *Stationary stools* have plastic glides. *Mobile stools* have five swivel casters with 2″ dia. rubber wheels. **To Order:** Please specify color: black (with black base) or gray (with gray base).

(J) Harsh environment stainless steel swivel stools with rubber seat adjust by turning the seat. Stools are made of stainless steel for corrosion resistance. The middle of the seat has a nonslip black rubber surface. *Stationary stool* has rubber glides. *Mobile stool* has four swivel casters with 2″ dia. rubber wheels.

Sit/Stand Stools

Relieve foot and leg strain when working in a standing position—these stools allow you to rest most of your weight on the seat as you work. Seats are made of black polyurethane.

Style A have a lever under the seat that raises and lowers the seat quickly and easily. Stools have plastic glides and a seat that swivels and tilts forward. *Stool with plastic base* is black. *Stool with aluminum base* meets standards for Class 10 clean rooms.

Style B has an angled base to get you close to your work. Base is made of steel. The seat is padded, swivels to the right and left, and tilts forward. Base is black and has antislip rubber glides.

Lever- and Foot-Operated Adjustable-Height Stools

A Stationary | **B&C** Stationary | **D** Stationary | **E** Mobile | **F** Mobile | **G** Stationary | **H&J** Mobile

All seats swivel.

(A) Steel Seat—All-steel construction is more durable and easier to clean than fabric. Color is gray. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels.

(B) Fabric Seat and Backrest—A padded fabric seat and backrest offer more comfort than Style A. Footrest is height adjustable and chrome-plated steel. Base is plastic. Color is black. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels. *Lever-adjustable stools* have a backrest that adjusts up, down, forward, and backward. *Lever adjustable stools with tilt control* allow you to angle seat and backrest forward and backward. Backrest also adjusts up and down. **To Order:** Please specify fabric color: black or gray.

(C) Vinyl Seat and Backrest—Seat and backrest have a padded vinyl surface that's easy to clean. Backrest adjusts up, down, forward, and backward. Footrest is height adjustable and chrome-plated steel. Base is plastic. Color is black. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels.

(D-F) Polyurethane Seat—Stools have a durable polyurethane seat that resists stains, grease, water, and most chemicals. Base is steel, unless otherwise indicated. Color is black, unless otherwise indicated.

Style D has an aluminum base. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 1″ dia. plastic wheels.

Style E has a removable divided storage tray with steel dividers to organize tools and supplies. Base and lower shelf are steel. It has swivel casters with 3″ dia. nylon wheels.

Style F offer hands-free height adjustment—footrest raises and lowers the seat. Base is aluminum with a painted black finish. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels.

(G-J) Polyurethane Seat and Backrest—Stools have a seat and backrest made of polyurethane that resists stains, grease, water, and most chemicals. Base is steel, unless otherwise indicated. Color is black.

Style G have a plastic base and height-adjustable chrome-plated steel footrest. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2¼″ dia. plastic wheels. *Lever-adjustable stool* has a backrest that adjusts up, down, forward, and backward. *Lever adjustable stool with tilt control* tilts and has a backrest that adjusts up, down, and backward.

Style H has two steel footrests at different heights and a backrest that adjusts up, down, forward, and backward. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. plastic wheels.

Style J has three steel footrests at different heights. Backrest tilts and adjusts up and down. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. plastic wheels.

Wall-Mount Stools

Mount this stool on a wall or piece of large equipment for a convenient, permanent place to sit. The leg has a rubber glide and contacts the floor when weight is applied for added stability. Use the lever to adjust the seat height. Comes with a steel mounting bracket with two holes that accept ½″-13 bolts (not included). Once mounted, the entire stool swings from one side of the mounting bracket to the other. Made of steel. Color is black.

Clean Room and Static-Control Adjustable-Height Stools

A
Stationary

B
Mobile

C
Stationary

D
Mobile

E
Mobile

F
Stationary

Choose from stools that meet clean room requirements or are designed to reduce static. All seats swivel.

Style A—These stools have a chrome-plated, all steel construction that is durable and easy to clean. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels. Color is gray.

Style B—Seat and backrest have a padded vinyl surface that is comfortable and easy to clean. Footrest is height adjustable and chrome-plated steel. Backrest adjusts up, down, forward, and backward. Base is plastic. Color is black. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels.

Style C—Stools have a polyurethane seat and backrest that resists stains, grease, water, and chemicals. They have a chrome-plated steel footrest. Seat and backrest tilt and adjust up and down. Base is plastic. Color is black. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. plastic wheels.

Style D—Seat and backrest have a padded vinyl surface that is comfortable and easy to clean. It has a chrome-plated steel footrest and a brass drag chain for grounding. Backrest adjusts up, down, forward, and backward. Color is black. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels.

Style E—A padded fabric seat and backrest offer more comfort than unpadded stools. Footrest is height adjustable and chrome-plated steel. A brass drag chain acts as a ground. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. polyurethane wheels. Base is aluminum. **To Order:** Please specify fabric color: black or gray.

Style F—Stools have a seat and backrest made of polyurethane to resist stains, grease, water, and chemicals. Base is aluminum. A brass drag chain acts as a ground. *Stationary stools* have plastic glides. *Mobile stools* have swivel casters with 2″ dia. plastic wheels.

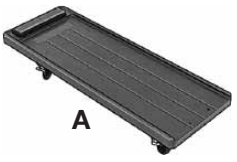
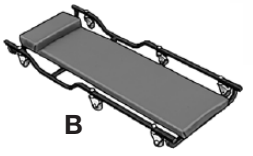
Creepers



A



B

C

D

E

Work below low-clearance equipment. All have swivel casters and padded headrests to keep you comfortable.

(A) Standard—Made of polypropylene.

(B&C) Heavy Duty—A durable steel frame provides support while the vinyl covered composite-wood platform is padded for extra comfort.

Style C has a three-position adjustable headrest.

(D) Harsh Environment—Made of polyethylene, this creeper resists most solvents, grease, and fuel.

(E) Easy Roll—This creeper has large wheels to roll easily over cracks, extension cords, drains, and other obstacles. It is specially designed to cradle your body for support. Made of polypropylene.

Equipment Seats

Replace worn-out seats on equipment such as forklifts. All seats are black and have foam padding. Overall capacity is 250 lbs. Seat frames are steel and have four 5/16" dia. threaded studs for mounting to your equipment. Seats come with a seat belt mounting bracket, unless noted.

Note: Seats are not intended for highway-use vehicles.

(A-G) Seats Designed for Specific Manufacturers' Equipment

Seats can also be used in other equipment that has the same center-to-center width mounting stud pattern. Seats adjust front to back.

Style B—Back cushion folds down onto the seat.

(H-P) Adjustable-Mount Seats

All seats have multiple center-to-center width mounting stud patterns for greater mounting flexibility. Seats adjust front to back.

Style H—Back cushion folds down onto the seat.

Style L—Seat is waterproof.

Style M—Seat has a fabric cover that stays cooler than vinyl. Seat is tear resistant. For indoor use.

Style N—Designed to isolate and reduce vibration with a trampoline-style sling instead of a hardboard metal pan under the seat.

Style P—A 1" high adjustable suspension creates a smoother ride. Has the same construction and vibration control features as Style N.

(Q) Seat with Suspension for Larger Equipment

This seat provides a comfortable ride for operators of larger equipment. Suspension is 9½" high and flexes to absorb shock and vibration. Height adjusts 3" in 1" increments. The angle of the seat back is adjustable, and seat adjusts front to back.

★ Not furnished with a seat belt mounting bracket. For a seat belt mounting bar, see 3605T14 below.
♣ Furnished with a pre-threaded hole for seat belt attachment. Mounting bracket not required.
♥ Furnished with a pre-drilled hole for seat belt attachment. Secure attachment with a nut and bolt.

Seat Belts

Add a seat belt to your equipment seat for a safer ride. All are lap style, have a push-button release, and come with mounting fasteners (unless otherwise indicated) to secure the belt to your seat.

Standard—Buckle the belt and pull the strap to tighten.

Continuous—Also known as an endless belt, this belt wraps completely around your seat. Buckle the belt and pull the strap to tighten. No need for mounting hardware.

Retractable—Retracts automatically when buckled.

Retractable with Switch—Similar to the retractable belt above, but your vehicle won't operate unless the belt is buckled. Includes a standard automotive plug that you can cut off to expose two wire leads.

Seat Belt Mounting Bar—Allows equipment seats that do not have a seat belt mounting bracket to accept seat belts. It accommodates seats up to 21" wide and has two ½" dia. end holes and six ⅜"x1¼" slotted holes for 11", 13", or 14½" wide center-to-center mounting patterns. Made of steel. Mounting fasteners not included.

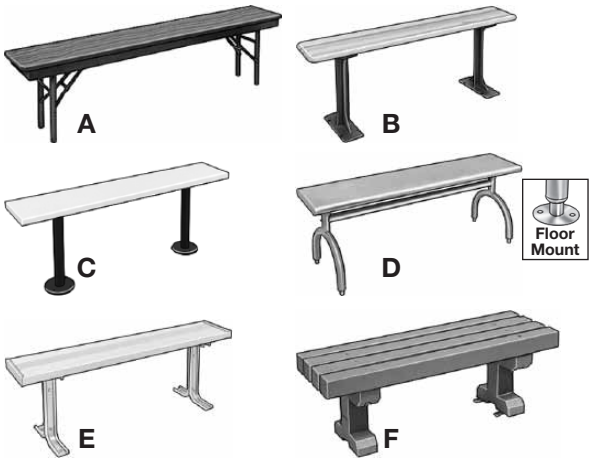
Benches



Benches are shipped unassembled, except Style A.

(A) Laminate-Top Folding Indoor Benches—The legs on these benches fold up and out of the way for easy transport and convenient storage. Legs have plastic glides. Base and legs are made of steel. Seat is plastic-laminate with a brown woodgrain finish.

(B) Heavy Duty Maple-Top Indoor Benches—These high capacity benches have sturdy iron legs with a 4″ Wd. × 10″ Dp. mounting plate. Each mounting plate has four slots that accept 3/8″ dia. bolts for floor mounting (fasteners not included). Legs have a green finish. Seat is clear-coated maple.

(C) Plastic Harsh Environment Indoor Benches—These benches resist chemicals, scratches, dents, and moisture. When properly installed, they help comply with ADA. Seat is white. Legs are made of black anodized aluminum and have a 6″ dia. flanged mounting plate with four holes per flange for floor mounting (fasteners included).

(D) Stainless Steel Indoor Benches—These corrosion-resistant benches are more dent- and scratch-resistant than aluminum. They meet standards for use in Class 100 clean rooms. Benches have legs that are curved for extra stability and leveling feet to compensate for uneven floors.

Floor-mount benches have a 3 1/2″ dia. mounting plate on each leg. Each plate has two 3/8″ dia. holes for floor mounting (fasteners not included).

(E) Aluminum Indoor/Outdoor Benches—These benches are durable and corrosion resistant. Each leg comes with rubber feet for free-standing applications and concrete anchors for floor mounting. Seat has a skid-resistant surface.

(F) Plastic Indoor/Outdoor Benches—Often used outdoors, these benches resist most chemicals, rot, splintering, and damage from UV rays. Each leg is black with two 1 1/2″ Wd. × 1 3/4″ Dp. stainless steel mounting plates with a 7/16″ dia. mounting hole (fasteners not included). **To Order:** Please specify seat color: brown or gray.

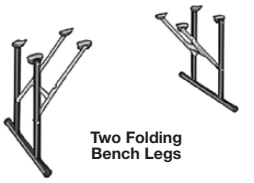
Pedestal Bench Legs

Leg is 16 1/4″ high and has an 8 1/4″ dia. flange on the top and bottom. Each flange has three 3/8″ dia. mounting holes (fasteners included). Capacity per leg is 900 lbs. For indoor use. Made of steel. **To Order:** Please specify color: beige, blue, or gray.

Note: For benches up to 96″ wide, use two legs. For benches wider than 96″, use three legs.

9085T3 ..... $34.93

Folding Bench Legs



Two Folding Bench Legs

Legs fold flat against your bench for easy transport and storage. Each leg is 16 3/4″ high. There are eight 3/16″ dia. holes to mount leg to the bench seat (fasteners included). For indoor use. Capacity per leg is 250 lbs. Made of steel. Color is black.

Note: For benches up to 72″ wide, use two legs. For benches wider than 72″, use three legs.

4958T12 ..... $14.70

Basketball Equipment

Outdoor basketball set includes a backboard, mounting post, rim, and nylon net. Backboard is aluminum with a white finish. It's maintenance free and measures 35″ Ht. × 54″ Wd. Mounting post is one-piece, zinc-coated steel pipe that's 12 feet long with a 3-ft. extension at the top. Rim is steel with an orange finish.

Basketball court stencils allow you to create an official half court. Come with instructions, stencils, and paint roller. Masking tape and approximately 1 qt. of paint are required (tape and paint not included).

Outdoor Basketball Set	45425T12	$766.63
Basketball (Indoor/Outdoor)	45425T23	22.20
Basketball Court Stencils	45425T33	51.53

Vertical File Cabinets

All cabinets have a single lock that locks all drawers. Lock includes two keys. File drawers have high sides that accommodate hanging-file folders without the need for hanging-file frames.

(A) Standard cabinets are steel. Each drawer has a label holder and adjustable dividers. Shipped assembled. **To Order:** Please specify color: beige, black, or gray.

(B) Fire- and water-resistant cabinets protect important documents from fire. All meet UL Class 350 requirements to maintain an interior temperature of 350° F or less after being subjected to 1700° F for one hour. Each drawer has a label holder. Made of steel. Color is beige. Shipped assembled.

(C) Mobile cabinets have four casters (two rigid and two swivel) with 1¾″ dia. plastic wheels that are concealed under the cabinet. Made of steel. Shipped assembled. **To Order:** Please specify color: beige or black.

(D) Easy-access mobile cabinet has two slide back tops that allow partial or full access to all your files. Tops store conveniently on the sides of the cabinet when open. Cabinet has a removable 13⅝″ Wd. × 28¼″ Dp. × 11½″ Ht. lower wire shelf and four swivel casters with 3″ dia. plastic wheels. Made of steel. Color is gray. Shipped unassembled.

Optional front-to-back hanging-file frames (not shown) can be added to most vertical filing cabinets to support hanging-file folders. Frames adjust from 24″ to 27″ deep in ½″ increments. Made of steel. Shipped unassembled.

Lateral File Cabinets

Wide instead of deep, these cabinets are often used in narrow aisles. Use them to hold both letter- and legal-size files. Store your files side-to-side with the included hanging-file frames or front-to-back with the optional front-to-back hanging-file frames (sold separately). Cabinets have a single lock that locks all drawers and comes with two keys. Leveling glides adjust to compensate for uneven floors. Made of steel. Shipped assembled.

Five-drawer cabinets have a top opening that has a retractable door and roll-out shelf for easy access to frequently used files. These cabinets also have a pull-out work surface.

To Order: Please specify color: beige, black, or gray.

Document File Cabinets & Safes

Flat-Document File Cabinets

Five-Drawer Cabinet with Optional Open Base

Eight-Drawer Cabinet with Optional Closed Base

Store blueprints, CAD drawings, maps, and other large flat documents in these steel cabinets. All have a front paper depressor to keep documents from curling. They have two handles and a label on each drawer. Shipped unassembled.

All cabinets are stackable. Only stack cabinets of the same size. **Cabinets with four and five drawers** can be stacked five high, except five drawer cabinets can only be stacked two high when using the optional open base. **Cabinets with eight drawers** can be stacked two high.

To Order: Please specify color: beige or gray.

Optional closed bases measure 6″ high. Made of steel.

Optional open bases offer convenient storage space. They're steel and raise the cabinets 20″ off the floor. Shipped unassembled.

Optional lock is for cabinets with five drawers. It includes one lock with two keys; this single lock will lock all drawers in the cabinet.

Safes

Standard Safe

Fire- and Water-Resistant Safe

Fire- and Water-Resistant Media Safe

Safeguard important documents and other valuables. Shipped assembled.

Standard safe is steel and has an electronic push-button lock with backup key. It also has a removable shelf and can be mounted to the floor (mounting fasteners included). Color is black.

Fire- and water-resistant safes are insulated, double-walled steel. These safes meet UL Class 350 requirements to maintain an interior temperature of 350°F or less after being subjected to 1700°F for two hours. All include an electronic push-button lock. Safes have one lockable drawer and come with two keys. Drawer is 3″ high and 1/4″ smaller than the interior width and depth of the safe. 6483T71 and 6483T72 have one shelf. 6483T73 has two shelves. All shelves adjust on 1/2″ centers. Color is white.

Fire- and water-resistant media safe protects media such as hard drives and CDs from fire and water damage. Made of insulated, double-walled plastic, this safe meets UL Class 125 requirements to maintain an interior temperature of 125°F or less after being subjected to 1700°F for one hour. Comes with a lock and two keys. Color is beige.

Hanging-Document Racks

Quickly access your blueprints, CAD drawings, and other large documents. Racks are steel. Color is beige. Shipped unassembled.

To create a hanging-document storage rack, order **brackets** and the number of **document clamps** you need (sold separately). Document clamps are required to hold your documents.

Wall-mount brackets save floor space by attaching directly to the wall (mounting fasteners included). Brackets extend from the wall, and the maximum document length depends on how high you mount the brackets.

Style A consists of two fixed brackets; mount them to accommodate a single document clamp width.

Style B has a swing-out bracket. You can use any combination of the document clamp widths (sold separately below).

Mobile brackets come with four swivel casters (two with brakes).

Style C has a fixed bracket and 2″ dia. plastic wheels. The bracket adjusts to accommodate a single document clamp width. Maximum document length is 50″.

Style D has a swing-out bracket and 3″ dia. wheels. The file stand has an adjustable depth and height. Maximum document length is 60″. You can use any combination of the document clamp widths (sold separately below).

Modular Stackable Organizer

Combine sorters, riser, and a table (all sold separately below) to design your own organizer. Since no fasteners are needed, changing your configuration is a breeze. Color is light gray. Shipped unassembled.

Sorter includes 20 removable compartment trays that measure 11″ wide and adjust in 7/8″ increments. Compartment trays have finger cut-outs, label holders, and form up to 25 compartments. Additional compartment trays are sold separately below. Sorter is made of steel, and compartment trays are made of gray plastic. *Note*: Sorter can stack up to three high when not using a riser and two high when using a riser.

Riser supports up to two sorters and comes with two openings for routing wires. Made of steel.

Table has a capacity of 500 lbs. and legs that adjust from 28″-36″ in 1″ increments. The shelf has a clearance of 14″ and 150-lb. capacity. Made of steel with a particleboard top with a light gray laminate surface.

Display Racks

A

B

C

Display and organize magazines, forms, and other papers. **To Order:** Where applicable, please specify color.

(A) Clear-View Plastic Wall-Mount Racks—Made of clear PET, these racks allow you to view contents from any angle. Mounting fasteners included. Shipped assembled.

(B) Steel Wall-Mount Racks—Come with two 3/8″ keyhole slots for wall mounting (mounting fasteners not included). All have contoured pockets to allow literature to lean forward to prevent paper curl, unless noted. Made of welded steel. Shipped assembled.

(C) Steel Revolving Floor Racks—These four-sided racks allow you to store large amounts of literature in one compact space. They provide the largest number of pockets and rotate 360° on a turntable so you can easily access rack contents. Pockets are contoured, allowing literature to lean forward to prevent paper curl. Made of steel. Shipped unassembled.

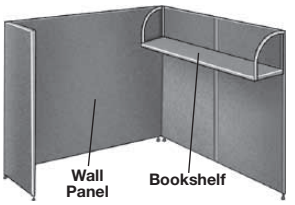
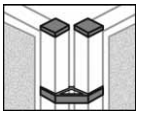
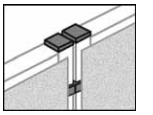
★Pockets are straight.

Fabric Partitions

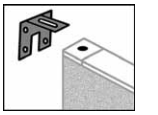




Corner Connector



Straight Connector



Wall Bracket

Freestanding Panel

All panels are 60″ Ht. × 1″ Thick. and have a welded-steel frame. Color is gray.

Wall Panels and Accessories—Create workspaces by connecting wall panels with connectors (sold separately). Partitions are easy to install, can be reconfigured as needs change, and have adjustable leveling feet. Wall panels must be supported every 6 to 8 feet with a wall bracket (sold separately) or with another wall panel set at 90°.

Wall brackets attach a wall panel to an existing wall. Two brackets are included: one for the panel top and one for the bottom. Each bracket has four 1/4″ dia. mounting holes (fasteners not included). *Bookshelves* hang anywhere on wall panels of the same width with the included shelf brackets. They are 14 1/2" Ht. × 13" Dp. and are steel with a gray finish.

To design your own panel system: 1. Make a rough drawing of the area you wish to partition, along with the overall measurements. 2. Determine the height, width, and number of panels you'll need. 3. Order the appropriate number and style of connectors you'll need to join the panels. To create a three-way connection, use two pairs of corner connectors; to create a four-way connection, use three pairs of corner connectors. 4. Order wall brackets when necessary. 5. Order bookshelves, if desired.

Freestanding Panels—With nothing to install, you can quickly set up temporary offices and meeting rooms. All have two gray T-leg bases.

Coat Racks

Space-Saver Coat Rack

This rack takes up very little floor space. It has four double hanging hooks, a 21″ dia. base, and four legs with adjustable nylon leveling feet to compensate for uneven floors. Overall height is 70″. Made of steel. To Order: Please specify color: chrome plated or black.

4708T21 ..... **Each** $85.01

Single- and Double-Sided Coat Racks

Place these racks anywhere to keep belongings neat and organized. For hangers (not included), see page 1718. Shipped unassembled.

Steel Racks— To Order: Please specify color: chrome plated or dark gray.

Stainless Steel Racks— Made of Type 304 stainless steel for excellent corrosion resistance, they're great for clean rooms.

Single-sided racks have a single hanger bar. ***Double-sided racks*** have three hanger bars for greater storage capacity.

Mobile racks have four swivel casters (two with brake) with 3″ dia. rubber wheels.

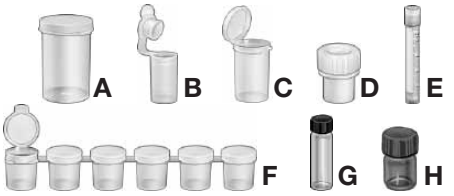
Vials



Sized for samples and small quantities.

Plastic Vials—*Style A* are polystyrene with a polyethylene (LDPE) snap-on cap. Maximum temperature is 158°F. *Styles B&C* are polypropylene with an attached flip-up cap. Not rated for temperature. *Style D* are thick-wall polyethylene (HDPE) for high durability. Cap is threaded. Maximum temperature is 248°F. *Style E* comes sterilized and withstands temperatures from –184° to 275°F. It is polypropylene with a threaded polyethylene (HDPE) cap. *Style F* are connected but can be cut apart. All are polypropylene with attached flip-up caps. Not rated for temperature.

Glass Vials—All are chemical resistant and have a threaded melamine cap with a PTFE seal. Not rated for temperature.

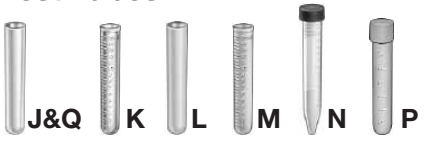
Test Tubes



Clear plastic test tubes are polystyrene. Max. temp. is 158°F. *Style K* has 1 ml graduations.

Semi-clear plastic test tubes are polypropylene and have a max. temp. of 275°F, except *Style N* have a max. temp. of 248°F. *Style M* has 1 ml graduations. *Style N,* 1/2 oz. tube has 1/2 ml graduations. *Style N,* 15/8-oz. tube has 5 ml graduations. *Style P* has 2 ml graduations.

Glass test tubes are chemical resistant. Max. temp. is 950°F.

Caps are polyethylene and have a max. temp. of 176°F. Caps for plastic tubes are HDPE, except cap for 3/4 oz. Styles J and L as well as Styles K, M, and P are LDPE. Caps for glass tubes are LDPE.

Plastic Jars

A wide mouth makes jars easy to fill and empty. All have a threaded cap.

(1-3) Clear—*Style 1* are polystyrene with a polypropylene cap. Maximum temperature is 158°F. *Style 2* are PVC; cap is phenolic with a coated-paper seal. Maximum temperature is 176°F. *Style 3* are polycarbonate, and the cap is polypropylene with a Buna-N rubber seal. Maximum temperature is 225°F.

(4) Autoclavable Clear—All are polymethylpentene with a polypropylene cap. Maximum temperature is 275°F.

(5) Super-Clean Clear—This jar is virtually particle-free. It's made of PET with a polyethylene-lined polypropylene cap. Not rated for temperature.

(6&7) Semi-Clear—*Style 6* are polyethylene (LDPE) with a polypropylene cap. Maximum temperature is 176°F. *Style 7* are polyethylene (HDPE). Maximum temperature is 230°F. 42955T2 cap is polypropylene, 42955T4 cap is metal, and 4577T22 and 4577T23 caps are polyethylene (HDPE).

(8-10) Rigid Semi-Clear—These jars are polyethylene (HDPE) with a polypropylene cap. Maximum temperature is 248°F.

(11&12) Autoclavable Semi-Clear—All are polypropylene. *Style 11* have a maximum temperature of 249°F. *Style 12* have a maximum temperature of 275°F.

(13) Absorption-Resistant Semi-Clear—Jars are fluorinated polyethylene (HDPE) to resist absorption of contents. Cap is polypropylene. Maximum temperature is 248°F.

(14) Thick-Wall Autoclavable Semi-Clear—Rigid and durable, these jars are polypropylene. Cap has a mason-jar threaded rim with removable seal. Maximum temperature is 275°F.

(15) Write-On Semi-Clear—For identification of contents, these jars have two write-on label areas. Both are polyethylene (HDPE) with a polypropylene cap. Maximum temperature is 248°F.

(16) Tamper-Evident Semi-Clear—Jars have a sealing ring that separates when the cap is opened. Both are polyethylene (HDPE) with a polypropylene cap. Maximum temperature is 212°F.

(17) Opaque Amber for Light-Sensitive Contents—All are polyethylene (HDPE) with a polypropylene cap. Maximum temperature is 248°F.

Glass Jars

A&B

C D

E F

Made from glass to resist chemical absorption. A wide mouth makes them easy to fill and empty. All come with a threaded cap.

Style A have a phenolic cap with a coated-paper liner.
Styles B, C&F have a phenolic cap with a PTFE seal.
Style D, also called mason jars, have a tin-plated cap that forms a vacuum seal.
Style E are slip, impact, and shatter resistant. Cap is melamine with a PTFE seal.

Plastic Bottles

G-L M N

A narrow mouth provides controlled pouring. All come with a threaded cap.
Style G are polyethylene (LDPE) with a polypropylene cap. Maximum temperature is 176° F.
Styles H, L, M&N are polyethylene (HDPE) with a polypropylene cap. Maximum temperature is 248° F.
Style L are fluorinated to prevent contents from being absorbed. *Style M* have two write-on label areas for identification of contents.
Style J have thick-walls for added durability. All are polyethylene (LDPE). Maximum temperature is 176° F.
Style K are autoclavable polypropylene. Maximum temperature is 275° F.

Easy-Grip Plastic Jars

P

Q

These grab-and-pour jars come with a threaded cap.

Opaque gray jar is polyethylene (HDPE) with an internal spout. Maximum temperature is 120° F.

Semi-clear jar is polyethylene (HDPE) with a polypropylene cap. Maximum temperature is 248° F.

Autoclavable semi-clear jar is polypropylene. Maximum temperature is 275° F.

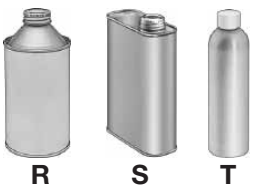
Metal Bottles



R S T

Sturdy metal construction makes these bottles a durable option for storing liquids. Each come with a threaded cap.

Styles R&S have a tin-plated steel cap with a coated-paper liner.

Style T are lighter in weight than steel. They have a polypropylene cap with a polyethylene foam liner.

	Capacity oz.	Capacity ml	Mouth OD	Base Dia.	Ht.

Glass Bottles

These bottles are glass to resist the absorption of contents. All bottles come with a threaded cap.

Styles 1&3 have a phenolic cap with PTFE seal.

Styles 2&4 are slip, impact, and shatter resistant. Cap is melamine with a PTFE seal.

1&2 3&4

Carboys

5 6 7 8

Flattened

9 10

Contain and dispense a large quantity of liquid with these carboys.

Style 5 have an indented grip on the back for easy pouring. All are polyethylene (HDPE) with a threaded cap. Maximum temperature is 230° F.

Styles 6&7 have a pouring spout that can be removed and stored internally. All are polyethylene (HDPE) with a threaded cap. *Style 6* is not rated for temperature. *Style 7* has a maximum temperature of 176° F.

Style 8 have a spigot to accommodate 1/2" to 5/8" ID tubing. They are thick-wall polyethylene (LDPE) with a maximum temperature of 176° F.

Style 9 is stackable up to three high. It's made of chemical-resistant polyethylene (HDPE) with a threaded polypropylene cap and faucet. Maximum temperature is 248° F.

Style 10 flatten for convenient storage. All are polyethylene (LDPE). Maximum temperature is 212° F.

Carboy Racks

Organize and dispense liquids with a vertical storage rack that holds up to four carboys (sold separately). Made of opaque gray plastic, racks measure 48" Ht. x 14" Wd. x 15 1/2" Dp. and support up to 200 lbs.

5-gallon carboy is semi-clear polyethylene (HDPE) and marked with 1-gal. graduations. It's rigid and has a molded carrying handle. The included faucet screws on at the base and a threaded, vented cap covers the fill port. Carboy measures 10" Ht. x 9 1/2" Wd. x 17" Dp. with a 3 1/4" mouth OD. It's not rated for temperature.

H

Accurately measure and dispense liquids. Bottles come with a threaded cap.

Style A—Bottles are made of PETG and have a polyethylene (HDPE) cap. Maximum temperature is 158° F.

Style B—All are polyethylene (LDPE). The cap is polypropylene and has a perforated lip for attaching a tag. Max. temperature is 176° F.

Style C—Bottles are polyethylene (HDPE) with a polypropylene cap. Maximum temperature is 248° F.

Style D— All bottles are polyethylene (HDPE). The cap is polypropylene and has a perforated lip for attaching a tag. Max. temp. is 230° F.

Styles E&F—Caps have flip-open access. All are polypropylene. Maximum temperature is 160° F. *Style F* has a molded handle.

Style G—Bottles have a write-on label area. All bottles and caps are polypropylene. Max. temp. is 275° F.

Style H—Made of glass for chemical resistance and clarity. Cap is phenolic with a PTFE seal, the except 32-oz. bottle has a melamine cap.

Graduated Plastic Beakers

Style 1 can be poured from three angles. It's polypropylene and has a label area. Not rated for temp.
Styles 2&3 can be nested for convenient storage. All meet ISO/DIS 7056. *Style 2* are polymethylpentene. Maximum temperature is 293° F. *Style 3* are polypropylene. Maximum temperature is 275° F.
Styles 4&5 meet NSF/ANSI Standard 2 for food equipment and are polycarbonate. Maximum temperature is 212° F. Cannot be sold in Connecticut or Vermont.
Style 6 are polymethylpentene. Maximum temperature is 293° F.
Style 7 have an angled measuring surface that can be read from above while pouring. All are made of copolyester. Maximum temperature is 194° F.
Styles 8&9 are polypropylene. *Style 8* have graduations on three sides. Maximum temperature is 140° F. *Style 9* have a maximum temperature of 275° F, except 3,000-ml beaker is 248° F.

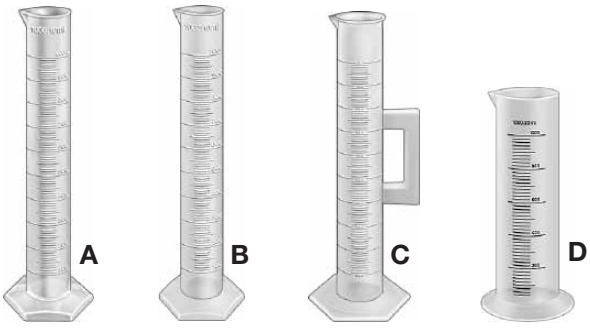
Graduated Plastic Cylinders



Measure and pour with precision. These autoclavable cylinders have a maximum temperature of 275° F. *Styles A&B* meet ISO 6706 standards and DIN 12680 TT, Class B tolerances.

(A) Clear cylinders are polymethylpentene.

(B) Semi-clear cylinders are polypropylene.

(C) Semi-clear cylinders with handle are made of polypropylene. Graduations can be read from the top down and from the bottom up.

(D) High-stability semi-clear cylinders have a wide, sturdy base, so they're less likely to tip over. All are polypropylene.

Pipettes

Transfer precise amounts of liquid. All pipettes are semi-clear polypropylene.

Bulb-style pipettes require two hands. Bulb is vinyl and 4″ long.

Pump-style pipettes can be used with one hand. Turn the thumbwheel to draw liquid into the pipette, and press the plunger for quick dispensing. Pump is polypropylene and 7¼″ long.

Cap., ml	Grad. Intervals, ml	Pipette Lg.	Bulb-Style		Pump-Style

Squeeze Bottles

Choose from bottles with a variety of nozzles for your specific dispensing applications. All come with threaded caps. *Styles A-M* are made of soft, easy-to-squeeze polyethylene (LDPE). *Style N* is made of sturdy polyethylene (HDPE).

Style A are semi-clear and come with a nozzle cover.

Style B have a nozzle that flips up for dispensing and folds down for storage. All are semi-clear.

Style C is available in your choice of colors for quick identification of contents: semi-clear, opaque red, and opaque yellow.

Style D is antistatic with an average surface resistivity of 10^9-10^{10} ohms/sq. Color is see-through blue.

Style E have a rectangular nozzle with a 5⁄16″ wide opening. All are semi-clear and come with a nozzle cover.

Style F come with a tube that can be attached to stream liquid. Use without the tube to dispense one drop at a time. Bottles are semi-clear and include a nozzle cover. Not for inks.

Style G have a 1¾″ long aluminum nozzle. They are semi-clear and come with a threaded nozzle cover.

Style H have a 3¾″ long angled aluminum nozzle. Bottles are semi-clear. An internal tube and a threaded nozzle cover are included.

Style J nozzle extends for hard-to-reach applications and dispenses at any angle. Nozzle is brass and bottles are semi-clear.

Style K have a brush applicator attached to an external Type 304 stainless steel tube. Bottles are semi-clear.

Style L come with an attached brush applicator that's excellent for cleaning circuit boards. Bottles are semi-clear. Not for dyes or inks.

Style M dispense liquid into the attached cup when you squeeze the bottle. Cup is clear polymethylpentene with graduations every 5 ml (up to 25 ml). Bottles are semi-clear.

Style N is a set of eight semi-clear, thick-wall bottles. Each come with a nozzle cover. A steel wire holder is included. It has an attached handle and measures 18″ Lg. x 9″ Wd. x 4″ Ht.

Squeeze Bottles with Angled Nozzle

Also known as wash bottles, these dispense liquid at a downward angle. Bottles are made of polyethylene (LDPE) and come with a threaded cap. For dispensing only; not recommended for storage.

(A&B) Bottles with choose-a-color cap make it possible to identify contents at a glance. Bottles are semi-clear.

(C&D) Contaminant-resistant bottles have a nozzle that's separate from the polypropylene fill cap to prevent any cross-contamination. *Style C* are semi-clear. *Style D* are opaque red.

(E) Extreme-duty bottles offer excellent chemical resistance and all are autoclavable. Made of clear FEP with a semi-clear ETFE cap.

Labeled Squeeze Bottles with Angled Nozzle

Printed labels allow identification at a glance. Also known as wash bottles, these dispense liquid at a downward angle. All come with a threaded cap. For dispensing only; not recommended for storage.

(F&G) Choose-a-label bottles have printed content names and hazard alerts. Labels meet Globally Harmonized System (GHS) standards, except labels for soap, water, and write-on. Bottles are polyethylene (LDPE) with a polypropylene cap. All have a vent to prevent gas build up, unless noted. Bottles are semi-clear, except bottle labeled for bleach, which is opaque white and bottle labeled for toluene, which is opaque red. *Style G* has a nozzle that's separate from the fill cap to prevent cross-contamination.

(H) Absorption-resistant bottle is fluorinated to prevent contents from being absorbed. Made of semi-clear polyethylene (HDPE) with a polypropylene cap.

(J) Antistatic bottle has a surface resistivity of 10^{12} ohms/sq. Bottle is opaque yellow polyethylene (LDPE) with a polyethylene (HDPE) cap.

Cap., oz	Dia.	Ht.	Available Labels

★Bottles labeled MEK, Soap, Toluene, or Water do not have a vent. ■Bottles labeled MEK and bottles with write-on label do not have a vent.

Push-to-Dispense Bottles

Safely dispense flammable liquids directly onto a work surface, cloth, or sponge. Turn the bottle upside down and press against the brass flange to dispense. Bottles are opaque red polyethylene (HDPE). All are FM approved. *32 oz. bottle* has a textured, molded grip.

Cap., oz.	Dia.	Ht.		
8	3 1/8"	5 1/2"	4321T4	$28.75
32	4"	10 1/2"	4321T3	33.28

Bottle Totes

Carry up to six 3 1/2" diameter bottles in this convenient tote. It's made of opaque gray polyethylene (HDPE) and measures 13 1/2" Wd. x 10" Dp. x 10 1/2" Ht., including the attached handle.

5569T12 $27.73

Drying Racks

Dry bottles, jars, and other containers without a mess. Water drips into the tray and drains through an attached tube. The rack includes 72 removable 4" pegs. Mount it on the wall with the included hardware. It measures 17" Wd. x 24" Ht. and is made of lightweight, opaque gray polystyrene.

Optional stand allows the rack to be set on a flat work surface. The stand measures 18 1/2" Wd. x 7" Dp. x 21" Ht. and is made of clear acrylic.

Optional Stand	6064T32	103.26
Replacement Peg	6064T31	2.35

Push-Top Dispensers & Spray Bottles

Push-Top Dispensers

Moisten swabs, wipes, and cloths by pushing down on the fill dish. *Plastic dispensers* are corrosion-resistant polyethylene (HDPE).

Small-capacity dispensers have a stainless steel pump. *Style B* have a locking cap to prevent spills. *Style C* has a surface resistivity of 10^7-10^9 ohms/sq. *Style D* has a surface resistivity of 10^2-10^6 ohms/sq.

Large-capacity dispensers have a brass pump. Excess liquid drains into the dispenser through a mesh flame-arrester plate. FM approved.

Spray Bottles

Pump to spray contents. Nozzle adjusts from mist to stream, except *Style L* is mist only. *Styles J-R* are semi-clear polyethylene. *Style S* is opaque silver with a window to view fill level. *Styles M-S* and 9864T53 are printed with graduations (oz. and ml) and dilution ratios.

(J) General Purpose Bottles—The tube on these bottles has a filter to prevent clogs, except 9864T51.

(K) Easy-Reach Bottle—This high-capacity bottle has a 36″ long hose for accessing tight spaces. Tube has a filter to prevent clogs.

(L) Misting Bottles—Both include a clear plastic pump cover.

(M) Choose-a-Label Bottles—Identify contents quickly with labels written in English and Spanish.

(N) Write-On Bottle—Has a printed checklist and write-on area.

(P) Any-Angle Bottles—The nozzle adjusts to spray at any angle—even upside down. Bottles have a checklist to identify contents.

(Q) Easy-to-Fill Bottles—Fill without a spill through the wide mouth on these bottles. *32-oz. bottle* has a high-output trigger sprayer.

(R&S) High-Output Bottles—Dispense up to three times more liquid per stroke. Both have a checklist and write-on area.

Aerosol Sprayers

Fill the reservoir, attach the propellant cartridge, and spray—no extra equipment needed. Both sizes come with a threaded cap.

Sprayer with 6-oz. reservoir is for use with thin liquids such as varnish, oil, and paint. It sprays up to 16 oz. with the included propellant. Comes with a strainer. **Sprayer with 8-oz. reservoir** handles thicker liquids such as latex paint. It sprays up to 18 oz. with the included propellant. Includes three interchangeable spray tips.

Air Atomizing Sprayers

Spray thin liquids evenly without propellant. Fill the sprayer and pressurize with compressed air. Working pressure is 80 to 145 psi; max. pressure is 200 psi. **Repair kits** include replacement seals, packing, and nozzles.

Styles A&B—All come with eight mist nozzles and a pin stream nozzle. *Style A 16-oz. sprayer* is red.

Styles C&D—Nozzle adjusts from mist to a pin stream. *Style C* is red.

Q

R

Use for spraying applications that require a large capacity and high output volume. Pump the handle to pressurize the tank, then squeeze the trigger on the attached wand to spray. Often used for degreasers, insecticides, disinfectants, cleaning solutions, and herbicides.

Note: The material of the parts can affect a sprayer's compatibility with a chemical or solution. Make sure that the tank, wand, and nozzle are suitable for your application.

Repair kits include replacement seals, gaskets, valves, and other commonly worn parts.

Styles H&J have a trigger that can be locked for continuous spray. Tank is semi-clear. Sprayers include a shoulder strap. *Style H* have a pressure release cap and a filter in the wand to prevent clogs. *Style J* have a built-in pressure relief valve. Offer good chemical resistance.

Style K has a comfortable backpack design with padded shoulder straps and a belt. A built-in filter prevents clogs. Color is opaque white.

Style L have a filter in the wand to prevent clogs, and the trigger locks for continuous spray. Color is blue.

Style M has a shoulder strap. Color is black.

Style N are corrosion resistant. They come with a shoulder strap.

Style P resist corrosion. They have a trigger that can be locked for continuous spray. *3-gal. sprayer* comes with a shoulder strap.

Style Q holds up to six gallons, and it's on wheels for convenient transportation. It has an extra-long hose, a handle, and two rubber tires. Tank is corrosion resistant.

Style R is triple-coated with epoxy for excellent chemical resistance. It can be used with harsh liquids such as acetone, naphtha, xylene, and toluene. This sprayer also resists corrosion, rust, and impact. The trigger can be locked for continuous spray. The hose is reinforced with braided nylon to prevent cracking and leaking. Includes two spray nozzles. Tank color is red.

Liquid Nitrogen Containers

Use these cryogenic containers to safely store, transport, and dispense liquid nitrogen. Also known as dewars, their welded, double-aluminum walls are vacuum insulated for maximum thermal protection.

Capacity gal.	Capacity L	Mouth OD	Base Dia.	Ht.		
With One Handle						
1 1/4	5	2 1/4"	8 7/8"	18 1/8"	8987T24	$763.85

8 1/2	32	2 1/2"	17"	24"	8987T33	1,220.45

Heavy-Duty Large-Capacity Graduated Dispensers

Often used with oil and other lubricating fluids, these sturdy plastic dispensers can handle even tough jobs. Choose from a variety of containers, lids, and accessories to design a system for your specific application. Containers and lids are made of thick-wall polyethylene (HDPE) that has been treated for static and UV resistance, and all are interchangeable. Lids and spouts have Buna-N rubber/neoprene seals to protect contents against contamination. Maximum temperature is 176° F. Not for use with fuels or solvents.

Containers

All are semi-clear and have a sturdy, molded grip handle.

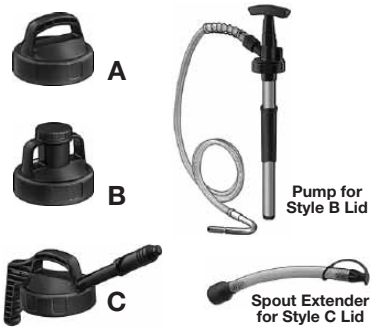
10	10	4 7/8"	9 3/4"	13 3/4"	1/2	0.5	5199T54	52.89

Lids and Accessories



Lids are available in five colors. *Style B* has a threaded screw cap and can be used with a pump. *Style C* have a twist-open spout to protect contents against contamination.

To Order: Please specify lid color: black, blue, green, red, or yellow.

Spout Extenders—For use with Style C lids, these allow controlled pouring in hard-to-reach areas.

Pump—For use with Style B lid, this pump dispenses approximately 1 quart per 14 strokes. It has a curved 3/8" OD nozzle and 59" long hose.

Reducer Nozzle—Minimizes output by decreasing the pump nozzle OD from 3/8" to 1/4".

Rectangular Plastic Batch Cans

Without Faucet

With Faucet

Strong yet lightweight, these batch cans have a smooth, seamless construction. All include a loose-fitting cover and are translucent white, except heavy duty impact-resistant polyethylene, which are translucent yellow.

Choose a can ***with faucet*** for convenient dispensing. Faucet is polyethylene and has a 5/8″ OD.

Round Aluminum and Stainless Steel Batch Cans

A&D *With Optional Cover*

B *With Optional Cover*

C *With Optional Cover*

E

F

G

(A) Food-Grade Aluminum with Handles— All cans are seamless. Top edge is machined smooth and handles are riveted. Cans meet NSF/ANSI standards. *Optional covers* are loose fitting.

(B) Food-Grade 300 Series Stainless Steel— Cans are stackable when used with optional cover. They have a brushed bright finish. Cans meet NSF/ANSI standards. *Optional covers* are loose fitting.

(C) Food-Grade 300 Series Stainless Steel with Handles— Cans are stackable when used with optional cover. Brushed bright finish. Cans meet NSF/ANSI standards. *Optional covers* are loose fitting.

(D) Heavy Duty Type 304 Stainless Steel with Handles— Cans have a polished finish. *Optional covers* are snug and dust tight.

(E) Narrow-Mouth Type 304 Stainless Steel with Handles and Cover— Also known as milk cans, these have a 13-ga. bottom ring for extra support. Cover has a tight friction fit and comes with two 7/16″ dia. holes for attaching a tag. Satin finish.

(F) Type 316L Stainless Steel with Handles and Clamp-Down Cover— Clamps hold the cover down for a tight seal, and the cover also has a removable silicone rubber gasket. Polished finish.

(G) Type 316L Stainless Steel with Handles and Lock-Ring Cover— Cover has a locking ring for a tight seal and a removable silicone gasket. Cans are stackable when used with cover. Polished finish.

USDA-Compliant Stainless Steel Drums

In addition to being corrosion resistant, these drums have smooth, welded seams to prevent food and chemicals from collecting in crevices. The top rim is reinforced with a ½″ dia. rod and sealed.

Drums with Protective Bottom Ring— Bottom ring minimizes wear and tear on the bottom of the drum when sliding drum along the floor.

Optional covers are 16-gauge stainless steel and loose fitting.

Optional covers with leverlock closing ring are 16-gauge stainless steel and include an FDA-compliant sponge-rubber gasket.

UN-Compliant Plastic Drums

Choose these UN-compliant drums for shipping hazardous materials. All are made of FDA-compliant resins, except the black closed-head drums. All drums have two openings with plastic plugs. Max. temperature is 158° F. **To Order:** Please specify color, where applicable.

Open-head drums come with a cover with steel leverlock closing ring or steel nut-and-bolt closing ring. Cover has a urethane gasket.

Closed-head drums with one or ***two handles*** are easy to move when empty.

Note: In hot-fill applications, allow contents to cool to ambient temperature before stacking.

Fiber Drums

Round All-Fiber Drum for Dry Materials

Square All-Fiber Drum for Dry Materials

Fiber Drum for Dry Materials with Galvanized Steel Rims

Fiber Drum for Liquid and Dry Materials with Galvanized Steel Rims

Our lightweight fiber drums are an economical choice for your storing and shipping needs. All are tan and not rated for temperature. All drums that meet UN specifications are UN-compliant for shipping.

32415T43 has a two-piece body with a separate lid. Good for fluorescent-bulb recycling, drum holds approximately 85 bulbs that are 1″ in diameter.

Fiber drums for liquid and dry materials with galvanized steel rims come with a 0.004″ thick polyethylene liner. The cover with leverlock closing ring comes with a urethane gasket and two openings (one ¾″ NPS and one 2″ NPS).

Salvage/Overpack Drums

Steel Drum with Leverlock Closing Ring

Mobile Polyethylene Drum

Perfect not only for secondary containment, but also for temporarily storing and transporting leaking containers. All drums are UN-compliant for shipping.

Steel drums come with a rust-inhibitive coating. All are yellow with a red cover with EPDM gasket, unless noted. All come printed with "Salvage Drum."

Polyethylene drums are nestable. Drums and covers are yellow. Covers screw on and have a neoprene gasket. *Mobile drum* comes with two 6″ dia. polyolefin wheels and has a load capacity of 250 lbs.

Drum Locks

For Open Head

For Closed Head

Secure 30- and 55-gal. steel drums. Padlock required (maximum shackle dia. of 5/16″).

Bolt for Open-Head Drums— Replace the standard ⅝″-11 bolt on the drum closing ring and lock.

1900A42 ..... **Each** $72.30

Bar for Closed-Head Drums— Replace plugs on ¾″ and 2″ drum openings with plugs and Buna-N and polyethylene gaskets. Slide the bar through the hole in each plug and lock.

1900A41 ..... **Each** $77.16

Locking Drum Fill Caps

NPT Male

Prevent tampering with the contents of your tank while allowing access for filling. Padlock required (maximum shackle diameter of 5/16″). Made of cast iron. Not rated for temperature.

Pipe Size	O'all Ht.	Dia.		Each
2″ NPT Male	2½″	3 5/16″	4906K21	$21.98
2″ NPT Female	1⅝″	3¼″	4906K23	23.87

4″ NPT Female	2¼″	5 15/16″	4906K29	71.96

Drum Vents

Prevent drum failure by using these vents to release pressure and vacuum buildup caused by draining liquids and sudden temperature changes. In case of fire, a flame arrester prevents flashback into the drum. FM approved.

(A) Automatic pressure and manual vacuum relief vents open when internal pressure reaches 5 psi. A knob on top of the vent allows manual vacuum relief. Vents end mount on horizontal drums.

(B-E) Automatic pressure and vacuum relief vents open when internal pressure or vacuum reaches 5 psi. Vents top mount on vertical drums. *Style D* has a removable cap so vent can be used as a fill opening. It also has a 6″ long flame arrester. *Style E* comes with two carbon filters. Each filter traps 99% of vapors.

Drum Liners

Why waste time cleaning drums? Simply use one of these liners and then dispose of it. All are made of FDA-compliant resins, except Styles J and K. All antistatic liners (Styles G, M, and Q) have a surface resistivity of 10^{11} ohms/sq. The conductive liners (Style K) have a surface resistivity of 10^{3} to 10^{5} ohms/sq.

Protective Drum Covers

For Open-Head Drums with Nut-and-Bolt Closing Ring | ***For Open-Head Drums without Closing Ring*** | ***For Closed-Head Drums***

You may not be able to save your drums from dings, but you can protect your drum lids and heads from damage with these drum covers.

Polyethylene covers are 40-mils thick. Max. temperature is 175° F.

Galvanized steel covers have a beaded rim. Made of 26-ga. steel.

Polyethylene Troughs

A

B *With Optional Cover and Optional Mobile Base*

Polyethylene troughs are built tough so they won't rust, dent, or leak—even when frozen. All are nestable.

(A) Structural-foam troughs have a heavy-wall construction and a 1 1/4" NPT female plastic drain with plug. Max. temperature is 120° F. Color is black.

(B) FDA-compliant trough is ideal for contents where sanitation is important. Made of FDA-compliant resins and meets USDA requirements. Max. temperature is 155° F. Color is white. *Optional cover* is made of white polyethylene. *Optional mobile base* is made of a galvanized steel angle frame and has four 5" dia. phenolic swivel casters. Base adds 6 7/8" to trough height.

Double-Wall Tanks with Forklift Entry

Tanks provide extra protection for products that require double-wall containment, such as diesel and waste oil, solvents, and antifreeze. The second wall forms a compartment that holds 120% of the primary compartment's storage capacity.

All tanks are steel and have a 2" NPT female fill opening. They also have a 2" NPT female opening for venting in the primary compartment and a 2" NPT female opening for leak detection in the secondary compartment. 3696K81 has two 2" NPT female openings for emergency venting in the primary and secondary compartments. 3696K83 has two 3" NPT female openings for emergency venting in the primary and secondary compartments. Runners on the bottom of the tank raise the bottom off the floor, allowing forklift entry. Meet UL 142 standards for above-ground storage. Color is white.

Cap., gal.	O'all Size, Lg. x Wd. x Ht.	Wall Thick.	Forklift Entry	Forklift Opening Size, Wd. x Ht.		Each
120	34" x 29" x 37 1/2"	12 ga.	2-Way	19" x 11 1/2"	3696K81	$2,125.00
240	55" x 34" x 37 1/2"	12 ga.	2-Way	40" x 11 1/2"	3696K83	2,675.00

Easy-Drain Cylindrical Tanks

Slopes aren't just for skiing—the cone-shaped bottom of these tanks is sloped to ensure easy and complete drainage.

(A) Polyethylene tanks with covers have a 19° bottom slope and seamless, heavy-wall construction with rounded corners. All tanks include a loose-fitting cover and PVC NPT female drain fitting with EPDM gasket. Max. temperature is 140° F. Color is translucent white.

Optional stands are steel with a black finish. Choose from styles with or without a mixer mount for attaching a mixer (not included). All stands allow a 14¼″ minimum clearance from bottom of drain to floor.

(B) Type 304 stainless steel tanks have a 10° bottom slope and come with three 2″ dia. Type 304 stainless steel pipe legs with adjustable feet.

Standard tanks have a smooth dull mill finish and come with a Type 304 stainless steel NPT female drain fitting.

Sanitary tanks have a brushed polished finish inside and out. Furnished with a sanitary, Type 304 stainless steel tri-clamp drain. (See pages 228-231 for fittings compatible with tri-clamp drains.)

Also Available: Hinged and unhinged loose-fitting covers for Style B stainless steel tanks. All covers are made of Type 304 stainless steel and have a smooth dull mill finish. Please ask for 3772K888 and specify tank part number as well as hinged or unhinged cover.

Tanks with Forklift Entry

When you need large storage containers that are easy to move with a forklift, choose these durable tanks.

Polyethylene horizontal tanks are seamless, UV-resistant, and made with FDA-compliant resins. All have been paired with a sturdy 12-ga. steel skid that has a black finish. All also have an EPDM gasket, threaded cap, and 25-gal. graduations (except 3664K22, which has 50-gal. graduations). Max. temperature is 140° F. Color is translucent white.

Round-bottom tanks have a 1½″ NPT female ball valve drain that's made of PVC. 3664K16 has an 8″ dia. fill opening and 3664K22 has a 6″ dia. fill opening.

Flat-bottom tanks are loaf-shaped for a low center of gravity and greater stability. They have a 6″ dia. fill opening and a 2″ NPT female drain opening that's made of PVC and polyethylene.

Steel vertical tanks meet UL 142 standards for above-ground storage, making them ideal for storing fuel and waste oil. All have two 3/16″ thick steel forklift channels, and they also have a 1½″ NPT female drain with steel plug. Color is red.

The *260-gal. capacity tank* has four 2″ NPT female openings and one 3″ NPT female opening.

The *500-gal. capacity tank* has nonslip steps and hand grips for easy access to the top of the tank. It has four 2″ NPT female openings and one 4″ NPT female opening.

UN-Compliant Tank with Forklift Entry

Also known as an intermediate bulk container (IBC), this tank meets UN31HA1/Y transportation specifications. It has the capacity of five 55-gal. tanks, yet uses up to 25% less floor space. Secured to a galvanized steel pallet, it is easy to maneuver with a forklift. Stacks two high when full and four high when empty.

The tank is made of FDA-compliant polyethylene and is protected by a rigid tubular steel cage. Tank comes with a 6″ top opening with threaded cap and TPE gasket, a 2″ NPS fill opening, and a drain outlet that has a 2″ NPS valve with dust cap. Max. temperature is 150° F. Color is translucent white.

Cap., gal.	O'all Size, Lg. × Wd. × Ht.	Wall Thick.	Forklift Entry	Forklift Opening Size, Wd. × Ht.		Each

Steel Elevated Tanks

An elevated bottom provides stability and a lifting lug on top makes it easy to transport these steel tanks. They are ideal for storing fuel and waste oil. All tanks have a threaded 4″ NPT female emergency vent fitting and three or five 2″ NPT female openings that include plastic plugs. Channels are made of ¼″ thick steel. All meet UL 142 standards for above-ground storage. Color is red.

Drain Pans

G

H

J

K

L

M

N

(G&H) Polyethylene drain pans have a pouring spout and a handle. *Style G* has a drain with plug and a storage compartment where fluids drain for disposal at a later date. *Style H* has an antisplash lip.

(J&K) Mobile polyethylene drain pans can be moved wherever they are needed. *Style J* has a red polypropylene funnel that mounts on a telescoping tube. It includes four swivel casters with 2½″ dia. polyolefin wheels, a 1¾″ threaded pour spout with cap, and a handle. Shipped unassembled. *Style K* is great for big jobs. Fluid drains from this pan into the storage compartment for disposal at a later date. Has two 3″ dia. polyethylene wheels. Includes a drain with plug, 2 3/16″ dia. pouring spout, and handgrips.

(L&M) Galvanized steel drain pans come in two styles. *Style L* has a one-piece seamless construction. *Style M* has a pouring spout with an antisplash guard and handles.

(N) FM-approved steel drain pans have a detachable wide-mouth plated-steel funnel, a built-in flame arrester, a ¾″ threaded plug for emptying, and a bail handle.

Spill-Control Containers

P

Q

R *2 Drum with Optional Cover*

S

(P) Polyethylene container for pails is perfect for small containers. Comes with removable grating for easy cleaning.

(Q) Polyethylene container for drums has an octagonal shape that provides greater spill control than same-size round containers.

(R) Large-capacity polyethylene containers have recessed rings to secure drums. They have bottoms with forklift entry except the 4-drum container, which has a flat bottom so it can be paired with a standard pallet for four-way forklift entry. "HAZARDOUS" is stenciled in black. Meets EPA 40 CFR 264.175.

(S) Large-capacity polyethylene container with removable bottom grating can be nested. Meets EPA 40 CFR 264.175.

Mobile Spill-Control Containers and Cart

Easily move these containers wherever they are needed. All meet EPA 40 CFR 264.175, except Style A.

(A) Low-profile polyethylene container has a drain spout and four swivel casters with 3″ dia. polyolefin wheels. Color is yellow.

(B) Nestable polyethylene container includes a steel dolly that has four swivel casters with 3″ dia. polyolefin wheels. Drum container is yellow. Dolly is orange.

(C) Polyethylene cart has a drain plug for easy drainage, built-in tool tray, and removable top grating deck for easy cleaning. Comes with two locking swivel casters with 8″ dia. polyolefin wheels and two 10″ dia. polyolefin wheels. Cart is yellow with black deck.

Flexible Spill-Control Pads

When you need an economical alternative to spill-control pallets, choose these reusable, chemical-resistant vinyl-coated polyester pads. Flexible sidewalls allow you to drive in and drop your drums directly onto the pad; walls spring back into shape. Pads fold for easy storage. The six-drum model meets EPA 40 CFR 264.175.

No. of 55-gal. Drums	Spill Cap., gal.	O'all Size, Lg. × Wd. × Ht.	Color		Each

Spill-Control Pallets

All pallets have removable grating for easy cleaning. Grating is black, except Style G, which is gray. Pallets meet EPA 40 CFR 264.175, unless noted.

(D) Low-profile polyethylene pallets have an *optional ramp* that has a ribbed, nonskid surface. The weight capacity is 1,000 lbs. Color is black. *Optional pair of linking connectors* allows you to connect multiple pallets. Use two per side.

(E) Low-profile large-capacity polyethylene pallets with bladder have a pallet to capture overspills and small leaks while larger spills deploy a double layer polyethylene bladder. The bladder holds up to 55 gallons and is 66″ Lg. × 58″ Wd. when fully deployed. *Optional ramp* has a ribbed, nonskid surface. Weight capacity is 600 lbs. Color is yellow.

(F&G) Large-capacity polyethylene pallets with forklift entry are designed with large reservoirs to handle bigger spills. *Style G* has recessed rings for secure drum storage and a deck that can be removed with a forklift. Pallets are stackable and nestable.

(H&J) Low-profile steel and steel pallets with forklift entry are made of 12-ga. steel. *Optional ramps* have a ribbed, nonskid surface. Weight capacity is 1,500 lbs. Color is gray.

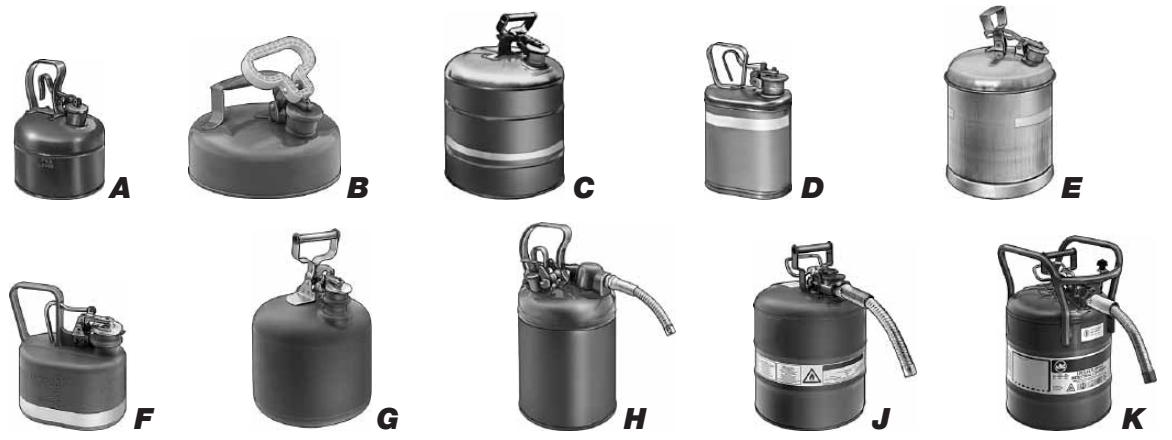
Safety Cans



A safer choice than fuel cans for storing flammable liquids, solvents, and cleaning solutions. All have spring-loaded, self-closing lids; pressure-relief caps; and a flame arrester. ***Type I safety cans*** have a single opening for both filling and pouring. ***Type II safety cans*** have two openings—one for filling, one for pouring.

(A-C) Steel Type I Safety Cans

Cans are FM approved, UL and C-UL listed (unless noted), and meet OSHA and NFPA (National Fire Protection Association) Code 30 requirements. Optional pour spouts are sold separately.

To Order: Please specify color where necessary. Color indicates usage: red for gasoline, yellow for diesel, blue for kerosene, and green for other solvents.

★Has a 6″ long flexible spout.

Safety Cans with Faucet

Use for trouble-free dispensing of flammable liquids. All cans have a flame arrester, a self-closing ¾″ OD faucet, and a self-closing pressure-relief cap. FM approved. Meet OSHA and NFPA (National Fire Protection Association) Code 30 requirements.

Steel cans are for petroleum-based liquids. ***Type 316 stainless steel cans*** are for liquids such as acetone, alcohol, ether, toluene, and xylene. ***Plastic cans*** are for aggressive chemicals and corrosives.

Upright Cans

Steel and plastic cans have a brass faucet. Stainless steel cans have a Type 316 stainless steel faucet.

	Cap., gal.	*Can Size* Dia.	Ht.	Fill Spout OD	Color

Plastic	5	13½″	17″	1½″	Red	4510T12	197.91

Safety Disposal Cans

Store leftover chemicals and solvents until they can be properly discarded.

For Nonflammable Liquids

Use this plastic can to store nonflammable acids and caustics. It has a 1 7/16" OD spout and a spring-loaded, self-closing cap. Can is translucent and graduated at quart, liter, and gallon intervals.

Cap., gal.	Overall Size Lg.	Wd.	Ht.	Color		
1	7 5/8"	4 5/8"	12 3/4"	White	8989T11	$54.16

For Flammable Liquids

The spring-loaded, self-closing cap on these cans automatically vents to relieve excess vapor pressure, and a flame arrester protects against outside ignition. All have a 3 3/4" OD spout, are FM approved, and meet OSHA and NFPA (National Fire Protection Association) Code 30 requirements.

Galvanized steel cans are for petroleum-based liquids. ***Type 316 stainless steel cans*** are for liquids such as acetone, alcohol, ether, toluene, and xylene. ***Plastic cans*** are for aggressive chemicals and corrosives.

Dispensing Stands for 5-Gallon Cans

To create a convenient dispensing station, pair this stand with your round, 5-gallon safety can (not included). Made of steel with a sturdy, adjustable safety lock, it can also hold other round containers up to 12 1/4" in diameter that weigh up to 75 lbs.

Overall size is 14" Lg. × 14 1/8" Wd. × 29 3/4" Ht. The stand folds for compact storage. Color is blue.

2704T14 ..... $85.06

Mobile Fuel Dispensers

Dispense fuel wherever you need it.

Style A has a gravity-fed flow rate of 2 gpm, a 1" OD nozzle, and a 10-ft. hose. Wheels are plastic. Meets UN specification UN3H1/Y/130.

Style B have a gravity-fed flow rate of 5 gpm, a 3/4" OD nozzle, and a 10-ft. hose. Wheels are pneumatic rubber. Meets UN specification UN3H1W and are D.O.T. (Department of Transportation) approved.

Style C are our highest capacity steel dispensers. All have a rotary hand pump that dispenses 4 gpm. They also have a 3.5-micron filter that strains out dirt and water, plus a valve to switch between filling and draining. A flame arrester protects against outside ignition. The pump hose is 7-ft. long and has a 3/4" OD and grounding wire. An 8-ft. grounding strap and clamp are also included. Wheels are rubber. FM approved.

Safety-Rated Steel Pail and Drum Funnels with Cover

Minimize spills while filling pails and drums. Funnels are FM-approved and have a flame arrester to protect against outside ignition. Connection is 2" NPT male. Color is red.

Pail funnel fits 5-gallon closed-head pails.

Drum funnels fit 30- and 55-gallon closed-head drums. Hinged cover automatically snaps shut at 165°F to extinguish flames. Padlock hasp on cover accommodates a 5/16" shackle dia. (padlock not included).

Self-closing drum funnel fits 30- and 55-gallon closed-head drums. Hinged cover automatically snaps shut at 165°F to extinguish flames. Padlock hasp on cover accommodates a 5/16" shackle dia. (padlock not included). It also includes a ball valve that reduces vapors and prevents spills if the drum tips over. A 3/4" drum vent provides automatic pressure relief.

(A-D) Vapor-lock-resistant funnels have outside ribs to prevent vapor lock. *Styles A* and *C* are autoclavable.

(E) Microfunnels with hanging tab are autoclavable.

(F) Quick-drain funnels have internal ribs to quickly drain materials and are autoclavable.

(G) Weighing funnels can be used as funnels, scoops, and weighing dishes. They are also autoclavable.

(H) Large-capacity funnel has a 6 11/16-gal. capacity.

(J&K) Funnels with filter screen and hanging tab have a permanent 60×60 mesh brass screen. *Style K* has an extra-long spout.

(L) Funnel with flexible spout has a clear extendable spout and a molded-in hand grip.

(M) Funnel with offset spout has a removable tapered stem offset 8″, a handle, and a removable 27×27 mesh brass screen.

(N-Q) Funnels with dirt- and dust-resistant caps have a polypropylene cap for both the funnel and the spout. *Style N* has a hanging tab. *Style P* has a handle. *Style Q* has a flexible spout and a handle.

(R) Funnel for powders has a large spout that allows the flow of powders.

Metal Funnels

Galvanized steel funnels have a removable 50 x 50 mesh brass screen.

Quick-drain galvanized steel funnels have a fluted bottom that prevents swirling and increases drainage speed. Also has a removable 50 x 50 mesh brass screen.

Quick-drain galvanized steel funnels with spill-resistant rim have a fluted bottom that prevents swirling and increases drainage speed. Taller rim allows for faster pouring without spilling. Also has a removable 50 x 50 mesh brass screen.

Galvanized steel funnel with extra-long flexible spout has a 40 x 60 mesh brass screen.

Galvanized steel funnel with offset spout has a removable 50 x 50 mesh brass screen.

High-stability galvanized steel funnels have a taller rim that allows for faster pouring without spilling and a skirt to hold the funnel in place. Also come with a fluted bottom that prevents swirling and increases drainage speed, and a removable 50 x 50 mesh brass screen.

Corrosion-resistant Type 304 stainless steel funnels are rust-resistant and have a hanging ring.

Polyethylene Pail and Drum Funnels

For Closed-Head Pails

For Closed-Head Drums

For Open-Head and Closed-Head Drums

Drain oil filters, cans, beakers, bottles and more without spills or tedious pouring. The sloped, scalloped surface channels hazardous liquids into the drain. Color is yellow.

Pail funnel for closed-head pails fits any closed-head pail. Also fits 12" dia. open-head pails.

Drum funnels for closed-head drums fit into 2" openings on any drum. *Drum funnel with Type 316 stainless steel screen* has a 14 x 14 mesh screen.

Drum funnels for open-head and closed-head drums fit over the rim of open-head drums or into 2" openings on closed-head drums. *Funnel with flame arrester* has an arrester that prevents flashback caused by sparks.

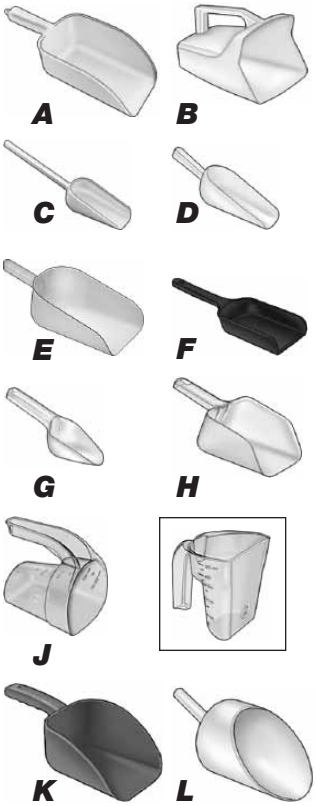
Plastic Scoops



Styles B, D, E, F, K, and ***L*** are chemical resistant.
Styles B, G, H, and ***J*** meet NSF/ANSI standards.
Style C are individually sealed in a polyethylene bag and sterilized. Made from FDA-compliant resins.
Style J allow you to scoop and measure at the same time. Scoops have two flat sides so they can lay flat or stand on end. All come with 100 ml, ½ cup, and 4 oz. graduations (except 8750T4, which has 200 ml, 1 cup, and 8 oz. graduations.)
Style K come in a choice of colors. **To Order:** Please specify color.
Style L are thicker walled for heavy duty applications.

Polyethylene Cutting Boards

Boards have a textured, nonslip surface. They're nonabsorbent and will not chip, splinter, or crack. Meet NSF/ANSI standards.
Choose-a-color cutting boards are available in blue, beige, green, red, white, or yellow. Assign a different color cutting board to each task to prevent cross-contamination. **To Order:** Please specify color.
Stain-resistant cutting boards are formulated to protect against stains and odors for the life of the board. All meet EPA and FDA guidelines. Boards are white.

Microwave Ovens

A

B

C

Cooking is fast and easy with these microwaves. All have an interior light and see-through door. They come with a power cord with three-prong plug and operate on 120 VAC, 60 Hz. UL listed.

(A) Economy Microwave Oven— This oven has 10 power levels, a digital display, a glass turntable that rotates food for even cooking, automatic defrost, and programmable controls that allow one-touch cooking. Comes with a 3-ft. power cord. The interior is made of steel, and the exterior is made of steel and plastic. Color is white.

(B&C) Commercial Microwave Ovens— Both models have bottom-feed heat distribution for uniform cooking. Come with a 4½-ft. power cord. Doors and interiors are made of stainless steel. Meet NSF/ANSI standards.

Style B has a dial timer that is clearly marked in 10-, 15-, and 30-second intervals to provide up to six minutes of cooking. Exterior is made of steel. Color is light gray.

Style C has 11 power levels, a digital display, and programmable controls for quick one-touch cooking. It also has automatic three-stage programming—you can program the oven to defrost food, begin cooking food at one level, and finish cooking food at another level. Exterior is made of stainless steel.

Mobile Food Warming Cabinet

Keep food warm during storage and transportation. You can set the temperature from 70° to 200° F. Cabinet is made of high-strength aluminum and has insulation in the top, sides, and doors. The doors have a magnetic latch and handle and can be reversed to open in the opposite direction.

Cabinet has 22 cu. ft. of work space. It has a 125-lb. capacity, and can hold up to 17 trays. Tray racks are spaced every 1½″ and are removable for easy cleaning. Cabinet has four swivel casters (two with brake) with 5″ dia. neoprene wheels. Includes a "power on" indicator light and 7½-ft. long power cord with three-prong plug. Operates on 120 VAC, 60 Hz, single phase and draws 16 amps. Meets NSF/ANSI standards. UL listed.

Tray is 18″ × 26″ with ⅛″ dia. perforations. Tray is made of aluminum.

36″ × 18″ × 31″	32″ × 15″ × 4″	9352T1	$366.32

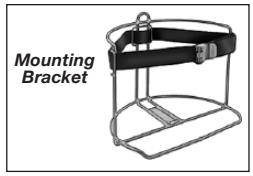
Microwave Leak Detector

Find radiation leaks that occur from damage, misuse, or everyday wear and tear in microwave ovens. Detector has a digital display. It provides audible beeping and a red flashing light when radiation levels are detected above the prescribed U.S. minimum (5 milliwatts per square centimeter at a distance of 2″). Permanently calibrated. Operates on a 9V battery (included). Size is 6⅛″ Ht. × 2¼″ Wd. × 1½″ Dp.

1074T4 ..... **Each** $36.36

Insulated Beverage Dispensers/Coolers

5-Gallon Dispenser/Cooler with Optional Cup Dispenser and Cups



Mounting Bracket

Supply cool drinks wherever you need them. Dispensers/coolers are imprinted with "Drinking Water," have a push-button spigot, and have a pressure-fit lid. Made of rust-, chip-, and dent-resistant polyethylene. Color is safety yellow with a red lid.

Mounting bracket has weather-resistant, welded steel construction and a holding strap (mounting hardware not included).

Coffee Makers

These coffee makers meet NSF/ANSI standards and are UL listed. All come with a 6-ft. power cord (unless noted) with a three-prong plug and operate on 120 VAC, 60 Hz.

(A&B) Fast-Brewing Drip-Style Coffee Makers— Get 12 cups of coffee in four to five minutes. These coffee makers have a top warming plate with separate on/off switch and a plastic brewing basket. Made of stainless steel. Both require paper filters (sold separately below).

Style B has a brass 1/4″ NPT male inline water connection to connect directly to a water source; coffee maker then fills automatically with water when you press the "brew" button. It comes with a 5-ft. power cord and includes a hot-water spout for tea or hot chocolate.

Decanters are made of glass and are sold separately below.

(C) Large-Capacity Percolator-Style Coffee Makers— The perfect choice when you need to make coffee for a crowd. Made of polished aluminum with plastic handles. No filters required.

Model 6159T15 has a coffee-level gauge and an on/off switch.

Coffee Maker Cleaner

No more nightmares about what's lurking in your coffee maker, this cleaner gets inside for a complete cleaning. Cleaner comes in a filter-paper packet that cleans the brew basket, urn, sight glass, and spigot. Each packet cleans a 12-cup coffee maker. There are 24 packets per package. *Note:* Not for use with aluminum.

6199T1 ..... **Per Pkg.** $10.81

Electric Kettle

Not just a teapot—this kettle boils water faster than a microwave oven. It charges in a base that has a 3-ft. power cord with a three-prong plug; operates on 120 VAC, 60 Hz; and draws 12.5 amps. Kettle lifts freely from the base—no cords attached—making it easy to pour.

Cup Dispensers

All dispensers can be adjusted to accept paper, plastic, and/or foam cups (not included) with different brim diameters. Made of stainless steel.

Wall-mount dispensers allow you to load cups in the top and pull from the bottom. Mounting hardware included.

Countertop dispensers have nonskid plastic feet. Cups load in and pull out from one side. *Note:* Dispensers cannot be stacked.

Paper cups are wax-coated.

Cup Holders

Need an extra hand? Place your drink in one of these self-leveling holders. The rubberized swivel joint adjusts to any position or angle and provides vibration protection. Holder is 4″ high with a 3½″ dia. top that tapers to 3″ at the bottom. Bottom has a 1½″ hole for drainage. Holder is made of ABS plastic; mounting flanges and arm are made of aluminum with a black finish. Mounting hardware included for all except the screw mounting style, which has seven 7⁄32″ dia. holes.

Mounting Style	Mounting Feature	Mounting Flange Dia.		Each
Screw	Permanent Mount	2 7⁄16″	5338T1	$28.62

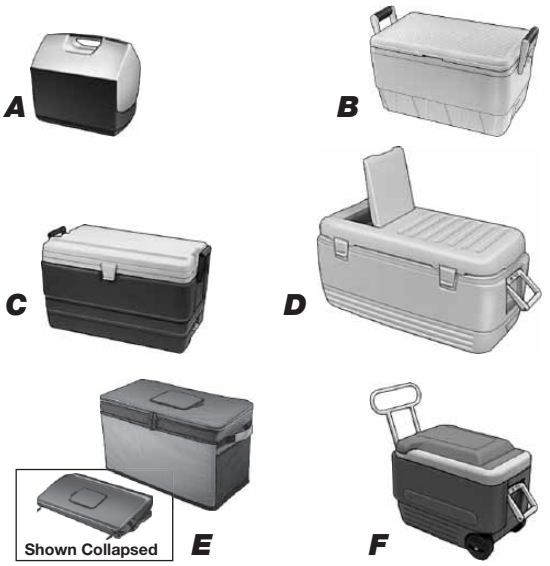
U-Bolt	For 1⁄4″ to 1 1⁄4″ dia. Pipes	—	5338T4	35.16

Reusable Ice Packs

Less messy than ice, these packs are durable, reusable, and keep contents colder longer than ice. Made of purified water, they are nonstaining and safe for food. Each pack consists of smaller cubes that can be cut apart and used individually. Each cube is 3″ Wd.×2″ Dp. Outer jacket is made of flexible polyethylene.

No. of Cubes	O'all Size, Wd.×Dp.		Each
18	12″× 9″	5404K1	$1.87
36	18″×12″	5404K2	2.84

Ice Chests



Made of plastic, these chests are insulated to keep contents cold.

Style A have a push-button lid that swings to either side and locks in the closed position to prevent spills.

Styles B-D have a hinged lid, lid latch (unless noted), swing-up side handles, and a drain plug (unless noted). *Style B* also has a lid strap. *Style D* also have a convenient hatch that allows access to the chest without opening the lid.

Style E allows compact storage; its collapsed size is 24″ Wd.× 12″ Dp.×3″ Ht. It has a soft, nylon fabric cover and a leakproof lining.

Style F has a domed lid, lid latch, and swing-up side handles. Also includes a pivoting handle and two 4⅝″ dia. polyethylene wheels.

★Does not include drain plug. ●Does not include lid latch or drain plug.

Ice Makers

Always have ice when you need it but never more than you can store; all machines stop producing ice automatically when their bin is full. They operate on 115 VAC, 60 Hz. Styles J and L come with adjustable legs for uneven surfaces. All produce cubed ice except Style H, which produces crescent-shaped ice. All are UL listed except Style K.

Note: Regular maintenance is required so machines run efficiently. ***Liquid cleaner*** for Styles J-L keeps water lines clear and is sold separately below.

Styles H&J—Both include a power cord with three-prong plug.

Style H does not require a drain. The exterior is made of steel; color is white. The interior is polystyrene and has a removable, clear plastic storage bin. Comes with a compression fitting that accepts 1⁄4″ OD copper tubing for water inlet and a 5-ft. power cord.

Style J exterior is stainless steel with a black plastic door. The interior is polyethylene with a molded-in storage bin. Comes with a 3⁄4″ male GHT (garden hose thread) connection for water inlet and a 6-ft. power cord. A 36″ long drain hose is included. Requires a 5″ clearance for the top, sides, and back.

Styles K&L—These high-capacity machines have a stainless steel housing, molded-in polyethylene storage bin, and black plastic door. Come with a 3⁄8″ NPT female threaded water inlet connection. Meet NSF/ANSI standards.

Style K has a 6-ft. power cord, three-prong NEMA 5-15 plug (see page 820 for plug configurations), and 1⁄2″ NPT female threaded bin drain. It requires a 5″ clearance for the top, sides, and back.

Style L must be hardwired. It has a 3⁄4″ NPT female threaded bin drain and requires an 8″ clearance for the top and sides; 5″ clearance for the back.

Compact Refrigerators and Freezers

Combination Refrigerator/Freezer

We've got what you need to keep things cool. All models have a steel cabinet with white finish and plastic liners. They have a power cord with three-prong plug and operate on 115 VAC, 60 Hz.

Combination refrigerator/freezer has three adjustable shelves, three door shelves, and a dial control to select cool, cold, or coldest. Requires 2″ clearance for the top and sides as well as 5″ clearance for the back. Freezer has 0.4 cu. ft. of space and a manual defrost. Includes one ice cube tray and a 6-ft. power cord. CSA certified.

Critical application refrigerator and ***critical application freezers*** are equipped with an oversized fan motor to maintain critical temperatures. They also provide fast cooling times and quick temperature recovery after the door has been opened—excellent for science and laboratory applications. All are UL and C-UL listed.

Refrigerator has three shelves and a 5½-ft. power cord. Also has an exterior mounted control with temperature display. Monitor provides visual and audible alarms for over/under temperature and door ajar conditions.

Freezers have a manual defrost to maintain set temperature and protect contents. The *1.5 cu. ft. model* has a 7-ft. power cord and the *4.5 cu. ft. model* has an 5½-ft. power cord and one shelf.

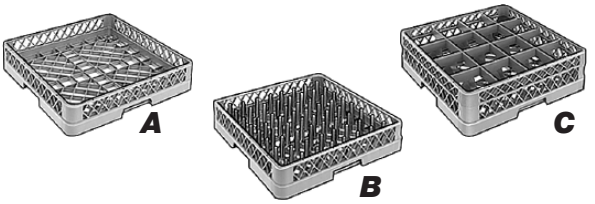
■ The estimated yearly energy cost is based on $0.12 per kWh. For more information, visit www.ftc.gov/energy.
★ Temp. range for the refrigerator.

Dishwasher Racks



With their open design, these racks allow you to thoroughly wash and dry plates, trays, glasses, flatware, and even parts. They have handles on all four sides. Made of durable plastic with a double-wall construction to provide the chemical, impact, and heat resistance (up to 180° F) you need. Color is beige. Meet NSF/ANSI standards.

(A) Open rack is the choice for large or irregularly shaped items.

(B) Supporting rack has pegs to support large plates and trays. It also holds cups, glasses, and bowls.

(C) Compartment rack has 16 individual compartments to protect your glassware. Each compartment is 4 7/16″ square × 4 13/16″ high.

		O'all Size, Wd. × Dp. × Ht.		Each

Plastic Cups

All cups can be nested. Styles D and E are great for small-batch mixing.

(D) Clear polypropylene Cups have a max. temperature of 225° F.

(E) Translucent polystyrene cup has a max. temperature of 200° F.

Optional lids for D and E cups are made of clear polyethylene. Max. temperature is 155° F.

(F) Translucent polypropylene cups with lid have a max. temperature of 176° F.

(G) Translucent polyethylene cups with lid have a max. temperature of 176° F.

Plastic Storage Containers and Snap-On Lids

E With Optional Lid

F With Optional Lid

G With Optional Lid

H With Optional Lid

J&K With Optional Lid

These containers are made of FDA-listed material, and they meet NSF/ANSI Standard 2 for food equipment, unless otherwise stated. *Copolyester* (Styles H&J) and *polycarbonate* (Style K) containers are crack and stain resistant.

(E) Round containers with graduations have handles and 1 qt. and 1 L graduations. Max. temperature is 212° F. *Optional lids* are made of yellow polyethylene.

(F) Rectangular containers have handles, a marking area for labeling with a grease pencil, and can be nested. Max. temperature is 150° F. *Optional lids* are made of white polyethylene.

(G) Square containers with graduations have 1 qt. and 1 L graduations and can be nested. Max. temperature is 170° F. *Optional lids* are made of translucent polypropylene. They do not meet NSF/ANSI Standard 2 for food equipment.

(H) Rectangular containers with graduations have handles and 1 qt. and 1 L graduations. Max. temperature is 212° F. Cannot be sold in CT, ME, or VT. *Optional lids* are made of translucent white polyethylene.

(J) Rectangular containers have handles, a marking area for labeling with a grease pencil, and can be nested. Max. temperature is 212° F. Cannot be sold in CT, ME, or VT. *Optional lids* are made of clear polycarbonate.

(K) Choose-a-color rectangular containers allow for better identification of contents and safer handling through color coding. All have handles and can be nested. Containers are clear with a color tint. Max. temperature is 212° F. **To Order:** Please specify color: blue, green, red, or yellow.

Fiberglass Pans

There's nothing delicate about these heavy duty fiberglass pans—they are corrosion resistant, and they won't dent or splinter. Max. temperature is 250° F. To Order: Please specify color, where applicable.
Food-grade pans meet NSF/ANSI standards.
Conductive pans have a surface resistivity of 10^5 ohms/sq.
Static-dissipative pans have a surface resistivity of 10^5 to 10^9 ohms/sq.
The lower the surface resistivity, the faster charges are dissipated so conductive pans dissipate charges faster than static-dissipative pans.

Fiberglass Pans with Antiskid Surface

The molded-in rubber surface on these heavy duty, low-height pans provides excellent skid resistance to keep parts from sliding off the pan. They also meet NSF/ANSI standards and have a reinforced rim. All can be nested. Max. temperature is 212° F.

Top Outside Size, Lg. × Wd. × Ht.	Color		Each

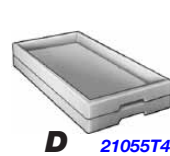
Stain- and Stick-Resistant Plastic Pans



D *21055T48*

E *With Vented Bottom*

F

G *With Vented Bottom*

You're looking at the ultimate in impact, wear, chemical, corrosion, stain, and stick resistance. All pans are autoclavable and made of a blend of PTFE and polypropylene. They are made of FDA- and USDA-compliant resins and meet NSF/ANSI standards, unless noted. Max. temperature is 250° F.

(D) Stackable Pans

All have handholds.

Top Outside Size, Lg. × Wd. × Ht.	Color		Each
20" × 10" × 1 5/8"	White	21055T48★	$20.56
23 5/16" × 9 1/8" × 5 5/16"	White	21055T37	37.54

★ Does not meet NSF/ANSI standards.

(E) Stackable/Cross-Stackable Pans

All have locking corners that prevent shifting when stacked. Low sidewalls allow better airflow.

Steel and Aluminum Pans

Pans can be nested, unless noted.

(J&K) Clear-coat steel pans have a nonstick surface.

(L) Rectangular galvanized steel pans are seamless.

(M) Aluminized-steel pans are strong, durable, corrosion resistant, and have a nonstick surface. All have a rod-reinforced rim.

(N-Q) Aluminum pans are corrosion resistant; have a smooth, bright finish; and are seamless.

Food-grade pans meet NSF/ANSI standards.

Stainless Steel Pans

All pans have an unpolished finish. Pans can be nested.

(A&B) 300 Series stainless steel pans are seamless and meet NSF/ANSI standards. *Style B* pans have 1/4" dia. perforations on the sides and bottom to allow drainage. *Optional covers* are stainless steel.

(C&D) Low-height Type 304 stainless steel pans have a seamless construction. *Style C* pans meet NSF/ANSI standards. *Style D* has three raised ribs on the pan surface to strengthen the tray.

(E) Type 316 stainless steel pans offer excellent resistance to corrosion and pitting. All have a welded construction.

Keep-It-Cool Plastic Pans

Keeping your cool has never been easier. Simply freeze pan for eight hours prior to use—internal gel allows contents to remain below 40° F for eight hours. All pans meet NSF/ANSI standards and are autoclavable and made of ABS plastic. *Optional covers* are clear acrylic. Max. temperature is 212° F. **To Order:** Please specify color: white or black.

Top Outside Size, Lg. × Wd. × Ht.	Pans	Pans Each	Optional Covers	Optional Covers Each

Conductive Fiberglass Tray with Slotted Openings

With a surface resistivity of 10^5 ohms, this tray protects up to twenty-four 3" × 3" to 12" × 12" circuit boards from static electricity. Max. temperature is 250° F. Meets ANSI/ESD S20.20.

O'all Size, Lg. × Wd. × Ht.	Color		Each
15" × 9" × 5 1/8"	Black	4760T51	$29.00

Magnetic Stainless Steel Pans

Fully magnetized to hold tools and small parts, you can use these pans right side up, sideways, and even upside down. All pans are 25-ga. Type 430 stainless steel and are seamless. Magnets are covered with rubber to protect metal surfaces from scratches.

Easy-to-Assemble Cardboard Bin Boxes

All bin boxes can be assembled easily without the need for tape, glue, or fasteners and are made of corrugated cardboard. Shipped flat. *Note:* Not rated for capacity.

Standard bin boxes have a labeling area and an inventory-control chart on the side. Two notches on the back allow the bin box to catch the shelf above it and tilt out for easy access. All have a white exterior with a tan interior. *Optional dividers* fit side-to-side, are held in position by the tension of the bin box sidewalls, and can be positioned wherever needed. Color is tan.

Tall bin boxes have a labeling area. All have a white exterior with a tan interior.

Conductive boxes have a conductive coating. Surface resistivity is 10^4 ohms/sq. and meets MIL-81705C electrostatic decay requirements. Color is black.

Extra-Wide Divided Plastic Bin Boxes

You'll get six compartments in one with these divided bin boxes. All are nestable and stackable. Use 3/8" diameter dowel rods to stack; 12" deep bins require two rods and 18" deep bins require three. (See page 3695 for dowel rods.) Made of polypropylene. **To Order:** Please specify color: blue, red, or yellow.

Optional divider fits side-to-side and is black.

Static-Control Plastic Bin Boxes

Keep your components safe from static with these bin boxes. The antistatic bin boxes drain charges more slowly than the conductive bin boxes, which are used when static electricity needs to be drained more quickly.

Antistatic hangable and stackable bin boxes come with a lip on the back so you can hang them from a rail or louvered panel. (See page 1641 for static-control panels and racks.) All have a label holder and are made of polypropylene. Surface resistivity is 10^9 to 10^{12} ohms/sq. Color is blue. **Also Available:** Labels for bin boxes. Please ask for 1515T322.

Conductive hangable and stackable bin boxes have a lip on the back so you can hang them from a rail or louvered panel. (See page 1641 for static-control panels and racks.) Surface resistivity is 10^5 ohms/sq. Color is black. *Optional dividers* fit front-to-back and are black.

Conductive stackable bin boxes have molded-in label holders and a bar in front for stability (unless noted). Surface resistivity is 10^3 ohms/sq. Color is black. **Also Available:** Labels for bin boxes. Please ask for 4761T1.

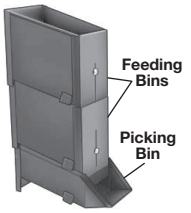
Modular Steel Dispensing Bins



Team up feeding and picking bins with the same rear width to create a dispensing system that's just right for you. Color is green.

Feeding bins have an adjustable front panel and adjustment screw that allow you to control the amount of material that flows into the picking bin. Can be stacked up to two high.

Picking bins have a shallow-angle lip for easy access to parts and a sloped bottom that allows parts to flow forward.

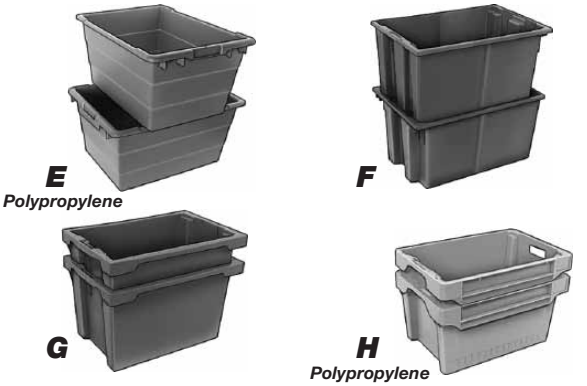
Nestable and Stackable Tote Boxes



(E) Nestable and cross-stackable tote boxes go from nesting to stacking with a simple 90° turn. *Polypropylene* boxes are gray. *Polyethylene* boxes are made from FDA-compliant resins. Color is translucent white.

(F) FDA-compliant nestable and stackable tote boxes are made of FDA-compliant resins, have ribs under the top lip to prevent jamming when nested, and have handholds. *Optional lids* are made of polypropylene, unless noted. **To Order:** Please specify color for tote boxes and lids: blue, gray, or red, unless noted. *Note:* The red boxes are not FDA compliant.

(G) Nestable and stackable tote boxes compatible with 48″ × 40″ pallets are nestable in one direction and stackable when turned in the opposite direction. All have handholds. *Optional lids* are made of polypropylene. **To Order:** Please specify color: blue, red, or yellow.

(H) Nestable and stackable tote boxes with built-in label holder and compatible with 48″ × 40″ pallets are nestable in one direction and stackable when turned in the opposite direction. All have handholds. When paired with an *optional lid,* boxes can be used for shipping. *Polypropylene* boxes have a recessed bar code area.

To Order: Please specify color: blue, red, or yellow.

Also Available: Labels for boxes. For labels for polypropylene boxes, please ask for 1515T336. For labels for polyethylene box, please ask for 4311T12.

Plastic Tote Boxes with Hinged Lids

All boxes have lids that interlock and are attached to boxes with metal hinges. A ⅜″ dia. hole allows you to secure lids with a wire seal or cable tie (not included). All are nestable when lids are open, and are stackable when lids are closed. They have handholds and are made of FDA-compliant resins, except the red models. All are compatible with 48″ × 40″ pallets, unless noted; 21 13/16″ and 21 15/16″ long boxes are also compatible with 48″ × 45″ pallets.

To Order: Please specify color: blue, gray, red, or translucent, unless noted. Blue, gray, and red boxes are made of polyethylene. Translucent boxes are made of polypropylene.

Vented Nestable and Stackable Plastic Tote Boxes

(A) Standard tote boxes are FDA compliant. Vented sides and bottom allow easy draining. All are made of polyethylene and have handholds.

(B) Stain- and stick-resistant tote boxes are the ultimate in impact, wear, chemical, corrosion, stain, and stick resistance. All meet NSF/ANSI standards, are made of FDA-compliant resins, and have handholds. Sides and bottoms are vented. Made of a blend of PTFE and polypropylene.

(C) Heavy duty chemical-resistant tote boxes are made of reinforced fiberglass so they are lightweight and strong. They also resist most chemicals, solvents, and oils. All have handholds and are compatible with both 48″×40″ and 48″×45″ pallets. **To Order:** Please specify color.

Create-Your-Own Compartmented Plastic Tote Boxes

Create a tote box with the perfect number of compartments—simply choose the box and number of dividers you need. The dividers fit into molded slots in the boxes and intersect so you can have compartments as small as 1⅛″ square.

(D) Polyethylene tote boxes have gray dividers; lids are clear. **To Order:** For boxes, please specify color: blue, gray, or red.

(E) Conductive polypropylene tote boxes provide protection from electrostatic fields when used with lid. Surface resistivity is a maximum 105 ohms/sq. Boxes, dividers, and lids are black.

Plastic label holders snap onto divider boxes. **Also Available:** Labels for bin boxes. Please ask for 17895T112 for 4″ Wd. × 13/16″ Ht. labels and 17895T118 for 5″ Wd. × 3″ Ht. labels.

Collapsible Large-Capacity Containers

Container without Casters

Containers collapse to save valuable storage space. All are made of zinc-plated steel and have four-way forklift entry. *Containers without casters* can be stacked four high, except 32″ Lg. × 20″ Wd. containers, which can only stack three high. *Containers with casters* have two rigid and two swivel casters with 4″ dia. phenolic wheels, except for the 32″ Lg. × 20″ Wd. containers, which have 3½″ dia. phenolic wheels. *Note:* Do not stack containers without casters on containers with casters.

Static-Control Plastic Boxes with Foam

With Clear Lid

Don't let static buildup ruin sensitive parts. Boxes are black with a clear or black lid.
With Clear Lid—The box and foam have a surface resistivity of $<10^5$ ohms/sq.; the lid does not.
With Black Lid—The box, lid, and foam have a surface resistivity of $<10^5$ ohms/sq. Meet Mil. Spec. B-81705-C.

Compartmented Boxes with Handle

Steel Box

Plastic Box with One Compartment

Plastic Box

Plastic Box with Compartments on Both Sides

Steel boxes have a plastic-lined lid and plastic lift-out bin cups. Color is blue.
Plastic boxes are opaque gray with semi-clear lids, unless noted. *Boxes with adjustable compartments* have dividers, so you can create the number and size of compartments you need. *Box with adjustable compartments on both sides* has nine fixed compartments on each side.

Sand Bags

Rectangular

Tubular

Polypropylene sand bags come in two shapes. *Rectangular* are UV treated for extended life and have built-in polypropylene ties. *Tubular* is laminated with polyethylene, and is oil, tear, puncture, and water resistant. Ties not included.

Burlap sand bag has built-in polypropylene ties.

Polyethylene sand bag is made of three layers of reinforced polyethylene. Bag is tear resistant and will withstand extreme outdoor heat for 3-5 years. Ties not included.

Note: Sand not included.

Wire ties are plastic coated and come on a 2,460-ft. spool so you can cut the length you need. Spool OD is 8½″ with a 1″ dia. center hole for mounting.

Water-Resistant Bags

Tall

Duffel

Also known as dry bags, they protect their contents in wet environments.

Tall bags have a translucent window to view contents and a roll-down closure with a plastic buckle.

Duffel bag has a waterproof zipper and a vinyl flap for extra protection. It has two top handles and two end handles.

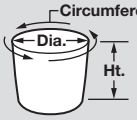
About Choosing the Proper Size Plastic Bags

Match the gallon capacity of your container to the gallon capacity listed in each bag presentation. If the exact capacity is not listed, choose a larger size. To determine the bag size for an unmarked container, calculate the bag circumference and height required (see below).

Round Containers

For bag circumference, multiply the container's diameter by 3.14.

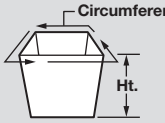
For bag height, take the container's height, add ½ of its diameter, and then add 2″ for overhang.



Square or Rectangular Containers

For bag circumference, add all four sides together.

For bag height, take the container's height, add ½ of its shortest width, and then add 2″ for overhang.



Multipurpose Plastic Bags

These bags are designed to resist tears and punctures by stretching around items with sharp edges. Twist ties are included.

For information about choosing the proper size plastic bag, see page 1781.

Large-Volume Bags

Light Duty (Shown as a Bun Rack Cover)

Heavy Duty (Shown as a Pallet Cover)

Extra-Heavy Duty (Shown as a Pallet Box Liner)

Cover, store, or dispose of extra-large items with these plastic bags. Bags are clear, except UV-resistant bags are black. Twist ties are not included.

Light duty bags are also known as bun rack covers. They fit racks up to 26″ Wd. × 20″ Dp.

Heavy duty and **extra-heavy duty** bags fit pallet loads up to 53″ Wd. × 43″ Dp.

UV-resistant bags protect contents outdoors for up to six months.

Hazardous Waste Bags

Asbestos

Infectious Waste

Bench-Top Bag with Optional Stand

Specific warning labels and images on these bags identify the type of waste. Designed for hazardous disposal, they're tear, puncture, and leak resistant. Twist ties are included, except for bench-top infectious waste bags.

Asbestos bags read "Danger: Contains Asbestos Fibers. Avoid Creating Dust. Cancer and Lung Disease Hazard. Avoid Breathing Airborne Asbestos."

Infectious waste bags are printed with the OSHA-required biohazard graphic to quickly alert people to the contents.

Styles A&B have a raised bottom to insulate and protect floors from heat transfer. *Style B* won't mark walls or floors.

Styles C-F extinguish internal fires by restricting oxygen flow. *Styles E&F* won't mark walls or floors.

Styles G-K have a galvanized finish to protect against rust. They can be used outdoors. *Heavy duty* containers are twice as thick.

Styles L-Q won't mark walls or floors and come with a removable plastic liner. *Style L* has a noncorrosive base.

Style R comes with a white recycle decal.

Styles S&T come with four white decals: Plastic, Paper, Recyclables, and Cans/Bottles. They have a removable plastic liner and won't mark walls or floors.

Wall-Mount Waste Containers

Plastic container has molded-in hooks for holding a plastic bag. It includes a mounting bracket and fasteners. Container is ADA compliant when properly installed and FM approved.

Stainless steel containers come with a reusable vinyl liner, except the 2-gal. container. All have four 3/8" Wd. × 5/8" Lg. mounting slots.

Steel mesh containers can be used outdoors. Both have two 3/8" dia. mounting holes.

Style C has a hinged bag-securing rim and four 1/4" Wd. × 9/16" Lg. mounting slots.

Drum Lids

A

B

C

D

E

F

G

H

Convert your steel drum into a covered waste container.
Style A is FM approved when used with a steel drum.
Style C is fire extinguishing and FM approved when used with a steel drum. At 165° F, the fusible link melts to drop the cover and snuff out a fire. It comes with a nut and bolt strap assembly for fastening the cover to a drum.

Styles E&F include thumb screws for fastening the covers to drums. Both are FM approved when used with a steel drum.
Style F has two self-closing push doors.

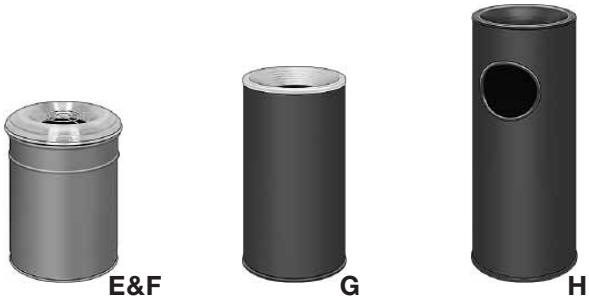
Cigarette Disposal Containers



E&F G H

Use these containers for quick disposal of cigarette waste.

Styles E&F restrict oxygen flow to extinguish internal fires. They're both FM approved.

Style E holds 4½ gallons.

Style F holds 6 gallons.

Styles G&H have a removable top-mounted metal collection bowl.

Style H also has a 3½-gallon waste container with a removable plastic liner.

Outdoor Cigarette Disposal Containers

K L M N

Keep outdoor smoking areas tidy with these weather-resistant containers. The narrow neck restricts oxygen flow to extinguish internal fires, while the broad base provides stability. Lift the top off the base to empty.

Styles K-M include a removable steel pail. *Styles K&M* are FM approved.

Style M has stainless steel latches to form a tight seal plus a chain that secures the top to the base. *Anchor kit* includes a ¼″ Dia. × 1″ Lg. steel lag screw and anchor for permanent placement.

		Base Dia.	Ht.	Available Colors

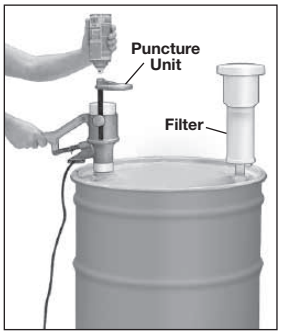
Sand Sifter	18″ Lg.	4086T27	30.00

Aerosol Can Recycling Systems



Turn any size aerosol can into nonhazardous, recyclable scrap metal with these drum-mounted systems. They safely puncture cans to relieve pressure and drain residual liquid into the drum.

To use, thread the puncturing unit onto the 2″ dia. opening of a 30- or 55-gallon drum (not included); then thread the filter with replaceable carbon cartridge onto a ¾″ opening in the drum. Insert the can and push the lever to puncture.

Puncture unit is cast iron and measures 18″ high. Systems come with safety goggles and a 6-ft. long anti-static wire with a ring terminal to ground the drum, as required by OSHA.

California compliant system also includes a drum cover, under-drum pan, automatic shut-off valve, and can counter.

	Standard		California Compliant	
Complete System	41275T51	$788.29	41275T61	$1,352.84

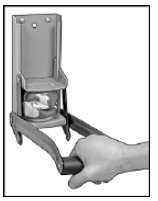
Gasket for Puncture Unit	41275T55	8.21	41275T55	8.21

Manual Trash Compactors

You don't need compressed air or an external power source to crush waste with this compactor. Pull the ratchet handle to reduce the contents of a 55-gallon drum to 25% of the original height. It's made of steel and has a 30″ long handle. Drum not included.

Ht.	Wd.	Dp.		
90″	29″	27″	40245T23	$992.33

Aluminum Can Crushers



When collecting aluminum cans for recycling, this crusher lets you save the metal—not the air inside. This wall-mount crusher has a 12″ long lever-style handle with a comfortable foam grip. It's made of steel and mounting hardware is included.

Ht.	Wd.	Color		
8″	3¾″	Gray	4009T1	$10.91

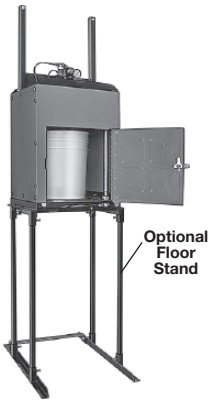
Air-Powered Trash Compactors

With the pull of a lever, this powerful compactor reduces waste inside a 55-gallon drum to 25% of its original height in under one minute.

To operate, connect a compressed air source to the ¼ NPT female fitting. Crusher requires 8 cfm of air at 100 psi. It's made of steel and has a 46″ long handle with a two-handed safety lever. Drum not included.

Ht.	Wd.	Dp.		
76″	36″	27″	40585T12	$3,679.96

Air-Powered Pail, Can, and Filter Crushers



Reduce metal containers to 25% of their original height in under two minutes with this crusher. Made of steel, it works with unsealed quart, one-gallon, and five-gallon pails and cans, as well as oil filters. Not recommended for use with high-density polyethylene containers.

To operate, connect a compressed air source to the ¼ NPT male fitting. Crusher requires 9 cfm of air at 100 psi.

Chamber is 12″ Dia. × 15″ Ht. It has a recessed bottom with a drain outlet and hose.

	Ht.	Wd.	Dp.		
Crusher	44″	22″	21″	41145T51	$3,279.96
Optional Floor Stand	37″	22″	30″	41145T52	189.95

Drum Crushers/Compactors

When used as a crusher, this machine can force a 55-gallon drum down to 6″ high in under one minute. To compact waste within a 55-gallon drum, remove the drum-crushing plate and it will reduce the drum's contents to 20% of their original height. Chamber measures 38¾″ Ht. × 26½″ Wd. × 26¾″ Dp.

Made of steel, this crusher/compactor has a three-phase motor that must be hardwired. When operating on 208-230 volts AC, it draws 20 amps; when operating on 460 volts AC, it draws 10 amps. It also has a 15-gallon oil reservoir for AW-32 or ISO-32 hydraulic oil.

This unit has a keyed on/off switch and watertight, double locking handle. It also includes a drip pan that fits below the base to collect any liquid waste remaining in the drums. This unit meets OSHA and JIC (Joint Industrial Council) standards.

About Glove Sizing

To determine your glove size, wrap a tape measure around your palm. The number, in inches, corresponds to a unisex letter size as shown in the chart. Finger cot sizes are based on their respective glove size.

Size, inches	6	7	8	9	10	11	12
Size, letter	XS	S	M	L	XL	2XL	3XL

Glove length is measured from the tip of the middle finger to the end of the glove.

Thickness is measured in mils (1 mil = 0.001″). Thicker materials are more durable and will last longer; thinner materials offer better dexterity.

Inspect gloves prior to use for tears, cracks, pinholes, and deterioration.

Disposable Gloves

ⓘ For additional information about the chemical compatibility of these gloves, go to mcmaster.com and search for **5306TAC**.

Disposable Gloves

Chemical-Resistant Nitrile, Chemical-Resistant Neoprene, and Sure-Grip Latex

General Purpose PVC

Quick-Change Polyethylene

These single-use gloves prevent cross contamination and provide the dexterity needed for intricate work. They are ambidextrous. All are made from FDA-compliant materials for food contact. Boxes of gloves fit dispensers sold on page 1795, unless noted.

Powder-free gloves are good for applications where particulate contamination is a concern. **Lightly powdered** gloves are easy to pull on and off.

Chemical-Resistant Nitrile—Protect your hands from incidental chemical contact such as spills and splashes. These gloves are also a good alternative for those concerned about latex allergies.

Chemical-Resistant Neoprene—These durable gloves resist tears and chemical spills and splashes better than any other disposable glove we offer.

Sure-Grip Latex (Natural Rubber)—Designed for jobs that require tactile precision, these gloves have a tacky grip.

General Purpose PVC—These economical gloves are good for applications that require a moderate amount of dexterity and durability.

Quick-Change Polyethylene—Commonly used in food preparation, these loose-fitting gloves quickly slip on and off.

Antistatic Disposable Gloves

Minimize the buildup of electrostatic charge in environments where static-sensitive instruments are used. These powder-free nitrile gloves have a surface resistivity of 2.2×10^{11} ohms and protect against incidental chemical contact such as spills and splashes. They are ambidextrous. All are made from materials that comply with FDA regulations for food contact. Boxes of gloves fit dispensers sold separately below.

Material	Thick., mils	Lg.	Color	Surface	Choose a Size	Box Qty.		Box 1-5	Box 6-Up
Nitrile	4	9″	Black	Textured	S-XL	20	9328T8	$4.43	$3.92
Nitrile	4	9″	Black	Textured	S-XL	50	9328T7	9.79	8.68

Skin-Soothing Disposable Gloves

An interior coating of aloe helps prevent chapping. All gloves are ambidextrous. They are made from materials that comply with FDA regulations for food contact. Boxes of gloves fit dispensers sold separately below.

Nitrile gloves offer chemical splash protection and are a good alternative for those concerned about latex allergies. **Latex (natural rubber)** gloves have excellent grip and elasticity. **PVC** gloves are economical.

Material	Thick., mils	Lg.	Color	Surface	Choose a Size	Box Qty.		Box 1-5	Box 6-Up

Disposable Finger Cots

Handle small items when dexterity is essential and full hand coverage isn't needed. These cots cover your fingers without restricting hand movement.

Powder-free cots are good for applications where particulate contamination is a concern. **Lightly powdered cots** are easy to pull on and off.

Static-Control Nitrile—Protect sensitive components from the buildup of electrostatic charge. These cots are also a good choice if latex allergies are a concern. Cots are antistatic. 5516T3 has a surface resistivity of 5×10^9 ohms; 5516T2 has a surface resistivity of 1×10^9 ohms.

Finger Cot Dispenser—Keep cots clean and ready to use. The dispenser is white plastic with a clear lid. It can be set on a table and has two ⅛″ dia. holes for wall mounting (fasteners not included). Holds approximately 1,440 cots. Size is 13″ Ht. × 6″ Wd. × 8″ Dp.

Clean Room Disposable Gloves

Standard Latex

Standard PVC

Heavyweight Nitrile

Neoprene/Latex/Nitrile Blend

Cleaned and bagged in environments with low levels of particulates, these powder-free, unlined gloves won't contaminate your work area. **Class 10** gloves are packaged in a clean room containing fewer than 10 particles larger than 0.5 microns per cubic foot. **Class 100** gloves are packaged in a clean room containing fewer than 100 particles larger than 0.5 microns per cubic foot.

Standard—These gloves are ambidextrous and conform to the hand. *Latex (natural rubber)* gloves are the most form fitting. *Nitrile* gloves protect your hands from incidental chemical contact such as spills and splashes. Nitrile is also a good choice if latex allergies are a concern. *PVC* gloves are economical.

Heavyweight—Thicker and more loose fitting than standard gloves, these are also abrasion and chemical resistant. *Nitrile* gloves have the best tactility and are a good choice for those concerned about latex allergies. *Neoprene/latex/nitrile blend* gloves have better splash protection than nitrile gloves against corrosive acids.

Class	Material	Thick., mils	Lg.	Color	Surface	Choose a Size		Pkg. of 50 Pairs

Clean Room Disposable Finger Cots

Protect objects in your clean room from skin oil and other contaminants when dexterity is essential and full hand coverage is not needed. These latex (natural rubber) cots are washed to eliminate residue and were packaged in a clean room containing fewer than 100 particles larger than 0.5 microns per cubic foot.

Antistatic latex cots minimize the buildup of electrostatic charge to protect static-sensitive components. Surface resistivity is 10^{12} ohms.

Acid-Resistant Gloves

Latex

Nitrile-Coated Latex

These latex (natural rubber) gloves stand up to most acids and alcohols. They also resist abrasion and offer good dexterity. *Food service* gloves are made from FDA-compliant materials. *Unlined* gloves offer the best dexterity. *Flocked* lined gloves are easy to take on and off. *Knit* lined gloves absorb perspiration.

Nitrile-coated latex gloves provide better abrasion and chemical resistance than latex gloves. They also resist fats and grease. Gloves have a green inner layer that shows through the coating as it wears off, making it easy to inspect for cracks, pinholes, and other signs of wear.

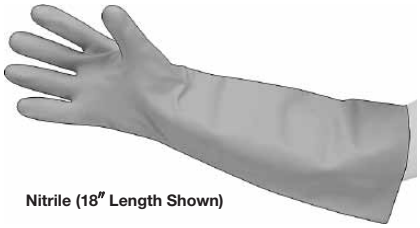
Oil- and Acid-Resistant Gloves



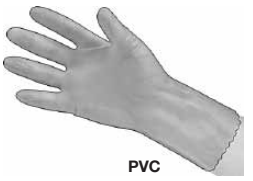
Nitrile (18″ Length Shown)

Neoprene (31″ Length Shown)

Double-Dipped Neoprene

Neoprene/Latex Blend

Neoprene-Coated Latex



PVC

Protect your hands during maintenance and repair work where contact with both oils and acids is likely. These gloves are made from materials that comply with FDA regulations for food service, except PVC gloves. *Unlined* gloves have the best dexterity. *Knit lined* gloves absorb perspiration. *Flocked lined* gloves are easy to take on and off.

Nitrile—In addition to resisting most oils and acids, these gloves also withstand deterioration from petroleum products and solvents such as alcohol.

Neoprene—Thicker than nitrile gloves, these gloves last longer while providing the same level of protection against oils, acids, and solvents. 31″ long gloves have a ½″ dia. brass grommet on each sleeve that allows you to tie them across your shoulders.

Double-Dipped Neoprene—An extra coating provides more abrasion resistance than standard neoprene gloves. These gloves have a different color inner layer that shows through the coating as it wears off, making it easy to inspect for cracks, pinholes, and other signs of wear.

Neoprene/Latex Blend—Flexible and comfortable, these gloves are for lighter duty jobs than full neoprene.

Neoprene-Coated Latex (Natural Rubber)—A multi-layer construction provides better protection against tears and pinholes than most single-layer gloves. Suitable for light duty jobs, these gloves deteriorate faster than full neoprene gloves when exposed to oils and acids. 12″ and 14″ long gloves have a different color inner layer that shows through the coating as it wears off, making it easy to inspect for cracks, pinholes, and other signs of wear.

PVC—These gloves are the most economical and offer good dexterity. They have a curved finger design that follows the natural contour of the hand for added comfort. 31″ long gloves have a ½″ dia. plastic grommet on each sleeve that allows you to tie them across your shoulders.

Chemical-Resistant & Abrasive Blasting Gloves

For information about gloves and sizing, see page 1794.

For additional information about the chemical compatibility of these gloves, go to mcmaster.com and search for **5306TAC**.

Vapor- and Chemical-Resistant Butyl Gloves

More impermeable to gas and vapors than other gloves we carry, these butyl gloves resist esters, ketones (such as MEK and acetones), highly corrosive acids, and other hazardous substances. They are unlined and have a curved finger design that follows the natural contour of the hand for added comfort.

Thick., mils	Lg.	Color	Choose a Size	Smooth Surface	Pair	Textured Surface	Pair
13	11″	Black	S-2XL	5607T11	$20.48	5607T51	$25.43
16	11″	Black	S-2XL	5607T21	24.97	5607T61	30.30

32	14″	Black	M-2XL	5607T41	46.32	5607T81	57.70

Ultra-Thin Chemical-Resistant Gloves

Wear as a liner or over other gloves to protect against esters as well as aromatic, chlorinated, and oxygenated solvents (ketones and alcohols). Commonly used to handle spill cleanup, these silver-film gloves are made with multiple layers of polyethylene and EVOH (ethylene vinyl alcohol). They are ambidextrous and have a smooth surface.

Thick., mils	Lg.	Color	Choose a Size		Pair
2.7	15″	Silver	XS-2XL	6075T21	$6.78
2.7	29″	Silver	XL	6075T22	18.47

Solvent-Resistant PVA Gloves

Clean machinery, tools, and other equipment while protecting your hands from oil-based degreasing solvents. These gloves have a PVA coating that holds up against the ketones and alcohols commonly found in lacquer thinner. They are not designed for use with water-based or alkali-based degreasing products. Gloves have a smooth surface and a jersey lining.

Thick., mils	Lg.	Color	Size		Pair
40	12″	Red	XL	5258T21	$27.50
40	14″	Red	XL	5258T22	28.75
40	17″	Red	XL	5258T23	30.00

High-Strength Solvent-Resistant Fluoroelastomer Gloves

These fluoroelastomer gloves withstand hazardous substances such as water-based solvents, chlorinated solvents, and aromatics (toulene and xylene) better than other gloves we carry. They are commonly used during industrial maintenance and degreasing operations. Gloves are unlined and have a smooth surface.

Thick., mils	Lg.	Color	Choose a Size		Pair
12	12″	Black	S-2XL	5604T31	$76.00
20	12″	Black	M-XL	5604T41	82.50

Abrasive Blasting Gloves

The combination of neoprene and vinyl provides the protection you need when working in abrasive blasting cabinets. These gloves have a smooth surface and a cotton lining.

For Cabinet Hole Dia.	Thick., mils	Lg.	Color	Size		Pair
6″	30	24″	Black	L	55405T22	$25.28
7″	30	33″	Black	L	55405T23	37.02

Chemical- and Cut-Resistant Gloves

Often used on machine assembly jobs where protection against both chemicals and cuts is essential, these gloves are thin enough for precision work. They resist tearing and degradation from oil and grease. An extra layer of nitrile-coated foam in the palm adds comfort. Surface is textured. For more information about cut-resistance levels, see page 1804.

Cut-Resistance Level	Cuff Style	Material	Lg.	Color	Choose a Size		Pair
Level 2	Snug Fit	Nitrile	12″	Blue	S-2XL	7843T2	$7.32
Level 3	Open	Nitrile	12½″	Green	M-XL	7843T1	36.09

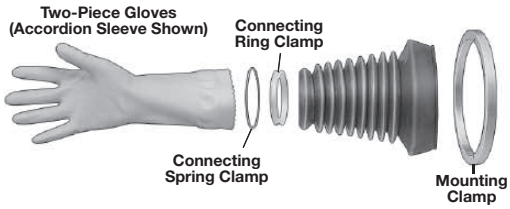
Chemical- and Temperature-Resistant Gloves

Protect your hands from chemicals when working near hot surfaces. Gloves are neoprene. A thermal lining withstands high levels of intermittent heat, and an outer coating acts as a barrier to chemicals and solvents.They are extra long for added arm protection and have an embossed texture on the fingers and palm for added grip. Gloves are washable and made from FDA-compliant materials for food contact.

Lg.	Max. Temp.	Color	Choose a Size		Pair 1-3	Pair 4-Up
17″	480°F	Black/Blue	M-XL	5399T11	$26.50	$24.46
26″	400°F	Black	M,XL	5399T33	36.65	33.98

For additional information about the chemical compatibility of these gloves, go to mcmaster.com and search for **5306TAC**.

Dry Box Gloves



Use in a controlled dry box environment to safely handle hazardous substances or avoid contaminating sensitive materials. These gloves fit 8″ dia. dry box access holes. All have a smooth surface.

Latex (Natural Rubber)—Offer the most dexterity of the dry box gloves we carry. They have moderate chemical resistance.

Neoprene—Use these gloves for applications that require more chemical resistance and durability than latex gloves.

Nitrile—Have good resistance to punctures, solvents, oils, and greases.

Polyethylene—Able to stand up to ozone and many oxidizing chemicals, these gloves also have a high level of abrasion resistance.

Butyl—Choose these highly impermeable gloves when working with vapors and gases. They also withstand hazardous chemicals such as ketones (MEK and acetone) and esters. Gloves remain flexible in temperatures as low as –40° F.

Sleeve-to-dry-box-mounting clamp set includes four clamps with an 8″ ID and 1/8″ mounting holes. Use two clamps to secure each glove sleeve to the box; one for the inside of the access holes and one for the outside. Fasteners included.

One-Piece Gloves

These gloves have a seamless one-piece construction that provides maximum strength and integrity. Attach directly to a dry box using the sleeve-to-dry box mounting clamp set (sold separately).

Material	Lg.	Color	Choose a Size	15 mils Thick	Pair	30 mils Thick	Pair

Sleeve-to-Dry Box Mounting Clamp Set						5322T91	354.41

Two-Piece Gloves

For applications that require frequent glove changes, the sleeves stay connected to the dry box so you can quickly change the size or type of glove being used. Attach gloves to sleeves using the included sleeve-to-glove connecting spring clamp and sleeve-to-glove connecting ring clamp. Attach sleeves to a dry box using the sleeve-to-dry box mounting clamp set (sold separately).

Chemical-Resistant Sleeves

Protect your arm from oils and most acids with these coated sleeves. Elastic at both ends secures them from the wrist to just past the elbow.

Neoprene-coated nylon sleeves resist the most chemicals of the sleeves we carry.

SBR-coated polyester sleeves withstand corrosive materials such as hydrofluoric acid.

Nitrile-coated polyester sleeves are the best choice for handling petroleum-based substances such as gasoline and xylene. They have a nitrile coating on the inside and outside.

Material	Thick., mils	Lg.	Color		Pair

Nitrile-Coated Polyester	16	18″	White	5564T13	16.34

Finger-Protection Tape

Wrap fingers to protect against cuts and abrasions without limiting dexterity. Tape is flexible and water resistant. It adheres to itself and will not stick to skin, hair, or clothing.

Cotton with Latex (Natural Rubber)—The open-mesh design allows the skin to breathe.

Latex-Free Vinyl—Choose this tape when latex allergies are a concern.

Work Gloves & Glove Clips

For information about gloves and sizing, see page 1794.

Light Duty Work Gloves

Canvas Glove

Jersey Glove

Terry Cloth Glove

Open-Fingertip Knit Glove

Ultra-Lightweight Glove Liner

Comfortable and flexible, these gloves are a good choice for protecting your hands from scrapes and scratches.

Canvas gloves have strong seams for durability and a snug-fit cuff.

Jersey gloves are as soft and comfortable as a sweatshirt. They also have a snug-fit cuff, except heavyweight gloves have an open cuff.

Knit gloves and liners are as thin and breathable as a T-shirt and can be comfortably worn for long periods of time. They are ambidextrous and have a snug-fit cuff.

Terry cloth gloves are more abrasion resistant than other light duty work gloves. They have a snug-fit cuff.

Sure-Grip Light Duty Work Gloves

Grip Dot

Criss-Cross Grip

These gloves have a raised PVC texture for added grip. All have a snug-fit cuff.

Knit gloves are as breathable as a T-shirt and keep hands cool during periods of extended wear.

Jersey gloves are soft and comfortable as a sweatshirt.

Canvas gloves are the most durable.

	Coating	Lg.	Color, Glove/Grip	Choose a Size		Pair 1-11	Pair 12-Up
Grip Dot							
Cotton/Poly Knit	Palm/Back	9¼″	Off-White/Blue	S,L	9727T1	$1.04	$0.96

Cotton/Poly Knit	Palm/Back	9¾″	White/Clear	S-L	9727T3	2.34	2.20

Repetitive-Motion Gloves

Reduce fatigue during jobs that require you to perform the same hand motions over and over. These nylon/spandex blend gloves retain body heat to stimulate circulation and keep muscles relaxed. They also have palm and wrist supports. Use alone or as liners. Gloves are ambidextrous and washable.

Cuff Style	Lg.	Color	Choose a Size		Pair 1-5	Pair 6-Up
Snug Fit	5½″	Orange	S-XL	9603T1	$10.66	$8.91

Glove Clips

Keep gloves close at hand with these clips. They have a safety break-away feature to prevent wearers from getting snagged by equipment. Clips are 4½″ Lg. × 1¼″ Wd. *Metal-detector-grade plastic* clips are designed for use in the food industry.

	Choose a Color		Each
Standard Plastic	Black, Blue, Green, Red, Yellow	57945T21	$5.36
Metal-Detector-Grade Plastic	Blue	57945T22	7.00

For information about gloves and sizing, see page 1794.

Sleeves

Keep your arms safe from scrapes and scratches. All sleeves are washable.

Cotton knit sleeves are comfortable and breathable. They are form fitting and have elastic at both ends.

Denim sleeves are more durable and abrasion resistant than other work sleeves. They are loose fitting and have elastic at both ends.

Terry cloth sleeves resist low levels of heat. They are form fitting and have elastic at one end and a snug-fit cuff at the other.

Denim

Sleeves

Material	Lg.	Color		Pair 1-11	Pair 12-Up
Cotton Knit	16″	Off-White	9661T51	$2.36	$2.02

Terry Cloth	24″	White	5957T49	11.83	11.02

Cut-to-Length Sleeves

These sleeves come on a 12-yard roll. The ends are not elasticized.

Material	Color		Roll 1-5	Roll 6-Up
Cotton Knit	Off-White	9661T32	$61.88	$56.25

Finger Cots

Cotton

Leather (Front/Side/Tip Coverage Shown)

Protect individual fingers without restricting hand movement.

Cotton cots offer better dexterity and tactility than leather cots. They have a snug fit and are washable.

Leather cots have better abrasion resistance than cotton cots. They have elastic backs, except full coverage cots are all leather.

Coated Work Gloves

The coating on these gloves provides extra grip and protection without limiting dexterity. **Palm-coated** gloves have an uncoated back side that makes the gloves more comfortable and breathable. **Fully coated** gloves provide the same protection for the front and the back of the hand.

Polyurethane—Thin and lightweight**,** these gloves are good for assembly work, small parts handling, and other jobs where a sensitive touch and precise handling are essential.

Latex (Natural Rubber)—Have light abrasion resistance. *High-visibility* gloves have a yellow back side that makes them easy to spot.

Nitrile—More durable than latex gloves, these gloves are also chemical and oil resistant. They are a good alternative for those concerned about latex allergies.

Ultra-Flex Nitrile—Have the protective benefits of nitrile gloves with more dexterity and comfort. These gloves conform to the hand to decrease fatigue and are the most flexible coated work gloves we carry.

Sure-Grip Nitrile—Good for handling glass, slippery plastics, and oily machine parts, these gloves have a dotted palm for the most secure grip of our coated work gloves. They also have excellent abrasion resistance.

PVC (Polyvinyl Chloride)—These gloves are the economical choice for protection from oil and abrasive materials. They also provide light chemical and acid resistance.

PVC/Nitrile Blend—More chemical and abrasion resistant than PVC gloves, these gloves also stay flexible in low temperatures.

Work & Inspection Gloves

For information about gloves and sizing, see page 1794.

Leather Work Gloves

Leather Palm

Protect your hands from on-the-job hazards. *Double-palm* gloves have two layers of leather on the palm and index finger for added protection. *High-visibility cowhide* gloves have a fluorescent back and cuff and reflective tape on cuff and knuckles. *Goatskin* gloves are strong yet thin, providing good tactility for precision handling and delicate tasks. *Pigskin* gloves won't stiffen when wet. *Deerskin* gloves are soft and flexible.

Leather-palm gloves are lightweight and breathable. They have a canvas back, except open-fingertip pigskin gloves have a mesh back.

All-leather gloves offer better protection for the entire hand than leather palm gloves.

All-leather glove with sleeve has a 10″ long sleeve with a 2½″ wide nylon mesh strip for air circulation.

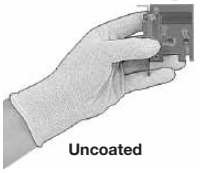
Static-Dissipative Gloves



Uncoated

Avoid damaging static-sensitive electronic parts. All gloves have a snug-fit cuff.

Uncoated gloves are ambidextrous, breathable, and absorb perspiration during periods of extended wear. Surface resistivity is 10^6 ohms.

Palm-coated gloves have a nitrile coating that provides abrasion resistance and a secure grip. Surface resistivity is 10^9 ohms.

High-temperature palm-coated gloves (also known as wave solder gloves) have a nitrile coating that protects hands while soldering. Maximum temperature is 200° F. Surface resistivity is 10^8 ohms.

High-Dexterity Work Gloves

Leather

Standard and Oil Resistant

Standard—Open Fingertip

Vented

Sure Grip

High Visibility

Abrasion Resistant—Open Fingertip

Impact Resistant (Back of Hand)

Flame Resistant

These flexible gloves combine abrasion resistance with a design that conforms to your hand. They have a spandex back, except flame-resistant gloves. All are 9″ long, except standard open fingertip gloves are 6½″ long. *Double-palm* gloves have two layers of leather or synthetic leather on the palm and index finger for added protection. *Padded palm* gloves have additional padding for impact resistance.

Leather—These natural leather gloves are supple and form fitting. *Medium duty cowhide* gloves balance durability and comfort. *Goatskin* gloves are strong yet thin, providing good tactility for precision handling. *Deerskin* gloves are the most flexible leather work gloves. *Heavy duty sheepskin* gloves are washable and reinforced with Kevlar for added durability.

Long-Life Synthetic Leather—Have better wear resistance than natural leather gloves. All are washable.

Vented gloves promote air circulation to keep hands dry. *Sure-grip* gloves have tacky silicone on the palms and fingers. *Oil-resistant* gloves have treated palms to withstand oil and water. *High-visibility* gloves have a reflective backing. A*brasion-resistant* gloves are reinforced with polyurethane for protection against scrapes and scratches. *Impact-resistant* gloves have knuckle guards on the back of the hand and foam padding on the front. Yellow gloves are high visibility. *Flame-resistant* gloves have two layers of Carbon X on the top of the hand and one layer on the palm to protect against radiant heat and flames.

Vibration-Damping Gloves

Minimize hand fatigue while operating rivet guns, jackhammers, and other power tools that produce high levels of vibration. All gloves have a spandex backing and cowhide leather palm, except full gloves have a goatskin palm.

Open-fingertip gloves have a snug-fit cuff and shock-absorbing gel padding. *Gloves/liners* can be used alone or as liners. They have padding in the palm, thumb, and index finger. *Gloves* are padded in the palm, all fingers, and thumb.

Full gloves have shock-absorbing gel padding padded in the palm, index finger, and lower thumb. They also have a hook-and-loop cuff.

Palm pads have rubber padding. *Fitted* pads conform to your hand and provide more coverage on the upper palm.

Cut-Resistant Gloves

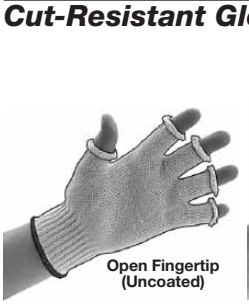
For information about gloves and sizing, see page 1794.

About Cut-Resistant Gloves

Our cut-resistant gloves meet the ANSI/ISEA 105-2011 standard, which designates levels of cut resistance based on the force needed to cut through the material of the glove using a razor blade.

Cut Level	Common Applications	Downward Force of Blade
2	Packing boxes, assembling parts, and handling light material.	501 - 1,000 grams
3	Handling pallets and metal parts with burs.	1,001 - 1,500 grams
4	Working with sheet metal, glass, and other material with sharp edges.	1,501 - 3,500 grams
5	Using cutting blades and knives.	3,501 grams or greater

Cut-Resistant Gloves



Open Fingertip (Uncoated)

Dot Grip

Palm Coated

Fully Coated

Sleeve with Glove

Protect your hands from cuts and scratches. Gloves have a snug-fit cuff, except fully coated gloves have an open cuff.

Kevlar gloves absorb moisture. **Dyneema** gloves are thinner, more breathable, and more form fitting than Kevlar gloves.

Latex-coated gloves are water resistant. *Nitrile-coated* gloves are oil resistant and have better abrasion resistance than other coated gloves. *Polyurethane-coated* gloves offer good tactility for precision handling and delicate tasks. *PVC-coated* gloves provide a good grip in wet, dry, and oily conditions.

Cut-Resistant Clean Room Gloves

Handle sharp objects when contamination is a concern. These polyurethane-coated Dyneema gloves are lint free and packaged in a clean room containing fewer than 100 particles larger than 0.5 microns per cubic foot. They have a snug-fit cuff.

Cut-Resistance Level	Clean Room Class	Color	Lg.	Choose a Size		Pair
Level 2	100	Gray	9½″	XS-2XL	6223A11	$15.87

For information about gloves and sizing, see page 1794. For information about cut-resistance levels, see page 1804.

Food Service Cut-Resistant Gloves

These gloves are commonly used in meat packing and other food service environments.

Fabric—Made of interwoven fabric and stainless steel fibers, these gloves offer cut protection without sacrificing dexterity. They are washable and have a snug-fit cuff. *Uncoated* gloves are made from materials that comply with FDA regulations for food contact. *Polyurethane-coated* gloves have a non-slip coating on the palm and fingers for added grip.

Type 304 Stainless Steel Mesh—Also known as chainmail gloves, these are made of interlinked corrosion-resistant stainless steel rings. Materials comply with FDA regulations for food contact. Gloves have an open cuff.

Polyurethane-Coated Fabric

Type 304 Stainless Steel Mesh

Note: Gloves are sold individually (order two for a pair).

Cut-Resistance Level	Lg.	Color	Hand	Choose a Size		Each

Cut- and Impact-Resistant Gloves

Bumpers on the back of these mechanic-style gloves protect your hands from impact when working in confined spaces.

Palm-coated gloves have an abrasion-resistant polyurethane coating and allow good dexterity. **Flame-resistant** gloves meet NFPA 2112 for flame resistance. **Cold-resistant** gloves are insulated, waterproof, and windproof. **Dot-grip** gloves have raised silicone dots on the palm and fingers for a good grip even when handling slippery objects. **Oil-resistant** gloves provide good grip in oily applications.

Cut- and Puncture-Resistant Gloves

Reduce the risk of cuts and punctures when handling metal with burs and other pointed objects. These gloves are reinforced on the palms with lightweight puncture-resistant material.

Puncture-resistant gloves are washable. *Synthetic leather* gloves are mechanic style and provide a good grip. *Poly blend* gloves provide full hand and forearm protection. **Needlestick-resistant gloves** are palm coated to protect against punctures from objects such as needles and syringes. They are washable.

Cut-Resistant Sleeves

These lightweight sleeves protect your arms from cuts without restricting movement. All are washable.

Kevlar sleeves absorb moisture. For sleeves you can cut to length, choose the 13-yd. roll. **Dyneema** sleeves are thinner, more breathable, and more form fitting than Kevlar sleeves. **Spectra/Type 304 stainless steel** sleeves are the most durable cut-resistant sleeves. **Poly blend** sleeve is puncture resistant.

Cut-Resistant, Laser-Protection & Welding Gloves

For information about gloves and sizing, see page 1794.

Cut- and Temperature-Resistant Gloves

Heat Resistant

Protect your hands from cuts and intermittent exposure to extreme temperatures. For more information about cut-resistance levels, see page 1804.

Cold-resistant gloves remain flexible in low temperatures and have a thermal liner to keep hands warm.

Heat-resistant gloves have a wool liner for additional heat protection.

Cut-Resistance Level	Material	Max. Temp.	Cuff Style	Lg.	Color	Choose a Size		Pair
Cold Resistant								
Level 2	Nitrile-Coated Polyethylene	___	Snug Fit	10″	Gray/Black	L,XL	7623T31	$11.82
Heat Resistant								
Level 4	Kevlar	500° F	Snug Fit	12″	Yellow	L	7623T4	68.36

Laser-Protection Gloves

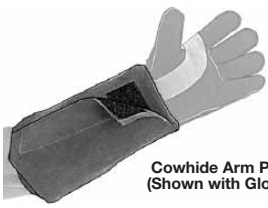
Guard your hands from accidental exposure to laser beams. These gloves have a laser radiation resistance of 4.7 W/cm^2 and meet EN 60825 for laser safety. They have a snug-fit cuff.

Material	Lg.	Coating	Color	Choose a Size		Pair
Dyneema	9″	Nitrile	Green/Black	S-XL	7381T1	$119.23

Welding Gloves and Pads

Comfort-Fit Cowhide Glove

Aluminized Welding Glove Pad (Shown With Glove)



Cowhide Arm Pad (Shown with Glove)

Shield your hands and arms from welding sparks and spatter.

Gloves

These gloves have reinforced seams and fingertips to prevent burn-through. All have an open cuff.

Standard duty cowhide gloves are stitched with Kevlar threads for added strength.

Comfort-fit cowhide gloves have a soft lining. Gloves with wool lining also have an inner layer of Mylar between the wool and cowhide to protect the back of your hand from radiant heat.

Pigskin gloves remain flexible in wet and oily environments.

Elkskin gloves offer the best dexterity of the welding gloves we carry. They are insulated and remain supple even after repeated exposure to moisture and heat.

Material	Lining	Lg.	Choose a Color	Choose a Size		Pair

Elkskin	Nomex	14″	Off-White	S-XL	5329T6	32.65

Pads

Aluminized welding glove pad fits over gloves for additional protection against sparks and spatter. It's made from highly heat reflective aluminized rayon and has two straps to hold it in place.

Cowhide arm pads allow you to rest your arm on a hot surface while welding. They have a hook-and-loop closure for a snug fit.

	Lg.	Wd.		Each
Aluminized Welding Glove Pad	7 1/2″	5 1/4″	5317T22	$6.46
Cowhide Arm Pad—Left	10″	6″	9698T5	21.60
Cowhide Arm Pad—Right	10″	6″	9698T7	21.60

TIG and MIG Welding Gloves

4″ Open Cuff

These gloves provide the heat resistance and dexterity needed for welding. **TIG welding** gloves are thinner and more flexible than MIG gloves. **MIG welding** gloves have better heat protection than TIG gloves.

Pigskin gloves won't stiffen when wet.

Cut-resistant pigskin gloves have Kevlar-lined palms and fingers for protection when handling sharp material. They are rated level 3 for cut resistance. For more information about cut-resistance levels, see page 1804.

Cowhide gloves provide a good balance of durability and dexterity.

Deerskin gloves are supple and more flexible than other welding gloves.

Sheepskin gloves are soft and have excellent dexterity.

Goatskin gloves are soft with good tactile sensitivity.

Heat-Resistant Gloves

Designed for intermittent handling of hot pipes, engine parts, and castings, these gloves protect your hands from moderate heat and abrasion. Gloves are washable, except palm-coated acrylic and nitrile gloves.

Palm-coated acrylic gloves have good dexterity and a nitrile coating with embossed dots for a good grip.

Cotton gloves are soft and have reinforced knuckles for added protection.

Cotton terry cloth gloves are moisture absorbing and have an outer layer that dissipates heat.

Palm-coated cotton gloves have a nitrile coating that provides level 2 cut resistance and a good grip on oily surfaces. For more information about cut-resistance levels, see page 1804.

Nitrile gloves have a knitted interior for heat resistance. They also have a nitrile inner layer for oil and grease resistance.

Nomex gloves are breathable and cool down quickly after removal from a hot surface.

Leather Heat-Resistant Gloves

Made of flexible leather, these gloves protect your hands in high-temperature applications.

Heavyweight gloves withstand longer exposure to heat than standard gloves with an extra layer of self-extinguishing fabric.

Extra-heavyweight gloves withstand even longer exposure to heat than heavyweight gloves with two layers of self-extinguishing fabric and an extra layer of wool.

Firefighter-style gloves are fire retardant and commonly used in firefighting and similar severe duty applications. They meet OSHA, CAL-OSHA, and NFPA requirements. All have a Nomex cuff. *Cowhide* gloves remain soft after repeated soakings. *Pigskin* gloves are more durable and abrasion resistant than cowhide.

Extreme Heat-Resistant Gloves and Mitts

For protection against intermittent exposure to extreme heat during jobs such as metal forging and glass manufacturing, choose these gloves and mitts. They have a wool lining and open cuff. Size is large.

Kevlar Blend—These gloves and mitts have good dexterity. Color is yellow.

Zetex—Protect your hands from molten splashes. Color is white. *Finger cots* are one size.

PBI Kevlar Blend—Provide better abrasion resistance than the Kevlar blend. Color is gold.

Zetex Plus—These gloves and mitts have the best resistance to sparks and molten splashes. Color is tan.

Note: Holding heavy objects may decrease temperature rating.

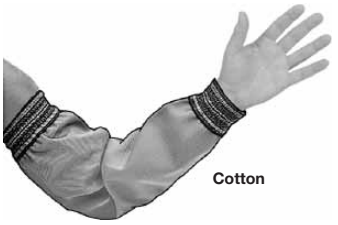
Heat-Resistant Sleeves & Cold-Resistant Gloves

For information about gloves and sizing, see page 1794.

Heat-Resistant Sleeves



Cotton

Cotton sleeves are lightweight. They have elastic at both ends and are washable.

Leather sleeves are abrasion-resistant cowhide. All have wrist snaps; the 18″ and 23″ lengths also have arm straps.

Kevlar blend sleeves are heat and abrasion resistant. They withstand intermittent contact with surfaces up to 1000° F. All have wrist snaps; the 18″ and 23″ lengths also have arm straps.

Nomex sleeves resist heat up to 1300° F. They are designed for intermittent contact with hot surfaces.

Cold-Resistant Gloves and Mitts

High-Visibility Pigskin

Water-Resistant PVC

Neoprene

Oil-Resistant PVC

Convertible Nylon Mitt

Gloves

Abrasion Resistant—A tough leather outer shell provides durability and protection against on-the-job hazards.

Cowhide gloves provide economical abrasion resistance.

Pigskin gloves won't stiffen in wet or oily environments.

Deerskin gloves have the best dexterity of the abrasion-resistant leather gloves.

Water Resistant—These gloves maintain a secure grip on wet surfaces.

Palm-coated nylon gloves have a nitrile coating that provides level 3 cut resistance. For more information about cut-resistance levels, see page 1804.

PVC gloves protect against acids and solvents.

Neoprene gloves withstand detergents and other cleaning agents.

Nylon gloves have a breathable, windproof membrane for superior cold resistance. They are form fitting and offer good dexterity.

Oil Resistant—These PVC gloves resist petroleum-based products.

Work Shoes and Boots

General Purpose and Chemical-Resistant 6″ PVC

General Purpose 16″ PVC

General Purpose Leather

Chemical-Resistant Premium PVC/ Polyurethane

Heat Resistant

Cold Resistant

Before you step into your work area, make sure you have the right footwear. These shoes and boots come in whole sizes, unless noted. Order your normal shoes size, except order one size up for Insulated Leather Boots.

Safety toe styles meet ASTM F2413-11. Toe is steel, except insulated leather has a composite safety toe. *Steel shanks* provide additional support for demanding work such as ladder climbing. *Fiberglass shanks* and *composite midsoles* are similar in strength to steel but lighter in weight. *Steel midsoles* provide protection from punctures when working around glass, nails, and scrap metal.

General Purpose—The economical choice for keeping your feet dry in water and mud. *Rubber* is abrasion resistant. *Leather* is flexible. *PVC/Polyurethane* is more durable than PVC.

Chemical Resistant—*Premium PVC/Polyurethane* has better chemical resistance than PVC/polyurethane. *Neoprene rubber* holds up when exposed to petrochemicals, animal fats, and some acids.

Heat Resistant—Also known as firefighters' boots, these insulated rubber boots provide the heat protection and durability required by firefighters. The uppers are foam insulated. Boots meet OSHA 29 CFR 1910.136 and 1910.156. They are UL certified to NFPA 1971 standard for structural firefighting.

Cold Resistant—These insulated leather boots have waterproof rubber bottoms and multiple-layer insulation.

Waders

Keep dry when you're in deep water, mud, and sludge. All waders fit over socks. Lengths are approximate and measured from the bottom of the heel to the top of the wader. *Steel toe* style meets ASTM F2413-11 for impact and compression. *Steel shank* provides additional support for demanding work such as extensive ladder climbing. *Steel midsole* provides extra protection when working around glass, nails, and scrap metal. Meets ASTM F2413-11 and CSA Z195-09, Grade 1 for puncture resistance.

Hip Waders—Provide protection to mid-thigh. All have adjustable straps with snaps that loop through your belt for a secure fit.

Chest Waders—All have adjustable suspenders. *General purpose rubber* waders have insulated boots. *Insulated neoprene* waders have insulation throughout. Knees and seat are reinforced.

Shin and Ankle Guards

Impact-Resistant Shin and Knee Guards

Welding Shin and Foot Guards

Welding Ankle and Foot Guards

Impact-resistant shin and knee guards have attached knee pads with a slip-resistant rubber cap. They secure with buckle closures.

Welding shin and foot guards protect from sparks and welding spatter. Also known as leggings, they're abrasion and tear resistant. A spring-tension frame keeps them securely in place.

Welding ankle and foot guards protect from sparks and welding spatter. Also known as spats, they have a snap-button closure and adjustable instep strap.

Ice Grippers

Heavy Duty

Find your footing on icy surfaces. Grippers have steel studs and fit over your shoes and boots.

Standard Duty—The rubber harness stretches over shoes and boots. Grippers have four studs on the front and two on the heel.

Heavy Duty—17 studs on each gripper dig in and hold tight. They have adjustable hook-and-loop straps.

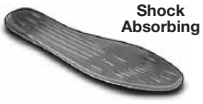
Shoe and Boot Insoles



Shock Absorbing

Puncture Resistant

Add flexible comfort and protection to your shoes and boots.

Shock-absorbing insoles are polyurethane and have a treated top layer to reduce odors.

Puncture-resistant insoles are 0.02″ thick Type 301 stainless steel under a 1/16″ thick foam pad. Meet ASTM F2413.

To Order: For shock-absorbing insoles, please specify whole or half size. For puncture resistant insoles, please specify whole size.

Knee Pads

General Purpose Foam Rubber

General Purpose Leather

Protective Cap and Impact Resistant

Hinged

Gel-Filled Easy Slide

Gel-Filled Nonslip

General Purpose—Ergonomically designed for a secure fit. *Foam rubber* pads offer some flexibility. Heavy duty pads have an added layer of rubber for longer life. *Leather* pads have a tough exterior and a rivet-reinforced inner layer of water-resistant felt.

Protective Cap—*Easy-slide plastic* allow movement with little resistance on hard surfaces. *Nonslip rubber* provides traction on wet surfaces. *Nonmarring rubber* won't mark or scuff surfaces. *Flame-resistant plastic* have a flame-retardant cotton lining.

Impact Resistant—The thick cap can take hard knocks from rocks and debris. The neoprene foam padding absorbs shock and a liner wicks away moisture.

Hinged—Provides protection without sacrificing mobility. These pads not only guard the knee cap but also protect above and below the knee. Pads have a hard plastic outer shell with nonskid strip and are cushioned with foam rubber.

Gel Filled—A gel center reduces fatigue during long jobs. *Easy-slide plastic* allow movement with little resistance on hard surfaces. *Nonslip nylon* provide traction on slippery surfaces.

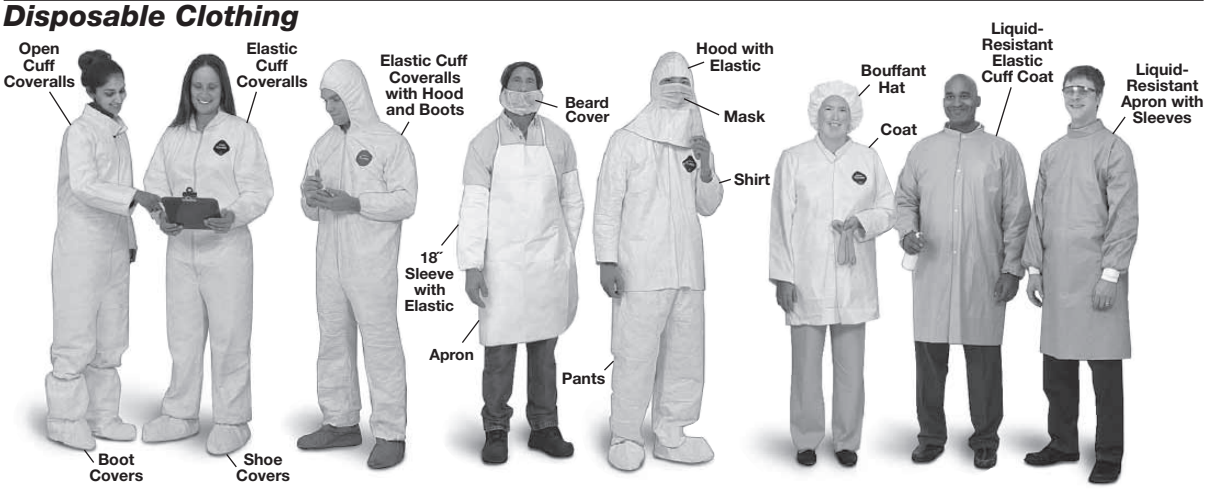
Sizing Guidelines for Disposable Clothing

This chart is a general guideline for sizing. Proper fit varies with individual body shape and underclothing.

Size	Height	Weight
S	5′0″-5′7″	90-125 lbs.
M	5′2″-5′7″	125-160 lbs.
L	5′5″-5′10″	140-200 lbs.
XL	5′7″-6′2″	150-220 lbs.
2XL	5′11″-6′4″	180-240 lbs.
3XL	6′2″-6′5″	230-280 lbs.
4XL	6′4″-6′8″	240-300 lbs.
5XL	6′7″-6′11″	260-330 lbs.

Disposable Clothing



Dirt- and Dust-Resistant Clothing

Breathable to keep you cool and comfortable, this clothing protects against dirt and grime. Pants have an elastic waist. Shirt and coats have a snap front.

Abrasion-resistant Tyvek is made of heat- and pressure-bonded olefin fibers that form a barrier that's soft yet strong. Tyvek resists liquid splashes but is not recommended for continuous liquid exposure.

Tear-resistant Kleenguard has three layers of antistatic polypropylene for abrasion resistance and durability. It also protects from liquid splashes.

Light duty polypropylene offers economical protection in environments where abrasion resistance and liquid splashes are not a concern.

		Abrasion-Resistant Tyvek				Tear-Resistant Kleenguard				Light Duty Polypropylene

Disposable Clothing *(Continued from previous page)*

Liquid-Resistant Clothing

Liquid- and dirt-resistant coated polypropylene clothing has a polyethylene coating for durability. It is nonlinting.

Breathable liquid- and dirt-resistant polypropylene clothing is vented in the back, so it only provides frontal protection.

Liquid- and tear-resistant poly blend clothing is made of a specially treated wood pulp and fabric blend to protect against blood and other bodily fluids. It offers some breathability.

Clean Room Clothing

Class 10 clothing is for use in a clean room containing fewer than 10 particles larger than 0.5 microns in each cubic foot of air space. *Class 100* clothing is for use in a clean room containing fewer than 100 particles larger than 0.5 microns in each cubic foot of air space. *Class 1000* clothing is for use in a clean room containing fewer than 1000 particles larger than 0.5 microns in each cubic foot of air space. Color is white for all.

Disposable Tyvek—Individually polybagged to meet clean room standards, this clothing provides light splash protection from nonhazardous liquids, plus it's breathable and low-linting. It meets Federal Standard 209E for airborne particle count levels. Coveralls have a zipper front and elastic wrists and ankles. Coat has a snap front with elastic wrists. Hood has side ties. Boot covers have a PVC sole, elastic tops, and ties at the ankles.

Washable Polyester—Provides acid and alkali splash protection that's launderable to meet clean room standards and must be laundered prior to first use. Coveralls have a zipper front, knit cuffs, and snap closures on the neck and ankles. Coat has a military collar with snap front and wrist closures. Hood comes with a detachable face cover.

PVC Coated

Acid-Resistant
PVC

Acid-Resistant and
Oil-Resistant Coat Style

Disposable—Provide basic protection from liquid splashes. *Light duty polyethylene* is commonly used in food-preparation environments. Material complies with FDA regulations for food contact. *Standard polyolefin* resists chemicals and abrasion. *Clean room coat style polyolefin* are individually bagged to meet Class 100 clean room standards. They're chemical resistant and have elastic cuffs.

Water Resistant—Also handle mild acids.

Acid Resistant— *Acrylic/nitrile blend* won't crack in the cold and withstands lacquers and caustic chemicals. *PVC-coated polyester* provides longer life than PVC alone.

Oil Resistant—*Nitrile-coated cotton* and *polyester* also resist solvents and grease. *Neoprene-coated nylon* also resists alkalies and caustic chemicals; material complies with FDA regulations for food contact.

Flame Resistant—Made of flame retardant materials that comply with California Fire Marshal specifications F-121.2.

Cold Resistant—For applications involving exposure to extremely cold materials, such as cryogenic processes.

Disposable Overshoes

Latex

Latex overshoes resist acids, alcohol, and salts. They have a nonslip sole.

Polyethylene overshoes are commonly used in food-preparation environments. Material complies with FDA regulations for food contact.

Material	Ht.	Thick., mils	Color	Choose a Size		Pair 1-11	Pair 12-Up
Latex	12″	23	Yellow	Men's 7-16	52315T5	$8.38	$7.44

Polyethylene	18¼″	3	Clear	One Size	9670T3	$22.68	$20.32

Shop Aprons

Cotton-denim and **cotton duck** aprons are breathable and resist light abrasion. *Swing bib pocket* swings out from the bottom to prevent items from falling out when you bend over.

Extra abrasion-resistant leather is extremely durable.

Heat-resistant Kevlar protects against incidental contact with hot surfaces up to 600° F. It's also cut and abrasion resistant.

Flame-resistant carbonized fiber also provides abrasion and electrical resistance.

Cut- and puncture-resistant poly blend provides ANSI/ISEA Level 5 protection from cuts and punctures.

Coveralls

These coveralls are roomy to fit over your work clothes.

When measuring chest size, measure around the fullest part of your chest. Take all measurements over any clothing you expect to wear under the garment.

Dirt and Dust Resistant—*Cotton/polyester blend* is more durable than cotton. Coveralls have brass buttons, seven pockets, and a brass two-way front zipper. *Cotton* is breathable to keep you cooler. Coveralls have brass buttons and seven pockets.

Static Control—Protects sensitive equipment from electrostatic discharge. The surface resistivity is 10^{10} ohms. Coveralls have a nylon front zipper, elastic waist, and seven pockets.

Flame Resistant—*Cotton* is sewn with Nomex threads and treated to provide basic flame resistance as well as good breathability. It meets NFPA 70E for electrical safety. Coveralls have a two-way brass front zipper and five pockets. They also have two hip slits and snap-closure cuffs. *Cotton/nylon blend* is soft yet wear resistant. It meets NFPA 70E for electrical safety. Coveralls have a hook-and-loop front closure and six pockets. *Nomex* provides excellent heat protection and will not ignite, melt, or burn. It meets NFPA 2112 for industrial personnel. Coveralls have a brass two-way front zipper, two hip slits, and six pockets.

To Order: For monogrammed coveralls, please specify block or script lettering. A maximum of 24 characters on two lines with 12 characters per line is embroidered in white (except white coveralls have a dark blue monogram). Personal names are over the left chest pocket; company names are over the right chest pocket.

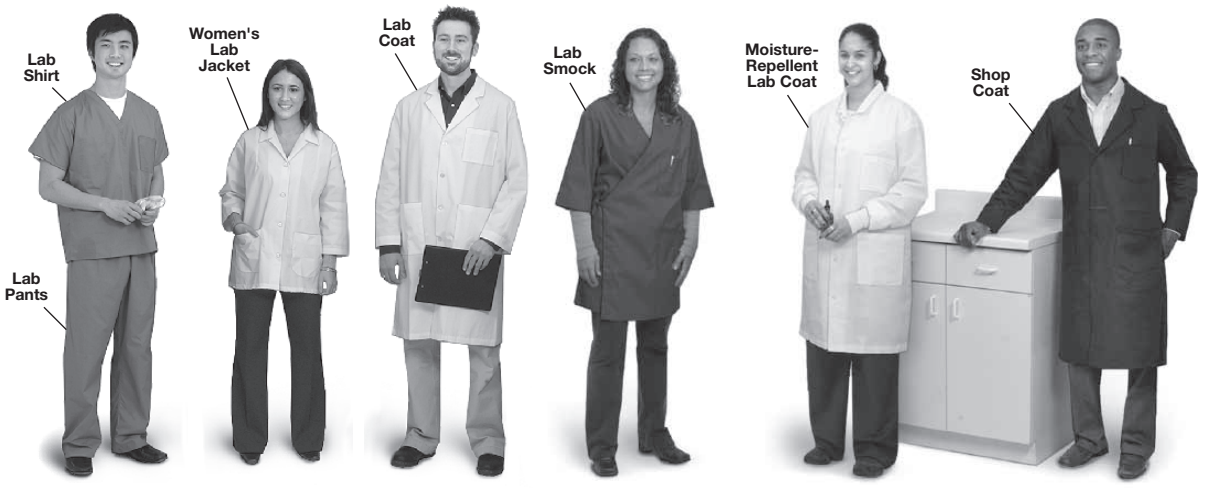
★ Orange coveralls with a 36″ chest size are only available in regular length.

Lab and Shop Clothing



When measuring chest size, measure around the fullest part of your chest. Find your waist size by measuring just above the top of your hip bone. Take all measurements over clothing you expect to wear under the garment.

Lab Shirts and Pants

Just like the scrubs worn in hospitals, these reversible garments are soft and comfortable for all-day wear. They're made of 55% cotton and 45% polyester.

Shirts have one chest pocket.

Pants have a rear pocket and a drawstring waist.

	Choose a Color	Choose a Size		
Shirts				
Light Blue, Dark Blue, Green		30″-52″ Chest	2027T7	$14.22
Pants				
Light Blue, Dark Blue, Green		24″-46″ Waist	2027T8	14.89

Lab Jackets, Coats, and Smocks

Standard—Garments are a durable polyester/cotton blend. *Jackets* have a button front, finished cuffs, and two waist pockets. *Coats* have a clear-button front, three pockets, and hip slits. Women's coat also has an adjustable back belt. *Smock* has hip slits and three pockets.

Static Control—Protect sensitive equipment from electrostatic discharge. Garments are a polyester/cotton/nylon blend. The surface resistivity for unlaundered fabric is 10^6 ohms. They have front and wrist snaps you can attach to a grounding point. They also have three pockets.

Moisture Repellent—Commonly known as a barrier coat, it's made of 99% polyester with 1% carbon fiber. It has stainless steel snaps, knit-wrist cuffs, and three pockets.

Flame Resistant—This treated cotton coat is self-extinguishing and meets NFPA 70E for electrical safety. It has hip slits and four pockets.

Single-Stripe Vest

Two-Tone Single-Stripe Vest

Dual-Stripe Vest

Breakaway Single-Stripe Vest (Class 3)

Long-Sleeve T-Shirt with Single Stripe

Hooded Sweatshirt with Single Stripe

Jacket with Single Stripe

All clothing is fluorescent with 2″ wide reflective stripes and meets ANSI/ISEA 107-2004. *Class 2* clothing meets visibility requirements for workers who are on or near roadways. *Class 3* clothing meets visibility requirements for workers in high-risk areas that need to be seen by traffic at a minimum distance of 1,280 ft. *Class E* pants meet Class 3 requirements when worn with an ANSI Class 3 vest, shirt, or jacket.

When measuring chest size, measure around the fullest part of your chest. Find your waist size by measuring just above the top of your hip bone. Take all measurements over clothing you expect to wear under the garment.

Safety Vests—Made of polyester, except flame-resistant vests are acrylic. *Breakaway* have hook-and-loop fasteners at the shoulders, sides, and front to tear away easily if caught on machinery. *Flame-resistant* meets ASTM F1506. *Two-tone* have orange-trimmed stripes. *Expandable* have adjustable side snaps that fit up to two sizes larger.

T-Shirts, Sweatshirts, Jackets, and Pants—Standard T-shirts and sweatshirts are cotton/polyester blend. *Moisture-wicking* clothing is polyester. *Flame-resistant* clothing is acrylic and meets ASTM F1506. *Jackets* are waterproof polyester. They have a removable fleece liner, hood, zipper and snap closures, and four pockets. *Pants* are polyester.

★ For proper fit, order one size larger than indicated in the chart above.

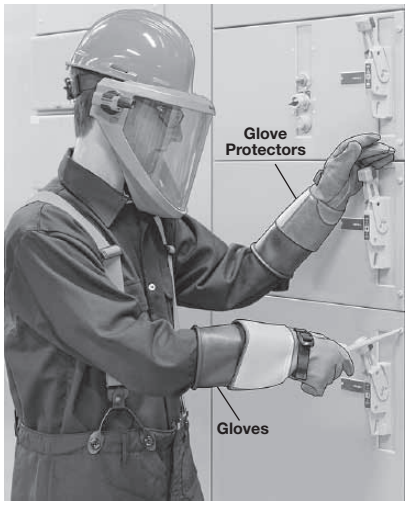
Electrical Protection Gloves & Blankets

Voltage Classifications

ASTM defines voltage classes for rubber insulating gloves, blankets, and sheeting. Before working with electrical equipment, make sure you have the right protection. First, identify the maximum voltage you will be exposed to. Then, match the voltage to one of the classes in the chart.

ASTM Class	00	0	1	2	3	4
AC Max. Use Volts	500	1,000	7,500	17,000	26,500	36,000

Electrical Protection Gloves



Gloves and Glove Protectors

Use when handling live electrical equipment. For glove sizing information, see page 1794.

Gloves are made of dielectric rubber. They're seamless and have rolled cuffs. All meet ASTM D120 and come tested and marked with the test date. You have one year from the test date to put gloves into service before they must be retested. Once in use, gloves should be tested every six months. Color is black. *Wear-indicating gloves* have a red or orange inner layer that shows through as the outer layer wears off, making it easy to inspect for cracks and pinholes.

Glove protectors are leather and must be worn over gloves for ASTM compliance when working with live electrical equipment. All have an open cuff. Protectors for Class 00 and 0 gloves are off white. Protectors for Class 1-4 gloves are red with orange cuffs.

			Gloves				*Glove Protectors*

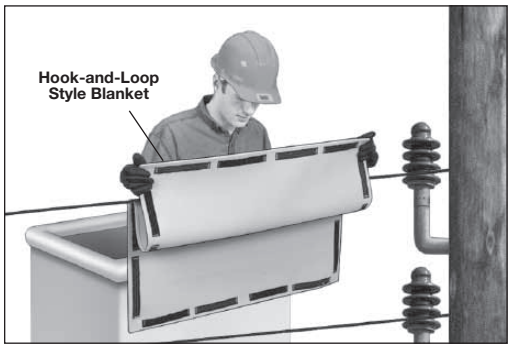
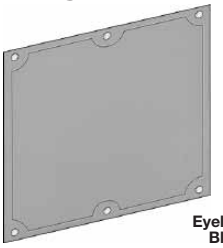
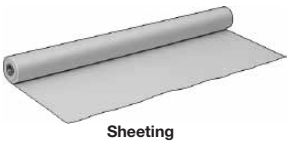
Electrical Protection Blankets and Sheeting



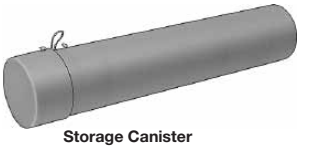


Eyelet-Style Blanket



Sheeting

Clamping Pin



Storage Canister

Blankets

Wrap these rubber blankets around power lines and electrical equipment to protect against contact with high voltage. Blankets meet ASTM D1048 specifications and come tested and marked with the test date. They should be tested once a year. Class 0 blanket is 1/16″ thick; Class 2 and 4 blankets are 1/8″ thick.

Hook-and-loop style blanket attaches with hook-and-loop strips.

Eyelet style blankets have six 5/8″ dia. eyelets and can be tied down to secure in place.

ASTM Class	Style	Wd.	Lg.	Color		
0	Hook-and-Loop	36″	36″	Yellow	5571T14	$203.29
2	Eyelet	36″	36″	Black	5571T12	204.56
4	Eyelet	36″	36″	Orange	5571T15	179.60

Sheeting

Cover irregularly shaped electrical hazards with this yellow neoprene rubber sheeting. It's flame and oil resistant and can be cut with scissors or a utility knife. Meets ASTM F2320.

ASTM Class	Wd.	Thick.	Full Roll		Per Ft.
0	36″	1/32″	30 ft.	87195K33	$26.99

Accessories

Clamping pin holds blankets in place and accommodates diameters up to 5″. It's fiberglass-reinforced nylon. *Storage canister* is polyethylene and stores up to four 36″×36″ blankets.

Clamping Pin	5571T24	$20.33
Storage Canister	6129T3	105.60

Electrical Arc Flash Protection Clothing

These garments provide protection from electrical arc flashes and are flame resistant. Gloves are sold separately on page 1818. Face shield is sold separately on page 1842.

Category 0-2—Made of a soft cotton blend, these garments meet ASTM F1506 and NFPA 70E for Category 0-2 protection.

Shirt has a button front and two pockets.

Pants have a button waist and four pockets.

Coveralls have a zipper front and seven pockets.

Category 3-4—Made of an aramid blend, these garments meet ASTM F1506 and NFPA 70E for Category 3-4 protection.

Coat has a hook-and-loop front.

Bib overalls have a hook-and-loop strap on the pant leg.

Coveralls have hook-and-loop closures on the sleeve and ankles.

Hood includes a hard hat with adjustable headgear and a polycarbonate face shield with an antifog coating.

Optional fan for hood mounts on your arc flash hood and pumps air inside using a fan motor. Operates on four AA batteries (not included).

NFPA Category	Common Tasks
0	Operation of a circuit breaker with panel covers on or off up to 240 volts.
1	Voltage testing or live installation of a circuit breaker in a panel up to 240 volts.
2	Work on energized conductors and circuit parts up to 600 volts.
3	Outdoor disconnect switch operation between 1,000 and 38,000 volts.
4	Work on energized parts, including voltage testing, in switchgears between 1,000 and 38,000 volts.

Electrical Protection Footwear

Slip this dielectric rubber footwear right over your work shoes for protection from electrical hazards. It meets ASTM F2413-05 and is tested to 20,000 volts AC. A deep heel cavity and antiskid sole give you good grip on ladder rungs and stair edges. Color is yellow and black. For information about footwear sizing, see page 1809.

	Ht.	Choose a Size		Pair
Overshoes	5″	7-13 (half sizes, except 12½)	50065T5	$128.51

High-Voltage Switch Operating Sticks

Also known as hot sticks, use these lightweight, insulated sticks to operate high-voltage switches from a safe distance. All are rated for 100,000 volts and meet ASTM F711 for live-line maintenance.

Fixed-length sticks are 1¼″ dia. and made of fiberglass bonded to a closed-cell polyurethane foam core. They have a bronze head. *Hanger for fixed-length sticks* has a bronze hook with stainless steel clamp for attaching to 1¼″ and 1½″ dia. sticks.

Telescoping sticks extend to multiple lengths. They have a nickel-plated steel head that can be rotated 180°. Sticks are approximately 2″ dia. at the base and 1¼″ at the tip. They are fiberglass reinforced plastic; tip has a rigid, closed-cell polyurethane foam core.

Welding Clothing

Cotton

These breathable cotton garments keep you cool while providing protection from minor sparks and low heat. Clothing is chemically treated for flame resistance.

Sleeves secure with elastic at both ends.
Pants have a zipper-fly front, belt loops, and four pockets.

	Lg.	Color	Choose a Size

Leather

Protect against heat, flames, and welding sparks and spatter better than cotton clothing. These flexible leather garments also resist cuts and abrasion.
Split-leg bib apron has three adjustable straps on each leg.

Chaps have snaps on the legs and an adjustable waistband.
Sleeves have snap closures on the wrist and an adjustable strap on the upper arm.

For sizing guidelines, see page 1820. For additional heat-resistant gloves, see page 1807.

Caps and Beanies

Keep dirt and dust off your head with these cotton caps and beanies. All are hand washable.

Caps have a fabric sweatband. Cap sizes: S (6⅞), M (7¼), L (7½), or XL (7¾).

Beanies are flame resistant to protect against sparks and spatter. Beanie sizes: M (6⅞-7⅛), L (7¼-7½), or XL (7⅝-7¾).

Flame-Resistant Hoods

Protect your head from sparks and incidental contact with flames. All hoods are soft, washable, and one size fits all.

Nomex hood offers moderate durability and flame resistance. Meets Cal/OSHA and NFPA 1971 standards.

PBI hood has better wear resistance than other hoods. Meets Cal/OSHA and NFPA 1971 standards.

Carbon X hood provides the best flame resistance of the hoods we carry. Meets NFPA 70E.

Material	Color		
Nomex	White	52655T15	$33.30
PBI	Brown	52655T14	35.51
Carbon X	Black	52655T17	42.37

Cooling Vests

Keep cool and comfortable in hot conditions.

Lightweight vest has an absorbent interior and a water-resistant liner to help keep your clothes dry. Soak it in cold water before wearing, and the vest provides cooling through evaporation for hours.

Heavy duty vest is made of flame-resistant cotton and has adjustable shoulder and waist straps. Complete vest comes with two removable single-cell cooling packs. Cool the packs by placing them in a freezer for 20 minutes. Once frozen they maintain a temperature of 55°F for approximately 3½ hours. Vest and set of two cooling packs weigh 6½ lbs. Fits up to size large.

Heat-Reflective Aluminized Clothing

Often used in steel mills, foundries, and glass plants, this aluminized clothing reflects radiant heat and protects against sparks and molten metal splashes. Garments have no pockets to trap hot particles and are oversized to fit over work clothes.

Apron has adjustable neck and waist straps.

Jacket, coat, and *coveralls* have snaps at the wrist and a flap front with snaps.

Pants have a snap fly and leather belt loops.

Hood with face shield uses an adjustable ratchet suspension to fit your head. There's enough room inside to wear glasses, goggles, or a respirator. The face shield is 7″×11″ clear polycarbonate.

Gloves are aluminized on the back of the cuff, hand, fingers, and thumb. All have a wool and cotton blend knit lining.

Boot covers have a flame-resistant cotton lining, polymer grip soles, and a zipper closure. They fit up to men's size 13.

General Purpose Rayon—Provides good radiant heat and moderate spark protection.

Abrasion-Resistant Kevlar Blend—Combines heat-resistant fibers with the excellent abrasion and cut resistance of Kevlar. Apron, jacket, coat, pants, and coveralls are Kevlar/fiberglass blend. Hood with face shield, gloves, and boot covers are Kevlar/Nomex blend.

Long-Life Carbon/Kevlar Blend—This heavyweight clothing lasts longer than Kevlar/Nomex blend clothing in comparable service.

High-Dexterity PBI Blend—Lighter weight than other aluminized clothing we carry, these garments offer good heat resistance without the bulk of Kevlar blend and carbon/Kevlar blend. They're also reinforced with Kevlar fibers for added strength.

Flame Resistant

In addition to being waterproof, these garments also stand up to oil and flames. They are mildew resistant and washable and meet ASTM D6413 for flame resistance. *Bib overalls* have adjustable elastic suspenders. *Jacket* and *coat* have a snap front with a storm flap, plus collar snaps for the detachable hood. *Hooded jacket* has a snap front with double storm flaps. *Hooded coveralls* have a snap front.

Chemical-resistant PVC-coated polyester clothing protects against incidental contact with acids, chemicals, and solvents. It meets ASTM F903 for resistance to penetration by liquids.

Umbrellas

Don't throw caution to the wind on a rainy day. These sturdy umbrellas have a wide double canopy and withstand gusts up to 55 mph.

Compact umbrella has a reinforced steel shaft. **Golf** umbrella has a strong yet lightweight fiberglass shaft.

Umbrella stand and wall-mount umbrella bag holder are aluminum with a satin finish. The stand has 12 slots and holds both compact and golf umbrellas. The bag holder has four 3/8" mounting holes (fasteners not included). Bags are sold separately.

Life Preserver Rings and Flotation Vests

Work safely near water with these flotation aids. Vests have reflective tape panels, except heat-resistant vest. They are international safety orange, except high-visibility mesh-top vest is fluorescent green.

Life preserver ring is molded polyethylene to resist oils and common chemicals. A 10-ft long floating polypropylene rope is attached.

Standard vest has a nylon shell.

Adjustable vest has three-piece construction and straps that adjust for a sure fit. It has a PVC shell.

Mesh-top and **high-visibility mesh-top vests** keep you cool with a breathable mesh upper half. They have a nylon/polyester shell.

Flotation-collar vest provides extra protection by supporting the neck and head. It has a nylon shell and breathable mesh lining.

Heat-resistant vest has a tough fiberglass shell that resists high temperatures during marine welding and similar applications. It has a zipper front and moisture-wicking mesh lining.

Inflatable vest is lightweight and provides good mobility. It has a CO_2 cylinder that inflates the vest automatically when submerged in water. You can also inflate it manually. Vest has a nylon shell.

Rearm kit for inflatable vest includes a CO_2 cylinder and other replacement components.

Protective Base Layers

Wear under clothing for added comfort and protection. **Warm-weather** garments wick away moisture and are vented and UV resistant. **Cold-weather** garments are a fitted rib knit fabric that traps heat while allowing perspiration to escape. **Flame-resistant** garments won't burn or melt when exposed to radiant heat and flames. They also resist molten metal splashes. **Arc-flash resistant** garments meet ASTM F1506 for protection against electrical hazards. They have an arc rating of 12.2 cal/cm^2. **Cut-resistant** garments protect you from scratches and cuts when working around sharp-edged objects. For more information about cut-resistance levels, see page 1804.

Cold-Resistant Clothing

Comfort Fit — **Lightweight** — **Heavyweight** — **Abrasion Resistant**

Hooded Sweatshirt | **Jacket** | **Coveralls** | **Coat with Detachable Hood and Bib Overalls** | **Parka and Face Mask** | **Hooded Coveralls** | **Hooded Jacket and Bib Overalls** | **Coveralls**

Comfort-fit garments combine the comfort of a sweatshirt with the ruggedness of a jacket. They have a zipper front and knit bottom and cuffs.

Lightweight garments protect you from cold and windy weather while offering greater mobility than heavyweight nylon clothing. *Jacket* has a water-resistant outer shell, lining, fiberfill insulation, and a zipper front. *Coveralls* are lined and have fiberfill insulation and a snap front.

Heavyweight garments keep you warm in bitterly cold conditions. All have a water-resistant outer shell, fiberfill insulation, and are lined, except face mask has no insulation or lining. *Coat* and *parka* have snaps on the collar for the detachable hood. *Bib overalls* and *hooded coveralls* have a knee-to-ankle zipper with a storm flap on each leg. Bib overalls also have adjustable elastic suspenders. *Face mask* is stretchable thermal knit and covers the entire head and neck. It includes a detachable quilted face piece to protect the mouth.

Abrasion-resistant garments withstand scrapes and scratches. All have polyester insulation and a quilted lining. *Hooded jacket* has a zipper front and inside pocket. *Bib overalls* have adjustable elastic suspenders and a knee-to-ankle zipper with a storm flap on each leg. *Coveralls* have a zipper front and hip-to-ankle zipper with a snap storm flap on each leg.

Tethering Belts and Lanyards—Not for Use as Fall-Arrest Equipment

Keep workers away from areas of potential free fall by restricting travel to within a certain distance from an anchor point. A belt and lanyard must be used together.

Single-Ring Belt

Dual-Ring Belt

Lanyard

Belts

All belts have a steel buckle, steel D-rings, and polyester webbing.

Max. Cap., lbs.	Choose a Size		
Single Ring			
310	S (31″-39″), M (35″-43″), L (39″-47″), XL (42″-50″)	8062T333	$51.93
Dual Ring			
310	S (32″-40″), M (36″-44″), L (40″-48″), XL (44″-52″)	7920T54	57.89

Lanyards

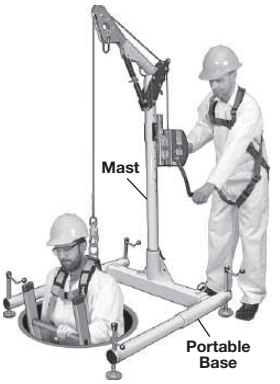
Lanyards are made of polyester webbing and have steel snap hooks.

	Length	Max. Cap., lbs.	Snap Hook Opening Size		
Standard	6 ft.	310	5/8″	8227T34	$45.94
Adjustable	6 ft. to 10 ft.	310	5/8″	8227T44	53.36

Fall-Arrest Anchor Points with Winch

This system provides support when lowering workers into and retrieving them from tight spaces. Use the hand-operated winch to control lifting and lowering. The overall system height adjusts from 79″ to 100″. The mast arm extends from 12″ to 29″. Maximum capacity is 350 lbs. When used properly, the system helps you comply with ANSI Z359.1 and A10.32.

You supply a harness (see page 1827). The system is aluminum with a 65-ft. galvanized steel wire rope and a steel snap hook. It comes with an adjustable mast and a separate portable base. For fixed-base installation, use the *optional wall-mount* or *floor-mount base*—weld or bolt the base to a concrete or steel structure and insert the mast into the opening. The bases are stainless steel and have four 13/16″ mounting holes (fasteners not included).



Wall-Mount Base

Floor-Mount Base

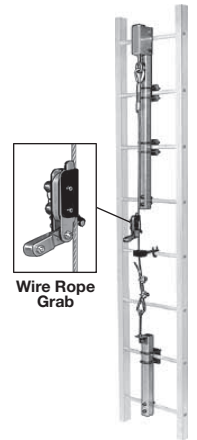
Fall-Arrest Anchor Point with Winch	8165T11	$5,665.16
Optional Wall-Mount Base	8165T13	905.26
Optional Floor-Mount Base	8165T12	972.47

Vertical Fall-Arrest Anchor Spans

Vertical fall-arrest anchor spans, also known as vertical lifelines, are commonly used when working around suspended scaffolding or beams. Attach the snap hook at one end of the rope to an overhead anchor point. You supply a harness (see page 1827) as well as a lanyard with rope grab (sold separately below). In the event of a fall, the rope grab stops you within inches. Maximum capacity is 310 lbs. When used properly, anchor spans meet ANSI Z359.1 and applicable OSHA standards.

Vertical fall-arrest anchor spans for ladders protect against falls while climbing ladders. They install on ladders that have a 1 1/4″ maximum rung dia. (mounting hardware included). These anchor spans have adjustable clamp brackets and secure permanently with an eyebolt on each end. You supply a harness and carabiner (both sold separately on page 1827) as well as a wire rope grab (sold separately below). In the event of a fall, the rope grab stops you within inches. Anchor spans accommodate up to four people at one time. Maximum capacity is 310 lbs. per person. When used properly, anchor spans meet ANSI A14.3.

Vertical Fall-Arrest Anchor Span

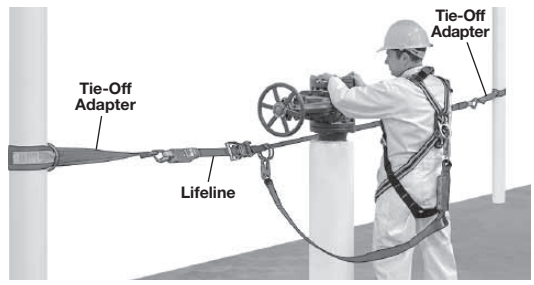


Vertical Fall-Arrest Anchor Span for Ladders

Vertical Fall-Arrest Anchor Spans		
50 ft. Polyester Rope	1004N1	$100.50
100 ft. Polyester Rope	1004N2	156.33
Required 3 ft. Polyester Webbing Lanyard with Rope Grab	1004N5	173.08
Vertical Fall-Arrest Anchor Spans for Ladders		
50 ft. Steel Wire Rope	8272T61	235.00
100 ft. Steel Wire Rope	8272T62	324.64
Required Wire Rope Grab	8272T73	150.00

Horizontal Fall-Arrest Anchor Spans

Also known as horizontal lifelines, these provide fall protection when overhead anchors aren't available. Attach the 60-ft. anchor span to an anchor point on both sides using the snap hooks, or use the included tie-off adapters for wrap-around anchoring. Anchor span and adapters are polyester webbing. Anchor spans include a built-in shock absorber. You supply a lanyard (see page 1826) and a harness (see page 1827). Up to two people can use the system at one time. Maximum capacity is 310 lbs. per person. When used properly, anchor spans meet applicable OSHA requirements.



Horizontal Fall-Arrest Anchor Span	1004N6	$434.38

Fall-Arrest & Tool Lanyards

Quick-Stop Fall-Arrest Lanyards

Stop your fall within a few inches. These self retracting lanyards swivel to prevent tangling and provide excellent mobility. They must be used when you have less than 18½ ft. of fall clearance. A complete fall-arrest system requires a lanyard, a harness, and an anchor. When used properly, the system meets ANSI Z359.1 and applicable OSHA requirements.

Use the *shock-absorbing attachment* (sold separately) to increase the capacity of 310-lb. polyester webbing lanyards to 400 lbs.

Lanyards—*Single-leg* lanyards have a steel snap hook with a ¾″ opening and require a carabiner to connect to a harness. *Dual-leg* lanyard attaches to two anchors at once. It has two steel snap hooks with ¾″ openings.

Lanyards with Anchor Point—These lanyards form their own anchor point by attaching directly to a rated structure. *Hook-over single-leg* lanyard has a large snap hook that attaches directly to a rated structure such as a scaffold or pipe to create an anchor point. Snap hook opening is 2½″. *Wrap-around single-leg* lanyard loops around a rated structure such as an I-beam and then attaches to itself to create an anchor point. It has a steel snap hook at each end with a ¾″ opening.

			Lanyards				Lanyards with Anchor Point

30 ft.	310	Aluminum/Plastic	8091T65	1,033.71						
50 ft.	420	Aluminum/Stainless Steel	8091T57	1,829.47						

Shock-Absorbing Fall-Arrest Lanyards

These lanyards absorb the force from a fall better than quick-stop lanyards, but don't stop you as quickly. For adequate fall clearance, you must have at least 20 ft. of clearance. A complete fall-arrest system requires a lanyard, a harness, and an anchor. When used properly, the system meets applicable OSHA requirements. 310-lb. capacity lanyards also meet ANSI Z359.1, except steel lanyards meet ANSI Z359.13.

Polyester/elastomer lanyards expand and contract with your movements. **Steel** lanyards hold up in abrasive and high heat applications. **Kevlar** lanyards meet ASTM F887-05 when used with an arc flash resistant harness.

Lanyards—*Single-leg* lanyards have a steel snap hook at each end with a ¾″ opening. *Dual-leg* lanyards attach to two anchors at once. They have a steel snap hook at each end with a ¾″ opening.

Lanyards with Anchor Point—*Hook-over single-leg* lanyards have a large snap hook that attaches directly to a rated structure such as a scaffold or pipe to create an anchor point. They have one steel snap hook with a ¾″ opening and one steel snap hook with a 2½″ opening. *Wrap-around single-leg* lanyards loop around a rated structure such as an I-beam and then attach to themselves to create an anchor point. They have a steel snap hook at each end with a ¾″ opening.

Hard-Hat Lanyard				1009N81	3.92

Fall-Arrest Harnesses

Harnesses have a D-ring on the back that attaches to a lanyard. A complete fall-arrest system requires a lanyard, a harness, and an anchor. When used properly, the system meets ANSI Z359 and applicable OSHA standards.

Polyester/elastomer harnesses expand and contract with your movements.

For Fall Arrest—*Heat-resistant* harness withstands temperatures up to 700° F. *Electrical arc flash resistant* harness has leather-insulated metal components and meets ASTM F887-05 when used with an arc flash resistant lanyard.

For Fall Arrest and Extracting—These harnesses have one additional D-ring on each shoulder to raise or lower workers.

For Fall Arrest and Positioning—These harnesses have one additional D-ring on each hip to provide a stable working position.

For Fall Arrest, Ladder Climbing, and Positioning—These harnesses have an additional D-ring on the chest for use with ladder-climbing systems (attach harness to the system using a carabiner). Another D-ring on each hip provides a stable working position.

Accessories—*Harness webbing ring* attaches to a harness to keep excess lanyard webbing out of the way. *Leg support strap* attaches to a harness and has a foot loop so workers can flex legs while suspended and prevent suspension trauma when hanging motionless. *18″ D-ring extension strap* has a snap hook on one end and a D-ring on the other to add length to the existing D-ring on a harness and make it easier to attach a fall-arrest lanyard. *Suspension seat* is for lifting workers into hard-to-access areas.

Fall-Arrest Anchor Points and Carabiners

Webbing boom strap attaches to the arm of a bucket truck. The strap has a cinching buckle for a snug, nonslip fit. **Nail-on anchor point** includes fasteners. **Bolt-on anchor point** has 9/16″ mounting holes (fasteners not included). **Push-in anchor point** is good for vertical and horizontal concrete applications. Install into a drilled 3/4″ dia. mounting hole. **Stationary I-beam anchor point** works with vertical and horizontal I-beams. **Steel glide-along I-beam anchor point** provides the best mobility with smooth wheel bearings.

Shower Stations

Connect to your facility's plumbing and use a mixing valve (sold separately on page 1829) to ensure water flows at a comfortable temperature. Stations include an identification sign. They meet ANSI Z358.1 when properly installed.

Showers

Wall Mount

Ceiling Mount

Floor Mount

All have a 10″ dia. shower head. The all stainless steel station has excellent chemical and corrosion resistance for use in harsh environments.

Wall- and ceiling-mount showers have a 1 NPT female supply connection.

Floor-mount showers have a 1¼ NPT female supply connection and a floor-mounting flange (fasteners not included).

Material					Floor Mount	
Pipe	Valve	Head	Wall Mount	Ceiling Mount	Mounting Hole Dia.

Showers with Eye Wash

Open Bowl

Covered Bowl

Without Bowl

Optional Spray Hose

These floor-mount stations combine a shower with an eye wash for convenience. They have a 10″ dia. shower head and dual spray heads, unless noted. Bowl is 11½″ dia. Pipe connections are 1¼ NPT female, except stations with PVC components have female socket weld connections with a pipe size of 2. The stations without a bowl do not have drain connections and should be used in areas with a floor drain. Stations with eye and face coverage provide greater flow than stations with eye coverage.

PVC components withstand harsh acids and other caustic chemicals.

Stainless steel components have excellent chemical and corrosion resistance.

Optional spray hose allows you to rinse your eye, face, or any part of your body. It has a squeeze handle. Mounts with a ½ NPT male connection. Valve is chrome-plated brass.

★Eye/Face Wash has four spray heads.

Freeze-Resistant Shower Stations with Eye Wash

Through-the-Wall Station

Heated Station

For use in cold environments, these stations connect to your facility's plumbing and drain automatically to prevent the pipes from freezing. They do not have a bowl. Shower head is 8″ dia. and made of ABS. Pipe is galvanized steel. All stations meet ANSI Z358.1 when properly installed.

Through-the-wall station is for use with walls up to 12¾″ thick. You can install the shower head and eye wash in an unheated area, but the valve must be installed indoors to keep water flowing at a comfortable temperature. Valve is chrome-plated bronze and pipe is galvanized steel. Shower has a 1¼ NPT female supply connection; eye wash has a ½ NPT female supply connection.

Heated floor-mount station can be fully exposed to the elements without freezing in temperatures as low as -50° F. Housed in a water- and dust-tight junction box with a pilot light, the thermostat keeps the water at a comfortable temperature. Thermostat has a temperature range of 60° to 70° F, operates on 120 volts AC, and has three wire leads for hardwiring. Junction box meets NEMA 4X for outdoor use and washdown environments. Valve and spray arms are chrome-plated brass. Station has 1 NPT male supply connections. Mounting flange has ½″ dia. mounting holes (fasteners not included).

Hazardous-location heated floor-mount station has the same specifications as the heated station and is also FM approved for Class I, Division 2, Groups B, C, and D hazardous locations.

Through-the-Wall Station	9120T58	$1,265.54
Heated Floor-Mount Station	9789T45	3,486.21
Hazardous-Location Heated Floor-Mount Station	9789T47	3,765.52

ANSI-Compliant Eye Wash Stations with Pipe Connection

Wall Mount with Open Bowl

Wall Mount with Covered Bowl

Floor Mount with Open Bowl (Shown with Spray Hose)

Sink Mount (Swing Left)

Sink Mount (Swing Down)

Hand Held (Wall Mount)

Hand Held (Wall Mount with Self-Retracting Hose)

Once connected to your facility's plumbing, these stations require very little maintenance to comply with ANSI standards. Use a mixing valve (sold separately) to ensure water flows at a comfortable temperature. All stations meet ANSI Z358.1 when properly installed. Bowls are 11¾″ dia. Stations with eye and face coverage provide greater flow than stations with eye coverage. Stations made of stainless steel withstand corrosive chemicals.

Wall Mount—All stations have a ½ NPT female supply connection and a flag handle to activate water flow. *Open bowl* and *covered bowl* stations have a 1¼ NPT female drain connection and mounting bracket with ⅜″ dia. holes; *without bowl* stations have a mounting bracket with 7⁄16″ dia. holes. Fasteners not included.

Floor Mount—Bolt in the floor-mount flange to use these free-standing stations. They have a ½ NPT female supply connection and a 1¼ NPT female drain connection. The mounting flange has 7⁄16″ dia. holes (fasteners not included).

Optional spray hose attaches to an eye wash station to rinse your eyes, face, or any part of your body.

Sink Mount—Mount these stations next to a sink—water flow is activated by swinging the unit 90° from the storage position. *Swing-left* and *swing-right* stations have a ½ NPT female supply connection. *Swing-down* station has a ½ NPT male supply connection.

Hand Held—The hose gives you longer reach than other eye wash stations. Direct the flow of water to rinse any part of your face or body. Valve and arms are chrome-plated brass. *Bench-mount* hose requires a 1⅜″ dia. cutout. *Wall-mount* styles have ¼″ dia. holes (fasteners not included).

ANSI-Compliant Portable Eye Wash Stations

For jobs that require mobility, these stations deliver a continuous flow of water without plumbing. They meet ANSI Z358.1. Tank is 304 stainless steel and has a pressure relief valve. Eye wash unit has two spray heads and a valve. The 6-ft. PVC spray hose has a squeeze handle. To operate, fill the reservoir with water and add the included 8-oz. bottle of water additive. After filling with water, pressurize the unit to 80 psi.

Freeze-resistant station has a thermostat that keeps water at a comfortable 65°F in environments as cold as -20°F. Station operates on 120 volts AC and has a 9-ft. cord with plug.

	Change Cycle	Dia.	Ht.	Capacity		
Standard	6 mo.	16″	39″	15 gal.	5420T23	$1,034.00
Freeze Resistant	6 mo.	18″	40″	15 gal.	5420T24	1,844.69
Water Additive (8 oz.)					54285T29	12.67

ANSI-Compliant Stand-Alone Eye Wash Stations

Standard

No plumbing required—surface mount these eye washes wherever an ANSI-compliant station is needed. All meet ANSI Z358.1. Stations are green polyethylene.

Mix-your-own refills require water; pour the refill into the tank and then fill with water. Choose from an 8-oz. bottle of water additive or a 1.4-gal. bottle of saline concentrate.

Ready-to-use refills don't need mixing. Saline bottle for standard and freeze-resistant stations is 1 gal. (requires 16 to fill tank); saline cartridge for easy-maintenance station is 6.9 gal. (requires one).

Standard

This station comes with one 8-oz. bottle of water additive. It is 20½" Ht.×22" Wd.×20" Dp. Wall mount using the included bracket with ¼" dia. holes (fasteners not included).

Eye wash fluid container captures used eye wash fluid. Container is polyethylene. Size is 33" Ht.×17" Wd.×18" Dp.

Supplemental Eye Wash Stations

Use these eye washes in addition to an ANSI-compliant station for areas that need immediate access to eye wash.

Wall-Mount Eye Wash Stations with Bottles

Mount these stations in a convenient location. They come with polyethylene squeeze bottles.

Stations with standard bottles have bottles that flood the eye with solution and come sealed with a tamper-evident tab. Stations include mounting fasteners.

Stations with directed-stream bottles have bottles with a built-in eye cup that concentrates the flow of solution over the eye. Ready-to-use saline solution is sold separately. Stations have 1/4" dia. mounting holes (fasteners not included).

Wall-Mount Eye Wash Stations with Reservoir

The 1-gal. station includes a ready-to-use saline cartridge.

The 6-gal. station comes with saline concentrate. Use the concentrate or an 8-oz. bottle of water additive (sold separately) and then fill reservoir with water. Station includes a mounting bracket with 1/4" dia. holes (fasteners not included). *Eye wash fluid container* captures used eye wash fluid.

Faucet-Mount Eye Wash Stations

Transform your sink into an eye wash station. Stations come ready to attach to your faucet. To install, remove the aerator and thread the eye wash onto the faucet. Adapters for different aerator sizes are included. An on/off valve allows the faucet to function normally after installation.

CPR Mouth Shields

The one-way valve on the mouth shield protects rescuer from victim's breath and fluids. Mouth shield is clear plastic and allows you to view victim's coloring and inspect for airway blockage. Not for use on children under 12.

Shield kit includes a shield, a pair of latex gloves, and four alcohol wipes.

Shield	55965T54	$9.43
Shield Kit	55965T55	11.69

First-Aid Cases

Steel

Take your supplies anywhere in one of these convenient carrying cases. All are white and have 3/8″ dia. mounting holes (fasteners not included). Cases with a gasketed lid are water resistant and keep contents dry.

Steel cases have a divider.

	Overall Size Ht.	Wd.	Dp.		
Plastic with Gasketed Lid	4 3/4″	8 1/2″	3 1/4″	41035T16	$3.28
Steel with Gasketed Lid	9 1/8″	6 3/8″	2 3/8″	41035T17	17.05
Steel	10 1/4″	14 3/4″	4 5/8″	41035T18	31.80

Bodily Fluid Cleanup Kit

Safely and effectively clean up infectious material and fluids in compliance with OSHA requirements.

Kit contains a barrier gown, one pair of goggles, one pair of vinyl gloves, one pair of shoe covers, a surgical-style mask, two antimicrobial towelettes, absorbent compound, a scoop, surface disinfectant, two paper towels, an incident report sheet, and a biohazard disposal bag. Furnished in a polypropylene carrying case with 3/8″ dia. mounting holes (fasteners not included).

Overall Size, Ht.×Wd.×Dp.		
7″×10″×3″	14935T21	$23.46

Wall-Mount Shelf Cabinets with Clear-View Door

One Door

Keep an eye on inventory without opening the doors. These wall-mount cabinets have a lock and two keys.

Cabinet with one door is made of steel with a white powder-coated finish and 3/8″ dia. keyholes for mounting (fasteners not included). It has three welded shelves, plus a pull-out shelf at the base that can be used as a work area.

Cabinet with two doors is made of steel with a beige painted finish and 1/4″ dia. keyholes for mounting. Fasteners are included.

	O'all Size Ht.	Wd.	Dp.		
One Door	27″	18″	8″	5573T1	$202.90

Pop-Up Shelters

With One Door

With Two Doors

Pop out the two tension frames and these shelters are ready to protect you from rain, snow, sun, and wind. The shelter fabric is urethane-coated polyester and is flame retardant to meet Canvas Products Association International CPAI-84. All have a zippered slit door, a netted window on the rear wall, a 10″ dia. vent port, and a built-in carrying case. Color is white with high-visibility green lower side walls.

Shelters with two doors also have a zippered roll-up door.

Fold-Away Beds

A 1¾″ thick foam mattress makes this bed a comfortable yet practical choice. Frame is steel. Overall size is 80″ Lg.×30″ Wd.×15″ Ht.; folded size is 40″ Lg.×31″ Wd.×5½″ Ht. Maximum weight capacity is 300 lbs.

Bed	9105T45	$98.77
Blanket, 60″×90″	9105T27	8.03
Pillow, 17″×23″	9105T29	14.90

Blood Pressure Monitors

Get precise readings of blood pressure and pulse rates. Monitor can store 60 readings each for up to four people. The cuff fits arm circumferences from 8⅝″ to 16½″. Operates on 120 volts AC power adapter (included) or four AA batteries (not included).

Overall Size Lg.	Wd.	Ht.		
5½″	4⅛″	2⅜″	5261T15	$90.83
AA Batteries (Pkg. of 4)			71455K53	2.94

Stretchers

Fold-up stretcher folds lengthwise and in half for easy storage. Good for moving injury victims a short distance. It has sturdy aluminum poles and a durable fabric cover. Overall size is 87″ Lg.×22″ Wd.×4½″ Ht. Maximum weight capacity is 350 lbs.

Fold-up stretcher kit includes a stretcher, a 62″×82″ wool-blend blanket, and a 54″×75″ vinyl sheet. Kit comes in a white steel storage cabinet. Cabinet is 47¾″ Ht.×8⅝″ Wd.×6½″ Dp. and has ¼″ dia. holes for wall mounting (fasteners not included).

Basket stretcher provides superior comfort and security for transporting injury victims extended distances. It has four restraining straps and an adjustable footrest. Stretcher is 80½″ Lg.×22½″ Wd.× 8″ Ht. and made of steel. Maximum weight capacity is 1,500 lbs.

Fold-Up Stretcher Kit	5522T3	445.00
Cabinet Only	5522T31	166.00
Basket Stretcher	5522T47	294.00

CamelBak Water Backpack

Stay hydrated while working outdoors or in other high-heat environments. These lightweight backpacks have an easy-to-fill reservoir with a delivery tube that supplies water to you.

Cleaning brush set includes a large brush for cleaning the reservoir and a small brush for cleaning the delivery tube.

50-oz. Capacity	6229T1	$49.30
70-oz. Capacity	6229T3	67.00
Cleaning Brush Set	6229T4	11.56

Back-Support Belts

Belts

Nylon

Elastic Polyester with Shoulder Straps

Belts with Lumbar Support

Polyester

Leather

Nylon w/ Shoulder Straps

Give your back the extra support it needs for lifting and other strenuous activities. Belts with *elastic* contain spandex, a breathable, lightweight material that stretches to conform to your shape. Belts *with shoulder straps* have reinforcements around the waist to retain the belt's shape and maintain comfort.

Warning: Not for fall protection.

To Order: Please specify size based on waist measurement (see chart). Also specify color where necessary.

Belts—*Elastic polyester belt with shoulder straps* has spandex tensioners. *Elastic nylon belt with shoulder straps* has polypropylene reinforcements.

Belts with Lumbar Support—All have a protective pad for lower-back support except the *elastic nylon belt with shoulder straps,* which has steel reinforcements. *Nylon belt with shoulder straps* has elastic tensioners. *Leather* belts are cushioned with a soft suede lining.

Wrist Supports

Open, Wrap-On

Thumb Strap, Slip-On

Molded

Limit wrist movement and maintain a safe, neutral position. All supports are ambidextrous.

Flexible supports are made of an elastic rayon/cotton blend fabric for a snug fit. Color is beige. *Thumb-strap* style positions and secures the wrist and hand. ***Wrap-on*** has a hook-and-loop closure.

To Order: Measure around the smallest part of your wrist and specify size (except for wrap-on open support): S (5½″-6½″), M (6¾″-7½″), L (7¾″-8½″).

Molded supports cradle your wrist to prevent and alleviate the symptoms of carpal tunnel syndrome. They're 5″ long foam with an aluminum core for rigidity. They have a 2″ wide elastic strap with hook-and-loop closure. One size fits all.

		Each 1-9	Each 10-Up

Elbow Supports

Prevent "tennis elbow" injuries caused by overflexing and straining forearm muscles. This adjustable black polyester support is 2″ wide and has a hook-and-loop closure. One size fits all.

52625T1 ..... **Each** 1-4 $7.17 5-Up $6.62

Ankle and Knee Supports

Ankle Support

Open Knee Support

Nylon-covered neoprene retains warmth and braces sore muscles to encourage healing.

Ankle supports are beige. Size is based on your shoe size.

Knee supports are black. For size, measure around your leg at the kneecap. *Open knee supports* limit pressure on the kneecap.

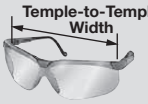
About Safety Glasses

The following applies to all of our safety glasses, unless noted:

- Meet ANSI Z87.1-2003 high-impact standards
- Provide 99% or greater UV protection
- Lenses are polycarbonate



Wraparound Safety Glasses

Semi-mirrored lenses are clear with a slight mirror coating for varying light conditions.
Mirrored lenses reflect the most sunlight.

Regular Lenses

- Scratch-resistant lenses
- Adjustable arm length
- 5½″ temple-to-temple width
- Polycarbonate/ABS frame; nylon arms

Lens Color/Finish	Glasses: Black Frame	Glasses: Blue Frame		Repl. Lenses	
Clear	9741T411	9741T412	$7.69	9741T51	$5.10

Wraparound Safety Glasses with Interchangeable Lenses

- Scratch-resistant lenses
- Adjustable arm length
- 5¼″ temple-to-temple width
- Polyurethane frame; nylon arms

Switch out lenses to change the look of your glasses. Lenses are interchangeable. The adjustable tilt at the hinges allows you to angle the glasses toward or away from the cheeks for a comfortable fit.

Lens Color/Finish	Frame Color	Glasses		Repl. Lenses	
Clear	Black	1696T63	$8.08		
Clear/Fog Free	Black	1696T64	8.83	1696T78	$5.44

Comfort-Fit Wraparound Safety Glasses

- Scratch-resistant lenses
- Adjustable arm length
- Temple-to-temple width: 5⅛″ for regular lenses; 5¼″ for oversized lenses
- Polycarbonate frame; nylon arms

A padded frame makes these glasses the ultimate in comfort. They are ventilated to increase airflow and reduce moisture buildup. The adjustable tilt at the hinges allows you to angle the glasses toward or away from the cheeks for a comfortable fit.

Semi-mirrored lenses are clear with a slight mirror coating for varying light conditions.

Mirrored lenses reflect the most sunlight.

Lens Cleaning Stations and Wipes

Silicone solutions provide better antifog properties.
Silicone-free solutions are for use in applications where silicone could cause contamination such as auto and paint facilities.

Disposable Stations

All include a pump bottle of antifog/antistatic solution and tissues. Stations are designed for wall mounting and don't include fasteners.

Cardboard stations have 5/8" dia. mounting holes.

Plastic stations have 1/2" dia. mounting holes and include tape with adhesive on both sides.

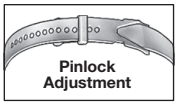
Face Shields

Face Shield

Face Shield with Chin Guard



These face shields meet ANSI Z87.1-2003 high-impact standards when worn with safety glasses or goggles.
Pinlock adjustment consists of interlocking straps.
Ratchet adjustment has an easy-turn knob.
Polycarbonate lenses have greater impact resistance than acetate lenses. *Green* lenses reduce glare.

Face Shields with Protective Coating

Face Shield

Face Shield with Chin Guard

The lens on these face shields is coated for an added level of protection. All have an 8″ Ht. × 14″ Wd. × 0.08″ Thick. polycarbonate lens that's oil resistant. They have a ratchet adjustment with an easy-turn knob to fit head sizes 6½ to 8. Meet ANSI Z87.1-2003 high-impact standards when worn with safety glasses or goggles.
Scratch-resistant face shields have a coating that extends the lens life.
Chemical-resistant face shields resist mild acids and most chemicals.
Heat-reflective face shields reflect radiant heat to keep your face cooler.

Hard-Hat Mount Face Shields

Acetate and Polycarbonate

Steel Wire Mesh

Attach these to the brim of cap-style hard hats (not included; see page 1846) to provide full-face protection. Face shields meet ANSI Z87.1-2003 when worn with safety glasses or goggles (acetate and steel wire meet basic-impact standards; polycarbonate meet high-impact standards).
Steel wire mesh lens provides increased ventilation during high-heat jobs.
Nylon bracket is nonconductive.
Gasketed nylon bracket provides a seal between the lens and your hard hat.
Gold-anodized aluminum bracket provides heat and corrosion resistance.

Face Shields for Electrical Work

Provide protection from low-level arc flash hazards when a full hood is not necessary. This face shield has an arc rating of 12 cal/cm². It has an 8″ Ht. × 14″ Wd. × 0.1″ Thick. green, fog-free polycarbonate lens with a scratch-resistant coating. Shield has a ratchet adjustment with an easy-turn knob to fit head sizes 6½ to 8. A chin guard and side shield offer added protection. Meets ASTM F-2178, NFPA 70E for Category 0-2 protection, and ANSI Z87.1-2003 high-impact standards when worn with safety glasses or goggles.

Face Shield	3942T47	$86.50

Hard Hats with Face Shield and Earmuffs

These hard hats give all-in-one head, face, and ear protection. Face shield has an 8″ Ht. × 15½″ Wd. × 0.040″ Thick. clear polycarbonate lens that meets ANSI Z87.1-1989. Hard hat is cap style and made of orange ABS plastic. Hard hats are Type 1, Class E, meaning they protect against blows to the top of the head only and are proof-tested at 20,000 volts. They meet ANSI Z89.1-1997. All have a ratchet suspension that adjusts with an easy-turn knob to fit head sizes 6 to 9. Earmuffs have a noise reduction rating (NRR) of 22 dB and meet ANSI S3.19-1974. Lift the face shield and earmuffs when not in use.

Optional steel wire mesh lens is 6¾″ Ht. × 12″ Wd. and meets ANSI Z87.1-1989.

Hard Hat with Face Shield and Earmuffs	5191T61	$45.00

Replacement Polycarbonate Lens	5191T62	4.29
Replacement Face Shield Bracket	5191T77	8.43
Replacement Earmuffs	5191T75	24.14

Air-Circulating Face Shields

A built-in, low-noise fan creates a constant flow of filtered air across your face for protection from wood dust particles. Meets ANSI Z87.1-2010 high-impact standards. Face shield has a 7″ Ht. × 12″ Wd. × 0.04″ Thick. clear polycarbonate lens and a ratchet adjustment with an easy-turn knob to fit head sizes 6⅜ to 7¾. It includes a lens cover, filter, rechargeable battery, 120V AC charger, and a carrying case.

About Selecting Welding Shades

The guidelines below are for common welding applications and are based on American National Standards Institute/Accredited Standards Committee (ANSI/ASC) Z49.1-2005.

Arc Current, amps	Minimum Shade No.	Suggested Shade No.
Shielded Metal Arc Welding		
60 to 160	8	10
160 to 250	10	12
Gas Metal Arc Welding (MIG)		
60 to 160	10	11
160 to 250	10	12
Gas Tungsten Arc Welding (TIG)		
Less than 150	8	12
150 to 500	10	14
Torch Brazing		
_____	___	3 to 4

Arc Current, amps	Minimum Shade No.	Suggested Shade No.
Air Carbon Arc Cutting		
Less than 500	10	12
Plasma Arc Welding		
Less than 20	6	6 to 8
20-100	8	10
100-400	10	12
Plasma Arc Cutting		
Less than 300	8	9
300 to 400	9	12

Plate Thickness	Minimum Shade No.	Suggested Shade No.
Gas Welding		
Less than ⅛″	___	4 to 5
⅛″ to ½″	___	5 to 6
Greater than ½″	___	6 to 8
Oxygen Cutting		
Less than 1″	___	3 to 4
1″ to 6″	___	4 to 5
Greater than 6″	___	5 to 6

Welding Glasses

Protect your eyes during welding jobs. These glasses have green polycarbonate lenses and a brow guard for added protection. Meet ANSI Z87.1-2003 high-impact standards.

Comfort-fit wraparound glasses have a padded frame and nosepiece for added comfort. Frame and arms are black polycarbonate. Arm length is adjustable.

Panoramic and **eyeglass-fit panoramic** glasses have a black nylon frame and arms. Arm length is adjustable. *Eyeglass-fit* can be worn over your prescription eyeglasses.

Magnifying glasses have magnifiers at the bottom of the lenses, a black nylon frame and arms, and a padded nosepiece for comfort. For information about magnification, see page 2320.

Welding Helmets

Style A with Fixed Lens

Style B with Flip-Up Lens

Style C with Fixed Lens

Style D with Fixed Lens

Style E with Flip-Up Lens

Helmets include a polycarbonate filter lens with an outer cover for protection from scratches and molten splashes (except for Style C, which does not have a cover). All have a ratchet adjustment with an easy-turn knob, except Style C has a pinlock adjustment.

Styles A-C—Lighter weight than fiberglass, these nylon helmets fit head sizes 6½ to 8. *Style B* helmets have an extended forehead that offers more overhead protection. *Style C* helmets can be quickly snapped on and off your slotted hard hat using the included hard-hat band.

Style D—Made of heat-resistant fiberglass, these helmets fit head sizes 6¾ to 8.

Style E—These leather helmets are flexible, so they're easy to maneuver in tight spots. They fit head sizes 6½ to 8.

Auto-Darkening Welding Helmets

Helmet

The filter lens on these black nylon helmets automatically switches from light (Shade No. 3) to dark (see Shade Nos. in table below) the instant you start welding. The multiple-shade, polycarbonate lens allows you to change shade number with the press of a button. Helmets have a ratchet adjustment with an easy-turn knob to fit head sizes 6¼ to 8 as well as inner and outer filter lens covers. Operate on two 3-volt batteries (included).

Helmets with flip-up lens have the added benefit of a spring-mounted front panel. Flip the panel up to expose a viewing lens.

For information about selecting welding shades, see page 1843.

Welding Goggles

These goggles have a green polycarbonate lens and an adjustable elastic headband. Meet ANSI Z87.1-2003 high-impact standards.

Eyeglass-fit and **flip-up eyeglass-fit** goggles can be worn over prescription eyeglasses. The *flip-up* goggles allow you to flip the filter lens up to expose a viewing lens.

Filter Lenses and Covers

Standard filter lenses are polycarbonate.

Heat-reflective filter lenses are gold-coated polycarbonate.

Auto-darkening filter lenses automatically switch from light (Shade No. 3) to dark (see Shade Nos. in table below) the instant you start welding. They operate on solar power, so there are no batteries to change. They are glass with an ABS frame. Meet ANSI Z87.1-2003 basic-impact standards. *Multiple-shade* lens allows you to change shade number without changing lenses. Flip a switch to select. The lens comes with mounting adapters that allow you to fit the lens into different size helmets.

Lens covers protect filter lenses from scratches and molten splashes. A gasket (sold separately) is required for a proper seal between a 2″ Ht. × 4¼″ Wd. filter lens and a lens cover on helmets with flip-up lenses.

Magnifiers are clear polycarbonate and fit behind most 2″ Ht. × 4¼″ Wd. filter lenses. *Magnifiers with mounting adapters* can be adapted to fit 4½″ Ht. × 5¼″ Wd. and 5¼″ Ht. × 4½″ Wd. filter lenses—just snap the magnifier into the size adapter you need.

Welding Face Shields

For full-face protection while welding, select one of these shields. They have a ratchet adjustment with an easy-turn knob to fit head sizes 6½ to 8, except hand-held shield does not adjust. Meet ANSI Z87.1-2003 high-impact standards when worn with safety glasses or goggles, except hand-held shield meets basic-impact standards.

Flip-up face shield has a welding shade that lifts up to expose an 8″ Ht. × 12″ Wd. × 0.09″ Thick. clear polycarbonate viewing lens. Good for cutting and brazing jobs.

Hand-held face shield can be held up to your face for quick inspection of welding activity. It's lightweight with a handle and includes a lens cover.

Hand-Held Face Shield

Hard Hats

About Hard Hats

To provide head protection, hard hats have multipoint suspension systems that distribute the force of impact. This distribution increases with the number of suspension points.

Pinlock suspensions adjust with interlocking straps.

Ratchet suspensions adjust with an easy-turn knob.

The hard hats below meet impact and penetration resistance requirements of ANSI Z89.1-2003, unless noted.

Impact and Electrical Insulation Classifications:

Type 1 hard hats protect against blows to the top of the head only.

Type 2 hard hats deflect both top and off-center blows to the head.

Class C hard hats are not tested for electrical protection.

Class E hard hats are proof-tested at 20,000 volts.

Suspension Styles

Pinlock

Ratchet

Hard Hats

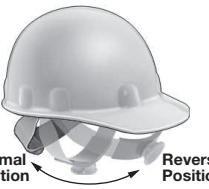
With Slots

With Slots and Logo

Ventilated

With Slots and Rain Trough

Heat-Resistant Polycarbonate



Reversible Suspension

Full-Brim Style

Adjust to fit head sizes 6½ to 8 except oversized hard hats, which fit sizes 7 to 8½ and hat with eight suspension points, which fits sizes 6¾ to 8. To Order: Please specify hard hat color: blue, green, high-visibility orange, orange, red, white, or yellow (unless noted).

Hats with slots accommodate face shields (see page 1842), welding helmets (see 4116T on page 1844), and earmuffs (see page 1849).

Hats with logo are white with one of the following logos on the front: U.S. flag (red, white, and blue); Visitor (red); or Safety First (green). To Order: Please specify logo.

Ventilated hats have slits on the top for increased air circulation.

Hats with rain trough have a rear brim gutter that channels water away from your neck.

Heat-resistant polycarbonate hats are made from a material similar to that used in firefighters' helmets.

Hat with reversible suspension lets you wear your hard hat backward without removing and reinstalling—just swing the suspension to the opposite side.

Full-Brim Style—A wide front-to-back brim provides added protection against sun, glare, splash, and rain.

Hard Hats with Face Shield

The fully retractable face shield provides protection against dust and spray and fits over prescription glasses. Face shield is 4¼″ Ht. × 10¾″ Wd. × 0.04″ Thick. and made of clear polycarbonate. Hard hats are ABS plastic and meet ANSI Z89.1-2003. They have ratchet suspension with sweat band and fit head sizes 6¾ to 7⅞.

Color	Suspension Points	Type	Class		
Blue	6	1	E	1984T17	$43.20

Bump Caps

Protect your head from minor bumps and scrapes. All have a pinlock suspension that adjusts with interlocking straps.
Note: Caps and face shield do not meet ANSI standards.

Traditional

All are polyethylene.
Cap fits head sizes 6½-7¾.
Cap with face shield attachment lets you add a lens (sold separately) to protect your face from spray and dust. It fits head sizes 6½ to 8¼.
Lens is 6″ Ht. × 15½″ Wd. × 0.040″ Thick. clear PETG.

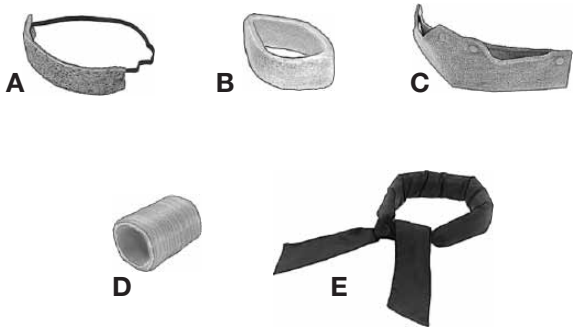
Baseball Cap Style

Sportier than traditional bump caps, these have cooling vents and foam padding for added comfort. They are made of polyester with a polyethylene shell insert. Caps fit head sizes 7½ to 7¾.

Color		
Black	2759T38	$14.33
Dark Blue	2759T34	14.33

Sweatbands



Cellulose bands have an additional absorbent layer for longer wear. Simply throw away after use.
Cotton terry bands absorb perspiration while providing maximum comfort. They're washable for reuse.

Elastic Headbands—Because they're not attached to your hat, you can position these bands where you want them.

Attachable Headband—Fastens securely to the suspension of your hard hat or welding helmet.

Bandanas with cooling crystals keep you cool all day—just soak in cold water for 20 minutes.

F	26	—	—	Black	53285T9	54.36	9159T7	13.83

About Hearing Protection

Earmuffs and earplugs are rated by the Noise Reduction Rating (NRR) guidelines, which are enforced by OSHA. The NRR of a hearing protector indicates its noise reduction capabilities measured in decibels (dB). The higher the NRR, the greater the noise reduction capability. The protectors on this and the previous page are tested in accordance with ANSI S3.19-1974.

For sound level meters, see page 1854.
For more information about decibel levels, see page 1866.

Caution: Prolonged exposure at or above 85 dB requires the use of hearing protection. The actual amount of protection depends on proper size and fit, the position in which the protector is worn, as well as your specific work environment.

Choosing a Hearing Protector

OSHA recommends that you choose a hearing protector with an NRR value that is two times the difference between your existing and desired noise level.

For example, if your noise level is 93 dB and you want your exposure to be no higher than 80 dB, the difference is 13 dB. You should choose a protector with an NRR of 26 dB or higher.

Hard-Hat Mount Earmuffs

Snap these earmuffs on and off your slotted hard hat. Earmuffs should be worn over the head to offer proper protection and noise reduction. They have plastic ear cups, spring-wire arms, and foam ear cushions. Hard hat sold separately.

Polyethylene hard hat with slots has a six-point ratchet suspension. **To Order:** Please specify hard hat color: blue, green, high-visibility orange, orange, red, white, or yellow. For more hard hats, see page 1846.

NRR, dB	Ear Cup Color	Earmuffs	Pair	Repl. Cushions	Pair
23	Yellow	55095T13	$20.75	9205T12	$13.57
27	Black	55095T7	26.32	9206T9	16.07
Polyethylene Hard Hat with Slots (Type 1, Class E)				52645T27	15.89

Earplugs

These soft, pliable earplugs provide comfortable hearing protection. Choose from separate (unattached) pairs and corded (connected with a plastic cord, unless noted) pairs that can be worn around your neck when not in use.

Standard—All are made of foam.

Roll-up plugs roll for insertion into your ear and then expand to conform to the shape of your ear canal. *Ribbed bullet* plugs provide added grip that keeps plugs from backing out of your ear.

No-roll plugs slide right into your ear. *Pod* plugs have a flexible plastic grip that makes them easy to insert and remove without touching the actual plug.

Comfort-Fit—These washable plugs are made of soft plastic.

Metal-detector-grade earplugs have an enclosed ball bearing that can be sensed by metal detectors. Good for food preparation areas.

★Cord is detachable.

Earplugs with Headband

More rigid than a cord, the headband on these foam earplugs can be worn under the chin or behind the head. They form a seal over the entrance to your ear canal but don't rest inside so they're a good choice for frequent on/off use. All earplugs have a flexible plastic band and should be worn in the position or positions that have a Noise Reduction Rating (NRR) listed.

Pod and **flared cone** earplugs include one pair of replacement plugs.

	NRR, dB Behind Head	NRR, dB Under Chin	Color	Earplugs	Pair	Replacement Plugs Pairs/ Pkg.	Replacement Plugs Pkg.

Earplug Dispensers, Respirators & Dust Masks

Earplug Dispensers

Open-Top Dispenser

Hinged-Top Dispenser

Dispenser with Earplugs

Keep earplugs accessible with these plastic dispensers.

Dispensers have two 3/16″ mounting holes (fasteners not included). Fill with the plugs of your choice.

Dispenser with earplugs is sealed to keep plugs sanitary and is not refillable. It dispenses one pair at a time. Dispenser includes mounting hardware. Plugs are foam, roll-up bullet style with an NRR of 33 dB. Color is green. Meet ANSI S3.19-1974. For information about hearing protection, see page 1849.

55815T61	50	$7.93

Dust Mask Dispensers

Keep masks clean and ready to use in this acrylic dispenser. It stores approximately 40 masks. Dispenser is 12½″ Ht. x 6″ Wd. x 6″ Dp. and has 3/8″ dia. holes for wall mounting (fasteners not included).

11885T14 $66.93

Low-Profile Cartridge Respirators for Solid Particles

Designed to fit easily under welding helmets, this respirator has a large surface area, which minimizes breathing resistance. Separate intake and outflow channels keep exhaled air from saturating the filter, so air remains cool and dry. Fitted with an N99 filter, this respirator filters out 99% of solid particles. It is not oil resistant.

	NIOSH Approval		
Respirator	TC-84A-2460	53565T2	$14.84
Replacement N99 Filter (Pkg. of 2)		53565T5	8.25

Snug-Fit Respirators for Vapors and Gases

The cradle-suspension head support reduces slippage for a secure fit. Made of thermoplastic. **To Order:** Please specify size: small, medium, or large (unless noted).

R95 respirator resists oil exposure for up to 8 hours and filters out 95% of solid particles.

P100 respirator resists oil exposure for up to 40 hours and filters out 99.97% of solid particles.

Respirator Accessories

Wipes

Hood

Fit Test Kit

Wipes quickly clear perspiration from your respirator. You'll get 100 individually wrapped 0.45% isopropyl alcohol pads.
52735T21 ..... Pkg. $16.50

Hood wraps around a full-face respirator to protect your head, face, and neck from dust, paint, and other chemicals. The elasticized face opening wraps around the respirator lens and underneath the cartridge, covering the user's head. Made of Tyvek.
1496T18 ..... $4.44

Fit test kit contains everything you need to perform up to 50 OSHA-approved qualitative fit tests on your respirators.
Note: Respirators must be equipped with an organic vapor cartridge.
52805T41 ..... $101.47

Black Nylon, 6″x9″	1440T8	11.38

Supplied-Air Respirators

Respirators run on a supply of clean air from an air pump or plant air line, so there's low breathing resistance to minimize fatigue during extended periods of use. All respirators require 6-15 cfm of air.
Add extra hose to span up to 300 ft. To maintain NIOSH approval, respirators must be used with the hoses listed.
Respirators for air lines connect to in-plant breathable air lines. Air connection is a ¼ industrial shape quick-disconnect coupling (see page 326 for more information).
Respirators for air pumps connect to portable air pumps (sold separately on page 1853) and have a ½ industrial shape quick-disconnect coupling.

Chemical-Resistant Respirators

Made of chemical-resistant Tychem QC with a sewn-in 6″x16″ acetate lens, these hood respirators have both an outer bib and an inner bib that tucks into your clothing for splash protection. Furnished with a ratchet suspension that fits head sizes 6½ to 8, a breathing tube, an air hose, and a belt. Hood accommodates eye and ear protection. NIOSH approval is TC-19C-154 Type C.
Lens cover has an adhesive back.

Replacement Ratchet Suspension					9770T78	17.25

Abrasion-Resistant Respirators

Good for use around abrasive blasters and painters, these respirators are made of high-density materials that protect against rough airborne particles. The polyethylene helmet has an inner and outer 5″x14″ acetate lens. Attached to the helmet is a waist-length polyurethane-coated nylon cape and a tube assembly with a belt for securing breathing tube. Comes with disposable adhesive-backed outer lens cover and air hose. Respirators have a pinlock size adjustment with interlocking straps that fits head sizes 6½ to 8.
NIOSH approval is TC-19C-293 Type C and CE.
Helmet meets ANSI Z89.1-2003 Class C standards; inner lens meets ANSI Z87.1-1989 impact standards.

Cooling Tube for Air Line Respirators

Cool incoming air by as much as 30° F. Tube has a control valve for temperature adjustment and is for use with 9770T7 and 10615T11 only.
9770T75 ..... $223.48

Pumps for Supplied-Air Respirators

With Open Dripproof Motor

With Totally Enclosed Motor

Connect these oil-free portable pumps to your respirators for a continuous supply of low-pressure breathable air. Air connection is a 1/2" industrial shape quick-disconnect coupling (see page 326 for more information).

Maximum supply pressure is 15 psi. Maximum hose length allowed is 300 ft. Motor operates on 120V AC, 60 Hz and has an 8-ft. cord with three-prong plug.

Supplied-Air Respirators with Hand-Held Air Pump

The portable pump on these respirators provides a continuous supply of clean air for one person. Respirators include a 50-ft. air hose and 25 clear, adhesive-backed disposable lens covers. Pump has an open dripproof, 3/4-hp motor that operates on 120V AC, 60 Hz and has an 8-ft. cord with three-prong plug. Add extra hose to span up to 300 ft. To maintain NIOSH approval, respirators must be used with the hoses listed.

Full-face respirator is silicone with a 10"×7" polycarbonate lens. NIOSH approval is TC-19C-322.

Chemical-resistant respirator has a Tychem QC hood with a 6"×16" acetate lens. Accommodates eye and ear protection. NIOSH approval is TC-19C-154.

Portable Single-Gas Detectors

When these detectors sense high levels of dangerous gases, they alert you with a 95 dB audible alarm, warning light, and vibrating alarm. You can adjust the alarm trigger points to suit your environment. Belt clip included. Size is 3 1/2" Ht.×2" Wd.×1" Dp. Temperature range is -4° to 122° F, unless noted. For use in Class 1, Division 1, Groups A, B, C, and D and Class 2, Division 1, Group G locations. CSA certified.

A calibration check must be performed on the detector before each use to verify that it is working properly. The check for *oxygen* detectors can be performed with the press of a button. The calibration test for *carbon monoxide* and *hydrogen sulfide* detectors requires a regulator, tubing, and cylinder (sold separately).

Detectors without replaceable battery operate on one lithium battery and should be thrown away at the end of their two-year lifespan.

Detectors with replaceable battery operate on one lithium battery (included).

Detector

	Without Replaceable Battery				*With Replaceable Battery*			
Detects	Measuring Range	Detectors		Calibration Cylinders	Measuring Range	Detectors		Calibration Cylinders

Replacement Lithium Battery						7821K62		11.00

★Temperature range is 14° to 104° F.

Portable Multi-Gas Detectors

When this detector senses high levels of combustible gases (such as acetone, butane, hydrogen, methane, pentane, propane, and toluene), oxygen, carbon monoxide, and hydrogen sulfide, it alerts you with an audible alarm rated at 95 dB, warning light, and vibrating alarm. You can adjust the alarm trigger points to suit your environment. There is also a motion sensor that sounds an alarm if the user becomes disabled. Detector has an LCD and a rubberized housing. Size is 4 3/8" Ht.×3" Wd.×1 3/8" Dp. Operates on a rechargeable lithium ion battery (included). Temperature range is -4° to 122° F. ETL listed for Class 1, Division 1, Groups A, B, C, and D and Class 2, Division 1, Groups F and G locations. IP 67 rated.

A calibration check must be performed before each use to verify that the detector is working properly. The check requires a *regulator, tubing,* and *cylinder* (sold separately).

Detector with sampling probe allows you to test the air in a hazardous area before entering. Great for confined spaces. Probe includes a rechargeable lithium ion battery. Detector comes with 25 ft. of tubing.

Detects	Measuring Range
Combustible Gases	0-100% LEL ■
Oxygen	0-30% Vol.
Carbon Monoxide	0-1,999 ppm
Hydrogen Sulfide	0-200 ppm

■ LEL = lower explosive limit.

Standard Detector	18995T42	$901.33
Detector with Sampling Probe	18995T44	1,474.57
Replacement Probe	18995T28	425.00
Replacement 25-ft. Tubing	18995T26	73.67
Calibration Cylinder	18995T47	276.00
Calibration Regulator for Standard Detector	18995T35	328.17
Calibration Regulator for Detector with Probe	18995T916	226.00

Surface-Mount Multi-Gas Detectors

An audible alarm and warning light alert you to the presence of propane, methane, hydrogen, and carbon monoxide. Alarm sounds at 420 ppm for propane; 5,000 ppm for methane; 200 ppm for hydrogen; and 150 ppm for carbon monoxide. This detector has a relay for connection to auxiliary alarm systems. A programmable timer allows you to set whether the relay alarm is triggered immediately, or after 4 or 8 minutes of continuous gas exposure. The reset button suspends the alarm and restarts the cycle for 5 to 8 minutes in case of false alarm. Detector has a 6-ft. cord with a two-prong plug and a 120 volt AC adapter. Mounting fasteners are not included.

Also Available: Single-gas detectors. Please ask for 6631T4 and specify propane, methane, carbon monoxide, or hydrogen.

dB @ 10 ft.	Ht.	Wd.	Dp.	Temperature Range	Mounting Hole Dia.		
80	6 3/4"	3 1/4"	1 3/4"	-20° to 120° F	3/16"	6631T18	$322.22

Early-Warning Surface-Mount Hydrogen Detectors

This detector triggers a "caution" alert when a small amount of hydrogen is detected and a second "danger" alert if levels continue to rise. When hydrogen concentration reaches 1% by volume, a yellow warning light illuminates and the first relay closes to trigger a remote exhaust fan and/or alarm. When hydrogen reaches 2%, a red warning light illuminates, an alarm sounds, and the second relay closes to activate another remote exhaust fan and/or alarm. Relays are rated for 10 amps @ 240 volts AC. Detector operates on 120/240 volts AC and has a terminal box for hardwiring. It is 7″ Ht.×4¾″ Wd.×2½″ Dp. and has 3⁄16″ dia. holes for wall mounting (fasteners not included). Temperature range is 14° to 104°F.

Use the *optional remote* and *25-ft. cord* to keep an eye on the detector's alert status from a distance. Remote has an 80 dB buzzer and the same yellow and red warning lights as the detector. Has two 3⁄16″ dia. holes for wall mounting (fasteners not included).

Detector	71095K71	$618.18
Optional Remote with Buzzer	71095K24	161.54
25-ft. Cord for Optional Remote	5703T411	5.80

Stick-On Carbon Monoxide Indicators

Place this indicator anywhere you need to detect and warn about the presence of carbon monoxide. The circle in the center darkens when carbon monoxide is detected and returns to its normal color when exposed to fresh air. Trigger point is 100 ppm. Replace indicator every 90 days. An unopened indicator has a shelf life of 3 years. Indicator is 2¼″ square.

1085T85	$6.73

Carbon Dioxide Meters

Measure and display real-time indoor ventilation quality with this meter. It has an easy-to-read LCD that shows carbon dioxide (CO_2) levels and is accurate to ±50 ppm or ±5% of reading (up to 5,000 ppm), whichever is greater. It also measures the temperature between 32° and 122°F (0° to 50 C°). Monitor is 6¼″ Ht.×3″ Wd.×1½″ Dp. and operates on the included 120 volt AC adapter or four AA batteries (not included). Adapter has a 6-ft. cord with a two-prong plug. Meter comes calibrated but must be recalibrated every 12 months.

Calibration kit includes a calibration cylinder, calibration regulator, tubing assembly, and storage case.

	Measuring Range, ppm		
Carbon Dioxide Monitor	0-10,000 ppm	39035K69	$651.92
Calibration Kit		39035K83	386.01
AA Batteries (Pkg. of 4)		71455K53	2.94

Static Charge Detector

Locate and accurately measure static charges. This unit detects field potentials up to 30 kV at 1″; higher voltages may be measured at distances greater than 1″. A hold button freezes the digital display for recording measurements.

Detector is 4⅞″ Ht.×2⅞″ Wd.×1″ Dp., operates on one 9-volt battery (included), and comes with a carrying case. Temperature range is 50° to 104°F.

Detector	6605T63	$673.08
Replacement 9-Volt Battery	71455K56	2.75

Sound Level Testers and Monitors

40 to 130 dB Tester — 35 to 130 dB Tester

Monitor — Calibrator

All of these units have a selectable frequency weighting—an electronic filter that adjusts the way the tester measures sound. The A weighting is similar to the response of the human ear and is used by OSHA. The C weighting is suitable for measuring the sound level of machinery. Testers and monitor *with calibration certificate* include a certificate of calibration traceable to NIST that states the product has passed a test for accuracy.

Testers take readings of ambient sound levels. They have an easy-to-read LCD. *35 dB to 130 dB testers* meet ANSI S1.4-1983 and include a storage case.

Monitors continuously measure ambient sound levels. The display alerts you when levels either exceed or fall below your programmed thresholds. When operating the monitor with the included 120 volts AC adapter, four warning lights will also flash when a threshold is reached. Monitors have a time stamp and a microphone that rotates 180°. They can be surface mounted using the ½″ dia. hole (fastener not included) or propped up using the attached folding stand. Meet ANSI S1.4-1983.

Use the *calibrator* to calibrate the tester or monitor before each use or the monitor on a regular basis and verify that it is working properly. *Remote microphone cable* allows you to use the monitor's microphone up to 15 ft. from the display.

Flame- and Heat-Resistant Pads

Silica Pad

Silica Pad with Magnetic Strip

Prevent heat and flame damage in small spaces—these pads are a good alternative to large blankets during localized, high-heat applications. They are for intermittent contact with flames and hot surfaces. Maximum temperature is 1800°F.

Silica cloth pad has two grommets for tacking pad to a wall.

Attach **pads with magnetic strip** to protect metal surfaces.

Material	Wd.	Lg.	Thick., mils	Weight, oz./sq. yd.	Color	Pads		Pads with Magnetic Strip	
Silica Cloth	8″	10″	54	36	Brown	2962K34	$14.28	2962K36	$19.25
Carbon Fiber	18″	18″	200	16	Black	2962K49	20.62	2962K51	21.00

Static-Control Curtains

The carbon fibers on one side of these curtains ground electrical charges to eliminate static. Curtains are clear vinyl, 12 mils thick, 14 oz./sq. yd., and have grommets on 8″ centers along the top. Maximum temperature is 120°F. Surface resistivity is 2×10^7 ohms. Meet NFPA (National Fire Protection Association) standards.

Curtain Hooks (Pkg. of 10) 54895T44 $8.89

Custom Sizes—To Order: Please specify height and width.

52365T75 Per Sq. Ft. $3.46

Protective Curtains

Welding spatter-resistant cotton duck curtains are 30 mils thick, 15 oz./sq. yd. Max. temperature is 200°F. Curtains have grommets on 12″ centers along all sides. Color is green. Meet Canvas Products Association International CPAI-84.

Oil-resistant polyester curtains are vinyl coated to hold up against oil and alkalies. They're 14 mils thick, 13 oz./sq. yd. Max. temperature is 150°F. Curtains are washable and have grommets on 12″ centers across the top and 24″ centers along either side. California Fire Marshal approved. **To Order:** Please specify beige, black, blue, white, or yellow.

Note: The finished size of all curtains will be slightly smaller due to hemming.

54895T89 Per Sq. Ft. $1.17

Sample Pack—Includes a swatch of each curtain color.

54895T47 $8.17

See-Through Welding Strip Curtains

You can see and walk through these brown-colored strip curtains. They consist of 8″ wide vinyl strips that overlap 50% to filter UV light and protect against welding spatter. All are 80 mils thick. Maximum temperature is 150°F. California Fire Marshal approved. For clear vinyl strip doors (not for welding), see page 2878.

With Bolt-on Brackets—Mount to vertical and horizontal surfaces. Brackets can be suspended from overhead supports using a ½″ threaded stud (not included; see pages 3182-3188). Curtain is 72 oz./sq. yd.

With Hanging Brackets—Use this bracket with 2″ maximum dia. overhead rods (not included). Curtain is 98 oz./sq. yd.

Also Available: Custom sizes. Please ask for 55705T999 and specify height, width, and mounting style.

Heat-Reflective Fiberglass

The aluminum on one side of these curtains reflects radiant heat. It also protects against molten spatter and has a maximum temperature of 300° F. The brown-colored fiberglass side resists abrasion and has a maximum temperature of 1000° F. Material is 30 mils thick, 20 oz./sq. yd., and has grommets on 12″ centers along all sides. Meets MIL-C-20079H Type 1 Class 10 and MIL-1-24244.

Protective Panels

Use individually or place multiple panels side-by-side. Attach a set of casters (sold separately) to platform legs for mobility.

Panels *with slip-on screen* are easy to install. They have a 1″ OD steel frame. All include two clips for connecting panels.

Panels *with tie-on screen* have a ¾″ square steel frame that reduces the slipping and twisting that can occur with round frames. Connect multiple panels using frame connectors (sold separately); one set required per connection.

Welding Spatter-Resistant Cotton Duck—Color is olive green. Meets Canvas Products Association International CPAI-84. *Slip-on screen* material is 30 mils thick, 16 oz./sq. yd. Max. temperature is 120° F. *Tie-on screen* material is 24 mils thick, 12 oz./sq. yd. Max. temperature is 300° F.

See-Through Vinyl—Screen material is 14 mils thick, 13 oz./sq. yd. Max. temperature is 150° F. California Fire Marshal approved. **To Order:** For *slip-on screens*, please specify gray or yellow. For *tie-on screens*, please specify gray, green, orange, or yellow.

Oil-Resistant Polyester—The blue vinyl coating on these panels withstands oil. Screen material is 14 mils thick, 14 oz./sq. yd. Max. temperature is 150° F. California Fire Marshal approved.

Flame- and Heat-Resistant Fiberglass—Panels are for intermittent contact with flames and hot surfaces. Screen material is 51 mils thick, 28 oz./sq. yd., and has a black acrylic coating. Max. temperature is 1000° F.

Hinged Welding Panels

Shield workers and equipment from welding and grinding hazards—tie the welding spatter-resistant cotton duck screens to the frame and fold these hinged panels into the configuration you need. Add platform legs (sold separately) to position panels in a straight line. Platform legs include fasteners and can accommodate casters (sold separately). Use one set of casters per platform leg. Frame is 1″ OD steel. Screen material is 24 mils thick, 12 oz./sq. yd. Maximum temperature is 200° F. Color is olive green. Meets Canvas Products Association International CPAI-84.

Three Panels

Easy-Carry Protective Panels

Lightweight and flexible enough to roll up and carry, these panels are wire reinforced so they stand on their own. They have a built-in handle and tie strap.

Welding spatter-resistant cotton duck panels provide spark and flash protection in welding, cutting, and brazing areas. Material is 30 mils thick, 16 oz./sq. yd. Max. temperature is 120° F. Color is olive green. Meets Canvas Products Association International CPAI-84.

Oil-resistant polyester panels have a vinyl coating that resists oils. Material is 15 mils thick, 11 oz./sq. yd. Max. temperature is 160° F. Color is yellow-and-black striped on the outside, solid yellow on the inside. California Fire Marshal approved.

Welding Curtain Partitions

Freestanding

Build-Your-Own Suspended

Create enclosures with these partitions. A 30″ high gray-tinted window spans the entire partition for visibility. Curtains are gray vinyl that resists tears, fire, oil, mildew, and most acids. Material is 14 mils thick, 13 oz./sq. yd. Slide curtains to open and close. All have hook-and-loop closures along the vertical edge for joining sections. Maximum temperature is 150°F. California Fire Marshal approved.

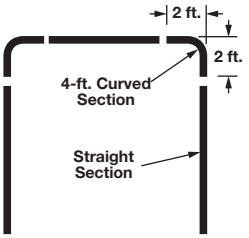
Also Available: Freestanding partitions in other sizes and curtain materials, and build-your-own suspended partitions in other materials. Please ask for 5592T999 and specify partition style, size, and material.

Freestanding Partitions

Everything you need to build a four-sided curtain partition, including 7-ft. high curtains, a galvanized steel track, four columns, and four 1 ft.×1 ft. bases.

Enclosed Area		
6 ft.×8 ft.	5592T31	$788.42
8 ft.×8 ft.	5592T64	857.65
10 ft.×10 ft.	5592T33	943.53

Build-Your-Own Suspended Partitions



Combine straight and curved sections to build a hanging one- to four-sided curtain partition. Each section includes the curtain, its corresponding galvanized steel track, two-wheel nylon rollers, 1″ swivel hooks for hanging curtains, and mounting hardware. Curtains have grommets along the top and a weighted bottom hem. Install track by suspending it from overhead supports using chain or ⅜″ threaded rod (not included; see pages 3182-3188 for threaded rod). Each straight section is hung from two points (if curve is used independently, it is supported from three points).

To design a partition, determine height, overall length, and number of straight and curved sections needed.

Note: Curved sections add 2 ft. to the overall length and width.

Section	8 ft. High		10 ft. High		12 ft. High	
6 ft. Straight	5592T41	$125.43	5592T45	$138.13	5592T53	$150.86

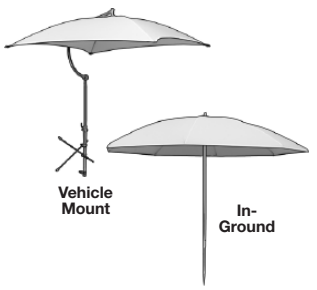
Vehicle-Mount and In-Ground Umbrellas



Canopy is yellow. Ribs are steel unless otherwise stated.

Vehicle Mount—The universal mounting bracket adapts to fit most equipment (fasteners included). Pole has a tilt hinge.

In-Ground—Has a pointed pole that's easy to push into the ground. Umbrellas with an aluminum pole have a tilt hinge. *Optional folding stand* lets you use in-ground umbrellas on hard surfaces.

Nonconductive umbrella has fiberglass ribs.

Welding umbrella has a 20 mil thick, 10 oz./sq. yd. canopy with a maximum temperature of 140°F. Meets Canvas Products Association International CPAI-84.

About Mirror Materials

Glass mirrors are economical and easy to clean.

Plastic-coated glass mirrors are laminated to keep shards from falling out of the frame if the glass breaks.

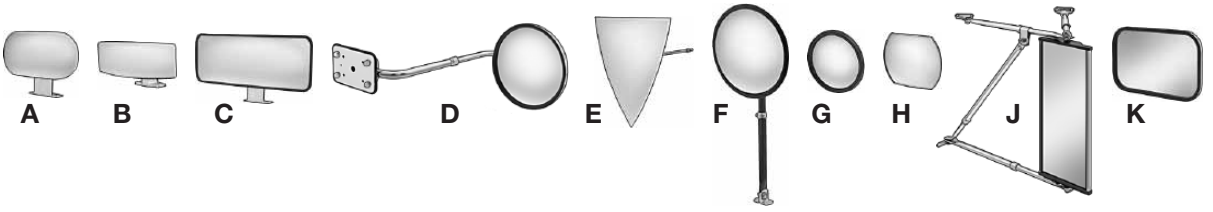
Tempered glass mirrors are more impact resistant than plastic-coated glass mirrors, but are heavier. If broken, they shatter into small pebbles rather than sharp shards.

Acrylic mirrors are lightweight and more impact resistant than glass mirrors, but may scratch. If broken, the mirror will split into a few large pieces rather than small, sharp shards.

Steel and **zinc** mirrors will not break, shatter, or crack. They are chrome plated for corrosion resistance.

Stainless steel mirrors are stronger and more corrosion resistant than steel and zinc mirrors.

Safety Mirrors



Convex mirrors provide a wide field of view for seeing around corners, down aisles, and over counters. **Flat** mirrors show objects to scale. All are suitable for outdoor use.

Styles A and *C* have two 1/4″ dia. mounting holes; *Style B* has four 3/16″ dia. mounting holes. Fasteners not included.

Style D includes mounting fasteners.

Style E mounts through a drilled hole and is secured with the included fasteners.

Style F includes mounting fasteners.

Style G includes a threaded ball stud and mounting fasteners, except 9208T46 has an adhesive back for surface mounting.

Style H has an adhesive back for surface mounting.

Style J is also known as a West Coast mirror. Mounting fasteners are included.

Style K has a 3/8″ threaded ball stud for use with the mounting brackets sold separately on this page.

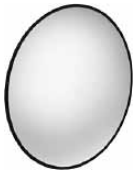
Safety Mirrors

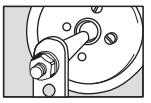
For information about mirror materials, see page 1859.

Convex Safety Mirrors



Circle

Oval



Back View

These convex mirrors provide a wide field of view for seeing around corners, down aisles, and over counters. The included threaded ball stud allows swiveling for easy adjustment.

Acrylic mirrors are lightweight and more impact resistant than glass mirrors. If broken, the mirror will split into a few large pieces rather than small, sharp shards.

Shatter-resistant glass mirrors resist scratching and are plastic coated to keep shards from falling out of the frame if the glass breaks.

304 stainless steel mirrors will not break, shatter, or crack upon impact.

Indoor—Hardboard back, unless noted.

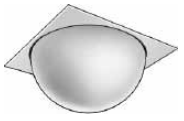
Shatter-Resistant Full-Dome Safety Mirrors for Drop Ceilings



Replace a tile in your drop ceiling with one of these mirrors for an unobstructed overhead view of blind intersections and corners. They have a lightweight acrylic surface.

For Opening Size	Dia.		
2 ft.×2 ft.	22″	6057T41	$69.03
2 ft.×4 ft.	22″	6057T51	109.48

Domed Safety Mirrors

Mount these dome-shaped mirrors for an unobstructed overhead view of blind intersections and corners.

Acrylic mirrors resist breakage and will split into a few large pieces rather than small, sharp shards if shattered upon impact. Mounting chain and hooks included.

Acrylic mirrors with galvanized steel back have sealed edges to keep out moisture and debris. Mounting fasteners included.

Acrylic mirrors with foam back clip to the grid in a drop ceiling (drop ceiling clips included).

Scratch-resistant acrylic mirrors have a clear, hard coating that keeps them looking like new. D-ring clips included.

Chrome-plated steel mirrors will not break shatter, or crack. They have two 1/8" mounting holes (fasteners not included) for flush mounting.

Class A, B, and C Fire Extinguishers

Class A—Wood and Paper

Class B—Liquids and Gases

Class C—Electrical

Handle the three most common types of fire—those involving wood and paper, liquids and gases, and electrical equipment. The UL rating for Class A and B extinguishers includes a number; the higher the number, the greater the firefighting capability. All extinguishers come charged with extinguishing material and are rechargeable. They have a pressure gauge and a mounting bracket (fasteners not included). They have a safety pin to prevent accidental discharge. Cylinder is steel with a red finish. Please check local ordinances for inspection requirements (inspection tags sold separately on pages 1914-1915).

Wet chemical (Halotron) extinguishers don't leave a residue behind. Good for use around electrical equipment.

Class B and C Fire Extinguishers

Wet and Dry Chemical

Carbon Dioxide—5-lb. Capacity

Class B—Liquids and Gases

Class C—Electrical

Fight flammable liquid, gas, grease, and electrical fires. The UL rating for Class B extinguishers includes a number; the higher the number, the greater the firefighting capability. All extinguishers come charged with extinguishing material and are rechargeable. They have a mounting bracket (fasteners not included) and a safety pin to prevent accidental discharge. Please check local ordinances for inspection requirements (for inspection tags, see pages 1914-1915).

Dry chemical (Purple K) extinguishers are the most effective in fighting Class B fires and are commonly used in garages and fuel transfer areas. They have a pressure gauge. Cylinder is steel with a red finish. U.S. Coast Guard approved.

Wet chemical (Halotron) extinguishers don't leave a residue behind. Good for use around electrical equipment. They have a steel cylinder with a red finish.

Carbon dioxide extinguishers won't corrode electrical equipment and are a good alternative to Halotron extinguishers. They meet D.O.T. requirements and have an aluminum cylinder with a red finish. 5-lb. capacity extinguisher has a nozzle that connects to the cylinder through a rigid swivel tube. 10- and 15-lb. capacity extinguishers have the nozzle and cylinder connected by a flexible tube.

Class A Fire Extinguishers

Class A—Wood and Paper

Douse fires from combustibles such as wood, paper, cloth, and rubber. Extinguisher comes empty. Fill it with water and pressurize using a compressed air or nitrogen source with a 100 psi capacity. It has a 5⁄16″-32 UNEF male Schrader fitting for pressurizing and a pressure gauge. It comes with a mounting bracket (fasteners not included) and a safety pin to prevent accidental discharge. Cylinder is stainless steel. Please check local ordinances for inspection requirements (for inspection tags, see pages 1914-1915).

UL Rating	Capacity, gal.	Discharge Time, sec.	Overall Size Dia.	Overall Size Ht.	Mounting Bracket Type	Mounting Bracket Hole Dia. (Qty.)	Extinguisher		Repl. Bracket

Class D Fire Extinguishers

Class D—Combustible Metal

Smother flames from combustible-metal fires involving magnesium, sodium, potassium, uranium, and powdered aluminum. Extinguisher comes charged with dry-chemical extinguishing material and is rechargeable. It has a pressure gauge, a safety pin to prevent accidental discharge, and a mounting bracket with two 7⁄32″ dia. holes and one 11⁄32″ dia. hole (fasteners not included). Cylinder is yellow steel. Please check local ordinances for inspection requirements (for inspection tags, see pages 1914-1915).

Class K Fire Extinguishers

Class K—Kitchen Fires

Suppress extremely hot reflashing fires involving combustible oil and grease. Extinguisher is charged with wet-chemical extinguishing material and is rechargeable. It has a pressure gauge and a safety pin to prevent accidental discharge. It comes with a mounting bracket with two 7⁄32″ dia. holes and one 5⁄16″ dia. hole (fasteners not included). Cylinder is stainless steel. UL listed. Please check local ordinances for inspection requirements (for inspection tags, see pages 1914-1915).

Fire Extinguisher Cabinets and Alarms

Control access to fire extinguishers and guard against theft and vandalism. Cabinets have a plastic window and an attached breaker bar. They come with cylinder locks that are keyed alike (all open with the same key) and two keys. Mounting fasteners are not included. Extinguishers are sold separately.

Fire extinguisher alarm sounds a buzzer when an extinguisher is removed from its storage position. Buzzer is 85 dB @ 10 ft. Attach the switch to a wall and the clip to an extinguisher. The switch is plastic and 3½″ Wd. × 1″ Dp. Requires one 9-volt battery (included).

Fire Sprinkler Heads

Sprinkler Heads

These brass sprinkler heads must be installed and maintained according to National Fire Protection Association (NFPA) standards. Install using sprinkler-head wrenches (sold separately) or any hand wrench that fits the NPT size. UL listed and FM approved. At the maximum water pressure of 175 psi, ½ NPT male connection heads have a flow of 74 gallons per minute; ¾ NPT male connection heads have a flow of 105 gallons per minute.

Pendent-style sprinkler heads are designed to be suspended below support piping. They can be used with exposed piping or finished ceilings. **Upright-style** sprinkler heads are designed to be installed above support piping and can only be used with exposed piping.

Fusible-link sprinkler heads are triggered by a soft metal alloy that melts at the rated temperature. **Glass-bulb** and **quick-response glass-bulb** sprinkler heads are triggered when the liquid-filled bulb bursts at the rated temperature. Quick-response heads react up to five times faster than other sprinkler heads.

Accessories

Sprinkler head storage box holds 12 sprinkler heads. It is steel with a red finish.

Sprinkler head guards protect sprinkler heads from damage and tampering. They are steel with a red finish. Guards fit both pendent and upright sprinkler head styles.

Sprinkler head stopper prevents water from spraying without having to shut down the entire sprinkler system. To reach the sprinkler head, insert any ¾″ to 1″ dia. pole (not included) into the stopper base.

Concealed Fire Sprinkler Heads

An inconspicuous cover plate provides a clean look for sprinkler heads. When the plate's temperature rating is reached, it falls away to expose the brass pendent-style sprinkler head. The head itself has a liquid-filled glass bulb that bursts at the rated temperature to trigger the sprinkler. Heads have a ½ NPT male connection. At the maximum water pressure of 175 psi, they have a flow of 74 gallons per minute. Install using required wrench (sold separately). UL listed and FM approved.

Temp. Rating Head	Plate	Plate Color	Sprinkler Heads		Repl. Cover Plates	
155° F	139° F	Chrome	6496T311	$95.41	6496T211	$28.49

Fire Stops

Prevent fire and smoke from passing through holes in fire-resistant walls and floors. Expanding fire stops expand when heated to fill voids left by melting pipes or cables.

Caulk, Putty, and Cement

Paintable Caulk and **Expanding Paintable Caulk—**Seal small openings in fire-resistant walls and floors. Both have a 4-hour fire rating. Dispense cartridges using a caulk gun.

Watertight Caulk—Caulk forms a long-lasting, flexible, watertight seal. Use it to close small openings in fire-resistant walls and floors. Caulk has a 3-hour fire rating. Dispense cartridges using a caulk gun.

Expanding Putty—Hand-mold this putty to fill small openings in fire-resistant walls and floors. It expands when heated and forms an insulating char that fills gaps left by melted pipes. It has a 3-hour fire rating. The *pad* is commonly used to seal openings around electrical boxes.

Fire-Stop Cement—Good for sealing large openings in fire-resistant walls and floors. Mix this lightweight powder with water to create a thick paste that's easy to apply. One bag covers a 2 sq. ft., 3″ thick opening. The cement has a 3-hour fire rating. FM approved.

Strips and Collars

Wrap Strip

Expanding Pipe Collar

Wrap Strips—Tuck these wraparound strips into the gaps around pipes passing through fire-resistant walls and floors. Strips secure with an adhesive closing flap. They have a 3-hour fire rating and meet UL 1479. Color is red.

Expanding Pipe Collars—Slide these into the small gaps around pipes passing through fire-resistant walls and floors. Collars are aluminum and have a sealant that expands when heated to fill gaps left by melted pipes. Fasteners not included. They have a 3-hour fire rating and meet UL 1479.

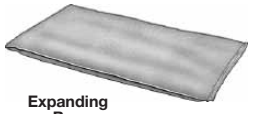
Bags, Plugs, and Sheets



Expanding Bag

Expanding Foam Plug

Expanding Bags—Stack and fold these bags to fill large gaps in fire-resistant walls and floors. Bags are reconfigurable and expand when heated to fill gaps left by melted cables. They have a 3-hour fire rating and are FM approved. Color is white.

Expanding Foam Plugs—Squeeze plugs into small openings in fire-resistant walls and floors. They are reconfigurable and have a 2-hour fire rating. Color is red.

Expanding Cut-to-Size Sheets—Seal large openings in fire-resistant walls and floors while allowing built-up heat to escape. They expand when heated and form an insulating char that fills gaps left by melted cable. To install, drill holes and fasten with screws (not included). Sheets have a 4-hour fire rating. FM approved.

Smoke and Carbon Monoxide Detectors

Detector with Alarm

Detector with Alarm and Strobe Light with Vertical Message

Give an early warning about the presence of smoke with these detectors. Color is white.

Battery-powered smoke detector sounds an alarm when invisible smoke particles are detected. It has a test and hush button, and runs on a nonreplaceable lithium battery.

Battery-powered smoke and carbon monoxide detector alerts you with an audible alarm when visible smoke particles or carbon monoxide is detected. It has a test and hush button, and runs on a nonreplaceable lithium battery. UL 217 and UL 2034 listed.

Hardwired smoke detectors can be linked in tandem to warn occupants outside the vicinity; if one unit is activated, they're all activated. Link up to 12 units with an alarm or up to six units with an alarm and strobe light. These detectors signal when visible smoke particles are detected. They have a test switch on the face plate. They run on 120 volts AC and have a backup battery in case of power failure. UL listed.

Signal Type	dB @ 10 ft.	Overall Size Dia.	Dp.	Message Orientation

Fire Alarm Systems

Configure a hardwired system to monitor your facility for fire and alert workers of potential hazards. A complete system consists of a control panel connected to one or more heat detectors and/or fire alarm stations.

Control Panel

Connect and monitor your fire alarm system. Control panel comes with all the circuitry needed to power and monitor devices for up to five zones. These devices can include up to 30 smoke or carbon monoxide detectors as well as an unlimited number of heat detectors and fire alarm stations. Indicators show the status of each zone. The control panel has two relays for connecting alarms such as buzzers, bells, and lights (sold separately on pages 1867-1868,1870).

The control panel operates on 120 volts AC and requires two 12-volt batteries (not included) for operation; in case of power failure, it will use the batteries as a backup power source. Panel is red steel with a locking door. Size is 19 1/2" Ht. x 14 1/4" Wd. x 3 3/4" Dp. Meets NFPA 72. UL listed.

Fire Alarm Control Panel	6634T77	$513.97
12-Volt Rechargeable Battery (2 Required)	7448K39	26.19

Detectors

Heat (Indoor)

Heat (Outdoor)

Smoke and Heat

Signal the control panel about potential fire hazards. Color is white. UL listed. Heat and combination heat and smoke detectors are triggered when the temperature climbs above the temperature rating.

Heat detectors are FM approved. Indoor detectors have screw terminals. Outdoor detectors have wire leads.

Smoke and heat detector has an alarm that delivers 85 dB at 10 ft. Connects with screw terminals.

Carbon monoxide detector sends a signal to your control panel and sounds an alarm when carbon monoxide is detected. Multiple units can be linked in tandem so all detectors will sound when any one of them is triggered. Alarm delivers 85 dB at 10 ft. Connects with screw terminals. Detector is UL listed.

Fire Alarm Stations

Pull Handle

Install these stations throughout your facility for quick access in case of a fire. When activated, they send a signal to your control panel. All are UL listed.

Pull-handle station is iron with a red finish. **Lift-and-pull handle** station is red plastic. **Push-button** station helps comply with ADA standards when properly installed. Made of red plastic.

Overall Size Ht.	Wd.	Dp.	Stations		Repl. Acrylic Rods

Covers with Spacer	8 1/8"	5 3/8"	4"	1105T54	71.84	1105T53	120.10

Buzzers

About Sound Levels

To choose an alarm or speaker that's loud enough, first determine the decibel (dB) rating of background noise. The table below lists some common examples and their average dB ratings. For sound meters, see page 1854.

Office	50 dB
Stockroom	60 dB
Loading Dock	70 dB
Freight Train	90 dB
Jackhammer	100 dB
Steel Mill	110 dB

Next, choose a device with a dB rating greater than the background noise level. Use the table below to determine how much louder a device will sound in your setting. For example, in a 60 dB stockroom, a bell with a 70 dB rating sounds twice as loud as the background noise, but a 63 dB bell is barely audible.

3 dB	Barely Louder than Background Noise
5 dB	Clearly Louder than Background Noise
10 dB	Twice as Loud as Background Noise
20 dB	Four Times as Loud as Background Noise
40 dB	Sixteen Times as Loud as Background Noise

Miniature Buzzers

A

B

C

D

Small in size and easy to mount, these buzzers produce a low-volume tone to alert workers in the immediate area. They are frequently used on machines and panels. Buzzers are plastic except Style H is steel. 5670T31 is UL recognized. Mounting hardware not included, unless noted.

Continuous Tone and Pulse Tone—Can be wired to trigger two alerts, each corresponding to a different warning. If the continuous and pulse tone are both triggered at the same time, only the continuous tone will sound.

Pulse Tone—Alternate on/off to draw greater attention than buzzers with continuous tone.

Styles A and **C** are also known as piezo buzzers. **Styles B, C**, and **D** increase volume as voltage increases. **Style D** has a flashing red light.

Hazardous Location Buzzers

Buzzers are UL listed for use in environments where flammable gases and combustible dust may be present. They are UL listed for Class I, Div. 1 and 2, Groups B, C, and D; Class II, Div. 1 and 2, Groups E, F, and G; and Class III hazardous locations. They're rated NEMA 4X for corrosion resistance and washdown protection. Buzzers are zinc and measure 7⅝″ Ht. × 7⅜″ Wd. × 4¼″ Dp. They include two wall-mount brackets with two ⅜″ dia. mounting holes each (mounting hardware not included). All have three wire leads and a ¾ NPT female conduit opening. Use indoors or out.

For information about sound levels, see page 1866.

Buzzers

Buzzers are electric with a continuous sound pattern and adjustable volume. They are zinc, except Style D is plastic. All are UL listed.

Style A has screw terminal connections. Surface mount using an outlet box (sold separately). Fasteners are included.

Styles B&C meet NEMA 4X standards for corrosion resistance and washdown protection. *Style B* panel mounts in a 3¾″ Ht. × 2½″ Wd. cutout. Furnished with three wire leads. *Style C* has a built-in electrical box, screw terminal connections, and a ¾ NPT female conduit opening.

Style D has 32 tones. It has two wire leads. Surface mount using an outlet box (sold separately) and the included screws. California State Fire Marshal (CSFM) approved and C-UL listed. Suitable for outdoor use.

Outlet box for Style A is galvanized steel. It has ½ and ¾ knockouts. UL listed.

Indoor outlet box for Style D is steel with ½ and ¾ knockouts.

Outdoor outlet box for Style D is aluminum with ½ and ¾ NPT female conduit openings.

Bells

The continuous rapid-fire ringing tone from these bells is distinctive, so it's sure to be heard. All are steel with two wire leads. Mounting hardware not included. UL and C-UL listed.

Indoor bells have a backplate with ¼″ dia. mounting holes for standard outlet box installation. *Indoor/outdoor bells* surface mount with the included outlet box that has a ½ NPT female conduit opening and two 5⁄16″ dia. mounting holes.

Bells with flashing light have a plastic lens and come with a bulb.

Bell guard fits over any of the bells listed. Made of zinc-plated steel, it is 17″ dia. and has four 5⁄16″ dia. mounting holes (fasteners not included).

Vehicle Alert Bells

Just like the bells you hear at service stations, this bell rings when a vehicle drives over the attached hose. Bell is steel and comes complete with 50 ft. of ⅜″ ID black rubber hose and a 6-ft. power cord. It operates on 120 volts AC and draws 10 amps. The bell is 6″ dia. and can be mounted indoors and out using three ⅜″ dia. mounting holes (mounting fasteners not included).

Add extra hose to span up to 300 ft. Use a hose splicer to connect hose lengths. Use a hose anchor to secure the end of the hose.

Bell	63965T21	$143.13
50 ft. of ⅜″ ID Hose	63965T12	54.68
Hose Splicer	63965T14	2.08
Hose Anchor	63965T15	17.26

Hammer Top Bells

These make great doorbells when used with a push button. Bells are steel with screw terminal connections and are for indoor use. The 5¾″ high and 6⅞″ high bells have two 3/16″ dia. mounting holes. All other models have three ¼″ dia. mounting holes. Mounting hardware not included.

Transformer converts 120 volts AC to 8 or 24 volts AC. It has three wire leads.

Push button is 2⅜″ dia., made of brass, and includes mounting fasteners. For indoor use.

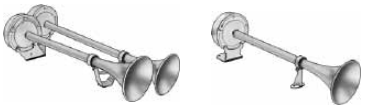
Trumpet-Style Horns



Electric (304 Stainless Steel)

Electric (Aluminum/Brass)

Air Powered

Electric

Electric horns produce a continuous signal; for a noncontinuous signal interrupt the voltage from the power supply. The *304 stainless steel* horns have excellent corrosion resistance. They are designed for intermittent use.

Aluminum/brass horns have ½ NPT female conduit openings and come with mounting brackets. Their maximum continuous cycle is 5 minutes on, 5 minutes off. 24-volt horn is FM approved. 120-volt horn is UL listed, CSA certified, and FM approved.

Lift Truck Horns

Mount these horns on your lift truck and they'll announce your arrival—no need to shout.

Styles A and **B** produce a sound that's loud enough to be heard in industrial settings. They're made of steel, and have two screw terminal connections and two 0.25″ wide male quick-disconnect terminals. For indoor use. Color is black. UL listed.

Style C has a built-in compressor (similar to a car horn) and produces a louder sound than other lift truck horns. It's made of black ABS plastic and has two 0.25″ wide male quick-disconnect terminals. Compressor is made of zinc-plated steel. For indoor use.

Style D lasts longer than other horns because it doesn't have moving parts, which tend to wear out. It's made of black nylon and is water resistant. Horn has epoxy-sealed electronic components and two 0.25″ wide male quick-disconnect terminals. UL listed.

Lift Truck Backup Alarms

Avoid accidents with these weather-resistant electronic alarms. They beep loudly and repeatedly when your truck moves in reverse. To install, wire the alarm between your battery and reverse lights. **Style E** alarms have screw terminal connections. **Style F** alarms have two wire leads. Alarms are resistant to vibration, dust, and moisture. Each has four 5/16″ wide mounting slots (mounting hardware not included). UL recognized.

All **single volume** alarms are made of glass-filled nylon. **Auto-adjust volume** model is made of glass-filled nylon. It detects the sound level around your vehicle and sets the alarm volume 5 dB above that level.

Backup alarm switch activates your alarm when you shift into reverse, so you can use the alarm on a vehicle without backup lights. Switch is made of zinc and operates on 12 to 80V DC at a maximum of 10 amps. Mounting bracket and hardware are included.

		dB @ 4 ft.	Amps

Backup Alarm Switch				56515T53	30.16

Lift Truck Motion Bells

Ditch switches and wires—just mount these bells directly to your vehicle's wheel hub. They're made of zinc-plated steel and can be used indoors and out.

Dual-direction bell sounds when the vehicle moves forward and in reverse. It has two 2″ Lg. × 1/2″ Wd. mounting slots (mounting hardware not included).

Single-direction bell sounds when the vehicle moves in forward or in reverse, depending on how you mount it. It can be mounted to 4, 8, and 12 lug hubs (mounting hardware included). **Hub adapter for single-direction bell** adapts 3, 5, 6, and 10 lug hubs for use with a single-direction bell.

Mounted to Wheel Hub

	dB @ 4 ft.	Dia.

Hub Adapter for Single-Direction Bell			5646T18	17.25

Multiple-Tone Horns

Horn swivels 180° on its mounting base, so you can point it in any direction. It has four continuous tones and produces 107 to 111 dB @ 10 ft. and 86 to 90 dB @ 100 ft. Horn is plastic and measures 9″ Ht. × 12 1/8″ Wd. × 14 1/2″ Dp. It has screw terminal connections and operates on 24V DC, 120V AC, or 240V AC. It draws 0.6 amps @ 24V DC, 0.21 amps @ 120V AC, and 0.12 amps @ 240V AC. Surface mount to an outlet box (sold separately) using the included fasteners. UL and C-UL listed.

Indoor outlet box is galvanized steel and has 1/2 knockouts.

Outdoor outlet box is aluminum and has 1/2 and 3/4 NPT female conduit openings.

Horn	6476T41	$497.17
Indoor Outlet Box	71695K12	1.96
Outdoor Outlet Box	5649T513	34.76

Hazardous Location Multiple-Tone Horns

Horns are UL listed for indoor and outdoor use in Class I, Div. 2, Groups A, B, C, and D; Class II, Div. 2, Groups F and G; and Class III hazardous locations.

Horns produce 27 tones. They're made of zinc, and measure 13 3/4″ Ht. × 8″ Wd. × 8 3/4″ Dp. They have three wire leads and three 1/2 knockouts. Surface mount using four 3/16″ dia. mounting holes (fasteners not included).

Horns operate on any of the following voltages: 120V AC, 240V AC, 120V DC, and 240V DC. They draw 0.31 amps @ 120V AC, 0.20 amps @ 240V AC, 0.20 amps @ 120V DC, 0.10 amps @ 240V DC.

Horn with 4-tone programming lets you select up to four tones, each corresponding to a different warning. If multiple signals are triggered at once, only the highest priority signal will sound.

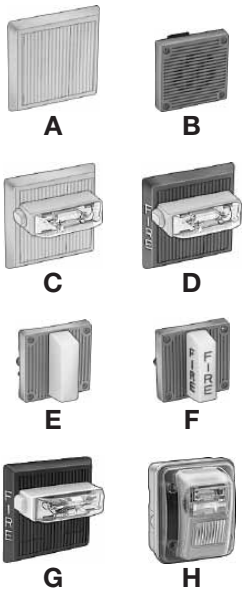
	dB @ 10 ft.	dB @ 100 ft.		
Horn with 1-Tone Programming	95-110	85-89	5823T41	$978.73
Horn with 4-Tone Programming	95-110	85-89	5823T42	1,287.22

Adjustable-Volume Multiple-Tone Horns

Horns can emit both continuous and pulse tones—pulse tones alternate on/off to draw greater attention than continuous tones. Horns produce 32 tones. Horns have an aluminum housing and measure 12 1/2″ Ht. x 8″ Wd. x 8 1/2″ Dp. They have screw terminal connections and a 1/2 NPT female conduit opening. Surface mount (no separate mounting box required) using the two 3/16″ dia. mounting holes (fasteners not included). They meet NEMA 3R for protection against rain, so they can be used outdoors. UL listed and California State Fire Marshal (CSFM) approved.

Volts	dB @ 10 ft.	dB @ 100 ft.	Amps		
120V AC	0-110	0-90	0.3	5682T67	$669.77
24V AC/24V DC	0-110	0-90	1.1	5682T65	669.77

Fire Alarms



Alarms are UL listed and California State Fire Marshal (CSFM) approved. Surface mount using an outlet box (sold separately below for Styles A-G; included for Style H). Fasteners are included. Alarms are plastic and have screw terminal connections.

Fire Alarms—Have eight tones and are suitable for outdoor use.

Fire Alarms with Strobe Light—In addition to an audible signal, these alarms flash a high-intensity white strobe to draw attention during fire emergencies. *Style C* has a 15/75 candela strobe, *Styles D* and *G* have a 15/30/75/110 candela strobe, *Styles E* and *F* have a 15 candela strobe, and *Style H* has a 75 candela strobe. The strobe on *Styles G* and *H* helps comply with ADA standards for photosensitivity when properly installed. *Styles C-F* have eight alarm tones and *Styles G* and *H* have two alarm tones. *Styles C, D,* and G are for indoor use only.

Indoor Outlet Box for Styles A-G is steel and has 1/2 and 3/4 knockouts.

Outdoor Outlet Boxes for Style A are plastic and have 1/2 knockouts.

Outdoor Outlet Boxes for Styles B, E, and F are aluminum and have 1/2 NPT female threads.

Fire Alarm Bells

These aluminum bells are bright red for visibility. They have screw terminal connections and surface mount using an outlet box (sold separately) with the included fasteners. Suitable for outdoor use. UL and C-UL listed and FM approved.

Indoor outlet box is galvanized steel and has 1/2 and 3/4 knockouts. *Outdoor outlet box* is aluminum and has 1/2 NPT female conduit openings. Color is red.

Bell guard is zinc-plated steel. It is 17″ dia. and has four 5/16″ dia. mounting holes (fasteners not included).

Sirens

Siren with Strobe Light

All sirens have a plastic housing and screw terminal connections. Surface mount using included hardware or an outlet box (sold separately).

Siren delivers 100 dB @ 10 ft. and 81 dB @ 100 ft.

Siren with strobe light delivers 100 dB @ 10 ft. and 80 dB @ 100 ft. Lens is plastic. **To Order:** Please specify light color: amber, blue, red, or white.

Indoor outlet box is steel and has 1/2 and 3/4 knockouts.

Outdoor outlet box is aluminum. It has 1/2 NPT female conduit openings and two 15/8″ mounting holes (hardware not included).

Multiple-Tone Sirens

Sirens can emit both continuous and pulse tones—pulse tones alternate on/off to draw greater attention than continuous tones. There are 32 tones to choose from and the decibel level can be set anywhere from 64 to 113 dB @ 10 ft. (55 to 89 dB @ 100 ft.).

Sirens are plastic with screw terminal connections and three 3/4 knockouts. Mount indoors and out using the included electrical box, which has four 1/4″ dia. mounting holes (hardware not included).

Volts	Amps	Dia.	Dp.

★ Amps measured @ 12V DC and 24V DC.

For information about sound levels, see page 1866.

Motor-Driven Sirens

The built-in motor-driven fan in these sirens generates a shrill tone that's audible over long distances. Sirens can emit a continuous or pulse tone—pulse tones alternate on/off to draw greater attention than continuous tones. They produce 113 dB @ 10 ft. and 89 dB @ 100 ft. Sirens have a shock- and corrosion-resistant powder-coated aluminum housing, so they're approved for use on U.S. Navy ships. They are 8½" Dia. × 15⅜" Lg. Sirens have two wire leads and a ½ NPT female conduit opening (male threaded conduit fitting is included). Mount them indoors or out (no separate mounting box required). 120V AC/DC siren is UL listed.

Weatherproof Telephone Enclosures

Protect your telephones from water, dust, corrosion, and extreme weather with these glass-reinforced polyester enclosures. They're rated NEMA 4X for washdown and corrosion protection.

Inside, enclosures have a mounting plate for a wall telephone (telephone not included). Inside dimensions are 11½" Ht. × 7¾" Wd. × 8" Dp.; outside dimensions are 14⅝" Ht. × 10⅞" Wd. × 10½" Dp. Enclosures have four 7/16" dia. mounting holes (mounting hardware not included). Color is gray. For indoor and outdoor use.

Enclosure with locking door comes with a lock and key for added security.

Pole-mounting kit lets you mount the enclosure on 2½" to 15" dia. poles.

Enclosure	5680T21	$185.13
Enclosure with Locking Door	5680T27	229.87
Pole-Mounting Kit	5680T31	150.43

Voice and Sound Recorders

Record and store up to 4,175 hours with this pocket-sized recorder. It has a built-in 4 GB memory and displays a time and date stamp for each recording on its screen, plus it has five folders to help you stay organized. Size is 4½" Ht. × 1½" Wd. × ⅞" Dp. Operates on two AAA batteries (included).

8700T1	$63.93

Telephone Privacy Booth

Have a private conversation, protected by this booth. Made of 16-ga. steel, it has a perforated interior backed with a sound-absorbing material and accommodates a handset phone. Booth has a gray enamel finish. Mounting hardware included. For indoor use.

30"	28"	26"	4877T11	$733.34

Speaker Volume Controls

With Volume Knob

With Key Lock

Wire one of these controls between your speakers and amplifier to adjust the volume. Controls have 10 sound levels and an off position, and are compatible with 25-, 70-, and 100-volt systems. A stainless steel mounting plate and mounting hardware are included. **Controls with volume knob** are ETL and C-ETL listed. **Control with key lock** prevents tampering.

Air- and Steam-Operated Long Distance Whistles

Without Valve

With Valve

The powerful tone from these whistles blasts over long distances—in every direction—and rises above background noise in loud environments. Whistles are brass and bronze. They operate at 50-200 psi; maximum input pressure is 200 psi @ 550° F. All have NPT female connections. Suitable for outdoor use.

Whistles without Valve—Apply air or steam pressure to produce a shrill tone and alert workers. Signal continues as long as pressure is applied.

Whistles with Valve—The quick-opening valve on these whistles allows manual operation—pull the valve while air or steam pressure is being applied to produce a shrill tone. The valve has a hole for attaching chain.

Speakers

For information about sound levels, see page 1866.

Wall-Mount Speakers

Expect high-quality paging and background music from this speaker. It operates on 25/70 volts and has a knob to adjust volume. Speaker has a white epoxy-coated steel housing and grille. It has six 3/8" dia. and four 1/4" dia. mounting holes (mounting hardware not included). For indoor use.

Note: Each speaker has several wattage options—the higher the watts, the louder your speaker will be. If you're connecting several speakers to one amplifier, the total watts of all speakers should not exceed the maximum wattage of the amplifier.

Watts	Max. dB @ 10 ft.	Ht.	Wd.	Dp.		
0.3, 0.6, 1.3, 2.5, 5	91	11 3/8"	11 5/8"	5 3/8"	57615T33	$59.08

Vandal-Resistant Wall-Mount Speakers

Tamper-resistant pin-in-torx screws on the cover of this speaker prevent vandalism. Speaker operates on 25/70 volts and has a white epoxy-coated steel housing with four 1/4" dia. mounting holes (mounting hardware not included). Size is 11 5/8" Ht. × 11 5/8" Wd. × 4 1/8" Dp. Surface mount indoors and out. A screwdriver bit is included for pin-in-torx screws.

Note: Each speaker has several wattage options—the higher the watts, the louder your speaker will be. If you're connecting several speakers to one amplifier, the total watts of all speakers should not exceed the maximum wattage of the amplifier.

Watts	Max. dB @ 10 ft.		
1, 2, 4, 8, 16	111	7695T1	$161.22

Premium Wall-Mount Speakers

These speakers have the best sound quality of our wall-mount speakers. Both have a switch to select either 70 volt or 8 ohm operation. Housing is plastic. Mounting bracket has four 3/16" dia. mounting holes (fasteners not included).

Note: Each speaker has several wattage options—the higher the watts, the louder your speaker will be. If you're connecting several speakers to one amplifier, the total watts of all speakers should not exceed the maximum wattage of the amplifier.

					White		Black

Hanging Speakers

For 360° sound projection, hang this speaker from a ceiling or I-beam. Speaker is white plastic and 9" Dia. × 20 1/2" Ht. It operates on 70 volts and comes with mounting hardware. For indoor and outdoor use.

Note: Each speaker has several wattage options—the higher the watts, the louder your speaker will be. If you're connecting several speakers to one amplifier, the total watts of all speakers should not exceed the maximum wattage of the amplifier.

Watts	Max. dB @ 10 ft.		
3, 6, 12, 25, 50	97	4304T3	$227.72

Ceiling-Mount Speakers

For clear public address announcements and background music, choose these speakers. They operate on 25/70 volts, except the 0.6- to 10.0-watt speaker operates on 70 volts. All are white and have an epoxy-coated finish. Speakers have a steel grille and include mounting hardware. For indoor use.

Note: Each speaker has several wattage options—the higher the watts, the louder your speaker will be. If you're connecting several speakers to one amplifier, the total watts of all speakers should not exceed the maximum wattage of the amplifier.

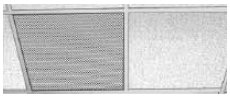
Quick-Install Speakers



Ceiling Mount

Beam Mount

Here's a no-hassle solution to your sound system needs: these speakers easily install into ceiling tiles or mount onto beams. They're perfect for paging and background music. Both models operate on 25/70 volts and have a white epoxy-coated steel grille. For indoor use.

Ceiling-mount speaker takes the place of a standard 24" × 24" ceiling tile—no cutting or mounting hardware required.

Beam-mount speaker secures to a beam or girder using the two included C-clamps.

Note: Each speaker has several wattage options—the higher the watts, the louder your speaker will be. If you're connecting several speakers to one amplifier, the total watts of all speakers should not exceed the maximum wattage of the amplifier.

Horn-Shaped Speakers

The horn-shaped design focuses the sound projection toward listeners. Speakers are epoxy-coated aluminum. All include a mounting bracket with three 1/4" dia. mounting holes. Fasteners are not included.

Style A doesn't have a transformer, so it must be attached to an 8-ohm amplifier output. **Style B** operates on 25/70/100 volts. **Style C** operates on 25/70 volts.

Note: Each speaker has several wattage options—the higher the watts, the louder your speaker will be. If you're connecting several speakers to one amplifier, the total watts of all speakers should not exceed the maximum wattage of the amplifier.

★ Watts with an 8-ohm amplifier.

Adjustable-Volume Horn-Shaped Speakers

Volume controls allow you to manually adjust output based on background noise. The horn-shaped design focuses the sound projection toward listeners. Speakers have a standard 600-ohm input for telephone paging. They don't work directly with a telephone.

Speakers—Made of beige epoxy-coated aluminum, speakers come with a mounting bracket with three 3/16" dia. mounting holes (fasteners not included). They must be externally powered by a 24V DC power supply (sold separately below).

Power Supplies—Required to operate speakers. They convert 120V AC to 24V DC, include a 6-ft. cord, and are UL listed. The *0.6 amp* power supply has a two-prong plug; the *4 amp* power supply has a three-prong plug.

Note: The total amps drawn by your speaker must not exceed the power supply's amp rating.

Public Address System Amplifiers

Desktop and Rack Mount

Wall Mount

Power your 25- or 70-volt public address system with these amplifiers. They support background music and paging (music is automatically muted during paging) and have bass and treble controls. All include inputs for low-impedance microphones and 600-ohm telephone systems. Amplifiers operate on 120 volts AC.

Desktop amplifiers have a 5-ft. cord with a three-prong plug. They can be wall mounted using the wall-mount bracket (sold separately). Bracket has eight 3/8" Lg. x 3/16" Wd. mounting slots (mounting hardware not included).

Rack-mount amplifiers have a 6-ft. cord with a three-prong plug. They include a bracket that has four 7/16" Lg. x 1/4" Wd. mounting slots to fasten to a standard 19" electronics rack, as well as fasteners for attaching to the amplifier (but not the rack).

Wall-mount amplifier has a 6-ft. cord with a three-prong plug. It has four 3/8" dia. mounting holes (mounting hardware not included). UL and C-UL listed. CSA certified.

Portable Public Address Systems

Corded System

Even with the built-in amplifier and speaker, these public address systems are light enough to carry from place to place—they weigh 4 lbs. (8 lbs. with batteries). They include a 50-watt amplifier, a 6" Ht. x 8" Wd. speaker, plus an input for a laptop or projector. Two interface cables (one for a laptop, one for a projector) and a carrying case with an adjustable shoulder strap are also included. Both systems operate on 10 D batteries or an AC adapter (sold separately below). Size is 11" Ht. x 13 1/2" Wd. x 4 1/2" Dp. UL and C-UL listed.

Corded system includes a microphone with a 15-ft. cord. **Wireless system** provides hands-free talking within 300 ft. It includes a wireless transmitter (requires one 9-volt battery, sold separately below) and two microphones: one headset model and one low-impedance lapel model.

AC adapter has a 7 1/2-ft. cord with a three-prong plug.

Corded System	5986T24	$467.81
Wireless System	5986T26	698.97
AC Adapter	5986T28	120.73
9-Volt Battery	71455K56	2.75
D Batteries (Pkg. of 6)	71455K55	7.32

Microphones, Plugs, and Cords

Microphones

Speak up and be heard with the help of these microphones. They're often used for paging, public address, and dispatching. Compatible with all amplifiers with a low-impedance input.

Hand-held plug-in model filters out wind, breathing, and other distracting sounds. It includes a swivel adapter for use with a stand, and has a 3-pin XLR male plug for connecting to a cord (sold separately below). Color is beige.

Hand-held hardwired model has a push-to-talk button and a 5-ft. cord with wire leads. It includes a mounting bracket with two 3/16" dia. mounting holes (fasteners not included). Color is black.

Freestanding hardwired model can lock "on" for hands-free operation. It has a 7-ft. cord with wire leads. Color is black and silver.

Microphone clip fits all microphones with 3/4" dia. and larger handles. It's made of black plastic and has a 5/8"-27 threaded female connection for mounting to a microphone stand.

Microphone stand extends from 35" to 63" high. Made of chrome-colored steel, it has a black 10" dia. base and a 5/8"-27 threaded male connection on top.

Hand-Held Plug-In	56785T111	$86.21
Hand-Held Hardwired	55295T125	109.09
Freestanding Hardwired	55295T225	218.18
Microphone Clip for Plug-In Microphone	55295T131	7.27

Megaphones

Handle Grip

Pistol Grip

Our voice-amplifying megaphones provide loud, clear communication even in noisy environments. They're weatherproof, so you can use them outdoors. All have an index finger push-to-talk trigger switch, a volume control knob, and a carrying strap. They're made of plastic. Color is blue and white except the pistol-grip megaphone with siren signal tone, which is gray and red. Batteries sold separately below.

Pistol-grip megaphones with a signal tone have a switch to activate the tone. **Pistol-grip megaphone with detachable microphone** has a shoulder strap.

All-Weather Intercoms

Bolstered by their sealed, heavy cast aluminum housing, these corrosion-resistant intercoms can handle extreme heat and cold. Rated NEMA 4X for corrosion resistance and washdowns. UL and C-UL listed for marine applications.

Stations have an amplifier, speaker, talk/listen toggle switch, and volume control knob. Connect multiple intercom stations using two-wire cable. All operate on 120 volts AC and draw 0.24 amps. Stations come with a 7-ft. power cord with a three-prong plug and a 7-ft. connection cable with wire leads. They have two 7/16″ dia. holes for wall mounting (fasteners not included). Size is 9 7/8″ Ht. × 6 3/4″ Wd. × 3 7/8″ Dp.

Intercom	5656T25	$659.45
Intercom with Call Button	5656T27	708.25

Build-Your-Own Low-Profile Railings

Flange

Support

90° Elbow

Domed End Cap

Coupling

Combine components to create a railing. They are sized to fit together and mount on floors and walls. All components are 304 stainless steel.

Rail has a material thickness of 1/16″. **Flange** and **support** come with mounting fasteners. **Coupling** includes adhesive and a mixing stick to connect two lengths of rail. When installed, the coupling is completely concealed by the rail.

Intercoms

Master Station

Desktop Substation

Wall-Mount Substation

Ceiling-Mount Substation

Create your own internal communication system. Choose a master station and one or more substations, then connect your system using two-wire audio cable (for cable, see 8233T31 on page 847).

All components are steel. Mounting hardware is included. For indoor use, unless noted.

Master stations have a built-in microphone and a volume control knob. Designed for desktop use, they operate on 120 volts AC and draw 0.6 amps. Both have a 6-ft. cord with a three-prong plug. The *master station for up to five substations* allows you to contact a specific substation or all substations at once.

Substations with call button enable you to initiate communication. **Substation without call button** must be selected at the master station in order to communicate. Includes a volume control knob.

The *wall-mount substation* mounts flush into a wall. Use the *wall-mount enclosure* (sold separately) to mount the substation onto the surface of a wall.

Wired Headset Radios

Over Head

Behind Head

Clip Adapter

Connect two headsets with an audio cable to transmit sound—your voice powers the radio's microphone.

Headsets have a metal headband, a microphone, and a 2 1/2-ft. cord. Ear cups are plastic with foam cushions. *Over-head* style has a noise reduction rating of 16 dB. *Behind-head* style can be worn under a hard hat. It has a noise reduction rating of 19 dB. For information about hearing protection, see page 1849.

Cables have a 1/4″ jack at each end. **Extension cables** have a 1/4″ jack at one end and a 1/4″ plug on the other.

Use a **clip adapter** to temporarily connect a radio to two wires rather than using a fixed wall plate jack system. It has a 1/4″ jack at one end and two alligator clips at the other.

Use a **wall plate jack** to create a fixed system between locations. Plug a radio into the jack and start talking. Any number of jacks may be wired together. For cable, see 8233T34 on page 847.

Radios

One-Watt Radio | 8-Channel Two-Watt Radio | Two-Watt VHF Radio | Four- and Five-Watt Radio

All of these radios operate on FCC designated business frequencies that require an FCC license. A frequency is the discrete setting on which a radio's transmission is carried; radios must operate on the same frequency to communicate with each other. Radios are narrowband capable.

Radios with multiple channels allow you to put different groups of users on an assigned frequency so they can operate within the same area without talking over each other. Change channels with the press of a button.

For better coverage and clearer transmissions, choose a radio with high wattage. UHF radios work best in and around steel and concrete structures. VHF radios work best in and around wood structures.

Radios have a black plastic housing. They come with a belt clip, a rechargeable lithium ion battery, and a charger that has a 6-ft. cord.

One-watt radios have an LCD for programming frequencies and codes. They come with a 3-hour charger. Size is 4 1/8″ Ht. × 2″ Wd. × 1 1/8″ Dp.

Two-watt radios have a voice scramble that allows you to input a privacy code—transmissions sound garbled to anyone listening without the same code. They come with a 4 1/2-hour charger. Size is 4 1/2″ Ht. × 2 1/8″ Wd. × 1 1/2″ Dp.

Four- and five-watt radios transmit with more watts than standard two-way radios. A 12-hour charger is included. Size is 4 1/2″ Ht. × 2 1/8″ Wd. × 1 1/2″ Dp. They meet MIL-STD 810 for resistance to shock, vibration, dust, and moisture.

Optional *six-unit desktop chargers* allow you to charge multiple radios at the same time.

D	Remote Speaker/Microphone	1467T26	58.33

Line-of-Sight Radios

Also known as a walkie talkie, this radio works best at short distances in areas with little to no obstructions. It operates on FRS (Family Radio Service) and GMRS (General Mobile Radio Service) frequencies and requires an FCC license, but won't work on FCC designated business frequencies and is not intended for commercial business use.

A frequency is the discrete setting on which a radio's transmission is carried; radios must operate on the same frequency to communicate with each other.

This radio has 22 channels. Channels allow you to put different groups of users on an assigned frequency so they can operate within the same area without talking over each other. Change channels with the press of a button.

Radio has a back-lit LCD, a battery life indicator, a plastic housing, and a removable swivel belt clip. It measures 6 1/4″ Ht. × 2 1/8″ Wd. × 1 1/8″ Dp. Power is 0.5 watt for FRS; 1 watt for GMRS. It runs on three AAA batteries (sold separately).

Optional *speaker/microphone* lets you use your radio without unclipping it from your belt. Optional *two-unit desktop charger* charges up to two radios and includes a charging adapter and two rechargeable NiMH battery packs.

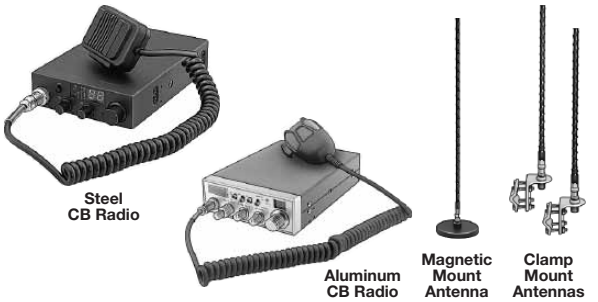
Replacement Belt Clip		5143T24	8.47
AAA Batteries (Pkg. of 4)		71455K62	2.82

CB Radios



These four-way 40-channel CB radios use nonbusiness designated frequencies and do not require a FCC license. A frequency is the discrete setting on which a radio's transmission is carried; radios must operate on the same frequency to communicate with each other. Channels allow you to put different groups of users on an assigned frequency so they can operate within the same area without talking over each other. Change channels by dialing the knob.

CBs have an LED display and a squelch control feature that lets you filter out static when the radio isn't transmitting. They come with a microphone with a 2-ft. coiled cord (cord for steel radio extends to 6 ft.; cord for aluminum radio extends to 9 ft.). They operate on 12 volts DC.

Steel radio is 1 3/8″ Ht. × 4 1/2″ Wd. × 6 3/4″ Dp.

Aluminum radio has an RF (radio frequency) knob to adjust signal and reception, and a microphone knob to control amplification and volume. Size is 2 1/8″ Ht. × 6 1/4″ Wd. × 10 1/4″ Dp.

Mount an antenna on the outside of your vehicle for better reception. Antennas have a fiberglass rod. The clamp-mount antenna comes with mounting hardware.

Cordless Telephone

You'll get portable convenience and reliable performance from this single-line cordless telephone. It is a DECT (Digital Enhanced Cordless Telecommunications) phone, and won't experience interference with any devices including wireless computer networks. Use up to 5 handsets with a single phone line. Frequency is 1.9 GHz.

Phone is powered by a rechargeable NiMH battery (included). Battery charger operates on 120 VAC, 60 Hz and has a 6-ft. cord with a two-prong plug. Includes caller ID, call waiting, speakerphone, volume control, and stores up to 50 phone numbers. Size is 5¼″ Lg. × 4½″ Wd. × 7″ Ht. Made of silver and black plastic.

		Each
Telephone	4077T7	$34.51
Replacement Battery	4077T72	15.60
Additional Handset	4077T71	25.07

Heavy Duty Plant Telephones

Indoor with Polyester Cord

Outdoor with Armored Cord

The glass-reinforced polyester surrounding these phones equips them to resist dirt, moisture, extreme temperatures, and corrosives. Phones have volume control, a sealed keypad, and a background noise-canceling device. All have four 0.28″ dia. mounting holes (mounting hardware not included).

Outdoor telephones are rated NEMA 3R for protection against falling liquids and light splashing.

Standard telephones are gray and UL listed. Choose from models with a 6-ft. retractable polyester cord and with a 15″ stainless steel armored cord. Armored cords have a pull strength three times greater than retractable polyester cords to deter vandalism.

Hazardous-location telephone is blue and meets UL and CSA specifications for Class I, Div. 2, Groups A, B, C, and D; Class II, Div. 2, Groups F and G; and Class III. It comes with a 6-ft. retractable polyester cord.

		With Polyester Cord		*With Stainless Steel Armored Cord*

Conference Telephone

Other speakerphones echo and cut out, but this unit provides free-flowing conversation with off-site colleagues. It receives and transmits signals simultaneously so calls never sound choppy.

Phone features three built-in microphones for 360° room coverage, built-in noise reduction circuitry, and volume control. It also has a jack for an external recording device (not included). The dial pad includes redial, mute, transfer, and hold buttons. Connects to any standard phone line. Size is 14½″ Lg. × 12¼″ Wd. × 2½″ Ht. Housing is black plastic.

5034T11 ..... **Each** $543.34

Call Boxes

Create a line of communication from a remote location such as a parking lot or security gate. Just press the button to automatically call a programmed number over a standard phone line. If the first programmed number is busy, the box calls a second number. Each box has its own phone number, so you can initiate calls to the call box using a regular touch-tone phone.

Boxes have an RJ-11 jack. They are made of stainless steel and have vandal-resistant screws to secure the faceplate to the box. Size is 9 15/16″ Ht. × 6 13/16″ Wd. × 2 7/8″ Dp. Mount indoors and out using four 1/4″ dia. mounting holes (screws not included). Temperature range is –4° to +149° F. Boxes have Braille and cast metal raised lettering to help comply with ADA requirements. CSA certified for outdoor use.

Emergency call box is marked with the word EMERGENCY in red lettering.

Telephone Signal Relay

Connect this easy-to-use relay to your phone and a light (or other signaling device) and it flashes the light on and off when the phone rings. Relay plugs into a two-prong outlet and accepts a two-prong plug. It operates on 120 VAC, 50/60 Hz and draws 0.1 amps. It's made of ABS plastic and includes a 6-ft. phone cord. Color is white. UL listed.

Note: For use with single-line analog phones only.

58015T12 ..... **Each** $34.46

Handset Cord Tangle Preventers

Tangle Preventer

Tangle Preventer with Cord

Attach these tangle preventers to your handset and cord—they allow the handset to rotate freely so the cord won't get tangled. Made of PVC.

Telephone Handset Holders

Leave your hands free while you talk. Made of PVC, these adhesive-backed holders adjust for use on either shoulder and provide nonslip support for the handset.

Color		Each
Black	1731T34	$10.44
Ivory	1731T32	10.44
White	1731T33	10.44

Telephone Volume Amplifier

Don't let background noise drown out your conversation. This device allows you to increase and adjust the volume of your telephone receiver. It plugs into your telephone and handset and is compatible with both single and multi-line telephones. Operates on one 9-volt battery (included). Made of plastic. Color is white.

59635T18 ..... **Each** $31.68

Telephone Surge Suppressor

Protect your telephone, answering machine, and other phone equipment from transient voltage surges. This easy-to-install surge suppressor plugs into a three-prong outlet, and comes with one RJ-11 input jack and two RJ-11 output jacks. Made of plastic. Color is white. UL listed.

1716T5 ..... **Each** $14.22

Telephone Signals

Mount these signals up to 25 ft. away from your phone and they'll alert you when it rings. All have RJ-11 jacks. Use a straight-line telephone cord (sold separately on page 1879) to connect the signal to your phone. If you have a single wall jack, add a duplex adapter (sold separately). No other connections necessary, unless noted.

Note: For use with single-line analog phones only.

Bell— Produces 95 dB at 3 ft., but has volume control so you can adjust loudness. Bell can be hardwired to your telephone ringer signal. It has two 1/2″ knockouts. Made of aluminum mounted on an aluminum electrical box. For indoor and outdoor use. UL listed.

120 VAC Bell— Decibel level is 98 dB at 10 ft. Bell has a 6-ft. cord with a three-prong plug for connection with a 120 VAC, 60 Hz outlet. It has two 1/4″ dia. mounting holes (screws not included). Made of steel mounted on a die cast aluminum electrical box. For indoor use. UL listed.

Strobe Light— Has a strobe that flashes whenever someone calls. Strobe light can be hardwired to your telephone ringer signal. It's made of plastic. For indoor use. Mounting screws included. UL listed.

Multitone Signals— Each offers four tones: bell, horn, vibrating chime, and single chime. Choose a tone and program your signal accordingly. Signals can be hardwired to your telephone ringer signal. Both models have two 1/2″ knockouts and include mounting screws. Made of plastic. For indoor and outdoor use. UL listed.

Standard Multitone—Decibel levels are 100 dB at 3 ft. for the bell tone, 108 dB for the horn tone, and 96 dB for the vibrating and single chime tones.

Multitone with Strobe Light—Provides a signal you can see and hear. Signal has a 15 candela strobe. It must also be hardwired to a 115 VAC, 60 Hz power supply. Decibel levels are 104 dB at 3 ft. for the bell tone, 109 dB for the horn tone, and 94 dB for the vibrating and single chime tones.

Telephone Jacks and Connectors

RJ11 jacks and connectors are primarily used in single-line telephone networks and with fax machines. **RJ12/RJ25** and **RJ45** jacks and connectors are for multiline telephone networks and data networks. Jacks and connectors are ivory, unless noted.

Jacks

Jacks with a 110 punch-down electrical connection are quicker to install than jacks with a screw-down electrical connection. 110 punch-down style require a punch-down tool (sold separately).

Single wall-mount jacks with phone bracket connect and hold the telephone on a wall. **Corrosion-resistant jacks** have a gel seal that protects the plug and jack connection from humidity, water, chemicals, and dirt.

Heavy Duty Ethernet Switches

5 Ports

With a durable plastic housing, these Ethernet switches are made to withstand the demands of harsh environments. They are washdown- and temperature-resistant. They have M12 D-coded ports for secure screw-in connections that are vibration resistant. Rated IP67. Switches operate on 10-30 volts DC and have a four-pole male sensor connector. **Power cable** (sold separately) has a female plug and four wire leads.

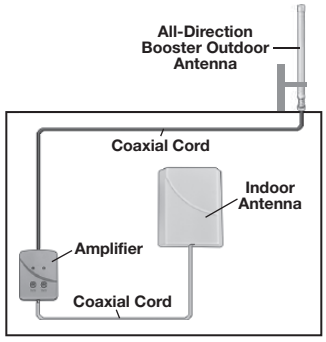
Cellular Phone Signal Boosters



Focused-Direction Booster Outdoor Antenna

Amplify weak cellular signals, resulting in fewer dropped calls and faster download speeds. Boosters are compatible with all U.S. cellular networks.

You'll get everything you need: indoor and outdoor antennas, an amplifier, a power supply, two RG6 coaxial cords, and mounting hardware. The indoor antenna mounts to a wall or ceiling, and the outdoor antenna mounts to the roof or a wall. The amplifier is 6½″ Ht. × 4¼″ Wd. × 1¾″ Dp. The power supply for the amplifier operates on 120 volts AC and has a 10 ft. cord with a two-prong plug.

Focused-Direction Boosters— For the fastest data connection on 4G devices, choose the 3G/4G booster. Install the outdoor antenna so it's pointed at your nearest cell tower. Coaxial cords are 30 ft.

All-Direction Booster— The outdoor antenna can pick up a cellular signal from any direction. Coaxial cords are 20 ft. and 30 ft.

Ethernet Switches

Light Duty 5 Ports

High and Extreme Temperature 5 Ports

Expand your data network by connecting computers, printers, and servers to an Ethernet switch.

Light Duty— These switches operate on 120 volts AC and have a 5-ft. cord with a two-prong plug. Housing is metal. The eight-port 100 Mbps switch is UL listed.

High and **Extreme Temperature—** Keep your plant floor connected with switches that can handle higher temperatures than light-duty switches. Mount these switches on DIN rail. They operate on 10-32 volts DC and have three screw-clamp connections, unless noted. Housing is plastic, except the 16-port switch has a metal housing. C-UL listed.

Switches with a fiber-optic port accept multimode fiber-optic cords. For fiber-optic cords, see page 1886.

■ Operates on 18-32 volts DC and has five screw-clamp connections.

Ethernet Cords

Connect computers, printers, and Ethernet switches to your data network. These cords are backward compatible, so they work in networks that meet the same or a lower category. **Shielded** cords prevent electromagnetic interference (EMI).

USB Hubs

4 Ports

Add USB ports to your computer. These hubs include a USB cord with a type A male plug to connect to a computer. They can run off your computer's power or use the included 120 volts AC power adapter. USB hubs are backward compatible, so they work with cords and connectors that meet the same or a lower USB standard.

No. of Ports	USB Standard		
3	3.0	4974T5	$60.00
4	2.0	4974T35	37.50
7	2.0	4974T36	58.94

USB Extenders

Stay connected to a USB device up to 150 feet away. The transmitter has a USB 1.1 type A male plug, and the receiver has a USB 1.1 type A female port. Run an Ethernet cord from the transmitter to the receiver. See page 1880 for Ethernet cords.

8560T1 — $53.40

Washdown USB Cords

In washdown environments, run these cords to a USB device inside an enclosure. The cords are rated IP67. USB cords are backward compatible, so they work with cords and connectors that meet the same or a lower USB standard.

A Male×Panel-Mount A Female—Cords connect to your device inside an enclosure. Choose USB 3.0 for the fastest data rates. Panel cutout dia. for USB 2.0 cords is 13/16″; for USB 3.0 cords, it is 1 1/16″. **Closure cap** (sold separately) protects the female port and is required to maintain the IP67 rating when not in use.

A Male×B Male—The type A male plug connects to a panel-mount A female port on the outside of your enclosure for a complete IP67 sealed connection.

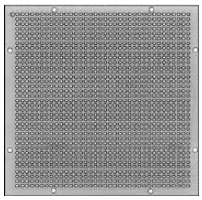
Ready-to-Use Circuit Boards



Also known as breadboards or protoboards, these boards have 0.042″ dia. holes spaced 0.100″ center-to-center so you can create a custom circuit board. Made of G-10/FR4 Garolite, they meet UL 94V0 for flame retardance. Boards are 0.062″ thick with a tolerance of 0.058″ to 0.066″. Color is yellow. Temperature range is 10° to 265° F.

Boards with **through-plated solder** have solder that goes through each hole and a solder pad on both sides. Also known as vias, through-plated holes allow you to make connections on both sides of the board.

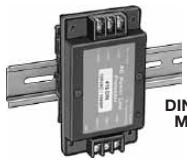
DIN-Rail Mount Surge Suppressors



DIN-Rail Mount

Slim Design DIN-Rail Mount

Snap these suppressors onto a 35 mm DIN rail for quick installation. They have three screw terminal input/output connections and a plastic housing. UL recognized, CSA certified, and CE approved.

DIN-rail mount have an LED status indicator. Install in series. You can also surface mount them using the 3/16″ dia. holes. Temperature range is –40° to +158° F.

Slim design DIN-rail mount has a mechanical red fault indicator and remote alarm contacts. It does not have a maximum amp rating because it installs in parallel. Temperature range is –58° to +185° F.

High-Definition (HDMI) Video Cords

Send high-definition signals to monitors, TVs, and projectors. Cords that are 33 ft. and longer have a built-in repeater that extends the signal to maintain digital quality. **Cords with Ethernet capability** are used with HDMI Ethernet Channel (HEC) devices. They allow an Ethernet-enabled device to share its connection with another device.

Ethernet Cable

Connect your office Ethernet network. This Ethernet cable is backward compatible, so it works in networks that meet the same or a lower category. **Category 3** cable can also be used in place of telephone cable.

Shielded cable has foil shielding that prevents electromagnetic interference (EMI) to minimize signal distortion. There is an uninsulated ground wire that is not counted in the number of wires. **Double-shielded** cable has foil and braided shielding to provide more EMI protection than standard shielded cable, so it prevents more signal distortion.

Duct-rated cable, also known as plenum cable, has low-smoke insulation and can be used without conduit in duct work and above a drop ceiling. Meets NEC Article 800, Type CMP.

Shielded Continuous-Flex Ethernet Cable

Transmit data in automated applications with this category cable made to Ethernet standards for transmission speed and construction. Use it when continuous movement is required in robotics and cable carriers. It has braided shielding that prevents electromagnetic interference (EMI) to minimize signal distortion. This Ethernet cable is backward compatible, so it works in networks that meet the same or a lower category.

Category 5E cable is UL recognized and CSA certified.

	Transmission Speed, MHz	Wire Ga.	No. of Wires	OD	Color	Lengths, ft.		Per Ft. 1-99	Per Ft. 100-Up

Industrial Communication-Standard Cable

Connect devices such as sensors, programmable logic controllers, and actuators to your automation network. Choose the communication standard that matches your existing network. Shielding prevents electromagnetic interference (EMI) to minimize signal distortion. *Foil and braid* shielding provides more EMI protection than foil or braid shielding alone.

Continuous-flex cable handles the rigorous flexing of automated applications such as robotics.

Communication Standard	Transmission Speed	Shield Type	Wire Ga. (No.)	OD	Color	Lengths, ft.		Per Ft. 1-99	Per Ft. 100-Up

Shielded Data and Communication Cable

Use this cable for complex data and signal transmission applications, including high-speed data transmission. There is an uninsulated ground wire that is not counted in the number of wires. Color is gray. Rated 300 volts AC. Meets NEC Article 725 and 800.

Standard

The foil shielding in this cable prevents electromagnetic interference (EMI) to minimize signal distortion. Use this in low-current circuits and communication and security systems, including intercoms and remote controls.

Wire Ga.	No. of Wires	OD	Capacitance, pF/ft.	Length, ft.		Per Ft. 1-99	Per Ft. 100-Up

Twisted-Pair Double Shielded

Use near variable-frequency drive motors and other interference-producing equipment—this cable is made to prevent more electromagnetic interference (EMI) and signal distortion than standard double-shielded data and communication cable. Its twisted-pair construction reduces internal EMI; the foil and braided shielding reduces external EMI.

Wire Ga.	No. of Wires	OD	Capacitance, pF/ft.	Lengths, ft.		Per Ft. 1-99	Per Ft. 100-Up
24	4	0.27″	12.5	10, 25, 50, 100, 500	75985K72	$0.57	$0.47

Shielded Continuous-Flex Data Cable

For applications requiring continuous movement in your plant-floor network, such as controlling order pickers and cranes, use this cable. It has braided shielding that prevents electromagnetic interference (EMI) to minimize signal distortion. Rated 300 volts AC.

Continuous-flex cable for harsh environments has insulation that resists oil and UV light.

Fiber-Optic Cords

In your fiber-optic network, use these cords to connect computers, servers, and Ethernet switches. They're rated OFNR (optical fiber nonconductive riser) so you can run them through the vertical shafts between floors.

Coaxial Connector Removal Tool

Even in hard-to-reach areas, unscrew BNC and F-type coaxial connectors. Tool is 8" long.

6287T35 ..... $24.73

F-Type Coaxial Splitters

3 Splits

Send the signal from one coaxial cord to multiple devices. All splitters have screw-on F-type connectors.

No. of Splits		
2	4229T17	$6.12

4	4229T19	10.04
8	4229T21	19.09

Coaxial Cable

Transmit audio, video, and data signals. Shielding prevents electromagnetic interference (EMI) to minimize signal distortion. *Foil and braid* shielding provides more EMI protection than braid shielding.

Duct-rated cable, also known as plenum cable, has low-smoke insulation and can be used without conduit in duct work and above a drop ceiling. Meets NEC Article 725, Type CL2P and Article 800, Type CMP.

Foil and Braid Shield

Coaxial Cable Connectors

Choose a connector that matches the RG number of your coaxial cable. **BNC** and **RCA** connectors are often used for audio and video transmission. **F-type** connectors are for video transmission. **SMA** connectors are often used for data transmission.

Crimp-on and **compression** connectors require a crimper (see page 1892) to attach to the cable. *Crimp-on* connectors attach with the included ferrule and create a hex-shaped connection. *Compression* connectors have a one-piece construction that provides the most secure connection.

BNC Connectors

Light Duty Data Plugs, Jacks, and Connectors

Crimp-On Plugs

To terminate these plugs, use a category cable crimper (see page 1892). Plugs are for solid and stranded wire. **Shielded** plugs prevent electromagnetic interference (EMI).

For Cable Category	No. of Wires	Pkg. Qty.	RJ45 Unshielded Plugs Color		Pkg	RJ45 Shielded Plugs Color		Pkg.
5E	8	10	Clear	68995K67	$8.10	Silver	8849T51	$14.40

Punch-Down Jacks

These jacks have a 110 punch-down connection; use a punch-down tool to terminate (see page 1878). All jacks can be snapped in to keystone style wall plates (see page 1889). **Unshielded** jacks are for solid wire. **Shielded** jacks are for stranded wire and prevent electromagnetic interference (EMI).

For Cable Category	No. of Wires	RJ45 Unshielded Jacks Choose a Color		Each	RJ45 Shielded Jacks Color		Each
3	8	Almond, White	3447T3	$4.40

6	8	Black, Blue, Gray, Ivory, White	1164N4	5.73			

Cord Couplers

Unshielded couplers are beige. **Shielded** couplers prevent electromagnetic interference (EMI) and are silver.

For Cable Category	No. of Wires	RJ45 Unshielded Couplers	Each	RJ45 Shielded Couplers	Each
5E	8	3243T22	$6.37	3243T27	$8.29

Snap-On Plugs and Jacks

With color-coded wiring guides and snap-together installation, these plugs and jacks speed up cable termination. They can be used with solid and stranded wire.

Plugs are shielded to prevent electromagnetic interference (EMI).

Adjustable plugs allow you to change the angle based on your application; they can be assembled in angles from 45° to 315°. **Continuous-flex** plugs have a cord grip for a more secure connection in constant motion applications such as robotics.

RJ45 Unshielded Jacks

For Cable Category	No. of Wires	Choose a Color		Each
5E	8	Blue, White	1164N1	$3.98
6	8	Blue, White	1164N2	4.33

6A	8	Silver	0.22″-0.41″	1164N21	$12.39	1164N22	$16.11			0.2″-0.38″	1164N23	$46.93

Screw-In Washdown Plugs, Jacks, and Cords

Screw together the sealed plugs and jacks to create an IP67-rated connection that withstands washdown environments. Color is black.

RJ45 sealed plug × crimp-on connection requires a category cable crimper to terminate (see page 1892).

To install a sealed jack in a panel, a 1″ dia. cutout is required. **RJ45 sealed jack × RJ45 jack** is shielded to prevent electromagnetic interference (EMI). **RJ45 sealed jack × 110 punch-down connection** requires a punch-down tool to terminate (see page 1878). **Jack cover** maintains the IP67 rating when a sealed jack is not in use.

RJ45 Sealed Plug × Crimp-On Connection

For Cable Category	For Wire Type	For Cable OD		
5E	Solid	0.1″-0.26″	5697T52	$17.76
5E	Stranded	0.1″-0.26″	5697T51	12.69

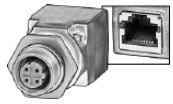
Washdown Plugs and Jacks

Keep your data network connections protected in washdown environments. When used together, these plugs and jacks provide an IP67-rated connection. All components are shielded to prevent electromagnetic interference (EMI).

RJ45 plug × snap-on connection and **M12 D-coded plug × snap-on connection** have an insulation displacement connector and don't require a tool for termination.

RJ45 connectors are gray. **RJ45 jack × RJ45 plug** requires a 7/8" dia. cutout for panel installation. It has a cover to maintain the IP67 rating when a plug is not connected.

M12 D-coded connectors resist vibration better than RJ45 connectors. **M12 D-coded plug × snap-on connection** is silver. **M12 D-coded jacks × RJ45 jacks** require a 21/32" dia. cutout for panel installation. Color is silver.



For Cable Category	RJ45 Plug × Snap-On Connection For Cable OD		RJ45 Jack × RJ45 Plug		M12 D-Coded Plug × Snap-On Connection For Cable OD		M12 D-Coded Jack × 90° RJ45 Jack		M12 D-Coded Jack × RJ45 Jack

Data Network Keystone Style Wall Plates and Connectors

Create various data connector configurations by choosing cord couplers to snap into the ports in these wall plates. **Single-device (1 gang)** wall plates are 4 1/2" Ht. × 2 3/4" Wd. Choose wall plates with angled ports to reduce cable strain. **Two-device (2 gang)** wall plates are 4 1/2" Ht. × 4 1/2" Wd.

BNC and **RCA** couplers are often used for audio and video transmission. **F-type** couplers are for video transmission.

DIN-Rail Mount Patch Panels

Even when space is limited inside an enclosure, this panel lets you expand and reconfigure your data network. It comes with 12 RJ45 jacks and a punch-down tool to connect them to Category 6 cable. The panel can be surface mounted or DIN-rail mounted; it includes a DIN-rail mounting adapter.

Ht.	Wd.	Dp.		
5 1/2"	3 3/4"	5 3/8"	4163T52	$161.54

Easy-Install Insulation Displacement Couplers

Quickly join solid or stranded low-voltage cable, such as Category 5, 5E, and 6. Insert cable into the funnel-shaped entry and crimp—no stripping is required because the coupler will pierce the insulation. For use up to 30 volts. **Crimper** (sold separately) is required for installation.

Corrosion-resistant coupler has a gel to protect the connection from humidity, water, and dirt.

	No. of Wires (Wire Ga.) Min.	Max.		Pkg. of 100
Standard	2 (24)	3 (16)	8414K1	$8.86
Corrosion Resistant	2 (24)	3 (16)	8414K5	10.62
Crimper			8414K9	Each $6.25

Insulation Displacement Connectors

For connecting solid Category 5 and other solid low-voltage cable without stripping, use these connectors that pierce the cable insulation. All have a corrosion-resistant gel seal to protect the connection from humidity, water, and dirt. For use up to 30 volts. **Crimping pliers** (sold separately) are recommended.

Butt Splices—Use to combine wires with a pigtail connection.

Tap Splices—Create a tap and run connection to split a new connection off an existing wire.

Tap and Run

Washdown Through-Panel Data and Power Ports

Mount these ports to the outside of an enclosure to access a programmable logic controller or other networked device without opening the enclosure.

They are rated NEMA 4 and 12 for protection from dust, dirt, washdowns, and oil/coolant dripping. A clear cover keeps water out when not in use. Electrical connections for wiring the receptacles are on the back. 15-amp receptacles have quick-disconnect terminals. 20-amp receptacles have screw-clamp terminals. UL listed.

Jacks are RJ45 and are on the front and back for connecting Category 5E cords.

Build-Your-Own Computer Connectors

By assembling your own computer connector, you can customize the wiring configuration. You'll get the housing, pins, and assembly hardware needed to build these connectors.

Crimp-on connectors are faster to assemble than solder connectors.

Crimper (sold separately) is required to install the pins. **Extraction tool** (sold separately) lets you remove the pins after crimping.

Shielded connectors prevent electromagnetic interference (EMI).

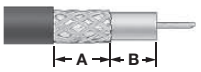
Cable Strippers & Crimpers

Data Cable Strippers

Stripper for Coaxial Cable

For three-layer stripping, this stripper includes a replaceable blade cartridge, four V-blocks to accommodate a variety of cable outer diameters, and a hex wrench to adjust blade height.

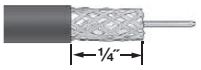


Strip Lengths

	For RG No.		
Stripper	178	7141K1	$67.85
Replacement Blades			
Strips 0.24″(A); 0.24″(B)		7141K2	34.82
Strips 0.33″(A); 0.11″(B)		7141K3	36.22

Confined-Space Stripper for Coaxial Cable

Choose this stripper for two-layer stripping of a short cable in a narrow space, such as in an outlet box. It includes a replaceable blade cartridge.

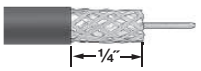


Strip Length

	For RG No.		
Stripper	6, 59	7141K11	$23.42
Replacement Blade		7141K22	6.25

Stripper for Coaxial and Category Cable

Switch out the four replaceable blade cartridges to cut and strip coaxial and category cable. The two coaxial cable stripping cartridges are for two-layer stripping. The coaxial cable cutting cartridge cuts down to the wire. The category cable cartridge strips the outer jacket of unshielded twisted-pair cable.



Strip Length

	For RG No.	For Cable Category		
Stripper	6, 7, 11, 59	3, 5, 5E, 6, 6A	7141K21	$34.33

For Stripping RG No. 7, 11			7141K23	6.25
For Stripping Category Cable			7141K26	6.25

Category Cable Crimpers

Standard

These crimpers work with category cable with a maximum OD of 0.3″. **Heavy duty** crimper is ratchet style to ensure a secure crimp with less force.

	For Cable Category	For RJ No.		
Standard	3, 5, 5E, 6, 6A	11, 12, 25, 45	56675T12	$66.67
Heavy Duty	3, 5, 5E, 6, 6A	11, 12, 25, 45	56675T11	73.67

Easy-Install Category Cable Crimpers

Speed up category cable termination by getting wiring right the first time. Pull wires all the way through the plug face to verify proper wire alignment. Then use the crimper to cut and crimp wires in one step.

Crimper is ratchet style to ensure a secure crimp with less force. In addition to these RJ45 pull-through plugs, the crimper works with standard RJ11, RJ12/25, and RJ45 connectors.

RJ45 pull-through plugs are for solid or stranded wire. **Shielded** plugs prevent electromagnetic interference (EMI).

Crimper

For Cable Category	For Max. OD		
3, 5, 5E, 6	0.28″	56675T13	$89.98

Coaxial Cable Crimpers

For BNC and SMA Connectors

Economy for BNC Connectors

For F-Type Connectors

Confined-Space for F-Type Connectors

Universal for BNC, F-Type, and RCA Connectors

Select the appropriate crimper by multiplying the outside diameter of your coaxial cable connector's ferrule by 0.87 and choosing the crimper with the closest matching cavity size. Ratchet-style crimpers ensure a secure crimp with less force.

For RG No.	Cavity Size	For Max. OD		
Crimpers for BNC Connectors—Ratchet Style

Tone Generators and Testers

Verify polarity, test for short circuits, check telephone line continuity, and trace cables. Tone generators and tester have LEDs to verify polarity. When testing for short circuits and line continuity and locating a cable, they emit an audible signal that can be heard with an amplifier (sold separately). They have red and black test leads with alligator clips. Tone generators require one 9-volt battery (sold separately). Multifunction tester requires two 9-volt batteries (sold separately).

Multifunction Tester—This tester checks resistance, capacitance, and circuit calibration, and it allows you to talk on a dead line.

Amplifiers—Used with a tone generator or tester, an amplifier lets you identify a cable without needing to make direct contact with a wire. The tone will get louder the closer you get to the correct cable. The amplifiers have a port for connecting a lineman's butt set. **Noise-filtering amplifier** blocks out power-line hum.

Cases are leather, except cases for tone generator with RJ45 plug and multifunction tester are nylon.

	Tone Generator with RJ11 Plug		Tone Generator with RJ45 Plug		Multifunction Tester with RJ11 Plug		Amplifier		Noise-Filtering Amplifier	
Testers	57175T1	$52.47	57175T9	$96.07	57175T6	$126.03	57175T5	$104.58	57175T8	$154.58

Inline Telephone Line Testers

Test a telephone line without disconnecting it. For inline testing, it has two RJ11 jacks. Tester comes with a cord with RJ11 plugs.

9240T4 ..... $24.11

Pocket-Size Telephone Line Testers

In one- and two-line analog telephone networks, measure voltage and continuity and verify polarity. The tester has LEDs to show if there is sufficient current available for proper network operation. It can simulate an off-hook state. The tester has an RJ11 jack and a cord with RJ11 plugs.

2189T16 ..... $19.29

Lineman's Butt Sets

Diagnose telephone line problems with this butt set. Because it is DSL-compatible, you can use the butt set with digital as well as analog lines. It measures DC line voltage and current, and it can check for a dial tone.

The LCD shows number dialed, caller ID, and call waiting. The butt set has a cordset with two alligator clips and an RJ11 plug. A headset is included for hands-free operation. Batteries are included.

57595T35 ..... $247.15

Data Cable Identifiers

Trace unshielded data and telephone cables. Identifier has two alligator clips, an RJ11 plug, an RJ45 plug, and an F-type male coaxial connector. Attach the identifier to send a signal through the cable that is received by the removable handheld probe. As you get closer to the cable you're tracing, the probe's audio and visual signals get stronger. Batteries are included.

1780T3 ..... $73.98

Coaxial Cable Testers

Test for open and short circuits in a coaxial line. The included four F-type male coaxial remotes allow you to trace four coaxial lines simultaneously. Tester comes with a nonreplaceable battery.

7901T2 ..... $34.21

Data Cable Testing Adapters

Attach a testing device, such as a tone generator, to test data lines without interrupting service. The tester has two RJ45 jacks and comes with a cord with RJ45 plugs.

9240T2 ..... $24.97

Data Cable Testers

When you test for short, open, and miswired circuits in data cable, the LCD on these testers displays the result. They include an RJ11/12 jack, an RJ45 jack, and an F-type male coaxial connector. Trace cable with the built-in tone generator with selectable tones. Battery is included.

Tester with Length Meter—By measuring capacitance, this tester can determine the length of coaxial and Ethernet cable.

Tester	7662T12	$95.89
Tester with Length Meter	7662T13	158.06

Power, Telephone, and Data Service Poles

When a workstation is not near a wall, these poles bring overhead cables within reach. They are internally divided to accommodate power cables on one side and telephone and data cables on the other. For power there are two duplex receptacles. Add jacks (see page 1888) to the knockouts to connect telephone and data cables, or run the cables through the knockouts to your equipment.

Mount poles vertically in rooms with ceilings up to 10-ft. high—no floor drilling or carpet cutting necessary. They come with carpet/floor grippers, ceiling trim plates, feed fittings, and mounting hardware. UL listed.

Aluminum pole is silver. **Steel** pole is off-white.

	Ht.	Wd.	Dp.		
Aluminum	10′ 5″	2¼″	2⁵⁄₁₆″	72135K44	$270.00
Steel	10′ 5″	2¼″	2⁵⁄₁₆″	72135K42	184.68

Build-Your-Own Stack Lights

Design a stack light with your choice of light pattern and color. Start with a base, then add up to five modules total—twist and lock them together. All components meet NEMA 4X for protection from corrosion and washdowns. All have a plastic lens. UL listed.

Bases are plastic and have a screw terminal for wiring. Each base comes with a top cap. *Surface-mount base* is 12⅝″ high and has four ¼″ mounting holes (fasteners not included). *Pipe-mount base* is 13⅜″ high and has a female ¾ NPT connection.

Continuous, flashing, and **strobe light modules** are 2⅞″ Dia. × 2⅜″ Ht. A maximum of 5 modules can be placed on the base.

Sound modules emit a continuous or pulse tone that adjusts from 88 to 100 dB at 10 ft. They must be placed in the top position. Size is 2⅞″ Dia. × 2¾″ Ht.

LED bulbs last longer than incandescent bulbs and provide years of maintenance-free operation.

Stack Lights

Indicate the condition of a machine or process with these ready-to-use, continuous lights.

Pipe/Surface Mount—Incandescent Bulbs

Three Light

These lights have plastic lenses that snap in and out, so you can easily swap colors or change their position in the stack. They meet NEMA 4X for protection from corrosion and washdowns. Diameter is 2¼″. Surface mount using four screws (not included) or pipe mount using the ¾ NPT female connection. UL listed.

Use the **extension pipe** and **mounting flange** to make the light taller (both sold separately).

Use the **vertical-mount bracket** (sold separately) to mount the light to a vertical surface such as a wall. Fasteners are included.

Surface Mount—LED Bulbs

Three-Light Standard

Lights have LED bulbs for years of maintenance-free operation. They meet IP65 for protection from washdowns and are UL recognized. Diameter is 1¼″. Lights have six wire leads. Mount the M22 male thread on the bottom of the light through a hole and then secure using the included nut.

Stack Lights with Buzzer

Three Light

Lights have LED bulbs for years of maintenance-free operation and can be wired as either continuous or flashing. The buzzer alerts workers when they're outside a direct line of sight. It sounds 90 dB at 10 ft. and has an adjustable volume control. Lenses and base are plastic. Diameter is 2⅜″. Lights meet IP54 for use in environments with splashing water. UL recognized.

Lights can be wall mounted with the included bracket and fasteners or pipe mounted with the included 11¾″ chrome-plated steel pipe with an M22 female connection. **120V AC** lights have twelve 39″ wire leads. **24V AC/DC** lights have ten 43″ wire leads.

	O'all Ht.	Amps	Color	120V AC		24V AC/DC

Push-Button Stack Lights

Give a signal with the push of a button. These lights have a control box with a button for activating each of the three LED light modules. Lenses and housing are plastic.

Mount the light by bolting the included bracket with two 3/8″ dia. holes to a surface (fasteners not included) or clamping it over a surface up to 2″ wide such as an office partition or workstation. You can adjust the height of the light by using either the included 3″ or 12″ mounting poles.

Mount the control box using the included tape with adhesive on both sides. It connects to the light via a 4-ft. connecting cable and has a 6-ft. cord with a plug.

Dia.	O'all Ht.	Amps @ 120V AC	Color		
2″	5 1/2″	0.03	Amber/Green/Red	3258T25	$244.31

Electronic-Alert Stack Lights with Buzzer

Get notified about equipment issues even when you aren't around your machines. These lights connect to your computer via Ethernet, allowing you to set up email alerts when there is a problem with a machine, server, or conveyor. The four-tone buzzer can emit both continuous and pulse tones—pulse tones alternate on/off to draw greater attention than continuous tones. Volume adjusts from 60 to 70 dB at 10 ft. Lights have an LED bulb for years of maintenance-free operation. Base and lenses are plastic. Light has a 3-ft. cord with a two-prong plug.

Dia.	O'all Ht.	Amps @ 120V AC	Color		
2 3/8″	13 1/4″	0.07	Amber/Green/Red	1043N11	$857.00

Quick-Connect Stack Lights

The quick-connect four-pole M12 plug on these lights makes them easy to hook up and configure. All have continuous LED light modules.

Stack lights stand out when placed on top of a machine. Base and lens are plastic. They meet IP65 for protection from washdowns. Mount the M22 male thread on the bottom of the light through a hole and then secure using the included nut and sealing gasket.

3-in-1 compact stack light emits three colors from a single lens and can be mounted in tight spaces where a tower will not fit. Color is selectable. Base and lens are plastic. Surface mount using the included screws. Use the **DIN-rail-mount bracket** (sold separately) to mount the light at any angle on a DIN rail.

3-in-1 Compact Stack Lights

Use these LED lights in tight spaces in place of a tower. They emit three flashing colors from a single lens. Color is selectable. Lenses and base are plastic. Rated NEMA 4X for protection from corrosion and washdowns. UL listed.

Lights—Surface mount using the included hardware or pipe mount using the 1/2 NPT female or 3/4 NPT male connection. All have four 18″ wire leads.

Lights with Buzzer—The buzzer alerts workers when they're outside a direct line of sight. Surface mount using the included hardware or pipe mount using the 3/4 NPT female connection. All have five 18″ wire leads.

Flashing Lights

About Relative Visibility of Signal Lights

Signal light visibility depends on a combination of light pattern and candlepower. When choosing a light pattern, think about where the light will be placed and how much attention you want it to draw.

Flashing—Commonly found on loading docks and railroad crossings, these lights are often used to notify workers of hazardous areas.

Revolving—More visible than flashing lights, these rotating lights are commonly found on hazards with moving parts, such as access gates.

Strobe—Intense bursts of light that reflect off surrounding objects make strobes the most visible. They're often used to call attention to hazards in motion, such as forklifts.

Candlepower (cp) indicates how bright a light appears at a distance. Common examples include a car's taillights (50 cp), traffic signals (600 cp), headlights (15,000 cp), high beams (50,000 cp), and police car searchlights (150,000 cp).

Surface-Mount Flashing Lights

Incandescent

Vibration Resistant

High Visibility and Long Life

The light pattern draws more attention to machine issues and work hazards than a continuous light. All lights meet NEMA 4X for outdoor use and washdown environments. Lenses are plastic.

Incandescent—*Surface-mount* lights include mounting fasteners. 120V AC light has two 15″ wire leads and is UL listed. 12V DC light has one 80″ wire lead. 24V and 36V DC lights have two 80″ wire leads. *Magnetic-mount with vehicle plug* light has a 15-ft. cord with a 12-volt vehicle plug.

Vibration-Resistant Incandescent—The pad below the base absorbs shock and vibration. All come with mounting fasteners. 120V AC light has two 15″ wire leads. 12V and 24V DC lights have two 30″ wire leads.

High Visibility Halogen—Surface mount with the included fasteners or use the ¾ NPT male connection for pipe mounting. All have 18″ wire leads.

Long-Life LED—These lights provide years of maintenance-free operation. Surface mount with the included fasteners or use the ¾ NPT male connection for pipe mounting. All have two 18″ wire leads.

Flashing Lights with Buzzer

Lights have a pulsing buzzer that sounds 85 dB at 10 ft. The buzzer warns workers of hazards even when they're outside a direct line of sight. Suitable for outdoor use. Lenses are plastic; bases are aluminum. Lights have two 6″ wire leads. Size is 6″ Dia. × 7⅜″ Ht.

Surface mount (fasteners not included) or pipe mount using the ½ NPT female connection. Lights are UL listed, except 12V and 24V DC incandescent lights.

To Order Please specify lens color: amber, blue, green, red, or white.

Solar-Powered Flashing Lights

Submersible

Place these LED lights in full sun and their batteries charge during daylight hours. Lights automatically switch on at dusk and off at dawn. They have a plastic lens and base and are suitable for outdoor use.

Portable lights have a magnetic base for quick positioning. They can be switched on or off with the press of a button. Includes four AA batteries.

Submersible light meets IP68. The lens has an integrated bird-deterrent spike. The base has four ½″ dia. mounting holes (fasteners not included). Includes a sealed battery.

One-Way-View Flashing Lights

Side-Mount Oval

Back-Mount Round

Back-Mount Rectangle

Direct your signal with these lights; they flash in one direction. All have long-life LED bulbs, plastic lenses, and an aluminum frame. Suitable for outdoor use.

Flashing lights flash in a series of four flashes per cycle. They operate on 0.3 amps at 12-24 volts DC. Side-mount lights have two ¼″ dia. mounting holes; back mount lights have four ¼″ dia. mounting holes. Screws not included.

Flashing/continuous lights can switch between being continuous or flashing. They operate on 0.3 amps at 12-80 volts DC. Light has three 12″ wire leads. Mounting hardware not included.

For information about signal light visibility, see page 1896.

Revolving Lights

The circular pattern of these lights draws more attention to hazards than flashing lights. They are suitable for outdoor use, except long-life LED lights. Lenses are plastic.

Incandescent—*Surface-mount* lights include fasteners and have two 6″ wire leads. *Pipe-mount* light has a ½ NPT male connection and two 20″ wire leads. *Magnetic-mount* light has a 6-ft. cord with a plug. *Magnetic-mount with vehicle plug* light has a 10-ft. cord with a 12-volt vehicle plug.

Harsh Environment Incandescent—Designed for corrosive environments, these sturdy lights meet NEMA 4X for washdown environments. *Surface-mount* lights include mounting fasteners. 120V AC light has three 30″ wire leads. 12V and 24V DC lights have one 6.5-ft. wire lead. *Pipe-mount* light has a ½ NPT female connection and three 28″ wire leads. UL listed. *Magnetic-mount with vehicle plug* light has a 15-ft. cord with a 12-volt vehicle plug. *Surface-mount bracket* has a ½ NPT male connection and includes mounting fasteners.

High-Visibility Halogen—These bright lights meet NEMA 4X for washdown environments. *Surface-mount* lights include mounting fasteners and one 6.5-ft. wire lead. *Magnetic-mount with vehicle plug* lights have a 15-ft. cord with a 12-volt vehicle plug.

Long-Life LED—These lights provide years of maintenance-free operation. *Surface-mount* light includes fasteners and has two 12″ wire leads. *Magnetic-mount with vehicle plug* light has a 15-ft. cord with a 12-volt vehicle plug.

Battery-Operated Signal Lights

Pocket-Size Continuous/Flashing

Continuous/ Flashing/Revolving

Strobe (Freestanding)

Set these portable lights wherever you need a signal light—they don't need to be wired or plugged in. All have a plastic lens.

Pocket-Size Continuous/Flashing—Carry these LED lights around with you and place them wherever needed. They can switch between being continuous or flashing. They come with a belt clip and run on two AA batteries (not included).

Continuous/Flashing/Revolving—These LED lights can switch between continuous, flashing, or revolving which draws the most attention. They have a carrying strap and run on two D batteries (not included).

Strobe—These lights have a xenon bulb and run on two included 6-volt batteries. *Tripod* lights adjust from 42″ to 70″.

Revolving Lights with Bell

The revolving motion of the light makes these more visible than flashing lights. The bell alerts workers when they're outside a direct line of sight. Volume is 93 dB at 10 ft. Lights operate on 0.4 amps at 120 volts AC. Bulb is incandescent. Overall size is 6″ Wd. × 15½″ Ht. All have a plastic lens. Surface mount using the two ¼″ dia. holes (fasteners not included). UL listed.

Indoor light has a plastic base. **Outdoor** light has a zinc base.

To Order: For lights and replacement lenses, please specify amber, blue, or red.

	Candlepower	Lights		Repl. Bulbs	
Indoor	4,000	14425T18	$367.81	14425T66	$23.22

Strobe Lights

Rectangle

Narrow Dome

Low-Profile Dome

Domed

Attract more attention with strobe lights than flashing or revolving lights. These emit short, intense bursts of light that reflect off surrounding objects. They have xenon bulbs. Lenses are plastic. Lights are designed for outdoor use. They meet NEMA 4X for protection from corrosion and washdowns, except pipe-mount low-profile lights.

Surface Mount

Rectangle lights have screw terminals and come with mounting fasteners. They meet IP66 and are UL listed.

Narrow-dome lights have two 1/4″ dia. mounting holes (fasteners not included). *120V AC* light has a 6-ft. cord with a two-prong plug. UL listed. *12-80V DC* light has two 12″ wire leads. UL recognized. *Pipe-mount bracket* comes with two U-bolts for wrapping around pipes.

Low-profile dome lights come with mounting fasteners. *120V* and *240V AC* lights have three 15″ wire leads. UL listed. *12-48V DC* light has two 30″ wire leads. Use the *pipe-mount adapter* (sold separately) to attach the base of the light to a 1/2 NPT male pipe.

Domed lights come with mounting fasteners. *120V AC* light has two 15″ wire leads. *12-24V DC* light has two 30″ wire leads.

Multiple-Flash Strobe Lights

Easier to spot than other strobe lights, these lights emit bursts of multiple flashes per cycle. Lenses are plastic. All lights are suitable for outdoor use.

Double Flash—These lights meet NEMA 4X for washdown environments. They come with mounting fasteners. *120V AC* light has three 15″ wire leads. Base is 304 stainless steel. *12-24V DC* light has two 30″ wire leads. Base is 304 stainless steel. *12-48V DC* light has two 30″ wire leads. Base is rubber.

Six Flash—A series of six flashes per cycle makes these lights stand out. Base is plastic. **Surface-mount** lights include mounting fasteners. *120V AC* light has a 4-ft. power cord. UL listed. *12-48V DC* light has three 12″ wire leads. **Magnetic-mount** light has a 10-ft. cord and plugs into a standard 12-volt vehicle receptacle.

Hazardous Location Signal Lights

These lights are UL listed for environments where fuels, solvents, acetylene, and other hazardous substances may be present. They meet NEMA 4X for protection from corrosion and washdowns. All have a plastic lens.

Flashing Lights—These have LED bulbs. They are UL listed for Class I, Div. 2, Groups A, B, C and D; Class II, Div. 2, Groups F and G; and Class III hazardous locations. Lights have two 18″ wire leads.

Strobe Lights—These have xenon bulbs. *Narrow-dome* lights are UL listed for Class I and II, Div. 2 hazardous locations. They have two 12″ wire leads. Pipe connection is ½ NPT female. *Domed* lights are UL listed for Class I, Div. 2, Groups C and D; Class II, Div. 2 Group G hazardous locations. They have two 15″ wire leads. Pipe connection is 1 NPT female.

Traffic Lights

Regulate traffic flow. Lights are steel with glass lenses. Bulbs are halogen. Each unit is 8″ Wd.×12¼″ Dp. All have screw terminals for hardwiring and two ¾″ dia. knockouts on each end for conduit connection. Meet OSHA standards.

One-light style has either an amber or red lens. To Order: Please specify color.

Two-light style has a red top lens and green bottom lens.

Three-light style has a red top, an amber middle, and a green bottom lens.

Flashers (sold separately) allow lights to be wired as continuous or flashing in any combination.

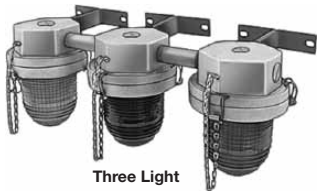
Continuous Signal Lights

Two Light with Optional Guard



Three Light

These lights have a cast aluminum body and glass lenses that hold up in rugged indoor environments. They have an LED bulb for years of maintenance-free operation. They are suitable for use up to 120 volts AC and have screw terminals. Pipe mount with the ¾ NPT female connection. They help meet OSHA standards.

One-light style is 7⅜″ Ht.×5½″ Wd.×5½″ Dp.

Two-light style is 14¾″ Ht.×5½″ Wd.×8¼″ Dp. It comes with a mounting bracket with two 5/16″ dia. holes (fasteners not included).

Three-light style is 7⅜″ Ht.×18½″ Wd.×8¼″ Dp. Each light has a mounting bracket with two 5/16″ dia. holes (fasteners not included).

Exit Lights

Illuminate the way out. Lights meet UL 924 and have corrosion-resistant housing. These products cannot be sold in California.

Plastic Housing

A

With Optional Wire Guard

B

Style A— Meet UL94V0 for flame resistance and are 2″ deep. They come with a bracket for wall, end, or ceiling mounting (screws not included), and are viewable from one or both sides. Housing is white. The *optional wire guard* is steel with a white polyester finish and comes with screws for mounting.

Style B— Rated NEMA 4X for washdown environments, these lights have a gray housing with a clear plastic cover plate. They measure 5″ deep, are one-sided, and include snap-out directional arrows. Furnished with four 1/4″ dia. mounting holes for wall mounting (screws not included).

Combination Exit and Emergency Lights

Locate exits, even during a power failure. Lights meet UL 924 and have a white housing with snap-out directional arrows. Exit lights have a battery for 1 1/2 hours of emergency lighting and operate on 120/277 volts AC.

Plastic Housing

E

F

Impact, scratch, and corrosion resistant, these signs have a plastic housing. They are viewable from one or both sides and can be mounted onto a wall, end, or ceiling. Mounting screws and bracket are included.

Style E has incandescent emergency lights.

Style F have LED emergency lights. They cannot be sold in California.

Accident Prevention Signs

Alert people to potential hazards in the workplace. Danger, Warning, and Caution headers meet OSHA requirements. All header colors meet ANSI Z535 specifications.

DANGER Indicates an imminently hazardous situation that, if not avoided, will result in death or serious injury. Typically used in extreme conditions. Danger headers have white letters on a red background.

CAUTION Indicates a potentially hazardous situation that, if not avoided, may result in minor or moderate injury. Caution headers are black and yellow.

WARNING Indicates a moderately hazardous situation that, if not avoided, may result in death or serious injury. Warning headers have black letters on an orange background.

NOTICE Indicates general instructions that are unrelated to bodily harm or safety. Notice headers have italicized white letters on a blue background.

English/Spanish

Accident prevention signs are available in bilingual English/Spanish versions in 10″ × 14″ and 14″ × 20″ sizes.

To Order Please ask for 4847T482 and specify corresponding English-language part number and sign material.

Accident Prevention Signs

For information about accident prevention signs, see page 1902.

Write-On Accident Prevention Signs

Signs have a blank area to write your own message. **Danger** header has white letters on a red background. **Warning** header has black letters on an orange background. **Caution** header has yellow letters on a black background. **Notice** header has white letters on a blue background. **Blank** sign is white.

Adhesive-backed vinyl signs are 0.004″ thick. *Plastic* and *aluminum* signs have four 3/16″ dia. mounting holes (screws not included). Plastic signs are 0.055″ thick. Aluminum signs are 0.04″ thick.

To Order: Please specify material.

Hand-Held Traffic Control Signs

Guide foot as well as vehicle traffic. Made of reflective aluminum, signs are 18″×18″ and have a 9″ long plastic handle. They have a message on both sides—stop side is white on red and slow side is black on orange.

Stop/Stop	5940T55	$40.30
Stop/Slow	5940T54	40.30

Sign Posts

Sign Posts

Reflective Marker

You'll get unbeatable durability from these steel sign posts. Holes are 3/8″ dia. on 1″ centers. Posts are for use with signs up to 18″×24″. Choose **galvanized steel** for enhanced corrosion resistance.

Drive cap prevents damage to the top of the post during installation. *Reflective marker* converts the sign post into a warning device. Marker is black on yellow reflective aluminum and is 30″ Ht.×3″ Wd. Mount using the two 3/8″ dia. holes (screws not included). *6-lb. aluminum base* is 15″ in dia. with a bracket that fits into the U-channel of the sign post. Base has three 9/16″ holes for bolting down when used outdoors (screws not included). *70-lb. concrete base* is 18″ in dia. with a bracket that fits into the U-channel of the sign post.

Overall Ht.	Overall Wd.	Green Painted Steel		Galvanized Steel

Portable Sign Posts

Put your sign in a prominent place, then relocate it as you see fit. This indoor/outdoor post is steel with a black painted finish. It has a 14″ dia., 32-lb. cast iron base. Mount the post to the base with the included hex bolt. Overall height is 48″; post OD is 1 7/8″. For use with signs that are 18″ or 24″ high.

5788T11		$98.00

Sign Mounting Brackets

A pair of these brackets allows you to mount a sign to an existing 4″ to 12″ diameter pole. Bracket is galvanized steel; strap is stainless steel. For use with signs that have 3/8″ diameter mounting holes.

	Pair 1-5	Pair 6-Up
1307T21	$16.03	$14.25

Railroad Signs

Stop them in their railroad tracks. Signs are made of reflective white on blue powder-coated steel. They are printed on one side and have two 5/8″ dia. mounting holes (screws not included). **Optional bracket** is zinc-plated steel and attaches to a rail. It also has two 5/8″ dia. mounting holes (screws not included).

2280T31

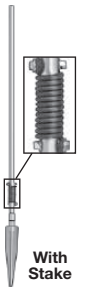
Optional Bracket

15″ Wd.×12″ Ht. Railroad Sign		$20.30
Optional Bracket	2280T35	$23.83

Bounce-Back Sign Posts



With Stake

With Bollard and Base

Reduce damage to signs, parking lot surfaces, and vehicles by installing these posts that rebound after contact. Made of steel, posts are 1 5/8″ OD with a spring at their base that offers 360° of flexibility. Mounting hardware and sign mounting brackets are included. **Posts with base** have a 9″ square base for mounting. **Posts with stake** are for driving into the ground.

Sign posts with bollard have a 52″ Ht.×7″ Wd. yellow plastic bollard with two reflective red bands for increased visibility.

Replacement sign mounting brackets are aluminum and allow you to mount signs up to 30″×30″ to the post (screws included). Use them in pairs.

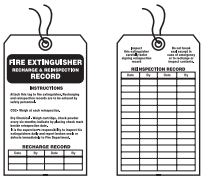
Cardstock Accident Prevention Tags

5860T31

5860T13



Front and Back of 5860T51

Alert workers of hazardous equipment the safe and professional way. Made of cardstock, these tags have one zinc grommet and two 6″ strings to attach to equipment. Each tag has space for a signature and date. Size is 7″ Ht.×4″ Wd. Use them to conform to OSHA 29 CFR 1910.145(f) and ANSI Z535. For blank cardstock tags, see page 1990.

Danger tags have headers with white letters surrounded by red with a black border. Messages have black letters on a white background.

Caution tags have headers with yellow letters on a black background. Messages have black letters on a yellow background.

Fire extinguisher inspection tag has a header with white letters on a red background. The rest of the tag is white with black letters.

To view images of these tags, go to mcmaster.com and search for the part number.

Package of 25 ... 1-3 $11.78 4-Up $10.02

Write-On Tags with See-Through Covers

Protect your message from wear—just peel back the clear plastic flap, write your message on the front of the tag, and then permanently cover it with the flap. Made of 0.015″ thick vinyl, these tags are 3 1/8″ Wd. × 5″ Ht. with a 3/8″ ID brass grommet and 6 3/4″ long nylon tie. Tags meet ANSI Z535.2-1991 and OSHA 29 CFR 1910.145(f).

For permanent markers, see 1661T on page 1972.

Danger tags have headers with white letters surrounded by red with a black border. Messages have black letters on a white background.

Valve No. tag has black letters on a blue, green, red, or yellow background. **To Order:** For valve tag, please specify background: blue, green, red, or yellow.

Tamper-Resistant Sign Holders

Lock the frame with the included Torx key to protect your signs from tampering. These holders have a black powder-coated steel frame. The display area is ⅛″ thick clear acrylic. Hinges are 304 stainless steel.

Mount holders to a wall using included fasteners. To mount to a pole, holders have four 1″ long slots for worm-drive hose clamps or steel banding (not included).

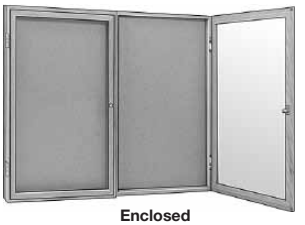
Bulletin Boards & Electronic Message Boards

Bulletin Boards

Open



Enclosed with Two Windows

Post announcements, flyers, and other documents on these boards. They come with mounting brackets (fasteners not included, unless otherwise stated).

Open—*Easy-clean rubber boards* are good for dirty environments; they have a black and tan surface that can be easily cleaned with a wet cloth. The 60″ and wider boards include mounting fasteners.

Enclosed—Control access to messages and guard against tampering. These boards have locking, shatter-resistant plastic windows that are keyed alike (all open with the same key). They come with two keys per window. *Cork boards with oak frame* do not come with mounting brackets. *Outdoor plastic boards* have a tan plastic surface that lasts longer than cork when exposed to harsh conditions. Install under an awning or overhang for use outdoors.

Electronic Message Boards

One-Row Display

Two-Row Display

Keypad

Messages draw attention as they display, flash, or scroll on these bright dot-matrix message boards. They have animations and editing functions. The included wireless keypad lets you program messages up to 30 ft. away. Letters center automatically and can be displayed in uppercase or lowercase. Frame is black.

They operate on 120 volts AC. Temperature range is 32° to 120°F. Mounting brackets and fasteners are included.

The 24″ long board with a one-row display includes software and a 25-ft. data cable that lets you program messages through your PC.

Replacement keypads include batteries, except 5779T23 requires two AA batteries (sold separately).

Portable Dry Erase Boards

For jobs that require mobility, these boards are easy to transport and set up. All have a white dry erase surface as well as marker and eraser holders.

Rolling Dry Erase/Bulletin Boards—These boards have a dry erase surface on one side and a cork surface on the other for posting bulletins. They have casters. Legs are oak.

Rolling Dry Erase Boards—You can write on both sides of these boards. They have casters with a locking brake. Legs are aluminum.

Adjustable-Height Dry Erase Board—The telescoping aluminum legs allow you to adjust the height.

Easy-Carry Adjustable-Height Dry Erase Board—Collapse the telescoping legs and fold the easel to convert this board into a carrying case for easy storage and transport. Legs are aluminum.

Easy-Carry Dry Erase Board—Use the built-in handles to move this lightweight board from room to room. You can lay it on a tabletop, mount it to a wall using pegs, or hang it from a cubicle divider with adjustable clamps (pegs and clamps sold separately). You can write on both sides.

Tripod Easels and Paper Pads

Write your message and then display it to capture attention. These easels have pad holders that adjust up or down to position pads of various heights, except the gray plastic easel has a fixed pad holder. *Gray plastic* and *aluminum* easels have telescoping legs that adjust for floor or tabletop use. Aluminum easels include a bar that allows you to hang pads from the top of the easel to use them as flip charts.

Magnetic Dry Erase Planning Boards

Plan production assignments, job schedules, time allocation, and inventory. Boards have a magnetic dry erase surface and an aluminum frame. Mounting brackets and fasteners are included.

Boards with Grid

These boards have grid lines that form a 1″×2″ pattern. They come with 1″×2″ magnetic card holders and blue, green, orange, white, and yellow blank cards that fit within the grid. Write or type on the cards, slip them into the holders, and place them on the board. Magnetic date headers for months, numbers, and days of the week are included.

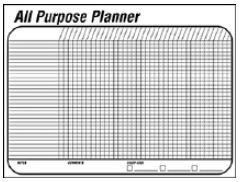
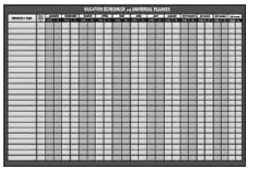
Calendar and Attendance Boards

30-Day Calendar Board



All-Purpose Planning Board

15-Employee Attendance Planning Board



Vacation Planning Sheet

Dry Erase Boards—All have an aluminum frame. *Calendar boards* and *all-purpose planning boards* are nonmagnetic. They come with four dry eraser markers (one black, one blue, one red, and one green) and mounting brackets (fasteners not included). The all-purpose planning board has a grid with write-on column and row headers. *Attendance boards* are magnetic. Write names on the board and mark the status of each person with a black magnetic dot. They come with one dot for each employee, two dry erase markers (one black and one red), a magnetic-back felt eraser, and mounting brackets with fasteners.

Wet Erase Sheets—Write on these reversible sheets with a wet erase marker and wipe clean with a damp cloth. They come with one black wet erase marker.

Wet erase marker set has one black, blue, green, and red marker.

Flags & Flagpole Accessories

United States Flags

Indoor Flag Set

Proudly made—and raised—in the United States of America. These flags have embroidered stars and brass grommets, except 8 ft. × 12 ft. and larger flags have rust-resistant D-rings or thimbles.

Flags for outdoor use resist sunlight and water. *Heavy duty polyester* flags withstand the most demanding weather conditions, especially high winds. *Fade-resistant nylon* flags have better UV resistance than polyester flags and will fly in the slightest of breezes.

United States indoor flag set has a fringed nylon flag with embroidered stars, sewn stripes, and a pole sleeve. The set includes an 8-ft. long, 1¼″ dia. two-piece oak pole; a gold-tone 8-lb. stand; a 7″ high eagle ornament; and a gold cord with tassels.

Flagpoles

Raise your flag with confidence. Poles are tapered satin-finish aluminum. They come with a gold anodized aluminum ball ornament, a pulley to raise and lower the flag, polypropylene rope, and a 9″ aluminum rope cleat. Poles are shipped in two or three pieces, unless noted

Standard flagpoles have two snap hooks. The 38½-ft. high flagpole has a revolving pulley.

Heavy duty flagpoles have a revolving pulley and swivel snap hooks with covers that allow them to move with the wind and resist strong gusts.

Aerosol Marking Paint and Dispensers

Paint

Hand-Held Dispenser

Rolling Dispenser with Distance Counter

Paint

Hold in an inverted position to spray, except overhead marking paint must be sprayed upright. Application temperature range is 50° to 80° F, except high-visibility turf marking and road marking paint have an application temperature range of 65° to 80° F.

Temporary marking chalk disappears in approximately 15 days when exposed to water, traffic, or abrasion.

Temporary marking paint fades in approximately 30 days when exposed to sunlight and traffic. Paint is acrylic-based. Apply **sealer** (sold separately) over temporary chalk or paint for up to 30 days of added protection.

Permanent marking paint is solvent based.

Unlike other marking paint, **permanent overhead marking paint** sprays in the upright position and dries fast, so it won't drip when applied overhead. It is water based.

Permanent turf marking paint is water based and will not harm grass or other plant life.

Permanent high-visibility turf marking paint lays on thicker than other turf marking paint, making cleaner, bolder lines. It is water based and will not harm grass or other plant life.

Spray **road marking paint** from the can for quick road marking with no need for brushes, rollers, or stripers. Good for marking traffic lanes, parking lots, and factory floors, it withstands abrasion in high-traffic areas. It is solvent based.

Large-Job Dispenser

Dispensers

Pull the pistol-grip trigger on these dispensers to release a line of paint. Use the **hand-held dispenser** for freehand marking. **Rolling dispensers** have one wheel and are 34″ high. The **rolling dispenser with distance counter** measures distance up to five digits. It has two wheels for added stability. Height is 37″. The **large-job dispenser** handles jobs such as striping a field or factory floor. It has four wheels, a windscreen, and storage for 12 aerosol cans. Height is 33″.

	Stripe Width

Road Marking Paint

Good for marking traffic lanes, parking lots, and factory floors, this paint withstands abrasion in high-traffic areas.

Latex paint cleans up easily with water.

Alkyd-based paint and **chlorinated rubber-based paint** last longer than latex paint in high-traffic areas. Paint and thinner cannot be sold in California or Utah. *Chlorinated rubber-based paint* forms a thicker coating than alkyd-based paint for better wear and weather resistance.

Apply **sealer** (sold separately) over paint for added protection. Sealer cannot be sold in California or Utah.

Road Marking Paint Stripers

Pump the handle on the tank lid to build pressure for even striping. Striper has a 304 stainless steel tank with a 4 gallon capacity that covers approximately 200 ft. per gallon. It works with all types of paint and allows striping next to curbs and walls.

Optional spray-wand attachment comes with 10 ft. of hose, two spray tips, and a 24″ brass extension wand.

	Stripe Width

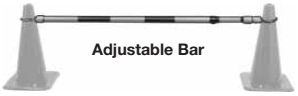
Cone-Mount Barricades



Mount these barricades to 28″ and 36″ high traffic cones. For cones, see 5901T above.
Adjustable bar barricades are 1⅜″ dia. ABS with a 3⅜″ dia. mounting ring on each end. **To Order:** Please specify reflective black/reflective yellow stripes or reflective orange/reflective white stripes.
Retractable-belt barricade requires one belt and one receiver (sold separately). Belts are 2″ wide polyester and come in a polyethylene housing. The belt receiver is PVC. **To Order:** For belt, please specify solid orange with orange housing or black/yellow stripes with yellow housing. For belt receiver, please specify orange or yellow.

	Lg.

Water-Fill Barricades

With Optional LED Light

You can fill these with water for added stability and drain when not in use for easy transport. Barricades connect side by side. Made of orange polyethylene. Meet NCHRP-350 crash testing standards.
LED light fits into the top of the barricades. Light has a 5″ Dia.×3″ Ht. red lens, a polypropylene base, and requires two 6-volt batteries (not included). Comes with mounting hardware.

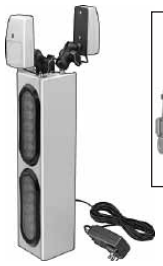
Blind Corner Warning Lights



When motion is detected from both directions at a two-way corner, these red LED lights flash to alert personnel and prevent collisions. Lights operate on 120 volts AC and have a 25-ft. cord with a two-prong plug. They have a yellow powder-coated steel body with plastic lenses and are suitable for outdoor use. UL listed.

Mount to a surface (fasteners included) or use a *remote sensor cable* (sold separately) to mount the motion sensor up to 20 feet away from the unit for a more advanced warning.

No. of Sensors	Maximum Sensing Distance, ft.		
2	35	1214N1	$621.21
Remote Sensor Cable		1214N11	61.67

Folding Guards

Three-Panel Barrier

Add-On Panel

Restrict access to an area of your facility. When not in use, the panels of this guard fold for easy transport and storage. Use an add-on panel to create a longer length. Made of 1 3/16″ thick yellow polyethylene. Helps meet OSHA 19.23(e)(1) requirements.

	Panel Ht.	Panel Wd.	O'all Wd.		
Three-Panel Barrier	31 3/8″	39 3/8″	118″	5434T82	$233.33

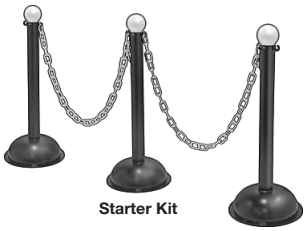
Chain Barriers

You can use these lightweight, weather-resistant barriers indoors and outdoors. Mix and match posts and chain to create a barrier that suits your needs. Posts, chain, sign holders, ball tops, and bases are polyethylene. Hook connectors, S-hooks, connecting chain links, and magnetic mount rings are acetal.

Barrier Kits



Starter Kit

Posts have a removable top. Fill the base with sand or pea gravel for added stability.

Starter kit includes three 41″ Ht. × 3″ Dia. black posts with 16″ dia. base, two lengths of 6′9″ long yellow chain, and three hook connectors.

Add-on kit includes one of each component in the starter kit.

Starter Kit	9197T12	$145.62
Add-On Kit	9197T13	50.57

Posts

All posts have a removable top. Fill the base with sand or pea gravel for added stability.

Round posts are 3″ dia. and have a hook connector at the top of the post to attach chain on either side. **To Order:** For solid posts, please specify black, orange, red, white, or yellow. For striped posts, please specify black/yellow, magenta/yellow, or orange/silver.

Square post is 5″ square and has four 3/8″ dia. mounting holes in the base for permanent installation. Pass chain through the hole in the top. Color is yellow.

Rack- and Magnetic-Mount Retractable Belt Barriers

Belts are 2″ wide polyester. Housing is black aluminum.

Rack-mount barriers attach to upright rack shelving to block off aisles. When the belt is extended, a connecting clip on the end secures it to the shelving holes or you can wrap the belt around a post and hook the clip to the belt. Rack shelving must have holes on 1 1/2″ centers.

Hook-on barriers hang from rack holes for temporary installation. **Bolt-in** barriers secure permanently to rack holes with a nut and bolt (fasteners included).

Magnetic-mount barriers have a magnetic housing and belt end to attach between metal surfaces—no mounting hardware required.

Retractable Gates

Gates collapse for easy transport and storage. To join multiple gates, slip the handle of one gate into the end post of another. Made of powder-coated aluminum and steel.

Gates with casters have 2″ dia. swivel casters. To Order: Please specify black/yellow or black/fluorescent yellow.

Locking bar keeps barrier from being folded up so it stays extended. It is steel and measures 12¾″ Lg. × 1½″ Wd. × ¼″ Thick.

Wall-mount brackets allow you to permanently attach gates to a wall. Brackets are 3″ Lg. × 1½″ Wd. and have two 1″ Lg. × ⅜″ Wd. mounting slots.

Replacement caster sets come with a set of four or six casters attached to the legs. To Order: Please specify gate part number and post color: yellow or fluorescent yellow.

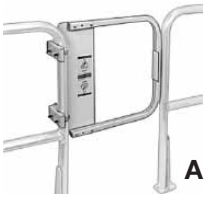
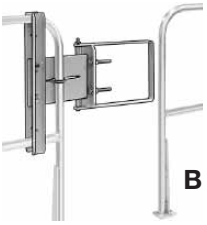
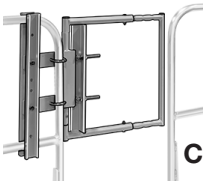
Safety Gates



A



B



C

D

No need to shut these gates behind you—springs automatically do it for you. Gates can be mounted on railings and walls to swing open to the left or right. Connecting fasteners are included except for Style D. All help meet OSHA 1910.23(a) requirements.

Style A&B gates mount to round railings up to 2″ dia. or 2″ square railings. The arm for Style A is 1¼″ Wd. × 1¼″ Dp. The arm for Style B is 1½″ Wd. × ¼″ Dp. Both have a slot with bolt for adjusting the arm to fit the opening. Gates can swing 180° in one direction. *Style A* gate arm is 22¼″ high. *Style B* gates have a low-profile 12″ high arm.

Style C gates adjust in 2″ increments to fit a wide range of openings. They mount to round rails up to 2″ dia. or square rails up to 2½″ Wd. × 2¼″ Dp., unless noted. The gate arm is 1¼″ Dia. × 21⅝″ Ht., unless noted, and has a removable pin for adjusting to fit the opening. Gates swing 90° in one direction.

Style D gate adjusts to fit a wide range of openings and has adjustable tension. It mounts to round railings up to 2″ dia. or 2″ square railings. The arm is 1⁵⁄₁₆″ dia. and has a set screw to adjust the gate to fit the opening. Has two ⁷⁄₁₆″ dia. mounting holes. Gate swings 120° in one direction.

Galvanized steel gates provide very good corrosion resistance.

Powder-coated steel gates offer some corrosion resistance and high visibility. Styles A-C are yellow; Style D is red.

Stainless steel gates provide excellent corrosion resistance.

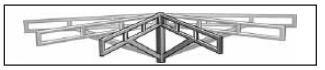
★ Made of 304 stainless steel. ■ Fits square rails up to 2″ wide. Gate arm is 22″ high.

Soft-Close Safety Gates

A hydraulic arm with adjustable tension allows this gate to close smoothly. It can be mounted on railings and walls to swing open 90° to the left or right. Arm is 2″ Ht. × ¾″ Wd. red powder-coated steel. A set screw adjusts the arm to fit the opening. It has two ⁷⁄₁₆″ dia. mounting holes. Helps meet OSHA 1910.23(a) requirements.

For Opening Size		
15″ to 31″	8147T81	$242.16

Parking Gates



Slide these gates over steel guard posts to control access to parking lots and dock doors. They fit 5½″-6″ dia. guard posts that are a minimum of 42″ high. All are yellow powder-coated steel. They swing in two directions.

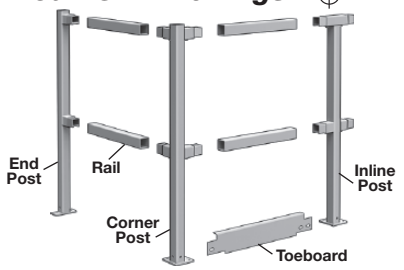
Build-Your-Own Railings



Modular mix-and-match components allow flexible railing configurations. All components are yellow enamel-coated steel.

Rails can be cut to length. The assembled length refers to the total installed length of the rail with posts on each side. Rails are 2″ Wd. × 2″ Dp. Connecting fasteners are included.

Posts are 2″ square with a 42″ high top rail and 21″ high midrail. Mounting fasteners are included.

Toeboards are 4″ high. Connecting fasteners are included.

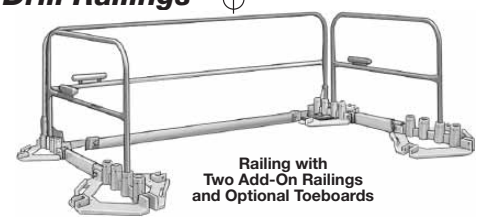
No-Drill Railings



Weighted bases allow you to install these yellow powder-coated railings without drilling holes. Top rail is 42" high and midrail is 20" high. Rails are 1⅝" dia. Railings include one rail, two bases, and two connecting pins. Railings can pivot in 45° increments. Add-on railings come with one rail, one base, and two connecting pins. When properly installed, railings meet OSHA 1910.23(c) and 1926.502(b) requirements when making a U-shape. *Optional toeboards* are 4" high. *Optional nonskid pad* protects the work surface from scuffs and scratches.

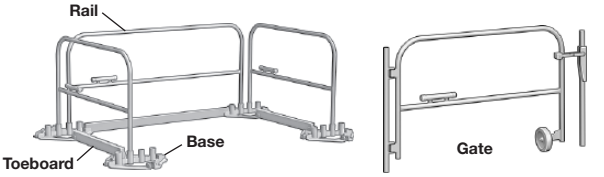
Build-Your-Own No-Drill Railings



Combine bases, rails, gates, and toeboards to create a barrier customized to your needs.

Base is weighted to allow installation without drilling holes. It accepts four rails.

Rails are yellow powder-coated steel. Top rail is 42" high and midrail is 20" high. Rail is 1⅝" diameter. Rails can pivot in 45° increments. When properly installed, rails meet OSHA 1910.23(c) and 1926.502(b) requirements when making a U-shape.

Gate can be mounted on the left or right to swing 135° in one direction. Latch post, pivot post, wheel, and two connecting pins are included.

Toeboards are 4" high. Made of zinc-plated steel. Include two connecting pins.

Nonskid pads are rubber to protect the work surface from scuffs and scratches.

Use rail-to-base connecting pins to secure the railings to the bases.

Guard Posts

Closed-top guard posts have a welded top. Guard posts with an eyelet have a welded eye for attaching chain.

Open-top guard posts allow you to pour in cement for added strength. The 24″ to 42″ high posts include an end cap. *In-ground posts* are 84″ high with a 42″ burial depth for an installed height of 42″.

Posts are yellow powder-coated steel with a 3″ high striped black band, except 57895T76 and 57895T77 are 304 stainless steel, which offers excellent corrosion resistance.

Build-Your-Own Guardrails

Gate (Shown with Posts and Mounting Plate Covers)

Combine rails, posts, and gates to make a custom guardrail system. All components are yellow powder-coated steel. Posts are 1/4″ thick; rails are 1/8″ thick. Both styles of rail can be used with both styles of post.

Posts come with connecting fasteners. Posts for two-rib components have 8″ square mounting plates. Posts for three-rib components have 10″ square mounting plates.

Bolt-in rails attach directly to the posts (fasteners not included). Three-rib rails have six 1″ Lg. × 5/8″ Wd. mounting holes. Two-rib rails have four 15/16″ Lg. × 9/16″ Wd. mounting holes.

Slide-in rails come with brackets that attach to the posts. Rails slide in and out of brackets for easy removal.

Gates have a spring closure mechanism and can be mounted on the left or right to swing open 90° in one direction. Two-rib gates have 10 1/4″ Lg. × 2 5/8″ Wd. mounting plates. Three-rib gates have 15″ Lg. × 3 1/2″ Wd. mounting plates.

Mounting plate covers are 2 3/8″ thick and include fasteners.

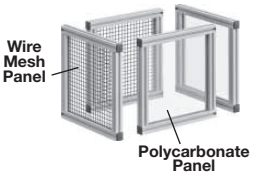
Machine-Mount T-Slotted Framing Machine Guards



Compact in size, these guards can be mounted directly to a machine or workbench. Panels are framed in 1″ square PVC-coated aluminum T-slotted extrusions to provide multiple points of attachment for other components. T-slots are 0.26″ wide. Fasteners not included.

Wire mesh panels are 0.0625″ dia. steel mesh with 1/2″ square openings. To Order: Please specify black or yellow.

Polycarbonate panels are clear and 3/16″ thick.

Chip Guards

Flexible-Arm Magnetic Mount

Swing-Arm Bolt-In Mount

Swing-Arm Magnetic Mount/ Bolt-In

Bolt-In Mount

Clamp-On Mount

Mount near a machine to deflect flying chips away from the immediate area. Panels are 1/8″ thick clear polycarbonate, unless noted.

Flexible-arm guards have arms that bend and twist in any direction. Clamp-on guards have a 2″ maximum clamp opening. Bolt-in guards have two 1/4″ dia. mounting holes (fasteners are included).

Swing-arm guards swing in and out as needed and can be locked in any vertical position. They have steel arms and 1/4″ dia. mounting holes, unless noted.

★ Has PVC arm and 3/16″ thick panel.

Machine Guards

Combine posts, panels, and doors to create a barrier around equipment. All components come with connecting fasteners.

Panels and doors are 6′6¾″ high.

Wire mesh panels and doors have black powder-coated steel mesh with 1⅞″ openings, except sliding mesh doors have a 1″ opening. Wire diameter is 0.165″.

Solid polycarbonate panels and doors are 3⁄16″ thick.

When standing on the side of the door that swings away from you, left-hand doors open to the left; right-hand doors open to the right.

Hinged doors have a slide-bolt latch.

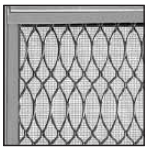
Hinged Chip Guards

Guard with Screen Panels



Reinforced Screen Panel

Protect personnel and equipment from flying chips with these portable chip guards. These guards consist of three 79¾″ Ht.×29¼″ Wd. panels. Overall width is 87¾″.

Guards with a screen protect against larger chips and allow air to pass through. The reinforced screen panels have a grille that provides more impact resistance than the screen alone. Guards with solid panels provide the most protection.

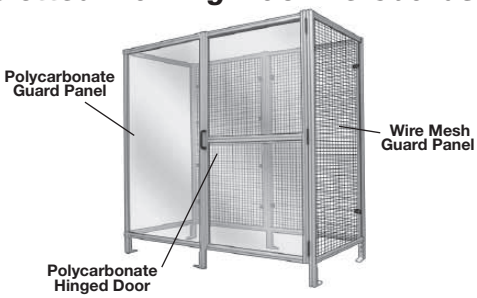
T-Slotted Framing Machine Guards



Framed in 1½″ square aluminum T-slotted extrusions, these customizable machine guards provide multiple points of attachment for other components and structures. T-slot width is 0.320″. All components have a 6″ floor clearance. Connecting fasteners are included.

Panels include two posts. Choose from 1⁄4″ thick polycarbonate panels and PVC-coated steel mesh panels with 1″ square openings and 0.0781″ dia. wire mesh.

Doors have a slide-bolt latch. They can be mounted to swing open to the left or right.

Quick-Access Machine Guards

These panels lift on and off their posts in seconds, so you can protect machinery while providing access for maintenance. All components are yellow polyurethane-coated steel. Floor clearance when assembled is 12″.

Panels permanently secure to the posts with the included self-tapping screws. They have a 0.125″ dia. wire mesh with 1½″ square openings.

Post is 6″ Ht.×2½″ Wd.×1⁄16″ Thick. Use as center or corner post. Mounting fasteners are included.

Door can be mounted to swing open to the left or right and can be locked with a padlock (maximum 3⁄8″ shackle dia.). Connecting fasteners are included.

Aluminum T-Slotted Framing

Solid

Hollow

If you can design it, you can build it with this versatile "create anything" framing. Use it to make machine guards and frames, carts, workstations, enclosures, and more.

Extrusions have continuous T-slots along the length to provide attachment points for other components, making structures easy to assemble and reconfigure. Use fasteners to connect components.

Hollow extrusions are lighter weight and more economical than solid extrusions.

Brackets and Braces

Connect extrusions without machining with these screw-on brackets and braces (fasteners included). They are aluminum, except brace ends are zinc.

Brace ends allow you to make a brace of any length—you supply the connecting extrusion between the brace ends.

Connectors

Concealed connectors require one tapped hole to insert and one drilled access hole to tighten. They are zinc-plated steel.

Adjustable connectors allow positioning anywhere along the extrusion. One counterbored hole is required. They are zinc.

End-to-end connectors require two counterbored holes. They are zinc.

External connectors require tapped holes. They are aluminum.

Pivots and Hinges

Provide smooth, consistent motion at the junction between two extrusions. Fasteners included.

Inline and **perpendicular pivots** are aluminum. **Locking pivots** can be used inline or perpendicular and have a locking handle. They are zinc, except pivots for 20 mm high single profile extrusions and 2″ and 60 mm high double/quad profile extrusions are aluminum.

Inch hinges are aluminum. **Metric hinges** are nylon, except the hinges for 40 mm and 45 mm high extrusions are black powder-coated zinc. **Heavy duty hinges** are aluminum.

♦ Made of 302 stainless steel.

Drop-In Fasteners

Place these fasteners directly into the extrusion to attach components—no need to disassemble your structure. Fasteners consist of a screw and nut. All are zinc-plated steel.

Rubber-handle fasteners can be tightened with a hex key (not included). Color is black.

Spring-loaded ball fasteners hold nut in place. Tighten with a hex key (not included).

Double-spring tab fasteners align the nut flush with the T-slot opening. Tighten with a hex key (not included).

Fasteners **with stud** twist into place for quick attachment of inside braces and other accessories. They can be used for grounding anodized extrusions. Tighten with a socket wrench.

Aluminum T-Slotted Framing *(Continued from previous page)*

Mounting Plates, Holders, and Brackets

All include mounting fasteners.

Mounting plates have flat head screws and room to drill your own mounting holes. They are aluminum.

Sensor holders accept photo eyes, laser sensors, and light sensing switches. They are black nylon.

Monitor mounting brackets are compatible with 75 mm and 100 mm VESA mounting hole patterns. They can swivel and pivot. Brackets are plastic.

Bin box holders allow you to hang any storage bin with a lip on an extrusion. They are aluminum.

Floor-Mounting Brackets, Plates, and Feet

Floor-mounting brackets are aluminum, except adjustable-height bracket is zinc. Fasteners included for attaching to an extrusion.

Threaded end caps accept leveling feet and casters. They are zinc with a black powder coating. Fasteners included.

Swivel leveling mounts swivel 15°. One tapped hole is required. They are zinc-plated steel with a nonskid rubber pad.

Swivel casters swivel 360° and have a brake. One tapped hole is required, unless noted. *Inch* casters have rubber wheels. *Metric* casters have plastic wheels.

★ This product is for use with double or quad framing. Requires two tapped holes.

(Continued on following page)

Aluminum T-Slotted Framing *(Continued from previous page)*

Panels, Panel Holders, and Door Hardware

Wire mesh panels have a 1/8″ wire dia. and 1″ × 1″ openings.
Solid panels are 1/4″ thick, except perforated aluminum panels are 1/8″ thick with 3/8″ dia. openings.
Panel holders are aluminum and include fasteners, except twist-in solid panel holders are black nylon and don't require fasteners.
Sliding tracks for solid panels consist of a top and bottom track that accept up to three 1/4″ thick panels, except the track for 1″ wide extrusions accepts two panels.
Lift-off solid panel hangers can be easily repositioned. They are black powder-coated zinc.
Panel gaskets hold 1/4″ thick panels in place. They are black rubber.
Roller wheels are black nylon and include fasteners.
Sliding door glides rotate 360°. They are UHMW. Fasteners included.
Panel hinges accept panels up to 1/4″ thick. They are black plastic and include fasteners.
Magnetic latches accept panels up to 3/16″ thick. Fasteners included. *Inch* latches are aluminum. *Metric* latches are black nylon.
Slide-bolt latches include fasteners. *Inch* latches are aluminum. *Metric* latches are zinc.
Handles are black plastic and include fasteners.

Aluminum T-Slotted Framing *(Continued from previous page)*

Plastic Caps and Covers

End caps are black.
UHMW strips are slippery, abrasion-resistant inserts that allow you to create smooth motion along a T-slot.

T-slot covers conceal wires and keep dust out of the T-slot. They can be cut with scissors. *Black* covers can be turned over to hold a panel.

Cable Holders

Cable tie holders are black nylon and accept ties up to 3⁄8″ Wd. x 1⁄16″ Thick.
Cable holders allow you to attach cable or tube without using cable ties. They are black nylon.
Brush strips cover door gaps and keep out air currents and dust. They are black plastic with 3⁄8″ bristles.

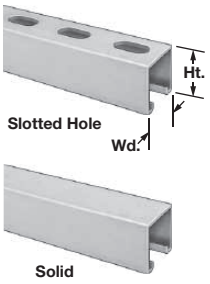
Strut Channel



Channel is 1⅝" Ht. × 1⅝" Wd.

Slotted Hole—Holes are 1⅛" Lg. × 9/16" Wd. on 2" centers, except fiberglass are 1" Lg. × ⅜" Wd. The first hole is 7/16" from the end, except for primed steel first hole is ½" from the end.

Zinc-plated steel channel offers good corrosion resistance.

Primed steel channel, also known as galvannealed steel, is weldable and ready to be painted.

Galvanized steel channel offers better corrosion resistance than zinc-plated steel and can be used outdoors.

Aluminum channel is corrosion resistant and about half the weight of steel.

304 stainless steel channel offers better corrosion resistance than zinc-plated steel and galvanized steel.

316 stainless steel channel provides maximum corrosion resistance.

Fiberglass channel is nonconductive, corrosion resistant, and about half the weight of aluminum. Temperature range is –30° to 200° F.

6′8″ long channel is for use with beams spaced 6 ft. apart. The length allows 4″ on each end to attach the channel to the beam.

To Order: For choose-a-color steel, please specify black, red, white, or yellow.

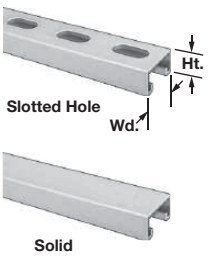
Low-Profile Strut Channel



These channels fit in tight spaces but are the same width as regular strut channel, so they fit many of the same connectors. Channel is 13/16" Ht. × 1⅝" Wd.

Slotted Hole—Holes are 1⅛" Lg. × 9/16" Wd. The first hole is 7/16" from the end, except primed steel is ½".

Zinc-plated steel channel offers good corrosion resistance.

Primed steel channel, also known as galvannealed steel, is weldable and ready to be painted.

Galvanized steel channel offers better corrosion resistance than zinc-plated steel and can be used outdoors.

Aluminum channel is corrosion resistant and about half the weight of steel.

304 stainless steel channel offers better corrosion resistance than zinc-plated steel and galvanized steel.

316 stainless steel channel provides maximum corrosion resistance.

6′8″ long channel is for use with beams spaced 6 ft. apart. The length allows 4″ on each end to attach the channel to the beam.

To Order: For choose-a-color steel, please specify black, red, white, or yellow.

Stacked Strut Channel

Slotted Hole—Holes are 1⅛" Lg. × 9/16" Wd. on 2" centers, except fiberglass holes are 1" Lg. × ⅜" Wd. The first hole is 7/16" from the end.
Zinc-plated steel channel offers good corrosion resistance.
Galvanized steel channel offers better corrosion resistance than zinc-plated steel and can be used outdoors.
Aluminum channel is corrosion resistant and about half the weight of steel.
304 stainless steel channel offers better corrosion resistance than zinc-plated steel and galvanized steel.
Fiberglass channel is nonconductive, corrosion resistant, and half the weight of aluminum. Temp. range is –30° to 200°F.
To Order: For choose-a-color steel, please specify black, red, white, or yellow.

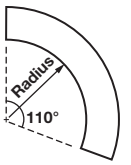
Curved Strut Channel

Top/Bottom Opening

Inside Opening

Outside Opening



This channel lets you create continuous runs without corners. It is zinc-plated steel and 1⅝" Ht.×1⅝" Wd.×0.11" Thick.

Top/bottom opening channel can be suspended for use in light duty conveying and other trolley applications.

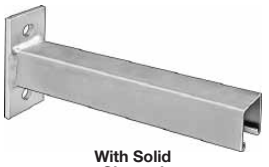
Opening Location	Radius, ft.	6-ft. Lg.
Top/Bottom	3	3147T1 $95.05
Inside	3	3147T2 79.21
Outside	3	3147T3 79.21

Strut Channel with Finished Ends

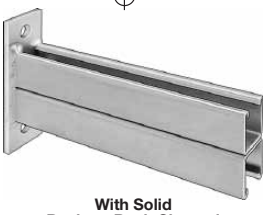
These short lengths of strut channel with welded ends provide an attractive way to mount clamps and other strut channel accessories to machines and surfaces. Channel is 1⅝" Ht.×1⅝" Wd.×0.11" Thick.

Material	3" Lg.	6" Lg.
Galvanized Steel	1266N11 $12.46	1266N12 $14.91

Strut Channel Wall Mounts



With Solid Channel



With Solid Back-to-Back Channel

Mounts with solid channel have a ¼" thick mounting plate with two 9/16" dia. mounting holes spaced on 3" centers.

Mounts with solid back-to-back channel have ⅜" thick mounting plates with two 9/16" dia. mounting holes spaced on 4⅝" centers.

Zinc-plated steel mounts offer good corrosion resistance.

Powder-coated steel mounts are green.

Galvanized steel mounts offer better corrosion resistance than zinc-plated steel and can be used outdoors.

304 stainless steel mounts offer better corrosion resistance than zinc-plated steel and galvanized steel.

316 stainless steel mounts provide maximum corrosion resistance.

To Order: For choose-a-color steel, specify black, red, white, or yellow.

Strut Channel Floor Mounts

Single Channel Straight Post

Stacked Channel Angled Post

Plastic Single Channel Post

Attach these mounts to the floor to support upright 1⅝" Ht.×1⅝" Wd. strut channel. Mounting holes are on 4¼" centers, unless noted. Mounting bolts are not included. Note: Base height does not include plate thickness.

Steel and **stainless steel** mounts with 4"×6" plates have two ¾" dia. mounting holes. Mounts with 6"×6" plates have four ¾" dia. mounting holes.

Zinc-plated steel mounts offer good corrosion resistance.

Galvanized steel mounts offer better corrosion resistance than zinc-plated steel and can be used outdoors.

304 stainless steel mounts offer better corrosion resistance than zinc-plated steel and galvanized steel.

316 stainless steel mounts provide maximum corrosion resistance.

Plastic mounts are compatible with fiberglass strut channel. They have four ⅝" dia. mounting holes. Temperature range is –40° to 140° F. Color is gray.

To Order: For choose-a-color steel, please specify black, red, white, or yellow.

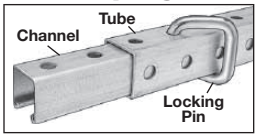
Telescoping Strut Channel



Channel

Tube

Slide the strut channel into the tube to create the length you need and secure with a locking pin (sold separately). Holes are 9/16" dia. on 1 7/8" centers. The first hole is 5/8" from the end. Channels and tubes are steel.

Channel is 1 5/8" Ht. × 1 5/8" Wd. × 0.11" Thick.

Tube is 1 7/8" Ht. × 1 7/8" Wd. × 0.11" Thick.

Zinc-plated channel offers good corrosion resistance.

	Channels		Tubes	
Finish	5 ft.	10 ft.	5 ft.	10 ft.
Zinc-Plated	3138T6 $21.16	$40.20	3138T3 $52.53	$99.81
Green Powder-Coated	3138T4 21.16	40.20	3138T1 52.53	99.82
Black Powder-Coated	3138T5 25.73	48.88	3138T2 90.85	172.62
Locking Pin			3138T71	14.28

Strut Channel Trolleys

A
With One Hole

B

C
With Three Holes

Suspend from strut channel to create a conveyor.

Style A trolleys have a horizontal plate with holes for hanging threaded rod and eyebolts. They have 5/16" dia. mounting holes spaced on 1" centers.

Style B trolley has a horizontal plate with a 3/4" dia. eyebolt and two 9/16" Lg. × 5/16" Wd. slotted holes spaced on 1" centers for hanging threaded rod.

Style C trolleys have a vertical plate with 9/16" dia. holes for attaching hooks and shackles. Trolleys with three mounting holes have holes spaced on 15/16" centers.

Zinc-plated steel trolleys offer good corrosion resistance.

304 stainless steel trolleys offer better corrosion resistance than zinc-plated steel.

	Cap., lbs.	Lg.	Wd.	Ht.	Clearance	No. of Holes	No. of Wheels

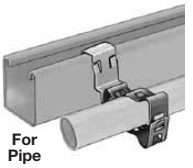
Strut Channel Feet

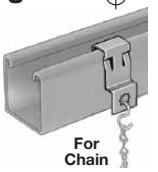
Provide a stable, nonscratch bottom for structures with strut channel legs. Foot fits 1 5/8" Ht. × 1 5/8" Wd. strut channel. It is black rubber with a steel insert.

Dia.	Thick.	Cap., lbs.		
3"	1/2"	200	1261N1	$8.75

Strut Mount Hangers



For Pipe



For Chain

For Threaded Rod

Slip these hangers onto the lip of top-opening strut channel to attach chain, wire rope, pipe, or threaded rod. Hangers are steel and fit all 1 5/8" wide strut channel.

For Suspending	Cap., lbs.		
3/8" ID Pipe	20	3217T14	$1.95
1/2"-3/4" ID Pipe	20	3217T16	2.10
Chain (1/4" Dia. Hole)	150	3217T11	.82
1/4"-20 Threaded Rod	150	3217T17	1.79
3/8"-16 Threaded Rod	150	3217T18	1.88

Strut Channel Trolley Brackets

Brackets mount on the outside of 1 5/8" Ht. × 1 5/8" Wd. strut channel so you can hang channel without disrupting trolley movement. They are zinc-plated steel. They have a 9/16" dia. top mounting hole and 7/16" dia. side mounting holes.

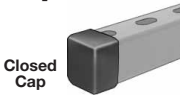
Hanging bracket can be used with straight or curved strut channel.

Hanging/connecting bracket can be used with straight strut channel. It is longer than the hanging bracket so it can join lengths of strut.

Bracket Type	Cap., lbs.	Lg.	Wd.	Ht.		
Hanging	1,200	1 5/8"	1"	3 3/4"	3626T41	$6.19
Hanging/Connecting	2,500	3 1/2"	1"	3 3/4"	3626T42	9.44

Strut Channel Caps and Plugs

Open Cap



Closed Cap

Plug

Cover rough ends of 1 5/8" wide strut channel.

Zinc-plated steel plugs offer good corrosion resistance.

304 stainless steel plugs offer better corrosion resistance than zinc-plated steel.

To Order: For choose-a-color plastic, please specify black, red, white, or yellow.

Strut Channel Covers

Create a four-sided raceway for cables or give a more finished look to your strut channel structure. Covers fit 1 5/8" wide strut channel.

Zinc-plated steel covers offer good corrosion resistance.

Aluminum covers are corrosion resistant and about half the weight of steel.

304 stainless steel covers offer better corrosion resistance than zinc-plated steel.

To Order: For choose-a-color steel, please specify black, red, white, or yellow.

1/2"-13	5	3259T118	13.63

Tab-Lock Nuts — For 13/16"-3 1/4" Ht. x 1 5/8" Wd. Channel

A tab fits tightly against the lip of the channel to keep these nuts from slipping. Nuts are steel; tabs are plastic.

Thread Size		Each
1/4"-20	2233K11	$0.98
3/8"-16	2233K12	1.00
1/2"-13	2233K13	1.10

Clamping Nuts — For 13/16"-3 1/4" Ht. x 1 5/8" Wd. Channel

Connect two slotted-hole or round-hole channels to create stacked channel. Use two nuts for lengths less than one foot; add one nut for each additional foot. Nuts are zinc-plated steel.

Min. Hole Size Wd.	Lg.		Each
9/16"	7/8"	2233K19	$2.00

Square Nuts — For 13/16"-3 1/4" Ht. x 1 5/8" Wd. Channel

Also known as insert nuts, these convert slotted holes to threaded round holes and keep hardware centered in the slot. Nuts are zinc-plated steel.

Thread Size		Each
1/4"-20	2233K15	$1.23
3/8"-16	2233K16	1.30
1/2"-13	2233K17	1.41
5/8"-11	2233K18	1.90

Twist-Lock Nuts — For 13/16"-3 1/4" Ht. x 1 5/8" Wd. Channel

Insert this nut into the open side of strut channel and twist to secure. A built-in washer enables one-handed installation. Use with a hex nut to connect threaded rod. Nuts are zinc-plated steel.

Thread Size		Each
1/4"-20	3260T11	$1.93
3/8"-16	3260T12	1.99
1/2"-13	3260T13	2.03

Push Nuts — For 1 5/8"-3 1/4" Ht. x 1 5/8" Wd. Channel

Push this nut into place rather than threading it onto a fastener. To install, push a threaded fastener into the nut in the direction of the arrow. For finer adjustment, spin the nut. Nut is zinc-plated steel.

Thread Size		Each
3/8"-16	3259T72	$6.63

Rod-Stabilizing Nuts — For 1 5/8"-3 1/4" Ht. x 1 5/8" Wd. Channel

Keep a rod securely centered against the bottom of your strut channel. Nut is zinc-plated steel.

For Rod Dia.		Each
3/8"-5/8"	3259T91	$8.06

Slot Nuts — For 13/16"-3 1/4" Ht. x 1 5/8" Wd. Channel

When you don't have access to the open side of strut channel, slip this nut through a slotted hole and turn it 90° to secure it in the channel. Nut is zinc-plated steel.

Thread Size		Each
3/8"-16	2233K14	$0.79

Strut Channel Shelf Brackets

A tab on the end of these brackets fits inside the strut channel for extra stability. Brackets fit 1 5/8" wide strut channel. They are 1/4" thick and have 9/16" dia. mounting holes.
Zinc-plated steel brackets offer good corrosion resistance.
Galvanized steel brackets offer better corrosion resistance than zinc-plated steel and can be used outdoors.
304 stainless steel brackets offer better corrosion resistance than zinc-plated steel and galvanized steel.

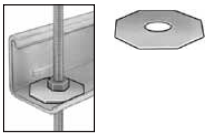
Centering Washers

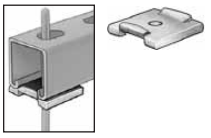
Keep hardware centered in the strut channel slot. Washer is zinc-plated steel. Use with hex nuts to connect threaded rod (not included).



For Rod Dia.		
1/4"	3260T21	$0.22
3/8"	3260T22	.23

No-Spin Washers

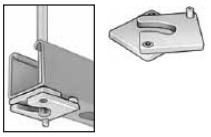
Notches on these washers grip the channel to keep them in place. Use with hex nuts to connect threaded rod (not included).



For Rod Dia.	Zinc-Plated Steel		304 Stainless Steel	
5/16"	3585T11	$0.73	—	—
3/8"	3585T12	.76	3585T14	$3.66
1/2"	3585T13	.78	3585T15	3.75

Hinged Washers

Quickly attach these washers by twisting them closed at any point along a threaded rod.

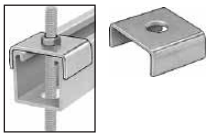


Thread Size	Zinc-Plated Steel		316 Stainless Steel	
1/4"-20	3260T14	$2.47	—	—
3/8"-16	3260T15	2.54	3260T18	$42.38
1/2"-13	3260T16	2.84	3260T19	43.44

Sit-on-Top Washers

Add hardware to strut channel without having to hold the washer in place or reach inside the channel. Use with hex nuts to connect threaded rod (not included).

To Order: For choose-a-color steel, please specify black, red, white, or yellow.



For Rod Dia.	Zinc-Plated Steel		Galvanized Steel		Choose-a-Color Steel	
1/4"	1273N17	$1.98	1273N16	$3.95	1273N1	$2.48

Strut Channel Casters

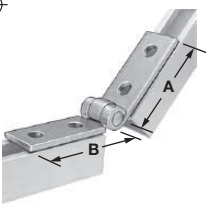
Add mobility to structures built with strut channel. Casters have swivel bearings. Made of zinc-plated steel with a 2" high plastic stem that easily slides into 1 5/8" Ht. x 1 5/8" Wd. strut channel. The wheel is black rubber. Durometer is 70A.

	Wheel Dia.	Wheel Wd.	Mount Ht.	Cap., lbs.		
Without Brake	3"	1 1/4"	4 3/8"	150	2356T11	$19.17
With Brake	3"	1 1/4"	4 3/8"	150	2356T14	20.38

Strut Channel Hinges

Hinges have a 0° to 180° range, but can achieve a maximum angle of 270° if strut channel is cut at a 45° angle. They fit 1 5/8" wide strut, are 1/4" thick, and have 9/16" dia mounting holes.

Zinc-plated steel hinges offer good corrosion resistance.



Material	(A)	(B)		
Zinc-Plated Steel	4"	4"	3505T12	$13.81
Green Powder-Coated Steel	4"	4"	3505T11	15.11

Strut Channel Connectors CAD

Connectors fit 1⅝" wide strut channel. Fasteners not included.

Steel and **stainless steel** connectors are ¼" thick with 9/16" dia. holes.

Zinc-plated steel connectors offer good corrosion resistance.

Galvanized steel connectors offer better corrosion resistance than zinc-plated steel and can be used outdoors.

Powder-coated steel connectors are green.

304 stainless steel connectors offer better corrosion resistance than zinc-plated steel and galvanized steel.

Fiberglass connectors are nonconductive, lighter weight than steel, and corrosion resistant. They are ⅜" thick with 7/16" dia. holes. Temperature range is -30° to 200°F. **Plastic** connectors are ⅜" thick with 7/16" dia. holes, except 33125T111 and 33125T119 have 9/16" dia. holes. Temp. range is -40° to 140°F.

To Order: For choose-a-color steel connectors, please specify black, red, white, or yellow.

Strut Channel Connectors *(Continued from previous page)*

90° Angle with Tabs—Connectors have tabs on the ends to keep them centered on the channel.

90° Angle with Stud—Connectors have a stud on the side to attach another length of strut or other items.

Adjustable Angle—Includes a base and a wraparound connector.

Position strut channel to the angle you need, then bolt the pieces together.

Powder-coated steel connectors are green.

To Order: For choose-a-color steel connectors, please specify: black, red, white, or yellow.

Aluminum Bolt-Together Framing

Lightweight but strong—bolt these aluminum tubes together without drilling or welding.

Tubes

Standard

Flanged

Tubes are 1½″ square, 0.125″ thick anodized aluminum with bolt holes on all four sides.

Flanged tubes let you mount accessories such as panels, bins, and conveyor stops. Flange is 1½″ high and runs the length of the tube.

Lg.	Standard		Flanged

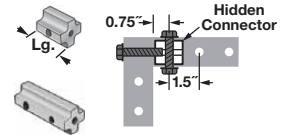
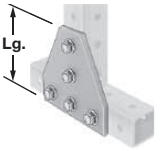
Connectors, Plates, Tees, Brackets, and Accessories



Hidden Connectors

Plate



Tee

Bracket

Floor-Mounting Bracket

End Cap

Leveling Foot

Swivel Caster

Connectors, **plates**, **tees**, and **brackets** are aluminum and include fasteners. The plates, tees, and brackets are anodized.

Hidden and *extended hidden connectors* fit inside the tube for a clean look. Use extended hidden connector for tube that has been cut and no longer has the standard 0.75″ distance between the end of the tube and the center of the first hole.

End cap is black plastic.

Leveling foot is nickel-plated steel.

Swivel caster swivels 360° and has a brake. It's nickel-plated steel with a black rubber wheel.

★ Requires an extended hidden connector to mount to the end of the tube.

Heavy Duty Steel Bolt-Together Framing

Stronger and more durable than aluminum framing, these steel tubes can be assembled without drilling or welding.

Tubes

Curved Fastener

Tubes are 0.105″ thick with bolt holes on all four sides. Connect multiple tubes with plates, tees, and brackets or slide one length of tube into the next larger size and bolt together using curved fasteners or locking pins. Select fasteners and locking pins based on the larger size tube in the connection.

Steel tubes are lightly oiled and can be painted. **Galvanized steel** tubes offer good corrosion resistance.

Curved fasteners are zinc-plated steel. Each package includes 10 bolts, 10 nuts, and 10 washers. **Locking pins** are zinc-plated steel. Use for quick adjustments.

Telescoping Tube Sets

You'll get two 4-, 6-, or 8-ft. nested tubes with a locking pin for quick adjustments. Tubes are 0.105″ thick galvanized steel with bolt holes on all four sides.

Outer Tube Size, sq.	Inner Tube Size, sq.		4 ft.	6 ft.	8 ft.

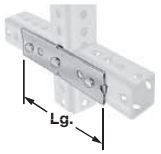
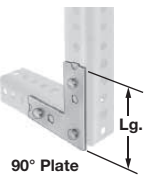
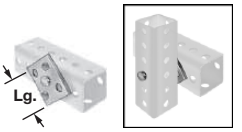
Plates, Tees, Brackets, and Floor-Mounting Base



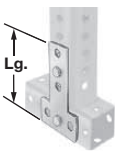
Plate



90° Plate

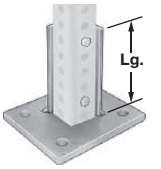


Crossover Plate



Tee

Bracket



Floor-Mounting Base

Plates, **tees**, and **brackets** are zinc-plated steel. Use to connect same-size tube (fasteners sold separately).

Floor-mounting base is galvanized steel. It fits 1¾″ to 2½″ square tube. Concrete anchor (sold separately) works with ½″-13 bolts.

Fasteners connect plates, tees, and brackets to tube. Each package includes 10 bolts, 10 nuts, 10 metal washers, and 10 plastic washers.

Solid Tube Framing

Create strong structures by welding these tubes together or drilling and securing with fasteners (not included). Tubes can be telescoped by sliding one length of tube into the next larger size. Round tubes and 1″ and smaller square tubes are 0.08″ thick; 1¾″ and larger square tubes are 0.105″ thick.

Steel tubes are lightly oiled and can be painted.
Galvanized steel tubes offer good corrosion resistance.
304 stainless steel tubes provide the best corrosion resistance.
Aluminum tubes are lightweight yet strong.

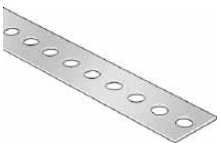
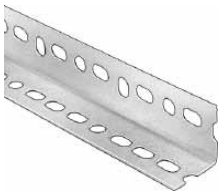
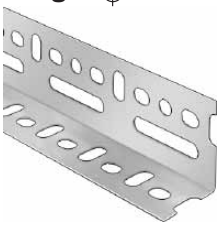
Flat and Angle Bolt-Together Framing



Flat



Zinc-Plated Steel and 304 Stainless Steel Angles



Galvanized Steel Angle

Green Powder-Coated Steel Angle

Two Corner Plates Shown with Three Angles

Cutter

Use a variety of slots and holes to bolt this framing together to create structures of any size and shape. Mounting hardware is sold separately.
Zinc-plated steel framing offers good corrosion resistance.
Galvanized steel framing has better corrosion resistance than zinc-plated steel framing.
Green powder-coated steel framing offers strength and some corrosion resistance.
304 stainless steel framing offers the best corrosion resistance.
Fasteners include 5/16″×¾″ bolts with nuts and washers to join components.
Corner plate provides added strength and rigidity. It is 6″×6″, 0.08″ thick galvanized steel.
Cutter makes it easy for one person to cut flats and angles. Overall length is 38″.

Galvanized Iron and Aluminum Slip-On Rail Fittings

Make custom railings, guard rails, storage racks, shelving, and framing with ease. Slip rail fittings over the appropriate size pipe and tighten the included set screws for a secure fit.

Pipe

Pipe is Schedule 40.
Galvanized steel pipe has very good corrosion resistance.
Aluminum pipe is lightweight with very good corrosion resistance.
Yellow-painted aluminum pipe is lightweight and offers high visibility.

Fittings

Fittings are strong and corrosion resistant. They come with recessed set screws that lock the pipe into the fitting.

Add-on and **clamp-on** fittings can be added or removed from existing structures without having to disassemble the entire structure.

Galvanized iron fittings are malleable iron and conform to ASTM A47.

Aluminum fittings can be used with any metal, including steel, without causing corrosion.

Galvanized Iron and Aluminum Slip-On Rail Fittings *(Continued from previous page)*

Flanges and Rail Supports

Flanges and supports are strong and corrosion resistant. They come with recessed set screws that lock the pipe into the fitting.
Galvanized iron flanges and supports are malleable iron and conform to ASTM A47.
Aluminum flanges and supports can be used with any metal, including steel, without causing corrosion.

Round Flange—2 3/4″ Dia. × 1 3/4″ Ht.	6040T56	14.38

Plastic Slip-On Framing Fittings

Build lightweight yet strong and corrosion-resistant structures with these plastic fittings. To assemble, join the pipe and fittings with PVC cement (not included, see page 3466) for a permanent bond or drill and connect with fasteners (not included).

Steel Clamp-On Framing Fittings

Add on to an existing structure without having to disassemble it—these fittings come in two pieces to clasp over tubes. Clamp fittings onto the tube and tighten the included cap screw and nut. For permanent connections and added strength, fittings have a 5⁄32″ hole to drill in an additional screw (not included).

Tubes

Zinc-plated steel tube offers good corrosion resistance.
Plastic-coated steel tube increases durability and allows you to color code your structures.

		Zinc-Plated Steel			Plastic-Coated Steel

Fittings are steel, unless otherwise stated. All have a through hole.
Rotational tee has plastic bushings that allow the tube to rotate inside the fitting—good for swing door applications.
Panel connector holds a panel up to 1⁄2″ thick.
Conveyor rail mounting brackets are zinc-plated steel. Use *flow-through bracket* on the loading side of your application and the *recessed-stop bracket* on the picking side of your application.

Conveyor rails are aluminum with black polypropylene wheels. They slide directly into the conveyor rail mounting brackets.
Conveyor lane dividers are black nylon.
End caps are black plastic.
Leveling foot includes mounting hardware.
Swivel casters have a hard rubber wheel and a brake. Mounting hardware is included. *Stem caster* wheel is red; *plate caster* wheel is blue.

Friction-Grip Framing Fittings

No need for fasteners—friction holds this framing together. To assemble, press fittings and accessories into the tube and hammer with a rubber mallet.

Tubes

Tubes are 1″ square, 0.05″ thick aluminum.
Flanged tubes let you attach panels and other items. Flange is 0.1″ Thick. × ⅝″ Ht. and runs the full length of the tube.
Slotted tubes let you attach panels and other items up to ¼″ thick. Slots are 0.05″ Thick. × ¼″ Ht. and run the full length of the tube.

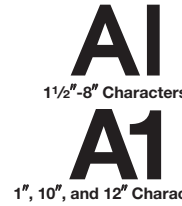
About Character Width

The width of a character is typically one-half its height. Narrower characters, such as 1 or A will be less, while M or W will be more.

Peel-and-Stick Characters



Characters with Background

Pocket Book

For long-lasting use inside and out, characters are adhesive-back vinyl.

Characters—*Individual characters* are 0-9, A-Z, $, ¢, period, comma, and dash. *Number sets* include 10 each of 0-9. *Letter sets* include 10 each of A-Z. *Number and letter sets* include six each of E; five each of A,I,R,S, and 1; four each of L,O,P,T; three each of F,G,H,M,N,U,W, and the number 0; two each of B,C,D,K,V,Y, 2-9, $, and ¢; and one each of J,Q,X,Z. All letters are uppercase.

Characters with Background—*Individual characters* are 0-9, A-Z, and dash. *Number sets* include 0-9. *Letter sets* include A-Z. All letters are uppercase.

To Order: For individual characters, please specify character.

Stencil Board Character Sets

Oilboard

Stencil boards can be used repeatedly to create messages of your choice. Stencils are 0.015″ thick and letters are uppercase.

Oilboard—*Number and letter sets* include two each of A,E,O,N,R,S; and one each of remaining letters, 0-9, $, ¢, &, and period.

Polyester—Longer lasting than oilboard. *Number sets* include one each of 0-9, $, and ¢; and two spacers. *Letter sets* include one each of A-Z and comma; and two spacers.

Note: Stencil width varies with character width.

Stencil Ink and Stencil Ink Removers

Aerosol Ink

Comes in a 12 oz. spray can and works on porous and nonporous surfaces. Dries in 15-20 minutes. Meets MIL-A-A-208B.

Available Colors		
For Porous and Nonporous Surfaces		
Black, Blue, Green, Orange, Red, White, Yellow	1641T31	$6.88

Ink

Porous Surface Ink—Apply with a brush or roller to boxes, fabrics, and paper. Ink dries instantly and can be used with stamp pads.

Porous and Nonporous Surface Ink—Apply with a roller. Ink dries in 2 minutes and can be used with stamp pads.

Available Colors	Quart		Gallon	
For Porous Surfaces				
Black	1638T11	$22.29	1638T12	$86.32
For Porous and Nonporous Surfaces				
Black	1639T31	21.60	1639T35	81.86
Blue, Green, Red, White, Yellow	1639T13	25.60	1639T14	90.00

Ink Remover

Removes excess ink from applicators and rubber stamps after use.

1-qt. Can	8626T12	$22.58

Made-to-Order Message Stencils

Have the exact message you need made into a stencil to use as often as you like. Stencils are crafted from oilboard.

To Order: Please specify message and character height.

Replacement Roller Wheel	1636T8	9.67	1636T9	11.31
Replacement Ink Pad and Tray			1636T55	10.43

Stencil Ink Brushes

Long hog-hair bristles ensure smooth, uniform application of stencil ink. Use with any stencil ink.

Dia.	Bristle Lg.		
1″	1⅜″	7817T3	$12.52
1¼″	1½″	7817T4	14.56
1½″	1⅝″	7817T5	15.96

Manual Stencil Cutters

Use these manual feed machines to cut precise, consistent stencils from blank stencil board. Produces characters 0-9, A-Z, &, period, comma, dash, apostrophe, and slash. Cutters are 20″ Lg.×14″ Wd.×13″ Ht. They come with an ink applicator, black ink cartridge, and 25 stencil board sheets (6½″ Ht.×20″ Wd.×0.015″ Thick.). Meets Fed. Spec. GG-S-747.

Also Available: Replacement punch and die sets. Please ask for 1993T21 and specify character and character height.

Character Ht.	Characters per Ft.	Max. No. Print Lines		
¼″	48	6	1993T15	$2,107.39
½″	22	6	1993T16	2,086.27
¾″	15	4	1993T17	2,086.27
1″	15	4	1993T18	2,086.27

Stencil Boards

Feed these sheets into your stencil cutter to create reusable stencils that resist ink absorption. Boards are flexible so they work on curved surfaces. For use with both manual and electronic cutting machines.

Adhesive-back polyethylene board has a slight tack that lasts for multiple uses, even on surfaces such as pipes.

Corrugated Carton Masking Ink

Spray on cardboard boxes and corrugated shipping cartons to cover existing marks. Ink is tan, weather resistant, and dries in 15-20 minutes.

12-oz. Can	1996T14	$6.89

Self-Inking Stencil Ink Rollers

These neoprene rollers hold 4 oz. of ink in the handle so you don't need an ink pad or tray. Both have a 3″ wide roller wheel. Use to mark porous and nonporous surfaces.

Cartridge Fed

Refillable—Works with stencil ink for porous and nonporous surfaces (sold separately, see 1639T on this page).

Cartridge Fed—Comes with one black ink cartridge. Ink dries in 2 minutes.

To Order: For replacement ink cartridges, please specify black, blue, green, orange, red, white, or yellow.

	Ink Rollers		Repl. Roller Wheels

Replacement Ink Cartridges			15305T68	6.46

Self-Inking Stencil Ink Brushes

The handle is a cartridge that dispenses ink into the brush with the push of a button. The hog-hair bristles can be used with any stencil ink and work well on rough, porous surfaces. Holds 2.5 oz. of ink (sold separately, see 1639T on this page).

Dia.	Bristle Lg.		
1½″	1½″	1635T5	$47.74
Replacement Brush Tip		1635T6	19.06

Electronic Stencil Cutters

More versatile than a manual cutter, this machine uses the included software to produce hundreds of fonts and symbols in a wide range of sizes (⅛″ and up). You can also import .dxf vector files from your computer. Cuts oilboard, polyester, vinyl, and polyethylene up to 29″ long.

Comes with a stand, two 60° blades, two adhesive-backed polyethylene rolls (100 ft. long), ten 24″×36″ sheets of oilboard, and a self-inking stencil ink roller with black ink. Replacement rolls are 100 ft. long.

Stencil Cutter	7350T1	$4,378.62
Oilboard Rolls (Pkg. of 2)	7350T2	159.00
Adhesive-Backed Polyethylene Rolls (Pkg. of 2)	7350T3	267.97

Paint Markers

For information about paint, see page 2154.

About Paint and Ink Markers

Paint markers work well even on dirty, rusty, wet, and oily surfaces. They leave textured marks you can feel with your hand.
Ink markers work best on a clean, dry surface. Marks dry faster than paint and are smooth to the touch.
Both paint and ink markers are permanent.

Ultra Fine (≤0.5 mm) | Extra Fine (0.6-0.8 mm) | Fine (0.9-1.2 mm) | Medium (1.3-2.4 mm) | Bold (2.5-4.5 mm) | Broad (>4.5 mm)

Paint Markers

Write on metal, plastic, rubber, wood, and paper with these oil-based paint markers. Marking temperature range is –20° to 150°F.
Fine Tip—Paint dries in 25-35 seconds.
Medium Tip—Can also be used on glass, concrete, leather, and vinyl. Paint dries in 25-35 seconds.
Bold Tip—Paint dries in 1-2 minutes.
Bold/Broad Tip—Tip is reversible for a bold or broad mark. Paint dries in 1 minute.
Marker sets include one each of available colors listed.

Tip	Stroke Width	Available Colors	Markers	Each	Repl. Tips Pkg. Qty.		Pkg.

Fade-Resistant Paint Markers

These rich colors won't fade in sunlight or exposure to weather. Use on glass, metal, plastic, and wood. Marking temperature range is 35° to 130°F. Paint is water-based and dries in 60 seconds. Tip is reversible for a bold or broad mark.
Marker set includes one each of black, blue, orange, red, white, and yellow.
Adhesive-backed holder functions as a cap and keeps your marker easily accessible and in one place.

To Order: For individual markers, please specify black, blue, gold, gray, green, orange, pink, purple, red, silver, white, or yellow.

Tip	Stroke Width	Markers		Marker Set	
Bold/Broad	3 mm/5 mm	5040T11	$2.65	5040T32	$15.64
Adhesive-Backed Marker Holder				5040T12	Each $8.78

Wet-Environment Paint Markers

Use on wet metal, plastic, rubber, concrete, wood, glass—and even underwater. Markers have a stainless steel ball tip and oil-based paint that is fade and chip resistant. Marking temperature range is –20° to 150°F. Paint dries in 25-35 minutes.
Large capacity markers have twice the volume.

Tip	Stroke Width	Available Colors		
Standard				
Fine	1.2 mm	Black, Red, White, Yellow	16105T18	$4.73
Medium	2.4 mm	Black, Blue, Green, Orange, Red, White, Yellow	16105T29	4.73
Bold	3.2 mm	White, Yellow	16105T3	4.73
Large Capacity				
Medium	2.4 mm	Black, Blue, Green, Orange, Red, White, Yellow	16105T58	6.02
Bold	3.2 mm	White, Yellow	16105T6	6.02

High-Purity Paint Markers

Used in nuclear facilities, the paint in these markers is low in chlorides and halogens so it won't degrade or contaminate marking surfaces. Use on metal, glass, and plastic. Paint is oil-based, except black, which is alcohol-based. Marking temperature range is –20° to 150°F. Dries in 3-4 minutes.

Tip	Stroke Width	Available Colors		
Fine	1.2 mm	Black, White, Yellow	2802T2	$7.20
Bold	3.2 mm	Black, White, Yellow	2802T8	7.20

High-Visibility Paint Markers

Make marks that stand out, especially on dark surfaces. Use on metal, glass, plastic, and paper. Paint is oil-based and permanent.
For gold and silver colors, marking temperature is not rated. Paint dries in 15 seconds. For fluorescent colors, marking temperature is –50° to 150°F. Paint dries in 60-90 seconds.

Tip	Stroke Width	Available Colors		
Fine	1.2 mm	Gold, Silver	8667T3	$3.04
Bold	2.8 mm	Silver	8667T16	3.70
Bold	3.2 mm	Fluorescent: Green, Orange, Pink, Yellow	4375T22	4.64

Glow-in-the-Dark Paint Markers

Paint stores energy from exposure to light to create luminescent marks you can see in the dark. Works on porous and nonporous surfaces and has a stroke width of 13 mm. Marking temperature range is 15° to 245°F. Dries in 5-10 minutes.

4194T1 ..... $16.88

High-Temperature Paint Markers

Paint holds up in extreme heat—up to 800°F. Use on nonporous surfaces. Marking temperature range is –20° to 150°F. Marker has a stainless steel ball tip. Paint is oil-based and dries in 25-35 minutes.

Tip	Stroke Width	Available Colors		
Medium	2.4 mm	White, Yellow	2862T61	$6.42

Removable-Mark Paint Markers

Writing comes off with water or a mild detergent. Use on glass, metal, plastic, and other nonporous surfaces. Marking temperature range is 0° to 150°F. Paint is alcohol-based and dries in 30-60 seconds.

To Order: Please specify black, blue, green, red, white, or yellow.

Tip	Stroke Width	Remove With		
Bold	3.2 mm	Water	7162T22	$6.06
Bold	3.2 mm	Detergent	7162T11	6.06

Squeeze-On Paint Markers

You control the flow of these paint markers with how hard you squeeze or press down. Use on metal, rubber, glass, and wood.

Abrasion Resistant—Uses polyurethane-based paint that stands up to scrapes and chipping. Comes in a 2-oz. metal tube with a stainless steel ball tip. Marking temperature range is –40° to 180°F.

Fast Dry—Uses oil-based paint that can also be used on plastic, paper, ceramic, and leather. Comes as a pen. Marking temperature range is –50° to 150°F.

Marker sets include one each of available colors listed.

Also Available: Replacement tips for fast-dry markers. Please ask for 9356T888 and specify metal or felt tip.

Medium Felt	2.3 mm	Black, Blue, Gold, Green, Red, Silver, White, Yellow	1 min.	9356T22	2.79		

Wide Mark Paint Markers

Draw large marks that are easy to see from a distance. Use on glass, metal, plastic, wood, and paper. Paint is acrylic based. Marking temperature range is 0° to 150°F. Paint dries in 1-3 minutes.

Tip	Stroke Width	Available Colors		
Broad	12.7 mm	Black, Blue, Orange, Red, White, Yellow	15375T4	$8.47

Fabric Paint Markers

Write on cotton, wool, synthetic blends, and other fabrics with a pigment-based paint that won't come off in laundering. Ball tip is made of stainless steel. Marking temperature range is –20° to 150°F. Paint dries in 2 minutes. **Large capacity** has twice the volume.

Tip	Stroke Width	Available Colors		
Standard				
Fine	1.2 mm	Black, White, Yellow	2792T6	$4.48
Large Capacity				
Medium	2.4 mm	Black, Orange, Red, White, Yellow	2792T2	5.68

Paint Markers for Recessed Characters

Make engraved and stamped characters more noticeable. Rub the marker over the recessed surface and wipe off excess paint while still wet. The oil- and wax-based lacquer paint completely fills crevices and dries with a luster. Marking temperature range is –50° to 150°F. Paint meets Fed. Spec. TT-F-325a and MIL-STD 171. Dries in 24 hours.

Tip	Stroke Width	Available Colors		
Broad	9.5 mm	Black, Red, White, Yellow	2018T3	$2.51

No-Drip Paint Markers

These solid sticks of paint allow for drip-free marking. Paint is oil- and wax-based (unless otherwise stated).

General marking works on metal, glass, plastic, rubber, and paper. Use *Model B* on wet, oily, rusty, and dirty surfaces. *Model F* is fluorescent and writes on oily and wet materials. *Model FD* has quick-dry resin-based paint.

Rough surface can be used on concrete, forgings, and castings. Paint is weather and fade resistant.

Primer resistant shows through oil- and solvent-based primer coatings. Use on metal.

Hot metal dries immediately when applied to heated metal and won't smear, char, discolor, or peel. Paint is resin based.

Heat treating and annealing holds up through heating and cooling processes. Use on welds, ingots, castings, and forgings.

Long-Life No-Drip Paint Markers

A barrel and stay-tight cap keep these solid sticks of paint from drying out. Use on metal, plastic, rubber, wood, and paper. Marking temperature range is 15° to 390°F. Paint is alcohol based and dries in 5-10 minutes.

Dia.	Available Colors		
10 mm	Black, Red, White, Yellow	1762T37	$3.75
13 mm	Black, Blue, Green, Orange, Purple, Red, White, Yellow, Fluorescent: Orange, Red, Yellow	1762T26	4.82

High-Purity No-Drip Paint Markers

These no-mess paint sticks are low in chlorides and halogens so they won't corrode metal and contaminate surfaces in controlled environments, such as nuclear plants and oil and gas refineries. Markers have a twist-feed tube. Marking temperature range is –40° to 210°F. Paint dries in 5 minutes.

Firm-Tip Ink Markers

Create sharp marks on metal, glass, plastic, wood, fabric, and paper. Marking temperature range is 5° to 140°F.

Dual Tip—Gives you versatility with two different tip widths on a single marker.

Application Specific—*High-temperature marker* stands up to 500°F heat. *Long-life marker* has a larger barrel with extra ink capacity. *Fabric marker* can be used on natural and synthetic fabric. *Metallic ink marker* is highly visible, especially on dark surfaces. *Retractable markers* click open and closed. *Heavy duty marker* works on wet and oily surfaces and has a strong chisel-shaped tip that lasts twice as long as other marker tips. A rubber grip and textured cap make it easier to use when wearing gloves and the oval barrel won't roll off work surfaces.

Marker Sets include one each of black, blue, green, and red, unless otherwise stated.

High-Purity Ink Markers

Typically used in nuclear facilities and highly controlled environments, these markers won't corrode or contaminate metal surfaces because they are low in chlorides and halogens. Use on metal and glass. Marking temperature range is –20° to 150°F.

To Order: Please specify black, red, or white. Medium tip is also available in blue or yellow.

Tip	Stroke Width	Markers	Markers Each	Repl. Tips	Repl. Tips Pkg. of 10
Fine	0.9 mm	5941T3	$5.99	1468T42	$4.08
Medium	1.9 mm	5941T4	6.51	1468T47	4.08

Wet-Environment Ink Markers

Write on damp surfaces and in wet conditions without smearing. These markers work on metal, plastic, glass, and linen. Marking temperature range is 35° to 100° F.

Tip	Stroke Width	Available Colors		
Medium	1.5 mm	Black, Blue, Red	6618T1	$3.07

Degreaser-Resistant Ink Markers

Marks remain intact when exposed to degreasing solvents such as mineral spirits, mineral oil, gasoline, and most alcohols. Use on smooth surfaces such as metal and plastic. Marking temperature range is –20° to 150° F.

To Order: Please specify black, blue, green, red, white, or yellow.

Tip	Stroke Width	Markers	Each	Repl. Tips	Pkg. of 10
Medium	1.9 mm	15415T62	$3.73	1468T47	$4.08

Dry-Out-Resistant Ink Markers

You can leave the cap off of these markers for up to two weeks without them drying out. Use on metal, rubber, glass, porcelain, and paper. Marking temperature range is 35° to 100° F.

Tip	Stroke Width	Available Colors		
Medium	2 mm	Black, Blue, Green, Red	5905T1	$2.20
Broad	5 mm	Black, Blue, Green, Red	5905T2	2.20

Leakproof Ink Markers

An aluminum valve eliminates the risk of seepage caused by the expansion and contraction of a marker due to extreme temperature fluctuations. Works on most surfaces. Marking temperature is not rated.

Tip	Stroke Width	Available Colors		
Medium	1.6 mm	Black, Blue, Red	8411T1	$4.80

Extra-Wide Ink Markers

Make bold lines you can see from far away. Markers have an oversized barrel and tip for maximum ink capacity and coverage. Works on rough, wet, and oily surfaces. Marking temperature is not rated.

Tip	Stroke Width	Available Colors		
Broad	15 mm	Black, Blue, Red	1662T6	$4.93

Precision Needle-Point Ink Markers

The thin inch-long nib allows you to make clear marks in small and confined spaces. Use on metal, glass, and plastic. Marking temperature range is 35° to 220° F.

Erasable—Flake off or brush away marks to remove.

Stroke Width	Available Colors		
Erasable			
0.8 mm	Blue, Green, Orange, Red, Violet, Yellow	2410T7	$11.60
Permanent			
0.8 mm	Black, Blue, Green, Orange, Red, Silver, Violet, White, Yellow	2410T3	11.60

Food-Grade Ink Markers

These NSF-registered markers are safe for direct contact with food, storage containers, and processing equipment. Use on glass, metal, plastic, rubber, cardboard, and shrink wrap. Marking temperature range is –20° to 150° F. Marks withstand temperatures up to 475° F.

Tip	Stroke Width	Available Colors		
Bold	2.7 mm	Black, Blue, Green, White, Yellow	5594T1	$4.38

Metal-Detector-Grade Ink Markers

Commonly used in food processing facilities, these broad-tip markers are made of a plastic that can be detected with a metal-sensing device. Use on metal, glass, cardboard, paper, and wood. Marking temperature range is 33° to 100° F.

Ink Type	Stroke Width	Available Colors		
Permanent	5 mm	Black, Blue, Green, Red	4348T11	$7.20
Highlighter	5 mm	Blue, Orange, Pink, Yellow	4348T12	7.20

Clean Room Ink Markers

Pens are sterilized and double bagged to meet requirements for use in Aseptic ISO 5 and other clean production environments. They have black ink that is water and fade resistant. Use on glass, metal, plastic, wood, and paper. Marking temperature range is 5° to 140° F.

Tip	Stroke Width		Pkg. of 4
Fine (Capped)	1 mm	6507T2	$29.74
Fine (Retractable)	1 mm	6507T1	53.74

UV-Visible Ink Markers

Often used for quality control and theft detection, the ink in these markers is invisible under normal conditions but fluorescent in ultraviolet light. Use on metal, glass, rubber, paper, and plastic. Marking temperature range is –20° to 150° F.

Tip	Stroke Width	Markers	Each	Repl. Tips	Pkg. of 10
Fine	1.1 mm	8592T75	$4.72	1468T53	$4.08

Ink Dot Markers

Large easy-to-see marks are easy to apply—even on moving objects such as boxes on a conveyor. A sponge tip allows you to make 24 mm dots on most surfaces. The squeeze bottle barrel holds 3 oz. of ink. Marking temperature range is 35° to 95° F.

To Order: Please specify blue, green, magenta, orange, purple, or red.

94925T14 ..... $1.96

Refillable Ink Markers

Load this marker with a color of your choice and fill up again when the ink runs out. You can change color by swapping out the ink and tip. Marking temperature range is 35° to 100° F.

Marker barrel holds ½ oz. of ink (sold separately) and comes with one 6.35 mm dia. tip.

To Order: For ink, please specify black, blue, green, orange, pink, red, white, or yellow.

	Marker	Repl. Tips (Pkg. of 4) 4.75 mm		6.35 mm

Crayons

With Optional Aluminum Holder

Writing doesn't smear or bleed and can be removed by wiping or sanding.
General Purpose—Use on most surfaces.
Rubber Marking—Use on wet and cold rubber.
Weather Resistant—Also known as lumber crayons, these work well on rough surfaces such as lumber, metal, and concrete.
Fluorescent Weather Resistant—Same as our standard weather-resistant crayons, only fluorescent for added visibility.
Heat and Weather Resistant—Also referred to as lumber crayons, these are graphite based so they won't melt. Use on lumber, concrete, and even hot metal.

Self-Inking Numbering Rubber Stamps

Stamps pick up fresh ink with every impression so they are convenient for fast-paced, repetitive stamping. Each band has 0-9, a dash, and a space. Ink pad is removable.

Ink (sold separately) is water-based and permanent. Use on porous surfaces such as cardboard and paper.

Self-Inking Miniature Inspection Rubber Stamps

Mark inspected items with a pocket-size stamp that makes 1,000 imprints before needing more ink. These stamps have a built-in pad with alcohol-based permanent ink. Use on nonporous surfaces such as metal and plastic.

Also Available: Other imprints and ink colors. Please ask for 1119T81 for 1/4″ dia. or 1119T83 for 3/8″ dia. and specify desired imprint. For ink, specify blue, green, red, or ultraviolet.

To Order: Please specify black or white ink.

Solvent-Resistant Epoxy Stamp Ink

Mix the packet contents for a specially formulated ink that withstands solvents and abrasion. Use with epoxy rubber stamps on nonporous surfaces. Combine packets on glass slides or metal (not for use with stamp pads). Meets CID A-A-56032D Type 1, 2, and 3 (formerly MIL-I-43553b).

Thinner allows you to achieve your desired ink consistency.

Ink cleaner removes fresh and partially dried ink from stamps and printing machinery. Ink is permanent once fully dried.

Available Colors

Black, White	85985T5	$23.18
Thinner (2-oz. Bottle)	85985T53	18.66

Ink for Plastics and Stainless Steel

These specially formulated inks adhere to tricky surfaces. Ink comes in a 2-oz. bottle.

Ink for plastics can be used on a variety of nonporous materials including treated shrink wrap. Ink is solvent-based and permanent. Dries in 10-15 seconds.

Ink for stainless steel works even when the surface is wet or oily. Suitable for use with stamp pads and stencils. Ink is permanent and resists petroleum solvents. Dries in 75-105 seconds.

Thinner allows you to achieve your desired consistency.

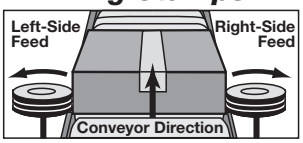
Conveyor-Mount Self-Inking Stamps



Horizontal Mount

Provide continuous, hands-free marking of boxes, cartons, and other paper items with a message of your choice. Lock the rubber characters into the stamp wheel to create messages (accommodates characters of varying heights). Maximum length of each line is 17″. Includes an ink cartridge with black alcohol-based, permanent ink for porous surfaces. Stamp attaches horizontally or vertically with four 9/32″ dia. mounting holes (fasteners not included).

Character Sets—*Number sets* have four each of 0-9; two each of period, dash, and forward slash (/); and one each of comma, $, and ¢. *Number and letter sets* have six each of E; five each of A, C, I, L, N, O, R, S, and T; four each of B, D, F, G, H, P, and period; three each of M, U, W, Y, 0, 1; two each of J, K, Q, V, X, Z, 2, 3, 4, 5, 6, 7, 8, 9, comma, and space; and one each of $ and &.

To choose left- or right-side feed, face your carton as it moves away from you on the conveyor for correct orientation (see illustration).

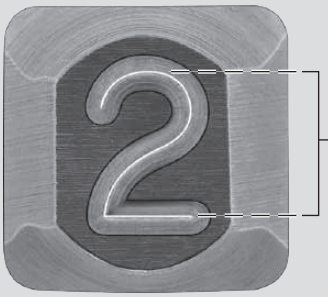
About Character Height



When you look at the face of a stamp, you'll notice the character is raised. The distance between the upper and lower raised ridges is known as the *character height*. This height is used to measure stamp size. If a stamp does not have a size marking on the shank, measure the character height to order the correct size.

The actual impression a stamp makes is larger than its character height and varies depending upon how hard you strike the stamp, the hardness of the material, and wear.

Steel Stamps

AB12
1/4" Character Ht.

Make your mark on metal. Stamps are designed for continuous use on materials with a Rockwell hardness up to C30 for *standard duty* and *heavy duty stamps*; and up to C50 for *extra-heavy duty stamps*, which have a thicker shank to handle more demanding jobs. All characters are uppercase.

Sets come in a compartmented case. *Number sets* contain 0-9 (6 doubles as 9). *Letter sets* contain A-Z; standard duty and heavy duty stamps also have an ampersand (&). *Number and letter sets* contain 0-9 (6 doubles as 9), A-Z, and an ampersand (&).

To Order: For individual characters, please specify number (0-9) or letter (A-Z); for standard duty and heavy duty stamps, you can also specify period, dash, or ampersand (&).

Stainless Steel Stamps

AB12
1/4" Character Ht.

These stamps are corrosion-resistant so they won't rust and flake with exposure to moisture and chemicals. They are made from 440C stainless steel and can be sanitized in an autoclave. For continuous use on materials with a Rockwell hardness up to C50.

Sets come in a compartmented case. *Number sets* contain 0-9 (6 doubles as 9). *Letter sets* contain A-Z and an ampersand (&).

To Order: For individual characters, please specify number (0-9), letter (A-Z), dash, period, @, or ampersand (&).

For information about character height, see page 1978.

Gentle-Mark Steel Stamps

The rounded faces on these stamps put less stress on surfaces and minimize fractures that can weaken or damage metal. All characters are uppercase.

Solid-face stamps are for continuous use on materials with a Rockwell hardness up to C30. Meet ANSI specification IN45, 2.2A39.

Dotted-face stamps produce even lower stress impressions than solid-face stamps. For continuous use on materials with a Rockwell hardness up to C30 for 1/8" and 1/2" character heights; and up to C50 for 3/16"- 3/8" character heights. Meet Nuclear American Society of Mechanical Engineers Code Section 3, Div. 1, Paragraph NA-3766.6 (2).

Sets come in a compartmented case. *Number sets* contain 0-9 (6 doubles as 9). *Letter sets* contain A-Z and an ampersand (&). *Number and letter sets* contain 0-9 (6 doubles as 9), A-Z, and an ampersand (&).

Reverse-Face Embossing Steel Stamps

Create raised lettering similar to a license plate with these reverse-face stamps. Impressions are made on the backside of metals for an embossed character on the front. Works well on casting molds and in high temperature applications where the lacquer used with recessed characters would melt. For continuous use on materials with a Rockwell hardness up to C30. All characters are uppercase.

Sets come in a compartmented case. *Number sets* contain 0-9 (6 doubles as 9). *Letter sets* contain A-Z and an ampersand (&). *Number and letter sets* contain 0-9 (6 doubles as 9), A-Z, and an ampersand (&).

High-Visibility Steel Stamps

When you want characters to stand out, use a stamp with a border. For continuous use on materials with a Rockwell hardness up to C30. All characters are uppercase.

Letter sets contain A-Z and come in a compartmented case.

Also Available: Other border shapes and sizes. Please ask for 1612T999 and specify hexagon, oval, or square, border size, character, and character height.

1/4" Circle Border

3/8" Triangle Border

To Order: Please specify circle or triangle border. For individual characters, also specify number (0-99) or letter (A-Z). For number sets, also specify the number range: 0-10, 11-20, 21-30, 31-40, 41-50, 51-60, 61-70, 71-80, 81-90, or 91-99.

Made-to-Order Steel Stamps

Design messages and logos to say exactly what you want. For continuous use on materials with a Rockwell hardness up to C30. Shank length is 3 1/2". All characters are uppercase.

Also Available: Stamps with more than two lines of characters; reverse-face embossing stamps; and stamps with your own logo. Please ask for 1560T999 and specify characters, character height, number of lines, and standard or reverse face. If ordering a logo, please provide an illustration.

To Order: Please specify characters and character height. Spaces do not count toward the number of characters per line.

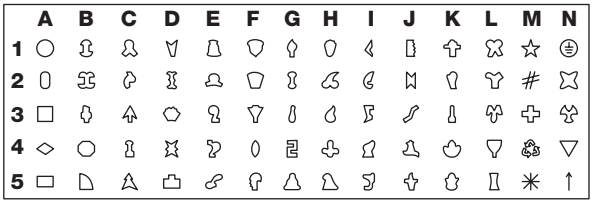
Inspection Symbol Steel Stamps

Symbol N2

Mark metals with unique characters for traceability, quality control, and inspection. For continuous use on materials with a Rockwell hardness up to C30.

Also Available: Other symbols and sizes. Please ask for 1574T999 and specify symbol and character height.



To Order: Please specify the corresponding letter and number for the symbol on the chart.

Character Ht.	Shank Size, sq.	Shank Lg.		
1/8″	5/16″	2 1/2″	1574T11	$9.76

Two-Digit Steel Stamps

Mark double-digit numbers with a single stamp. For intermittent use on materials with a Rockwell hardness up to C50.

Sets include 10 consecutively-numbered stamps and come in a compartmented box.

To Order: For individual stamps, please specify number (00-99). For sets, please specify a number range: 00-09, 10-19, 20-29, 30-39, 40-49, 50-59, 60-69, 70-79, 80-89, or 90-99.

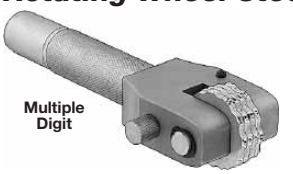
Master	One	1/2″	2 7/8″	1786T14	30.24

Rotating Wheel Steel Stamps



These all-in-one stamps provide an entire number set in the convenience of one handheld stamp. Rotate the wheel to change the character.

Single-digit stamps include 0-9, a dash, and an uppercase X on the wheel. For continuous use on materials with a Rockwell hardness up to C30.

Multiple-digit stamps include 0-9 and a space on each wheel. For continuous use on materials with a Rockwell hardness of up to C35.

Self-Aligning Stamping Presses

AB12 3/32″ Ht. AB12 1/8″ Ht.

AB12 3/16″ Ht.

Create evenly spaced character impressions on keys, tags, plates, and other metal parts. Spin the dial to select a character and press the lever to stamp. Makes one character impression at a time and advances the marking material automatically. The character dial includes 0-9, uppercase A-Z, lowercase c, period, dash, apostrophe, forward slash (/), and ampersand (&).

For use on materials up to 5 3/4″ Wd. × 8″ Dp. × 1/8″ thick, with a Rockwell hardness up to C30. For blank plates and tags, see pages 1986 and 1987.

Imprint area is 4 3/8″ Wd. × 5 3/8″ Dp. Presses include one spacing rack for proper character alignment.

Optional universal key holder secures any type of flat key.

			Replacement Parts		
Character Ht.	Presses		Dials		Spacing Racks	
3/32″	1595T51	$2,115.82	1595T52	$696.00	1595T53	$122.67

Optional Universal Key Holder					1595T81	404.00

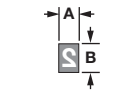
For information about character height, see page 1978.

Quick-Change Build-a-Message Steel Type Stamps

These characters can be easily configured and placed in a holder to stamp messages of your choosing on metal plates and parts. *Number sets* contain 0-9. *Letter sets* contain A-Z.

Characters (sold separately) are uppercase. If ordering replacement or additional type, make sure the overall character height and notch height match that of characters you already have.

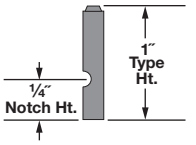
Blanks must be inserted to fill unused spaces for the holders to work properly.



Type Dimensions

Standard

Holders are 5 1/4″ long and have a spring pin that securely locks the characters in place for proper alignment. For use on materials with a Rockwell hardness up to C28. Comes with a hex key for tightening characters into the holder.



To Order: For individual characters, please specify number (0-9), letter (A-Z), period, forward slash (/), or dash. For holders, please specify type capacity.

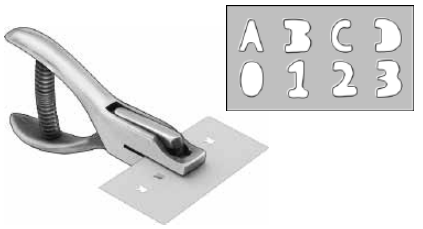
Character Punches & Etchers

Character Punches



Punch holes, letters, or numbers through copier paper, laminated cardstock, and business cards up to 1/32″ thick.

Also Available: Three- and four-character punches with a 1 1/8″ reach. Please ask for 8645T999 and specify characters and 1/8″ or 3/16″ character height.

To Order: Please specify character height for hole punches or character(s) (0-9, A-Z) for character punches.

	Available Character Hts.	1″ Reach		2″ Reach	
Hole	1/8″, 3/16″, 1/4″ dia.	8645T9	$40.01	8645T11	$46.67

Metal Etching Pens

Contains an acid solution that flows like ink and allows you to write on the surface of heavy metals such as copper, nickel, stainless steel, brass, iron, tin, and lead. Marks are black, smudgeproof, and permanent.

1683T6 ..... $17.74

Electrochemical Etcher Kits

Deluxe Kit

Permanently mark metal with a handwritten message, design, or logo. Draw directly on the stencils and add electrolyte fluid to transfer your message to the marking surface. A placement grid allows for precise alignment. Makes impressions 0.0001″ to 0.003″ deep.

All kits operate on 115 volts AC and include a grounding plate and 6-ft. cord with two-prong plug. Etchers have AC voltage for dark marks and a DC voltage adapter for clear and frosted marks. Not for use on anodized aluminum.

Standard Kit

- Hand marker rated 2 amps @ 10 volts AC (1)
- DC voltage adapter clip (1)
- Stencils (10 small)
- Electrolyte (one 2-oz. bottle for general purpose)
- Neutralizing cleaner (one pack of cleaning powder mix)

8597T14 ..... $84.16

Deluxe Kit

- Hand marker rated 2 amps @ 10 volts AC (1)
- DC voltage adapter clip (1)
- Stencils (200 small, 25 medium, and 25 large)
- Grids (one medium and one large)
- Pads (10 small, five medium, and five large)
- Electrolyte (three 8-oz. bottles, one each for general purpose, stainless steel, and brass/copper/bronze; two 4-oz. bottles, one each for aluminum and black oxide)
- Neutralizing cleaner (one 8-oz. bottle of cleaner and two packs of cleaning powder mix)
- Plastic carrying case

8597T11 ..... $232.59

Deluxe Kit with Two Hand Markers

- Hand marker rated 2 amps @ 10 volts AC (1)
- Hand marker rated 10 amps @ 15 volts AC (1)
- DC voltage adapter clips (2)
- Stencils (200 small and 25 large)
- Grids (one small and one large)
- Pads (two small and five large)
- Electrolyte (two 8-oz. bottles, one each for general purpose and stainless steel; three 4-oz. bottles, one each for aluminum, black oxide, and brass/copper/bronze)
- Neutralizing cleaner (one 8-oz. bottle of cleaner and two packs of cleaning powder mix)
- Plastic carrying case

Stencil Kits for Etching

Use your computer to print out images, copy, or logos and transfer them onto stencils with the UV exposure unit. The stencils are vinyl and can be used to etch metal and glass.

Operates on 115 volts AC and includes a 6-ft. cord with two-prong plug. Exposure unit is 12″ Ht. × 6″ Wd. × 5″ Dp.

- Ultraviolet exposure unit with 120 watt/365 Nm UV bulb (1)
- Digital timer (battery not included)
- Stencils (10 large)
- Aluminum exposure tray (1)
- Plastic developing tray (1)
- Stencil developer (one 16-oz. bottle)
- Developer sponges (4)
- Printer transfer sheets (three each for inkjet printers and laser printers)

Electric Etchers

Control the depth and width of metal etching marks with the turn of a knob. Etchers include a 120 volt AC transformer with 6-ft. cord and three-prong plug, grounding cord with clips, and a pen cord. Welding goggles are recommended for use with these machines (see page 1845).

Standard etchers come with a 42″ pen cord, a fine tungsten tip, a regular tungsten tip, a heavy duty tungsten tip, and a copper tip.

Heavy duty etcher is capable of etching heavy scale and rusted metal. It comes with a 60″ pen cord, a fine tungsten tip, a regular tungsten tip, a heavy duty tungsten tip, a heavy duty copper tip, and a copper tip.

Tungsten tips resist wear better than *copper tips*. *Heavy duty tungsten tips* have a larger diameter for etching wider marks. *Heavy duty copper tips* can be used for precision etching.

Electric Engravers

These adjustable-speed engravers make marks on metal, glass, plastic, wood, hard rubber, stone, and ceramic. *Carbide tips* are used for general purpose etching while *diamond tips* work well on extra-hard materials such as stone and ceramic. Maximum speed is 7,200 strokes per minute.

Economy engravers operate on 115 volts AC and have a 5-ft. cord with two-prong plug. Use the knob on the side to adjust speed. UL listed.

Pen-style engraver operates on 110 volts AC and has a 6 1/2-ft. cord with two-prong plug. Use the screw on the top to adjust speed. Also comes with one steel tip for engraving plastic.

Thumb-wheel control engravers operate on 120 volts AC and have a 7-ft. cord with three-prong plug. Use the wheel on the side to adjust speed.

Replacement Steel Tip for Pen-Style Engraver									1864T23	3.00

Air-Powered Engravers

Connect these pen-like engravers to a compressed air line and use to write on metal, glass, stone, ceramic, plastic, wood, and hard rubber. All engravers have a hose and carbide tip for general purpose engraving. Air consumption is 1.1 cfm at 90 psi.

Engravers

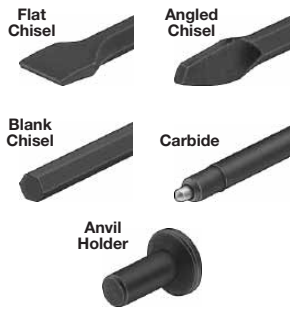
Adjustable speed allows you to modify the airflow so you can select the power to best suit your application.

	Max. Strokes/ Minute	Hose Inlet, NPT	Hose ID	Hose Lg.	Wt., lbs.	Engravers		Replacement Carbide Tips	
Standard	30,000	1/4″ Female	1/8″	6 ft.	0.3	1602T11	$299.84	1602T12	$54.52
Adjustable Speed	13,500	1/4″ Male	3/16″	8 ft.	0.3	1564T62	349.13	1564T68	32.68

Adjustable-Speed Engraver Kit and Replacement Parts

Kit includes one adjustable-speed engraver, an anvil holder, and four interchangeable tips: three steel tips (flat chisel, angled chisel, blank chisel) and one carbide tip. Also comes with an 8-ft. air hose, air filter assembly, and a carrying case.

Replacement tips and parts are for the adjustable-speed engraver only. *Flat chisel* works well for scaling and deburring. *Angled chisel* is used for cleaning weld beads. *Blank chisel* can be ground to a shape that suits your application. *Carbide tip* is for writing or marking.



Adjustable-Speed Engraver Kit	1564T63	$457.67
Flat Chisel Tip	1564T65▲	66.40

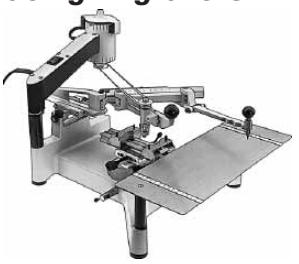
▲Requires anvil holder 1564T64 for operation.

Engravers & Branding Irons

Tracing Engravers



Also known as a pantograph, this adjustable engraver allows you to quickly make precise marks of varying sizes on plates and other objects. One end of the engraving arm traces the characters of your selected message while the other end engraves them into your surface. Creates enlarged, reduced, and one-to-one character sizes. The rotating cutter spindle allows for detailed work and smooth lines. Writes on plastic and metal. Operates on 120 volts AC and has a 4-ft. cord with three-prong plug.

Engraver comes with two carbide cutters, a diamond cutter (0.02″ tip), wrench, jigs, and sample material. The diamond cutter is for use on metal. The carbide cutters rout plastic so the core color is revealed.

It also comes with a brass number and letter set that can be used to create 25 different character heights. Includes 0-9, A-Z, 30 spacers, and a punctuation set of &, period, comma, dash, apostrophe, quotation marks, colon, and semicolon.

Number and letter set includes the characters listed above.

Plastic Legend Plates

Engrave these plates and slip them over control-board buttons to clearly identify their function and mark system components. Plates are 0.063″ thick and meant for indoor use. They have a satin finish and straight edges.

To Order: Please specify black with white core, red with white core, or white with black core.

Hole Dia.	1⅜″ x 1⅝″	1¾″ x 1⅞″	1¾″ x 2″	1¾″ x 2″	1¾″ x 2″	1¾″ x 2″	1 13⁄16″ Sq.	Pkg. of 10

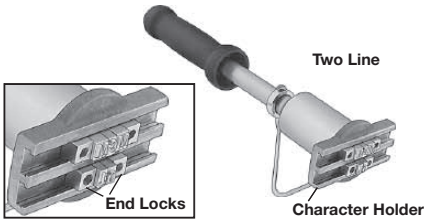
Branding Irons



Quickly and uniformly brand your message in wood, leather, and rubber. Marks set in 2 to 6 seconds (allow 15 minutes for the iron to heat up). Irons have a steel housing and stainless steel shaft, ceramic heating element, and built-in stand. They operate on 120 volts AC and have a 4½-ft. cord with three-prong plug. *Optional temperature regulator* allows you to adjust the temperature between brands.

The maximum character capacity per line is eighteen 3⁄16″, twelve ¼″, nine 3⁄8″, five ½″, four ¾″, or three 1″ high characters. Each line has two movable end locks that hold characters in place so you can vary the number of characters in your message. All letters are uppercase.

Individual characters are 0-9, A-Z, &, period, comma, and dash. *Number sets* include one each of 0-9. *Letter sets* include one each of A-Z and a spacer (unless noted).

Also Available: Made-to-order branding irons. Please ask for 1581T999 and specify character height, characters, and/or logo design.

Color-Contrasting Engraving Plates

Removing the surface layer of these engraving plates reveals a contrasting core color that makes messages stand out. Plates are 0.063″ thick and can be used for fine-line engraving. Plastic plates have a matte finish and aluminum plates have a satin finish. All have beveled edges (unless noted). For made-to-order engraved plates, see page 1909.

UV-resistant plastic plates work with rotary and laser engravers. Can be used outdoors.

Aluminum plates are more durable than plastic. They are nonconductive and have an anodized finish.

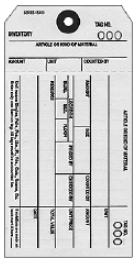
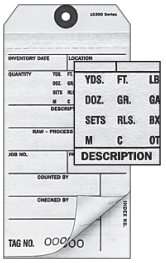
Rectangle with 6″ Wire Tie

Numbered Inventory Cardstock Tags



(Front) Tear-Off



(Front) Duplicate and Triplicate

(Back) All

Tags are numbered so you can match the detachable stubs or copies with the original to keep track of inventory. Tags are 6 1/4″ Ht. × 3 1/8″ Wd. manila cardstock with a 3/16″ dia. fiber-reinforced eyelet. All have black printing on both sides. Tear-off tags are 0.010″ thick. Duplicate and triplicate tags are 0.008″ thick.

Tear-off tags have a perforated stub that matches the top portion.
Duplicate tags have a top sheet that makes a duplicate copy.
Triplicate tags have an additional sheet for a third copy.

Also Available: Green or orange tear-off tags in a package of 1,000. For green, ask for 8659T881 and specify number sequence. For orange, ask for 8659T882 and specify number sequence.

Available Starting Numbers	Pkg. Qty.		Pkg.
Tear-Off			
000, 250, 500, 750	250	8659T42	$15.40
000, 1000, 2000, etc., up to 9000	1,000	8659T28	65.68
Duplicate			
000, 100, 200, 300, 400	100	86055T333	14.85
000, 500, 1000, etc., up to 14500	500	86055T888	63.64
Triplicate			
000, 100, 200, 300, 400	100	86055T444	15.24
000, 500, 1000, etc., up to 14500	500	86055T777	75.21

Numbered Create-a-Copy Cardstock Tags

When you write on the white top sheet, two additional copies with the same number are created—one on the pink middle bond sheet and another on the manila cardstock backing. Numbers are red on the top sheet and blue on the two copies. Tags are 6 1/4″ Ht. × 3 1/8″ Wd. × 0.008″ Thick. with a 3/16″ dia. fiber-reinforced eyelet.

Available Starting Numbers	Pkg. Qty.		Pkg.
000, 100, 200, 300, 400, 500	100	1103T222	$15.24
000, 500, 1000, etc., up to 9500	500	1103T777	81.61

Color-Coded Tear-Off Cardstock Tags

Tags have perforated green, yellow, and red sections that can be torn off to visually indicate when the status of an item or project changes. Tags are 5 3/4″ Ht. × 2 7/8″ Wd. × 0.016″ Thick. with a 3/16″ dia. metal eyelet.

1626T7 (Pkg. of 50) $14.93

5S Red Tags

Sort and flag items for removal or disposal with these highly visible red tags. Tags have black printing on both sides and can be filled out with pen. They are 6″ Ht. × 3 1/4″ Wd. × 0.015″ Thick. PVC with a 1/4″ dia. metal eyelet.

8570T11 (Pkg. of 10) $7.80

Material Management Cardstock Tags

You can immediately identify the message on these tags used to mark equipment and track work in progress. Tags are 2 3/8″ Ht. × 4 3/4″ Wd. × 0.010″ Thick. with a 3/16″ dia. fiber-reinforced eyelet. All have black printing on one side. *Style C tags* are sequentially numbered (000 to 099 for 15405T49; and 000 to 999 for 15405T52).

Weather-Resistant Inspection and Maintenance Tags

Aluminum-Laminated Cardstock

Adhesive-Back Aluminum

Plastic-Laminated Cardstock

Keep maintenance records near equipment, indoors and out. Tags have space for dates, initials, and notes.

Aluminum-laminated cardstock tags can be marked with a ball point pen to create permanent impressions. The front and back have printing, except the tag with the INSPECTED heading has a blank back. All are 0.020″ thick.

Plastic-laminated cardstock tags resist moisture, oil, mild acids, and chemicals. Pencil marks are erasable. The front and back of the tags have printing. All are 0.025″ thick and have a metal eyelet. These tags help you conform to OSHA 29 CFR 1910.145(f) and ANSI Z535.2-1991, except tags with EQUIPMENT INSPECTION and SAFETY EQUIPMENT INSPECTION headings.

Dry-Erase Magnetic Labels

Change your message and its location without using a new label. These magnetic labels have a vinyl surface that you can write on with dry erase markers.

Labels are magnetic on one side. They are 0.02" thick.

Reversible labels are magnetic on both sides, and each side is a different color to communicate inventory status and changes. They are 0.03" thick.

Labels for Hot, Cold, or Wet Surfaces

These adhesive-back polyolefin labels hold up in harsh environments. Color is white. **Sheets** are 8½″×11″ and can be used with a laser printer. **Rolls** have a 2″ dia. core.

Wet Surfaces—These labels adhere to wet or frozen plastic, glass, metal, and paperboard. Temperature range is –40° to 212° F.

Hot or Cold Surfaces—These labels withstand temperatures from –320° to 302° F. Apply to plastic, glass, and metal.

Label Dispensers

Manual Wall Mount

Manual Desktop

Electric Desktop

Improve labeling speed and keep labels neat and organized until you're ready to apply them. Dispensers are steel.

Manual label dispensers are for use with rolls of labels. Roll capacity varies; the total width cannot exceed the max label width. *Wall-mount* dispensers have four 3/8″ dia. mounting holes (fasteners not included).

Electric label dispensers have photo-eye activation and automatically advance labels and peel off the backing. All are for use with both roll and fan-fold labels. They have a single roll capacity. Dispensers operate on 120 volts AC and have a 6-ft. cord with three-prong plug.

Core adapters allow the manual wall-mount dispensers to hold rolls with a 3″ dia. core.

Bar Code Scanners

Long-Range Laser Scanner with Holder

Close-Range CCD Scanner

Read-All 2D Scanner

Wireless Long-Range 1D Scanner

Holder for Read-All 2D Scanner

Capture data and automatically input it into any Windows application without additional software. All scanners have built-in decoders that read the most common bar codes.

Wired scanners include a 6-ft. cable and connections for USB ports, except *read-all 2D* scanner has a 7-ft. cable.

Long-Range Laser—Has a longer range than CCD and 2D scanners and delivers good results when reading bar codes on rounded surfaces. It can also decode and transmit global trade item numbers (GTINs). Includes a holder with a gooseneck that provides positioning options.

Close-Range CCD (Charge Coupled Device)—Because this scanner requires close contact with bar codes, it blocks out light that can interfere with scanning. This makes it better for use in natural light and brightly lit areas than other types of scanners.

Read-All 2D—Reads 1D and 2D bar codes, even those on computer and mobile phone displays. This type of scanner can read lower-quality bar codes than laser and CCD scanners.

Long-Range 1D Wireless—Reads bar codes wirelessly, even those on computer and mobile phone displays. Scanner has a rechargeable battery and comes with a Bluetooth charging base.

Scanner Type	Max. Scan Distance

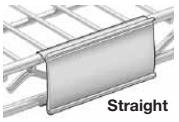
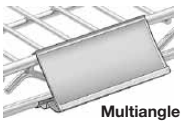
Label Holders & Document Protectors

Snap-On Label Holders for Wire Shelving



Straight



Multiangle

Snap holders onto wire shelving that has a 1¼″ face. They fit Eagle, Intermetro, and Nexel wire shelving. Made of clear PVC, holders protect labels from dust and dirt and are compatible with bar code scanners. Furnished with white cardstock labels that are on perforated sheets for use with laser printers.

Multiangle holders can be used straight or angled up or down to assist reading from above or below.

			Holders			Repl. Labels

Laminating Document Protectors

Peel off the backing on the adhesive plastic laminate and apply it directly to a document for permanent wear and water resistance. Protectors with a matte finish reduce glare.
Sheets and **rolls** can be applied to one or both sides of your document.
Pouches protect both sides of your document and are thicker than sheets and rolls for added rigidity. *4"×2 3/4"* pouches have loops, so they're great for luggage tags. *11"×8 1/2"* pouches are suitable for signs and notices.

K-Sun Label, Bar Code, and Heat-Shrink Tubing Printers

Use a single machine to print labels, bar codes, and heat-shrink tubing. Printers have an automatic label tape cutter and adjustable margins. They work with all K-Sun label tape and heat-shrink tubing.

Label Printers

Stand Alone

PC/Mac Compatible

Stand Alone—Produces six bar code formats and has a four-line display. Maximum character height is 2/3″. The printer comes with 1/2″ wide general purpose label tape (black characters/white background). It operates on the included six AA batteries or the wall adapter.

PC/Mac Compatible—Use with your computer to design labels, import Excel data, and save files for repeat printing. The included software package contains more than 1,000 characters and symbols and 15 bar code formats. Maximum character height is 2/3″. The printer comes with 1″ wide label tape (black characters/white background), a USB cord, and a wall adapter.

Quick-Apply Label Printer/Applicator Guns

Also known as pricing guns, these printer guns come with one roll of white labels and a black ink roller.

Single-Line Printer Gun—Prints up to six characters across. Characters include: 0-9 (one band has 10 and 12), period, /, $, ¢, +, FOR, TAX, and EA.

Double-Line Printer Gun—Prints up to eight characters on each line. Characters include: 0-9 (one band has 10, 11, and 12), period, /, $, ¢, +, FOR, +TX, TX, and EA.

Double-Line Alphanumeric Printer Gun—Prints up to 10 characters on each line. Top line has A-Z, 0-9, £, dash, and period; bottom line has 0-9, period, /, $, ¢, and FOR.

Replacement labels are 0.007″ thick paper and have a temperature range of –65° to 160° F. They come with a black ink roller.

Single- and Double-Line Gun

To Order: For replacement labels, please specify color: white or red.

About Selecting Pipe Markers

Our pipe markers meet ANSI/ASME 13.1, which requires that markers have a flow-direction arrow, identify contents with a message, and indicate hazard classifications with a specific background color.

The ANSI/ASME background color designations are:
Toxic and Corrosive Fluids—Orange
Flammable Fluids—Yellow
Low-Hazard Gas—Blue
Potable, Cooling, Boiler Feed, and Other Water—Green
Fire-Quenching Fluids—Red

To select a pipe marker for new installations, choose the message from the table below that corresponds to the contents of your pipe. For messages with multiple background color options, choose the color that best identifies the hazardous properties of the contents according to the ANSI/ASME background color designations.

To replace a pipe marker for existing installations, choose the message and background color from the table below that matches your existing pipe marker.

If you don't see the message you need, pipe markers with other messages are available.

Markers with orange and yellow backgrounds have a black message. Markers with blue, green, and red backgrounds have a white message.

Wrap-Around Pipe Markers

Attach to pipes for clear identification of contents. All pipe markers have a flow-direction arrow.

To Order: Please specify message (or blank) and background color from the chart on page 2002. Markers with a blank message can be written on with a permanent marker. For *other messages*, please specify pipe OD, message, and background color: blue, green, orange, red, or yellow.

Standard

Their coiled construction lets these markers snap around pipes and stay in place without adhesive. They are 0.02″ thick vinyl and have a temperature range of –40° to 160° F. For pipe sizes 6″ and larger, markers come with nylon ties for securing.

Fits Pipe OD	Marker Lg.	Character Ht.		
1/2″-1″	8″	1/2″	5774T91	$3.71

Other Messages			5774T2	

Washdown

These fade-resistant markers withstand detergents used in high-pressure cleaning. To apply, wrap the marker around your pipe and seal in place with the adhesive strip. Markers are 0.007″ thick polyester and have a temperature range of –40° to 250° F.

Fits Pipe OD	Marker Lg.	Character Ht.		
1/2″-1″	8″	1/2″	6698T1	$9.25

Other Messages			6698T11	

Corrosion Resistant

These markers are heat, chemical, and corrosion resistant. They consist of an adhesive-back, polyester message on a stainless steel backing. Use the included stainless steel straps and brackets to affix the marker to the pipe. Markers are 0.06″ thick and have a temperature range of –40° to 350° F.

Fits Pipe OD	Marker Lg.	Character Ht.

Other Messages			6662T51	

Adhesive-Back Pipe Markers

Apply directly onto clean, dry pipes. Use **markers without a flow-direction arrow** in conjunction with a flow-direction arrow (sold separately) to comply with ANSI/ASME standards.

Standard— Markers are 0.003″ thick vinyl and have a temperature range of –40° to 170° F, unless noted.

Reflective— These markers are easier to see in low-light conditions than standard markers. They are 0.007″ thick vinyl and have a temperature range of –70° to 160° F.

To Order: Please specify message (or blank) and background color from the chart on page 2002. Markers with a blank message can be written on with a permanent marker. For *other messages*, please specify pipe OD, message, and background color: blue, green, orange, red, or yellow.

Wire & Electrical Markers

Wrap-On Wire Markers

These adhesive-back markers wrap onto themselves to accommodate wires of various thicknesses. Markers are oil- and water-resistant. They have continuously printed black characters on a white background, except NEMA colors are blank.

Individual Characters

Markers are 0.007″ thick vinyl cloth and 1½″ long. The width varies depending on character.

Choose a Character	Marker Qty.		Pkg.
0-100, A-Z, -, +	360	24795T1♣	$13.16

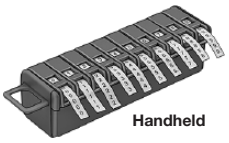
Marker Dispensers



Handheld

These plastic dispensers hold 10 rolls of marker tape and come with a marker roll set.

Handheld—Compact enough to carry around, these dispensers are 5″ Lg.×1½″ Wd.×1½″ Ht. (length includes handle). Markers are 0.0075″ thick Tyvek and come cut to ¼″×1¼″ on rolls of 76.

Bench Top—Cut markers to the length you want with the steel blade attachment. Dispenser is 8″ Lg.×3″ Wd.×1⅜″ Ht. Markers are 0.012″ thick vinyl-coated cloth and come on ¼″×96″ rolls.

White marker roll sets include 10 rolls of numbers (0-9). **NEMA colors marker roll set** includes 10 rolls of NEMA colors (black, blue, brown, gray, green, orange, purple, red, white, and yellow).

To Order: For white individual marker rolls, please specify character (0-9, A-Z). For NEMA colors individual marker rolls, please specify color (black, blue, brown, gray, green, orange, purple, red, white, and yellow).

Slip-On Wire Markers

Slip these PVC markers off the holder and onto unterminated wires. Gray, orange, white, and yellow markers have black characters. Black, blue, brown, green, purple, and red markers have white characters.

NEMA color markers correspond to the following international color code for numbering: black (0), brown (1), red (2), orange (3), yellow (4), green (5), blue (6), purple (7), gray (8), and white (9).

Individual Characters

Choose only the characters you need on holders or strips. You'll receive 10 holders or strips with 25 markers on each. Strips can be used to refill holders; holders can be used to refill dispensers.

To Order: Please specify white or yellow and the character (0-9, A-Z, +, –, /, or ⏚).

	Marker Qty.	For 16-9 Wire Ga. (0.051″-0.118″)	Pkg.	For 10-4 Wire Ga. (0.098″-0.196″)	Pkg.

Document Laminators

Protect important documents. All laminators have temperature controls and are UL listed.

Light Duty—Quickly handles small laminating jobs. It has a 5-ft cord with two-prong plug.

Heavy Duty—For frequent use and high-volume jobs, choose these laminators. They have an 8-ft cord with three-prong plug.

Heavy Duty Laminator Kits—Include 200 27⁄8″×53⁄8″ tags (20 each of blank and nine different safety messages), 100 tag pouches, three laminating carriers, five 81⁄2″×14″ and two 81⁄2″×11″ signs with safety messages, five lockout/tagout forms, and 20 laminating pouches.

Pouches are acid-free photo-safe polyester.

Slot punch makes a 9⁄64″×1⁄2″ slot in a laminated card or tag.

Laminators, Badges & Badge Holders

Heat-Free Laminators

You won't have to wait for these manual laminators to warm up—they don't need heat, electricity, or batteries. Turn the handle, guide your document through, then use the cutting blade to trim. The laminator comes with a 15-ft. roll of adhesive laminate. Laminate is clear polypropylene and 0.002″ thick per side.

Max. Laminated Wd.	Overall Size Wd.	Ht.	Dp.		
8½″	14″	7″	6″	1062T1	$70.00
Replacement Laminate (60-ft. Roll)				1062T5	32.63

Large-Document Laminators

Laminate banners and large signs. The laminator is UL approved and has a 6-ft. cord with three-prong plug. All laminates are clear polyester and 0.0015″ thick per side.

Auto-Adjust and Synchronized Clocks

You won't have to change these clocks each spring and fall for daylight saving time.
Auto-adjust clocks use an internal calendar to automatically adjust for daylight saving time. *Battery-operated* clock runs on three AA batteries (not included). *Plug-in* clocks have a 5-ft. cord.
Auto-adjust atomic clocks update daily via a radio signal from the NIST atomic clock. For use within the continental United States. They work best if used in facilities that do not have strong electronic interference. Place on a perimeter wall of your building facing the signal direction. Clocks run on one AA battery (not included).
Synchronized WiFi clocks link wirelessly to your network. Clocks run on six AA batteries (included).
Synchronized power-over-ethernet clocks receive power and time updates from your network. Use a CAT5 or faster ethernet cable to connect the clock to your power-over-ethernet switch or to a power converter (sold separately). The converter has a 5-ft. cord with plug.

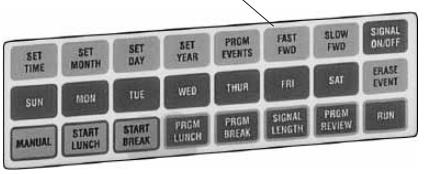
Scheduling Timers

Timer

Bell

Horn



Program timer to trigger an audible signal for events throughout the week. It has a keypad for scheduling events and adjusting the signal duration from one to 99 seconds. Keypad has a user-defined security code to restrict access. Clock displays 12- or 24-hour time. Timer must be hardwired and has a 6-volt battery backup (included). You can link up to 32 bells and horns to a timer at once.

Timer can be wall mounted or set on a desktop. It is 5 5/16″ Ht. × 9½″ Wd. × 3 5/16″ Dp. black metal. Operates on 1.2 amps @ 120 volts AC. UL listed. CSA certified.

Bell and horn can be used outdoors. They come with mounting hardware. **Bell** sounds 86 dB @ 10 ft. It operates on 0.085 amps @ 120 volts AC. **Horn** sounds 95 dB @ 10 ft. It operates on 0.16 amps @ 120 volts AC.

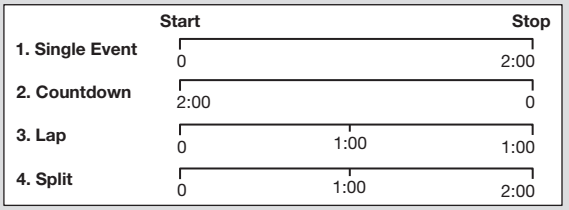
About Stopwatch Timing Functions

1. Single-event timing records one event.
2. Countdown timing indicates the time remaining before an event is scheduled to occur.
3. Lap timing displays the elapsed time, from start to finish, of several separate events. *Lap memory* indicates how many previous laps the stopwatch can recall.
4. Split timing records the combined time of events. Press button once to display the elapsed time for the first event. Press again to display the combined elapsed time of the first and second events.



Stopwatches

Pause timing with the press of a button. Stopwatches have a plastic lens and an inset dial that measures total time.
Stopwatch with NIST certificate comes with a certificate of calibration traceable to NIST.

Max. Time	Accuracy	Case Material		
Standard				
30 min.	±1.5 sec./hr.	Chrome-Plated Metal	1303T12	$78.44
60 min.	±1.5 sec./hr.	Black Plastic	1303T11	176.42
With NIST Certificate				
30 min.	±1.5 sec./hr.	Chrome-Plated Metal	9548T11	238.21

Digital Stopwatches

Time events with a high level of accuracy. These stopwatches are water resistant, can pause timing with the press of a button (unless noted), and include a lanyard. Case and lens are plastic. Case color is black (unless noted). Batteries included.
Optional aluminum clipboard has a clamp to hold the stopwatch and a clip to hold paper.
Backlit stopwatch allows you to time events in low-light conditions.
Stopwatches with NIST certificate come with a certificate of calibration traceable to NIST. *Split timing* stopwatches meet ISO 17025 standards.

Combination Wristwatch/Weather Monitors

Monitor your environment when working outdoors; this wristwatch not only displays time and date but also temperature, barometric pressure, and altitude. Temperature range is 14° to 140° F/–10° to 60° C. Other functions include a countdown timer that can be set to 3, 5, 10, 15, or 45 minutes; the ability to pause timing functions; and a digital compass. Watch has a gray plastic case and black rubber band with a buckle closure. Battery included.

Time Clocks with Message Stamp and Cards

Stamp your time cards with messages such as PAID and VOID as well as time information. These clocks print combinations of year, month, date, 12- or 24-hour time, and minutes. Ink is black. Insert paper into the front and clocks print automatically. The display shows time and date. Clocks auto-adjust for daylight saving time. Housing is plastic and locks to prevent tampering (one key included). Time cards are sold separately.

Selectable message clock prints 10 messages: RCV'D, SENT, FAX'D, VOID, PAID, CFM'D, APR'D, CMPL'D, ORIGN, and FILE. It has a 5-ft. cord with plug and a lithium battery backup (included). Housing is black. UL listed.

Create-your-own message clock lets you enter your own message up to 21 characters. Display includes day of the week. It has a 6-ft. cord with plug and a NiCad battery backup (included). Housing is beige and gray. UL listed and CSA certified.

Total-the-Hours Time Clocks and Cards

This clock saves you time at the end of a pay period by automatically totalling each employee's hours on their time cards. You can also print a summary of the active time cards with totals for each card in regular and overtime hours. Clock prints in black and red ink. Time cards are sold separately.

Insert cards through the top and the clock prints automatically. It can be set for weekly, biweekly, semimonthly, or monthly pay periods for up to 100 employees. The display shows time, date, and day of the week. Clock auto-adjusts for daylight saving time. Housing is blue and silver plastic and mounts with included hardware. Clock has a 4-ft. cord with plug. UL listed.

Finger-Scan Time Clocks

Scan employee fingerprints to register attendance. Time clock can be set for weekly, biweekly, semimonthly, and monthly pay periods as well as overtime for up to 125 employees. Upload data to your PC using the included software and 5-ft. USB cable or use your CAT5 ethernet cable. Clock is compatible with common payroll software such as QuickBooks and ADP.

The backlit display shows time and date when idle and employee name, in/out status, and total pay period hours after each successful scan. Housing is gray plastic. Clock has a 6-ft. cord with plug. UL listed.

	Ht.	Wd.	Dp.		
Time Clock	6″	8″	2″	8008T4	$491.04

Proximity-Touch Time Clocks

Record attendance with the touch of a badge or key fob. Time clock can be set for weekly, biweekly, semimonthly, and monthly pay periods as well as overtime for up to 50 employees. The included software lets you generate and edit reports. Upload data to your PC using a CAT5 ethernet cable. Clock is compatible with common payroll software such as QuickBooks and ADP. It comes with 15 badges. UL listed.

The display shows time, date, and day of the week. Housing is black plastic. Mount with included hardware. Clock is powered over ethernet and has a battery backup. You can link multiple time clocks on the same network.

1½″	8½″×11″	15½″	24½″	2″	**8387T5**	$45.64	**8387T7**	$7.92

Expandable Document Stands

Display reference books, catalogs, and other literature. Start with a base and select the binding (sold separately).

Bases—*Desktop* bases are steel. *Floor stand* base adjusts from 26″ to 44″ high. It holds two 13″ Lg.× 26″ Wd. panels: the lower panel supports books and the upper panel has two clips to hold paper. Panels are yellow plastic. Legs are black-painted steel.

Bindings—Connect to a base with the included slide hook. Bindings are steel and for use with three-hole punched sheets. *Three-ring bindings* allow better viewing of thick documents. *Three-post bindings* lock into place when snapped together.

Dividers—These are 9″×11″ five-hole punched black plastic sheets with reinforced white index tabs.

Paper Shredders

Manual Feed (Intermittent Duty) | Manual Feed (Continuous Duty) | Auto Feed

Shred documents, credit cards, and CDs into confetti-size pieces. Maximum sheet width is 9″. Shredders have a 5-ft. cord with plug. Color is black.

Manual Feed—*Continuous duty* shredder handles high-volume jobs without a cool-down period. It automatically lubricates the cutters with synthetic oil (sold separately) for years of maintenance-free operation.

Auto Feed—Place up to 300 sheets in the self-locking drawer and it will shred documents while left unattended.

Spiral Notebooks

All-weather notebooks have a plastic cover and paper with a special coating that repels water. Write on them using a pencil or an all-weather pen (sold separately).

Chemical-, tear-, and water-resistant notebooks retain all printed information even in environments with corrosive chemicals and high-pressure washdowns.

Clean room notebooks are for use in Class 100 and higher clean rooms.

Advanced-Function Calculators

Business

Trades

Scientific
Graphing Statistics

All have memory and include batteries.

Business—*Profit manager* calculator solves cost-sell-margin equations. Enter any two variables to get the third.

Trades—*Metric converter* calculator performs English to metric conversions (and vice versa), including length, area, and volume. *Metric converter with fractions* and *metric converter plus with fractions* calculators convert linear, square, and cubic figures from English to metric (and vice versa). The *metric converter plus with fractions* calculator provides an additional 400 conversion combinations. *Construction* calculator performs functions for rafters, stairs, and material estimation. *Electrical code* calculator contains the National Electrical Code tables and formulas.

Scientific—*Statistics* and *statistics with linear regression* calculators perform trigonometric functions, logarithms, roots, powers, reciprocals, and standard deviations. *Graphing statistics* calculator combines advanced graphing and data analysis with calculus as well as statistical and financial functions.

Computer Keyboards

These desktop keyboards are compatible with PCs. They are black, except foldable keyboard is blue.

Standard keyboard is sealed to resist liquid spills. *Foldable* keyboard is flexible plastic and resists dust and water. *Wireless set* includes a water-resistant keyboard, a mouse, and a USB receiver. *Washdown* keyboard has a rubber keypad and polycarbonate case so it's corrosion resistant and waterproof. Meets NEMA 4X. It is also compatible with Macs.

Screen Protectors and Privacy Filters

For Desktop and Laptop Computers

Protector

Privacy Filter

Protectors cling to screen surface to protect it from dust, smudges, and scratches. They are plastic film and can be cut to size.

Privacy filters darken the screen when viewed from the side, so on-screen images are only visible to the user. Filters are tinted plastic.

Fits Screen (Diagonal)	Protectors		Privacy Filters

Plastic Rolling Parallel Rules

This tool functions as a rule, compass, protractor, and template. It has a straight scale graduated to 1/16″ and 1 mm as well as a rolling scale graduated to 1/32″ and 1 mm.

Lg.	Max. Circle Dia.		
12″	24″	1245T7	$10.00

Technical Pens

Create precise drawings with this pen. It has a stainless steel point, white plastic shell, and reservoir cartridge.

Ink is waterproof and dries quickly.

Cleaning kit includes pressure bulb and 2 oz. of cleaning solution.

To Order: Please specify line width (trade/metric): 3×0/.25 mm, 00/.30 mm, 0/.35 mm, 1/.50 mm, 2/.60 mm, 3/.80 mm, or 4/1.20 mm.

Technical Pen	13285T5	$26.28

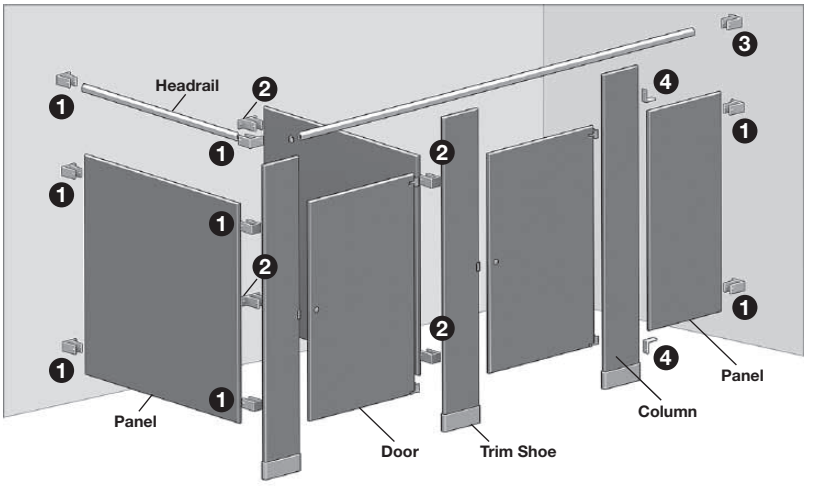
Toilet Partition Components

1 Hardware Package Attach Panel to Wall and Column; Headrail to Column and Wall

2 Hardware Package Attach Panel to Wall and Column

3 Hardware Package Attach Column to Wall; Headrail to Wall

4 Hardware Package Attach Panel to Column (Inline)



Partition Components

Design your own partitions, add to your existing partition, or replace individual components and hardware. Hardware is included with doors; all other components require installation hardware (sold separately below). To account for the hardware, the doors and panels are slightly smaller than the width listed.

Doors come with a latch, coat hook, and installation hardware. *ADA doors* are ADA compliant when properly installed. Meet ANSI 117.1.

Columns come with stainless steel trim shoes and an anchor kit to attach the column to the floor.

Painted Steel and **Stainless Steel Components—**Have a honeycomb core. *Steel* are the industry standard; *stainless steel* are corrosion resistant.

Plastic Laminate Components—Use in low-humidity environments. They have a particleboard core.

Solid Plastic Components—Our most durable and damage-resistant components. Suitable for harsh environments and washdown areas.

To view available colors, go to mcmaster.com and search a part number from the table below. For the best match, order a color sample pack. Please ask for 3621K777 and specify painted steel, plastic laminate, or solid plastic.

Hinges for Partitions

The weight of your door returns these hinges to the closed position. Each pair includes a top and bottom hinge. Mounting hardware is included.

Mortise-Mount Hinges

Often used as replacement hinges for our Painted Steel, Stainless Steel, and Plastic Laminate doors (sold above and on previous page), the pins on these hinges fit into cutouts (mortises) in doors.

Hinges are reversible for right- and left-hand doors. They're made of chrome-plated zinc with a 110° range of motion.

Surface-Mount Hinges

Often used as replacement hinges for our Solid Plastic doors (sold above and on previous page), these hinges mount directly onto your door.

Choose a right-hand hinge if the hinge is on the right (from the push side of the door); choose a left-hand hinge if it is on the left. The range of motion is 180°.

5

Designed to fit 1″ thick partition doors with a 1¼″ dia. hole, these concealed latches snap together—no mounting fasteners required. Reversible for right- and left-hand mounting, all latches include a bolt and strike. They're made of chrome-plated zinc.

Latches *for steel and stainless steel doors* have an angled bolt.

Latches *for plastic doors* have a straight bolt.

Styles 4&5 are ADA compliant when properly installed. They also meet ANSI A117.1.

Replacement for Sloan Flushmate 503			
K	American Standard, Crane, Gerber (except 28-385), Kohler (except K4404), Mansfield, Universal Rundle	2621K312	130.07

Components

(L) Upper supply kit connects the main line to the lower supply kit. It comes with an air inducer, vacuum breaker, and clamp.

(M) Flush valve cartridge activates the flushing mechanism.

(N) Lower supply kit feeds water into the tank. It comes with a hose supply shank, pressure regulator, and relief valve.

L	Upper Supply Kit	2621K82	$7.87
M	Flush Valve Cartridge	2621K81	29.32
N	Lower Supply Kit	2621K85	43.03

Toilet Mounting Flanges

Steel

Plastic with Extension

Steel flange is ⅛″ thick with six ⅝″ dia. mounting holes (fasteners not included). It also has slots for ¼″ or ⅝″ toilet bolts (sold separately on this page).

Plastic flanges with extension slide inside a 4″ cast iron or Schedule 40 plastic pipe. Tighten the included bolts to expand the compression joint, which allows up to 3″ of adjustment.

Steel Flange	29045K59	$6.43
Plastic Flange with Extension	29045K62	25.92
Heavy Duty Plastic Flange with Extension	29045K64	37.37

Toilet Seats

Made of plastic, these toilet seats come with rubber bumpers and stainless steel mounting hardware. They mount on 5½″ centers.

Heavy duty seats are treated to inhibit the growth of stain- and odor-causing bacteria on the surface of the seat.

Style C adds 3″ height to a toilet seat to make it ADA compliant. It can be used with any closed-front, elongated toilet seat.

	Lg.	Wd.	Standard Choose a Color			Heavy Duty Choose a Color

B	17″	14⅜″	White, Black	2733K3	32.43	—	—	—

Toilets

These efficient toilets help you conserve water. They use 1.3 gallons (4.9 liters) of water per flush, unless noted. They're made of white porcelain and have elongated bowls. Installation distance is measured from the wall or floor to the centerline of your waste pipe. *ADA toilets* are ADA compliant when properly installed.

Floor-mount toilets have two ½″ × ⅞″ mounting slots; **wall-mount** toilet has four ⅞″ dia. mounting holes. Mounting bolts are not included.

Tankless—Flush valve is not included. Top inlet connection is 1½ NPT male.

Gravity Tank—Both come with a fill valve, float, and flapper.

Pressurized Tank—For a more powerful flush, these toilets have a pressurized tank to increase water pressure.

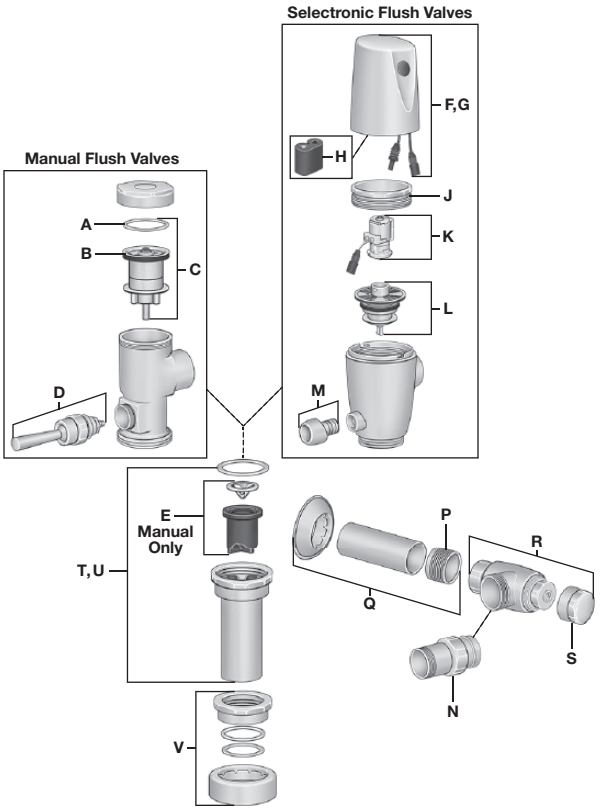
★ **To Order:** For toilets, please specify 1.28 or 1.6 gpf; for urinals, please specify 0.5 or 1.0 gpf.



Sloan and American Standard Flush Valves

Choose a valve with the same consumption rate or gpf (gallons per flush) as your toilet or urinal. All have a vacuum breaker to prevent water from backing up into the main line and a control stop to allow repairs without shutting off the water supply. Installation hardware is included. Valves meet ASSE 1037. They're ADA compliant when properly installed and CSA certified.

Automatic flush valves have a motion sensor for touch-free operation and a manual override button. They come with batteries and a low battery indicator.

Sloan valves have a rubber diaphragm assembly. **American Standard** have a piston assembly.

Sloan Manual-to-Automatic Flush-Valve Converters

Turn your manual Sloan Royal or Regal flush valve into one that's touch-free with this sensor-activated converter. There's also a manual override button.

Select a valve with the same gallons per flush as your toilet or urinal. Converters come with a handle cap, gasket, installation wrench, screwdriver, and batteries. They're ADA compliant when properly installed and meet ANSI 117.1. UL listed and CSA certified.

Handle-Mount Manual-to-Automatic Flush-Valve Converters

Slips-Over Handle

Replaces Handle

For touch-free flushing on your urinal or tankless toilet, attach these converters to your hand-operated Sloan and Zurn flush valve. They're activated by a motion sensor but also have a manual override option. They come with a wrench, a hex key, and batteries.

Tilt-down adapter adjusts 3747K21 for use with extra-clearance flush valves, angling the sensor down to detect users and prevent unintended flushes. Includes a gasket washer, adapter, push rod, and two sleeves.

Shower Stalls

Stainless Steel

Install these freestanding shower stalls anywhere you have a water connection. They have a center drain, a shower arm and head, plastic curtain with hooks, and built-in soap dish. Shipped unassembled.

Plastic stall has a 2″ quick-connect drain with strainer, a two-handle (hot/cold) valve, and a plastic handrail for support. Color is white.

Stainless steel stall offers the most corrosion resistance. Walls are 18 gauge; floor is 14 gauge. It has a 2″ slip-nut compression drain connection and a single-handle valve.

Touch-Free Hand Dryers

Standard

Fast Dry White Plastic and Stainless Steel

Fast Dry White-Painted Steel

Reduce paper waste in your lavatory by installing one of these motion sensor-activated hand dryers. Designed to be hardwired, they have a circuit breaker with overload protection that resets automatically. Dryers are ADA compliant when properly installed and meet ANSI 117.1. UL and C-UL listed.
Standard models have 1/4″ dia. mounting holes.
Fast-dry models remove water from hands in 10 to 15 seconds—twice as fast as standard dryers. *White plastic* and *stainless steel* dryers have 5/16″ dia. mounting holes. *White painted steel* dryers have 1/4″ dia. mounting holes.

Pour Bottle

Keep hands clean throughout the workplace.

Heavy duty with scrubbing grit cuts through the toughest dirt, tar, sealants, and water- and oil-soluble cutting fluids.

Paint- and resin-removing soap offers an alternative to thinners and solvents. It removes urethane- and oil-based paint, varnish, and lacquer.

Heavy-metal removing soap reduces the risk of contamination by scrubbing away lead, nickel, cadmium, cobalt, mercury, zinc, copper, and silver.

Wall-mount brackets for 1-gal. pump bottles come with fasteners. They are 6" Ht. x 9" Wd. x 6" Dp.

Pump dispenser for 63275T8 is 17" Ht. x 7" Wd. x 6 3/4" Dp.

Pump dispenser for 7113T15 is 17 1/4" Ht. x 4" Wd. x 9 1/2" Dp.

Touch-Free Soap Dispensers

Place your hands beneath these sensor-activated dispensers to release a single squirt of soap. They're ADA compliant when properly installed. Mounting hardware is included.

Wall-mount dispensers have a key-locking cover that shuts off power when opened.

Dispenser *for lotion and liquid soap* requires three C batteries; dispenser *for foam soap* requires four C batteries and has a low-battery indicator.

Deck-mount dispenser comes with a bottle of soap and four D batteries. A light indicates when the battery and soap levels are low.

Soap refills come with a pump and delivery tube. Each bottle provides approximately 1,000 hand washes.

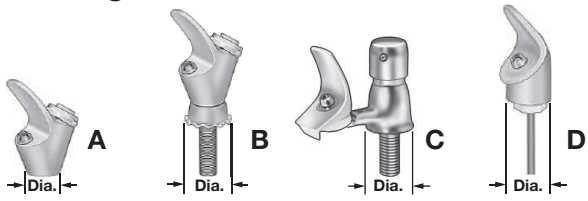
Drinking Fountain Nozzles



Also known as bubblers, these nozzles meet NSF/ANSI Standard 61 for use with drinking (potable) water.

Styles A-C have a push-button valve with flow regulator. They're made of chrome-plated brass.

Style B nozzle has a 4″ long connection shank.

Style C has a flexible, beige plastic mouth guard to protect against injuries. It comes with a 2″ long connection shank and is ADA compliant when properly installed.

Style D comes with a 1/4″ copper tube for connection to your water supply. It's made of chrome-plated plastic and has a flexible, beige plastic mouth guard to protect against injuries.

Refrigerated Drinking Fountains

A

B

C

D

E

F

G

H

J

Cool down with these refrigerated hydration stations. They have a heavy duty stainless steel basin and flexible plastic drinking nozzle, except Style J nozzle is chrome-plated brass.

Fountains operate on 120 volts AC and have a cord with plug. Factory set at 50° F, temperature is adjustable. Water inlet connection is an unthreaded 3/8″ OD copper tube; drain outlet connection is 1 1/4″ OD.

All fountains meet NSF/ANSI Standard 61 for use with drinking (potable) water and are CSA certified. They're also UL and C-UL listed, except Style E is certified to UL 399.

Fountains **with filter** reduce the lead and chlorine content from drinking water. Change the filter cartridge every 1,500 gallons.

Wall-mount fountains (Styles A-E) come with mounting brackets; see table for fasteners required. *Style E* has a sensor-activated filtered water station for filling glasses and bottles. Top panel indicates filter status.

Extreme duty fountain (Style J) is designed for humid and high-temperature environments. Housing is stainless steel and the internal components are coated for corrosion resistance.

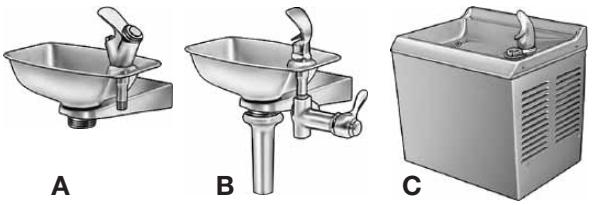
Nonrefrigerated Drinking Fountains



Connect to a water source and these fountains are ready to flow. For cold water, attach a remote water chiller (sold below). Fountains meet NSF/ANSI Standard 61 for use with drinking (potable) water.

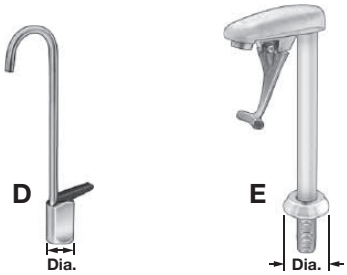
Styles A and **B** are stainless steel with a chrome-plated brass drinking nozzle. Basin measures 3″ Ht. × 10″ Wd. × 6″ Dp.

Style B has a 1¼″ Dia. × 4″ Lg. tailpiece.

Style C mounts to the wall with an included bracket. It has a stainless steel basin, a gray painted steel cabinet, and a flexible plastic drinking nozzle. It measures 15″ Ht. × 15¾″ Wd. × 13″ Dp. The mounting bracket has five ⅜″ dia. mounting holes.

	Connections: Inlet	Outlet		
A	Indoor/Outdoor	⅜ NPT Male	1½″ OD	**2789K75** $254.10
B	Indoor/Outdoor	⅜ NPT Female	1¼″ OD	**2789K74** 390.16
C	Indoor	⅜″ OD	1¼″ OD	**2789K76** 401.64

Glass and Bottle Fillers



Get your fill with these high-clearance spouts that easily attach to a water source. They're chrome-plated brass with a plastic push lever, and they shut off instantly when the lever is released. Meet NSF/ANSI Standard 61 for use with drinking (potable) water.

Style D is for use with cold and hot water.

Style E is for use with cold water.

	Inlet Connection	Dia.	Ht.	
D	⅜ NPS Female	1¼″	9⅝″	**2942K56** $53.48
E	½ NPT Male	2″	9 5/16″	**2853K4** 108.77

Water Chillers

When you need your nonrefrigerated drinking fountains to chill, attach one of these heavy duty chillers and they'll provide cold water. You can also install a glass filler or drinking fountain nozzle directly to the unit.

Made of galvanized steel for corrosion resistance, chillers are factory set at 50° F but can be adjusted.

Chillers operate on 120 volts AC and have connections for hard-wiring. For proper ventilation, allow 6″ clearance in front of the unit and 3″ behind the unit (unless noted). They're UL listed and meet NSF/ANSI Standard 61 for use with drinking (potable) water.

★ Requires 6″ of clearance in the front as well as the back.

Water Dispensers

Provide drinking water wherever it's needed. These beige plastic dispensers operate on 120 volts AC and include a cord with plug. For proper ventilation, allow 4″ on each side and 6″ behind the dispenser. They're UL listed and C-UL listed and meet NSF/ANSI standards for use with drinking (potable) water.

Bottled-water dispensers do not require a plumbing hookup. The reservoir detaches for quick cleaning. Bottle sold separately.

Inline-water dispensers draw directly from your water supply. They include a ¼″ OD plastic inlet connection.

Automatic Shut-Off Lavatory Faucets

J

K

L

M

Prevent wasted water with these faucets that shut off when the handle is released. Made of chrome-plated brass, all have a fixed spout with an aerator.
Delayed shut-off faucets dispense water for 10 to 30 seconds after pressing the push-top handle.
Styles J&K include a 1/4 NPT male adapter.
Style L faucet has a mixing valve to dispense water at a consistent temperature.

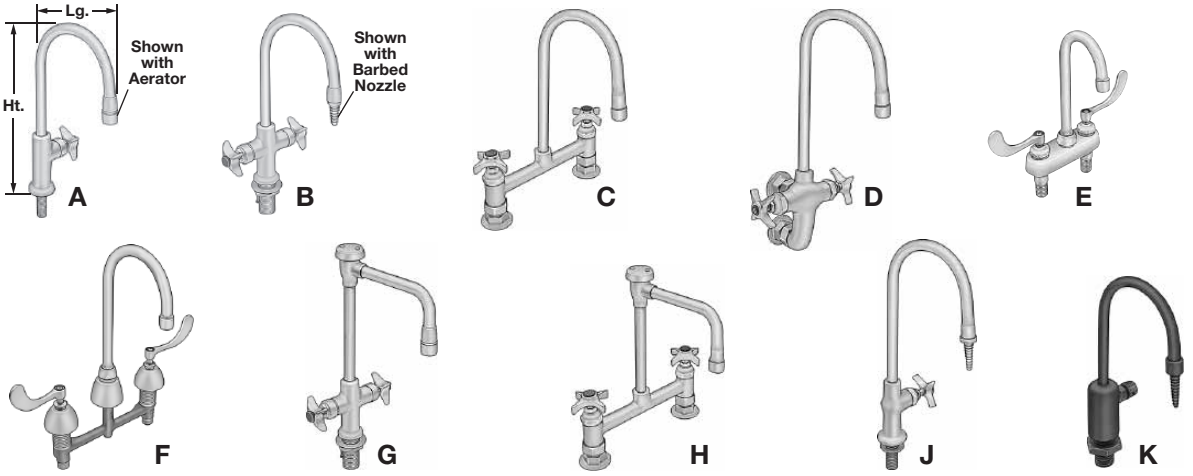
High-Clearance Faucets



The tall, narrow spout on these gooseneck faucets provides more space for filling bottles, beakers, flasks, and other laboratory accessories. They are made of chrome-plated brass, except Style K are PVC.

Faucets *with barbed nozzle* accept hose with a 1/4″ to 1/2″ hose ID.

Faucets *with backflow prevention* keep liquid from flowing back into your water supply.

Style A are for cold water only.

Styles E&F are ADA compliant when properly installed and can be installed to not swivel.

Style J comes with a 1/4 NPT male adapter.

Style K can also be used with deionized and demineralized water.

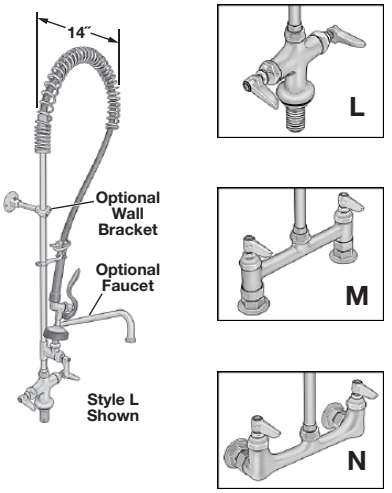
Washdown Sprayers



Pulling the trigger on these flexible sprayers shoots a concentrated jet of water to blast away dirt and grease. Often used for industrial parts washing and food service applications, they're made of chrome-plated brass and come with a 44″ long flexible hose with a stainless steel cover and a mixing faucet. Sprayers are compliant with regulations for use with drinking (potable) water.

Optional wall bracket extends 6″ and is made of chrome-plated brass. Fasteners included.

Optional faucets are chrome-plated brass. Top connection is 3/8 NPT female; bottom connection is 3/8 NPT male.

Replacement hose with spray head has a 1/2 NPT male inlet connection.

Faucet Washers and O-Rings

SBR rubber washers have a temperature range of –30° to 200°F.

PTFE washers absorb less water so they're more durable than SBR washers. Temperature range is –100° to 500°F.

Washer assortments include the individual washer sizes listed below. *PTFE assortment* also contains sizes 000 (15/32" OD) and 3/8" M (21/32" OD).

O-ring assortment includes 12 of the most popular O-ring sizes. Temperature range is –30° to 250°F.

Handle Puller		2818K31	Each $10.68

Four-Way Valve Keys

Open and close stopcocks, sillcocks, and other valves when handles are removed. Made of plated steel, key fits 1/4", 9/32", 5/16", and 11/32" valves.

2661K51 $7.62

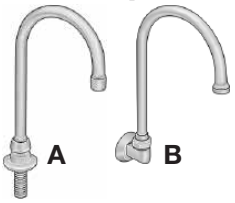
Faucet Accessories & Fittings

Extendable Faucet Sprayers

For water where you need it, this plastic sprayer has a 48″ long flexible hose. Connection is ⅛ NPT male and includes an adapter for ⅛ NPT female and ¼ NPT female.

Sprayer	2895K22	$15.52
Replacement Spray Head	2895K14	10.18

Faucet Spouts

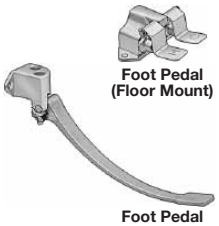


Made of chrome-plated brass, these spouts swivel and have aerators. They are compliant with regulations for drinking (potable) water.

Style A can also be installed to not swivel.

	Inlet Connection	Flow, gpm		
A	½ NPT Male	2.2	3046K26	$77.19
B	⅜ NPT Female	10.7	3046K37	59.19

Hands-Free Flow Control Valves



You don't need a free hand to make faucets flow. Press these chrome-plated brass valves with your foot or knee for water; release them to stop the flow. They have ½ NPT female inlet and outlet connections and are compliant with regulations for drinking (potable) water. Mounting hardware is included.

Single-pedal valves control either hot or cold water.

Double-pedal valves have separate controls for hot and cold water; press both to mix temperatures. Inlet connections are on 2½″ centers.

Valve repair kit includes valve stems, springs, washers, packing stems, and other parts required to rebuild these valves.

Mount Type	Pedal Lg.	Single Pedal		Double Pedal	
Foot Pedal					
Floor	3″	2683K3	$120.45	2683K1	$179.22

Valve Repair Kit				2683K9	15.33
Valve Replacement Cartridge (Hot/Cold)				2683K7	25.77

Water Supply Tubes

Connect water supply shut-off valves to faucets and toilet tanks. Also known as riser tubes, they have a ⅜″ OD.

Tubes **for faucets** are compliant with regulations for drinking (potable) water.

Material	Lg.	For Faucets		For Toilet Tanks	
Plastic	11½″	27015K71	$2.96	27015K75	$3.07

Flex-Head Adjustable Wrenches

Also known as basin wrenches, the pivoting head and spring-close jaws let you work in tight spaces where it's difficult to adjust the jaws of a traditional adjustable wrench. The head pivots 180° for use on the left or right.

Standard wrench is cadmium-plated steel.

Adjustable-length wrench has a telescoping handle for additional length. Wrench is steel with a black finish on the jaws.

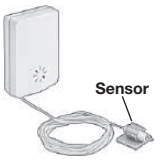
	Jaw Capacity	O'all Lg.		
Standard	⅜″-¾″	11″	2813K12	$11.43
Adjustable Length	⅜″-¾″	9″-16″	3064K11	26.23

Faucet-Mount Water Filters

Tap into great-tasting water by screwing this filter onto your faucet. It filters out sediment, chlorine, and other particles that cause unpleasant tastes and odors. The cartridge included lasts approximately two months or 200 gallons of water. Filter has 55/64″-27 female threads and comes with two adapters (13/16″-27 male; 15/16″-27 male). Compliant with regulations for drinking (potable) water. Note: Not recommended for hot water.

Water Filter	2518K12	$25.60
Replacement Filter Cartridge	2518K21	17.27

Water Overflow Buzzers



When water contacts the sensor, it triggers a buzzer to alert personnel to a leak or overflow hazard. Volume is 83 dB @ 10 ft. Frequently used to monitor sinks, pipe lines, tubs, and sump pumps.

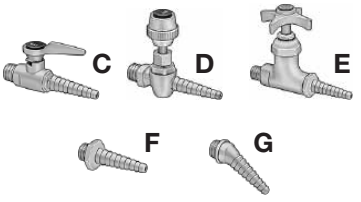
Mount the alarm box with the included hook-and-loop tape. A 5-ft. long flexible wire connects the sensor to the alarm. Requires 3 AAA batteries.

1377T63		$24.59

Service Fittings for Air, Gas, and Water

Fittings are made of chrome-plated brass.

Hose Cocks, Valves, and Nozzles—⅜ NPT Male Inlet



Hose cock and **needle valve** come with three interchangeable, color-coded identification buttons: orange for air, blue for gas, and yellow for vacuum.

		Lg.	Ht.	Maximum Pressure, psi	Accepts Hose ID		
C	Hose Cock for Air and Gas	3⅞″	1⅞″	125★	¼″-⅜″	2359K11	$30.97

Water Supply Hose with Fittings

Hook up faucets and other appliances to a water supply with these flexible hoses. Fittings are plated brass, except toilet tank ballcock hose fittings are plastic. Hose has a maximum temperature of 140° F.

Faucet and **ice maker** hoses are compliant with regulations for drinking (potable) water.

Dishwasher hose includes a 90° elbow adapter with a 3⁄8″ male compression connection.

Water Hammer Eliminators

Standard Pressure

High Pressure

Prevent knocking noises from water pipes with these eliminators. Install them close to the shut-off valve at any angle. Maximum temperature is 200° F.

Standard Pressure eliminator is compliant with regulations for drinking (potable) water.

Inlet Connection	Max. Pressure, psi	Dia.	Ht.

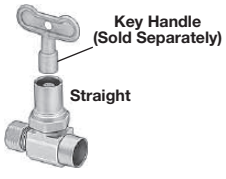
Water Supply Shut-Off Valves and Tools

Standard Valves with NPT Female Inlet

Standard Valves with Compression Inlet

1⁄4-Turn Valves with Push-to-Connect Inlet



Vandal-Resistant Valve with Solder Inlet

Also known as water supply stops, these valves shut off water to faucets, toilets, and fountains. Body is made of plated brass. Valves are compliant with regulations for drinking (potable) water.

1⁄4-turn valves are often used in tight areas. Water stops with a 1⁄4 turn of the handle.

Vandal-resistant valves have a removable key handle to prevent unauthorized use. Key handles are sold separately; made of plated brass.

Wrench turns valve handles without over-torquing. It's often used for corroded and hard-to-reach valves. Made of plastic.

Compression-sleeve puller removes stuck and corroded sleeves. Screw it into the compression nut; turn the handle to quickly dislodge the sleeve. Made of steel.

Lavatory Sinks

Porcelain sink has an overflow hole and a bracket with seven 9/16″ dia. mounting holes. It meets ANSI 112 and is ADA compliant when properly installed. Color is white.

Stainless steel sinks have seamless, welded construction. They come with a chrome-plated brass strainer and tailpiece (1¼″ dia.; 4″ long).

The 15″ long sink has a bracket with four 5/16″ dia. mounting holes.

The 22″ long sink is ADA compliant when properly installed. Mounting brackets and fasteners are included.

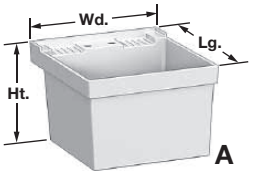
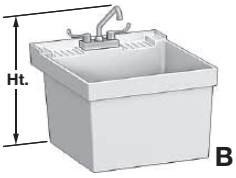
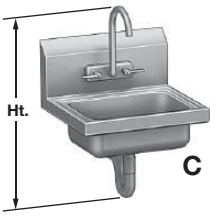
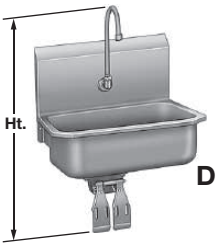
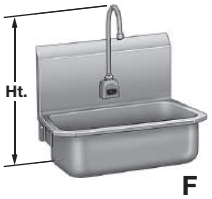
Wall-Mount Service Sinks

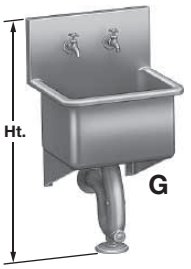


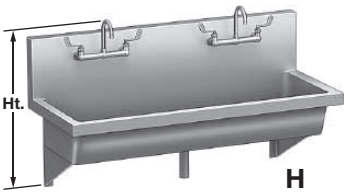


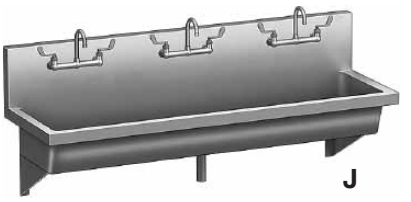












Keep floor space clear in work areas with these service sinks.

Plastic—These lightweight sinks have a 1½″ dia. strainer. They include a 5″ long tailpiece, wall hanger, and fasteners.

Style A has faucet holes on 4″ centers. **Style B** has a chrome-plated brass faucet with a swivel spout.

Stainless Steel—For use in food service applications, these sinks have rounded corners that are easy to clean and resist buildup. They come with a strainer.

Style C have a chrome-plated bronze faucet with swivel spout. They have a 1½″ dia. P-trap and a 4″ long tailpiece. Sinks include a mounting bracket with fasteners.

Styles D-F allow you to control water flow without touching the faucet. Faucets are chrome-plated brass. Strainer has a 1½″ dia. slip-joint connection. Sinks have a mounting bracket with ¼″ dia. mounting holes.

Styles D&E have knee pedals for hands-free operation. The faucet spout swivels. Sinks can also be used outdoors. *Sensor-operated faucet kit* converts your knee-operated sink to a swivel touch-free faucet. It has a 9½ ft. power cord with plug and operates on 120 volts AC. For indoor use. UL listed.

Style F have a touch-free faucet with sensors that adjust to detect hands from 6″ to 30″ away. They have a 9½ ft. power cord with plug and operate on 120 volts AC. For indoor use. UL listed.

Heavy Duty Stainless Steel—Sinks have chrome-plated brass faucets and come with a strainer, wall hanger, and mounting brackets. Wall hanger has ¼″ dia. mounting holes; brackets have 7/16″ dia. mounting holes.

Style G include a P-trap with cleanout plug; it has a 3 NPT female outlet connection.

Styles H&J have faucets with spouts that can be installed as fixed or swivel. They include a tailpiece (1½″ dia.; 4″ long).

K

These high-capacity sinks stand up to tough applications. Sinks that meet NSF/ANSI standards have rounded corners that are easy to clean and resist buildup.

Sinks with Faucets—The faucets are chrome-plated brass and have a swivel spout.

Styles A&B bowls are lightweight plastic. Legs have a 1/4″ dia. hole for floor mounting and come with leveling feet that adjust up to 1″. They have a strainer and tailpiece (1 1/2″ dia.). *Style A* tailpiece is 5″ long; *Style B* tailpiece is 7″ long.

Style C have a strainer with a 2 NPT male connection.

Style D has a 1 NPT female threaded side opening with removable plug for external draining. For bottom draining, it includes a strainer and tailpiece (1 1/2″ dia.; 4″ long) with slip-joint connection. Legs are removable and have four swivel casters with brakes.

Styles E-G have seamless bowls. *Optional drain board* is an angled shelf that mounts to either side of the sink.

Styles H&J have foot pedals for hands-free operation. They come with a strainer with 1 1/2″ dia. slip-joint connection. They can be used outdoors. *Sensor-operated faucet kit* converts your foot-operated sink to a swivel touch-free faucet. They have a 9 1/2 ft. power cord and operate on 120 volts AC. UL listed. For indoor use.

Style K includes a strainer with a 1 1/2 NPS male connection.

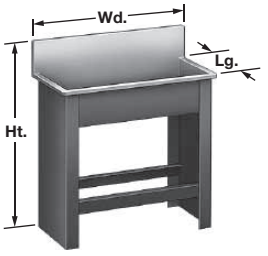
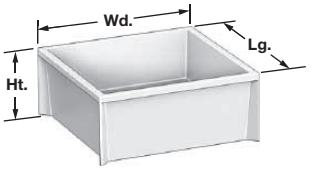
Extreme-Duty Freestanding Processing Sinks



The most corrosion resistant sinks we offer, these have a 316 stainless steel bowl that's undercoated to prevent condensation. Designed for use with corrosive chemicals and photography processing applications, they have a corner drain and strainer with a 1½ NPT male connection. The base is black vinyl-coated steel and has leveling feet that can be adjusted up to 1½".

Overall Size Lg.	Wd.	Ht.	Inner Bowl Size Lg.	Wd.	Dp.	Backsplash Ht.	Drain Opening Dia.		
20"	39"	46"	17"	36"	9"	8"	1½"	2836K72	$1,236.11
27"	51"	46"	24"	48"	5"	8"	1½"	2836K73	1,312.50

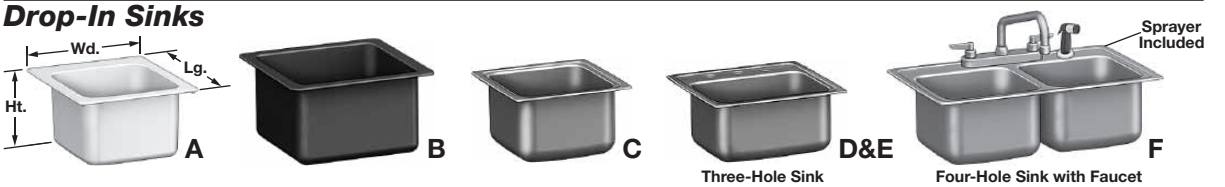
Floor Service Sinks



Empty heavy buckets of liquid directly into these low-profile, floor-mounted sinks. Install by sliding over 3" pipe. Connection is made water tight with included seal. They're made of seamless fiberglass and come with a strainer.

Overall Size Lg.	Wd.	Ht.	Inner Bowl Size Lg.	Wd.	Dp.	Drain Opening Dia.		
24"	24"	10"	22"	22"	9½"	3"	2180K1	$217.43
24"	36"	10"	22"	34"	9½"	3"	2180K3	234.15

Drop-In Sinks



Install these sinks into a counter. They have seamless rounded corners for quick cleaning. Installation hardware included, except Style B.

High-Impact Fiberglass—These white stain-resistant sinks have a back ledge that can be drilled for a faucet. The 22" long sink comes with a 1½" dia. strainer with a slip-joint connection. Stopper included.

Chemical-Resistant Plastic—Made of black polyethylene, these sinks have a strainer and 3½" long tailpiece with a 1½ NPT male connection. Stopper included. To install, apply sealant (not included) to rim and drop into your counter.

Stainless Steel—These sinks offer the best corrosion, acid, and chemical resistance. They're undercoated to reduce condensation.

Sinks with faucet have a chrome-plated metal faucet with swivel spout and are compliant with regulations for drinking (potable) water. *Style D* has a flow rate of 2.2 gpm. It also has ½ NPS male connections and comes with a strainer and tailpiece (1½" dia.; 4" long). *Styles E&F* have a flow rate of 1.5 gpm. They also have ½ NPT male connections.

Four-hole sinks come with a sprayer.

Wash Fountains

You won't have to wait to wash up with these deep-bowl, multi-user fountains. They're chemical and corrosion resistant and have a liquid soap dispenser, except Style C which has a bar soap holder.

Top-venting fountains include a drain trap. For images of connection location, please go to mcmaster.com and search for the part number.

Plastic—These fountains have ½ NPT female inlets and a 2 NPT male drain outlet. They're beige and have ½″ dia. holes for floor mounting.

Style A come with a support bracket for the spray head; it has 9/32″ dia. holes.

Stainless Steel—These fountains have ½ NPT male flexible hose inlets. Pedestals are black, vinyl-coated galvanized steel. They have ½″ dia. holes for floor mounting.

Styles C&D have a 1½″ unthreaded drain outlet. They also have four ½″ dia. holes for optional wall mounting.

Style E have a 2″ unthreaded drain outlet.

Touch-free fountains operate at 24 volts AC (from 120 volts AC) with a step-down transformer that draws 3 amps. Sensor and transformer are UL listed.

Storage Cabinets with Sink and Faucet

Single Bowl with Right/Left Countertop

Convenient for kitchens and breakrooms, these white-painted steel sink cabinets have a plastic laminate countertop. Sink is stainless steel with a chrome-plated brass swivel faucet (½ NPT male connections; 1.5 gpm flow rate). Inner bowl is 15¼″ Lg. × 21½″ Wd. × 6″ Dp. Sinks have a 3½″ dia. drain with a P-trap, strainer, and 4″ long chrome-plated brass tailpipe. Countertop has a tan limestone pattern and a 5″ backsplash. Shipped unassembled.

Sinks **with spray hose** require a hole for the spray hose. To drill, use a 1″ dia. hole saw.

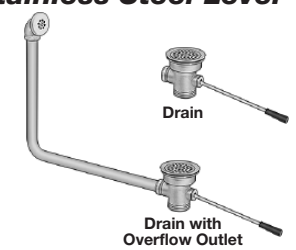
Stainless Steel Lever-Control Sink Drains



Plug and drain your service sink by moving a lever beneath the bowl. Lift lever to plug; push down to drain. Flange and strainer are stainless steel; body is plated brass.
Drains with overflow outlet accommodate most sinks. Use a hacksaw to trim the overflow outlet pipe to size.

Adjustable-Riser Drain Traps

The riser on this P-trap adjusts vertically up to 5½″. Often used with lab sinks, it's made of chemical-resistant plastic. Trap comes with a 1½″ dia. drain with strainer (top diameter is 3⅜″).

The tailpiece has 1½ NPS male threads and can accommodate sinks up to 2¼″ thick. The trap also has a 1½ NPT male outlet elbow. Meets ASTM F1412-92 for chemical resistance.

2978K14 ..... $94.53

Adjustable-Neck Drain Traps

Adjustable J-bend connects drains that are horizontally offset up to 2½″ or vertically offset up to 3½″. Made of white plastic, it comes with a wall tube, slip-joint nuts, and washers for 1¼″ and 1½″ dia. drains.

3097K5		$9.31

Easy-to-Clean Drain Traps

Loosen the knobs on this J-bend to clean it out without removing it from your pipe system. Made of clear plastic, it has a removable screen that traps objects while allowing water to flow.

It comes with slip-joint nuts and washers for 1¼″ and 1½″ dia. drains.

2972K53		$9.55

Sink Drain Wrenches

Install and repair various sink drain traps and fittings with one tool. Made of zinc-plated steel, it works on 6-, 8-, and 12-sided drain nuts. Overall length is 8¾″.

2377K4		$11.89

Sink Drain and Toilet Inlet Connector Wrenches

Adjustable from 1″ to 4″ in diameter, this wrench installs and removes standard and pop-up sink drains, overflow outlets, and toilet inlet connectors (spuds). It's steel with a black-oxide finish.

2811K14		$33.50

Porcelain Repair

Keep the surface of your porcelain fixtures looking like new. Filler and glazes are white.

Filler repairs large chips and cracks. Sand and finish with glaze (sold separately).

Glaze touches up small chips and scratches.

	Size		
Filler	2 oz.	7824T11	$10.90
Glaze for American Standard Fixtures	½ oz.	7824T21	10.90
Glaze for Kohler Fixtures	½ oz.	7824T22	10.90
Glaze for Appliances	½ oz.	7824T23	10.90

Sink Drains with Collection Traps

Stop clogs and blockages before they happen with these plastic traps. Often used in laboratory applications, they have removable collection pots.

Traps fit standard 1½″ dia. sink openings; top diameter is 3⅜″. The tailpiece accommodates sinks up to 2¼″ thick. Stopper is included.

Standard trap withstands frost, boiling water, and detergents. Outlet has a 1½″ dia. slip-joint connection. Trap includes an adapter tube with an unthreaded male outlet for use as an extension to another slip-joint connection.

Large capacity trap has a semi-clear catch pot, so you can see when it needs to be emptied. Outlet has 1½ NPT male threads. Meets ASTM F1412-92 for chemical resistance.

ADA-Compliant Pipe Insulation

To reduce the risk of burns from touching the hot pipes under your sink, install this molded, flexible pipe insulation. Made of white ⅛″ thick vinyl, it wraps around 1¼″ and 1½″ dia. P-traps and two 90° water-supply stop valves (⅜″ and ½″ inlets). It's treated to inhibit the growth of stain- and odor-causing bacteria on the surface of the insulation. ADA compliant when properly installed.

Optional cover for offset pipe insulates a 5″ offset drain on a wheelchair accessible sink.

Pipe Insulation	23685K72	$45.03
Optional Cover for Offset Pipe	23685K73	13.90

Garbage Disposals

Pulverize and eliminate food waste in your sink with these corrosion-resistant disposals. They have stainless steel grinding blades, a removable splash guard, cushioned mounting ring, reset button, and 3-ft. cord. Disposals mount below sinks with a 3½″ dia. drain opening. Motor operates on 120 volts AC and is insulated to reduce noise.

Grease Traps

Steel

Plastic

Often used in restaurants, these corrosion-resistant grease interceptors remove and retain grease from waste water to prevent blockages inside the plumbing system.

Steel traps have a slip-resistant cover and lift handle. They have unthreaded connections; for no-hub pipe couplings, please see page 105.

Plastic traps offer more corrosion resistance than steel traps. They have NPT female connections. Maximum temperature is 212°F.

Liquid and Granular Drain Cleaners

Organic waste digesters keep clogs from forming. They contain concentrated bacteria to break down waste buildup in drains, grease traps, and sewage systems.

Drain openers remove clogs by dissolving grease and other organic matter causing the blockage. They're made with sodium hydroxide and have no odor. *Liquid* opener can be poured directly into standing water. *Granular* openers activate in hot water.

Hand-Pump Drain Cleaners

Blast away blockages in pipes up to 200 ft. away. Pressurize the cylinder; insert head into your drain; and pull the trigger. To pressurize, pump the handle or use an air compressor with a 1/4 NPT female connection. Cleaners come with five drain adapters (1 1/4″ to 4″ dia.).

Standard cleaners have a 4″ dia. rubber cone and a 10″ rubber extension hose.

Deluxe cleaner has a 6″ dia. rubber cone, 4-ft. rubber hose, and four drain-opening plugs (1 1/2″ to 4″ dia. range). It also includes a check valve; adapters for water connection; and a 22″ extension hose.

Maintenance kit contains O-rings, washers, and other commonly worn parts.

Drain-opening plug set includes 1 1/2″, 2″, 3″, and 4″ diameter plugs.

Standard Cleaner	2624K11	$285.10

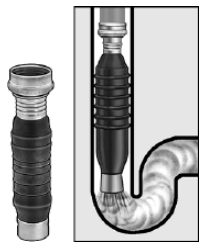
Drain-Opening Plug Set	2624K31	59.18

Gas-Powered Drain Cleaners

For use in drains, garbage disposals, toilets, and urinals, this drain cleaner uses a pressurized cartridge of compressed gas to power through clogs. It's plastic and has a 4″ diameter base adapter. Includes four cartridges. Each cartridge is for one application.

Drain Cleaner	27405K37	$39.46
Refill Cartridges (Pkg. of 4)	27405K38	9.50

Water-Powered Drain Cleaners



Semirigid

Flexible

Flush out clogs with your garden hose. These drain cleaners attach to a hose and expand to form a seal while the water pressure dislodges the blockage. They have a 3/4 GHT female connection.

Semirigid cleaners have a ribbed rubber cylinder to grip the inside of your pipe.

Semirigid drain cleaner kit includes three drain cleaners to fit 1″ to 6″ pipe IDs, a crossbar drain adapter, a 10-ft. hose with 3/4 GHT male and female connectors, a 3/4 GHT faucet adapter, and a carrying case.

Flexible cleaners have a bag-style cylinder that can move through pipe curves and elbows. They come with a backflow preventer, except the cleaner for 4″ to 6″ pipe ID has a 3/8 NPT male nozzle that can be capped to convert the cleaner to a plug (max. pressure is 40 psi; cap sold separately).

Hose has 3/4 GHT male and female connectors and a faucet adapter.

Faucet adapter allows your faucet to accept a 3/4 GHT female connector.

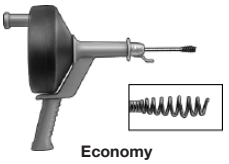
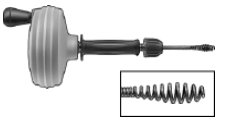
Hand-Held Drum-Style Drain Cleaners

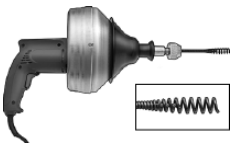


Economy



Standard

Add-a-Drill (Shown with Crank)



Drill-Included

Economy cleaners have a quick-release cable lock to hold cable in place. The drum and knob are plastic. Do not use with toilets.

Standard cleaner has a high-impact plastic drum that offers rust and heat resistance.

Add-a-drill cleaners can be operated with any ⅜″ or ½″ drill; for optimal performance, use at 350 rpm. Drum is plastic and includes a hand crank.

Drill-included cleaners have a variable-speed drill that operates on 120 volts AC up to 500 rpm. They're UL listed and have a power cord with two-prong plug.

2541K71 has a reversible motor, flexible and standard arrow heads, a 1¼″ side cutter blade, a ⅜″ drop-head bulb, a bulb auger, and a carrying case. For 1¼″ to 2″ pipe IDs, it comes with a 50-ft. cable (¼″ dia.); for 2″ to 3″ pipe IDs, it comes with a 35-ft. cable (⅜″ dia.). *Drop-head adapter* has a jointed connection to maneuver through bends in pipe.

Electric Drum-Style Drain Cleaners

Snake out deep drain blockages with these continuous-cable drain cleaners. They have an air-powered on/off foot switch, a ground fault circuit interrupter, and a forward/reverse control. Cleaners have a 165 rpm, ⅓ hp motor (unless otherwise stated) that operates on 120 volts AC and comes with a power cord and three-prong plug. Handle can be folded for compact storage, except 2540K63 handle is removable. Protective gloves included.

Manual feed cleaners have a removable drum for quick access to the cable. They come with a cutter set that includes a 2″ side cutter, a 1½″ U-cutter, an arrow head, and a bulb auger. They measure 38″ Ht. x 16″ Wd. x 20″ Dp.

Note: 2563K14 is not for use with tree roots in 4″ ID pipes.

Automatic feed cleaners are self-feeding to quickly move cable through pipes.

2536K64 comes with a cutter set that includes a 13″ flexible leader; an arrow head; a 1½″ U-cutter; 2″, 3″, and 4″ side cutters; a 3″ rotary saw blade; and a retrieving tool. Cleaner measures 41″ Ht. x 17″ Wd. x 27″ Dp.

Note: Not for use with tree roots in 4″ ID pipes.

2540K63 comes with a ½ hp motor; two 100-ft. cables (½″ dia. cable for 2″ to 3″ pipe IDs; ¾″ dia. cable for 4″ to 10″ pipe IDs); a cutter set that includes 13″ and 26″ flexible leaders; an arrow head; a spear head; 2″, 3″, and 4″ two-piece side cutters; 1½″ and 2″ U-cutters; a 3″ saw blade; a 4″ rotary saw blade; a retrieving tool; and a tool box. Cleaner measures 41″ Ht. x 22″ Wd. x 26″ Dp.

Tube Scrapers and Handles

Break down tube buildup.

Coiled Flat Wire—Remove soft and hard deposits without scratching.

Flat Wire—For hard, heavy deposits.

Spiral Blade—These self-sharpening scrapers use spring tension to exert pressure and remove soft and hard deposits without scratching your tubes.

Round Wire—Our most durable scrapers for hard, heavy deposits.

T-handles are 60″ long and made of steel. For more handles and styles, please see page 2702.

Tube Plugs for Condensers and Heat Exchangers

Plug leaky tubes in condensers and heat exchangers with these two-piece brass ring and pin sets. Insert ring into the tube, and hammer the pin into the ring for a secure seal.

Note: If you do not know the tube OD or gauge, measure the tube ID and select the closest ring OD.

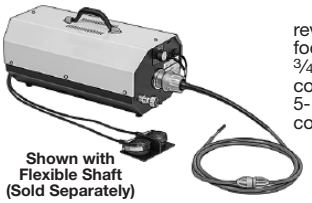
Tube Cleaners & Test Pumps

Electric Tube Cleaners

Force out tough tube blockages with these powered cleaners. Pair the **tube cleaner** with a **flexible shaft**; then attach a **scraper** or **brush** to the shaft. Water flows past the shaft to flush out loosened deposits.

Tube Cleaner



Shown with Flexible Shaft (Sold Separately)

Cleaner has a variable-speed, reversible motor with an on/off foot switch. The water inlet has a ¾ GHT connection. To power, connect an extension cord (NEMA 5-15) into the receptacle. For power cords, see page 828.

AC Voltage	hp	rpm		
120	½	0 - 1,800	3627K13	$1,673.10

1"	¼" - 28 Male	3627K85	5.42	7.34	7.80

Scrapers

Remove light to medium deposits in carbon steel, stainless steel, copper, and brass tubes.

For Tube ID	Thread Size	Scraper Lg.	O'all Lg.		
½" - 9/16"	¼" - 28 Male	3 1/16"	4½"	3627K44	$22.64
⅝" - 1"	¼" - 28 Male	3 7/16"	4⅞"	3627K45	22.64

Hydrostatic Test Pumps

Bench Mount

Freestanding

Bench Top

Channel Mounted

Lift and lower the jack-style handle on these pumps to generate the pressure needed for testing fluid pressure in valves, hose, sprinkler lines, pipes, boilers, condensers, heat exchangers, pressure vessels, and other pumps. Perform pressure tests with water, unless otherwise stated.

Bench Mount—Has 7/16" dia. mounting holes to anchor pump to your bench.

Freestanding—No water connection is needed with these pumps. They have a reservoir that stores fluid for testing. Both have a pressure gauge. 9108T2 reservoir holds 1.2 gallons of fluid; 9108T3 reservoir holds 3.2 gallons. Pumps can be used with water and hydraulic oil.

Bench Top—The baseplate on this pump provides leverage and stability while testing. It comes with a pressure gauge and carrying case.

Channel Mounted—Attached to a channel base for improved leverage, this lightweight pump can be used with water and hydraulic oil. Stroke length is adjustable.

Electric Hydrostatic Test Pumps

Freestanding

Frame Mount

To test pressure quickly, let a motor do the pumping. These electric pumps are for pressure tests with water and include a pressure gauge, pressure-regulator bypass, ball valve, and unloader valve. The totally enclosed fan cooled (TEFC) motor is capacitor start and operates on 120 volts AC. Pumps include a power cord with three-prong plug.

Freestanding—Compact, lightweight, and designed for convenient transportation.

Frame Mount—Protected by a metal cage with rubber feet. Pump includes a 10-ft. hose for high-pressure applications.

	Max. psi Generated	hp	Amps	Overall Size Lg.	Wd.	Ht.	Water Connection Size Inlet (Female)	Outlet (Male)	Max. Flow, gpm	Body Material

Air-Powered Hydrostatic Test Pumps

These pumps come with a regulator that shuts off the pump when the desired air pressure is met and restarts it when the pressure drops. Designed for use with water and hydraulic oil, they have two pressure gauges and a 3/8 NPT female air inlet. Pumps operate on up to 100 psi of air pressure, except 10,000 psi models operate on up to 82 psi. Body is stainless steel; frames are metal.

Bench-top pumps have removable roll bars.

Optional connection hoses have a 3/8 male NPT connection; they also come with a 3/8 NPT quick-disconnect set. Hose for 4,800 max. psi has a temperature range of –40° to 212°F; hose for 10,000 max. psi has a temperature range of –40° to 120°F.

Twist-to-Connect High-Pressure Test Fittings

Tighten these threaded fittings with your hands for a secure connection in testing, filling, flushing, venting, and plugging applications—no tools, tape, or sealant required. Air, gas, or hydraulic pressure pushes the seal against the threads, making them excellent for vacuum and pressure testing of hydraulic and air-powered systems. They have a stainless steel body and polyurethane seals, so fittings are compatible with most petroleum-based fluids. Temperature range is –65° to 212°F.

Connectors have a bypass that allows you to add media.

Cleanout Plugs

Close off your drain cleanout pipe with these threaded plugs. They fit NPT threaded cleanout fittings, except 9359T29 fits UNC threaded fittings.

Note: If you do not know your pipe size, measure the OD of your existing cleanout plug or the ID of your cleanout fitting and match to the value listed below.

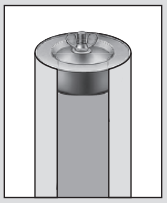
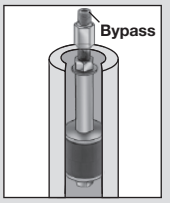
Expansion Plugs

About Expansion Plugs

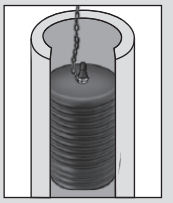
Test your systems for leaks by inserting an expansion plug into a pipe or tube for a tight seal before applying pressure.



Standard (End-of-Pipe Use)



For Inside-Pipe Use (Shown with Bypass)



Inflatable

Most expansion plugs have a top and bottom plate that, when tightened, squeeze against an expanding center ring to create a seal against the inside of the pipe. They work best with perfectly round pipes.

Standard plugs are designed to cap and seal pipes at the opening.

Plugs **for inside-pipe use** create a seal deeper within the pipe.

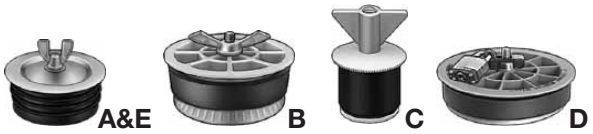
Inflatable plugs compensate for pipe that is not perfectly round. Fill the plug with air or water to create a secure, inside-pipe seal up to 24″ in diameter.

Plugs **with bypass** have an access tube that allows you to add media and relieve back pressure in the pipeline.

If you do not know your pipe size, select a plug based on the actual pipe or tube ID. For information about pipe size, please see pages 2-3.

Maximum back pressure is the amount of pressure a plug can withstand without moving. *Water, feet of head* refers to the pressure resulting from the height of the water above the plug.

Wing Nut Expansion Plugs



Twist the wing nut on these plugs to expand the seal and close off pipes.

(A-C) Zinc-plated steel and **plastic** plugs have a rubber seal.

(D) Lockable plastic plugs have a nitrile seal and a 5⁄16″ max. shackle diameter.

(E) Stainless steel plugs have a neoprene seal, unless noted.

Expansion Plugs with Bypass

Use the bypass tube on these plugs to add air, water, and other fluid in your pipeline or to relieve pressure while testing. Seals are rubber, except stainless steel seals are neoprene.

(A-C) Aluminum, steel, and **cast iron** plugs come with a metal bypass cap. *Style C* is not rated for air pressure.

(D) Plastic plugs come with a nylon bypass cap.

(E) Stainless steel plugs have a vented, barbed bypass tube connection that accepts tubing for attaching your air supply.

For information about expansion plugs, see page 2062.

Expansion Plugs with Bypass for Inside-Pipe Use

Plug your pipe from the inside. Insert these expansion plugs deep into your pipe, and then tighten the nut on the stem. Use the 1/8 NPT male bypass tube to add air, water, and fluid or relieve back pressure. Temperature range is –20° to 225° F.

For Pipe Size	For Actual Pipe ID Min.	Max.	Maximum Back Pressure Air, psi	Water, ft. of head	Overall Ht.

Hand Pumps for Air-Inflatable Plugs

Fill your air-inflatable plugs with this lightweight hand pump. It's rated to 160 psi and comes with a 2″ dia. pressure gauge, 26″ long rubber hose, and quick-disconnect coupling that fits Schrader and Presta valves.

Extension hoses are rubber and come with a tire thread inflation valve.

20-ft. extension hose has hooks for a secure connection to plugs with eyebolts.

Hand Pump

Extension Hose

Hand Pump	61505A22	$32.40
3-ft. Extension Hose	61505A23	16.17
5-ft. Extension Hose	61505A24	22.76
10-ft. Extension Hose	61505A25	29.33
20-ft. Extension Hose with Hooks	61505A31	151.56

Air-Inflatable Plugs

Conform to wide and out-of-round pipes with these inflatable rubber plugs. Also known as pneumatic plugs, they're designed for temporary seals since they can lose pressure over time. Inflate with a hand pump (sold separately above); an air compressor may overinflate the plug and cause damage. They come with zinc-plated steel hardware for retrieval. Temperature range is –20° to 125° F.

Air- and Water-Inflatable Plugs

Penetrate tight pipe junctures with the most flexible expansion plugs we offer. Made of rubber, they have brass fittings and a tire thread inflation valve. Temperature range is 32° to 95° F.

To inflate with air, use a hand pump (sold separately above). To inflate with water, attach a water supply hose to the 3/4 GHT connection. Whether you fill with air or water, a pressure relief valve will prevent overexpanding.

Plugs—These come with a strap handle, except plugs *for pipe size 10 to 24* have a ring to attach your own retrieval rope or chain. Plugs *for pipe size 10 to 24* have an air gauge and 4-ft. hose.

Plugs for Y-Joints—These extra-long plugs allow you to seal off two pipes at the same time. They have two separate inflation chambers to release back pressure gradually and prevent splash back as water clears the drain line. They come with a strap handle and 4-ft. hose.

Metal and Plastic Polishes and Cleaners

All-Surface Polishes/Cleaners/Protectants

Clean, polish, and protect aluminum, brass, copper, chrome, stainless steel, fiberglass, and acrylic with these polishes. They remove oxidation, tarnish, and surface rust without scratching or dulling.

Solvent-based creams not for use on painted surfaces.

Solvent-Based Creams		
4-oz. Tube	70995T7	$7.59
1.15-lb. Can	70995T9	32.41
Water-Based Paste		
16-oz. Can	7398T24	22.82

Metal Polishing/Cleaning Wipes

Avoid messy polishing creams and liquids with these moistened wipes. Nonscratching and solvent based, these wipes clean and polish aluminum, brass, copper, chrome, bronze, silver, stainless steel, and acrylic. Wipes measure 8″×11″.

		1-11	12-Up
Wipes (18/Pkg.)	6852T1	$11.83	$10.57

Metal Polish Wadding

Treated cotton wadding cloth is solvent based, nonscratching, and cleans and shines all metals. Comes in a 5-oz. can.

63325T42	1-11	$6.69	12-Up	$6.00

Aluminum Brightener/Cleaner

Quickly brighten and clean dull aluminum finishes with this foaming, water-based product. Good for any acid-resistant surface. Product can be sprayed or mopped and requires no scrubbing. Comes in a 1-gal. container.

7986T1	1-3	$22.76	4-Up	$20.32

Vinyl, Leather, and Rubber Protectant

This silicone-based protectant prevents UV damage and cracking, repels dirt and grime, restores, and provides long-term protection for vinyl, leather, and rubber. Comes in 32-oz. trigger spray bottle.

6531T2	1-11	$10.82	12-Up	$9.70

Stainless Steel Polishes/Cleaners

Citrus-based polish/cleaner contains d-limonene to preserve the high luster of stainless steel. It forms a finish that resists dirt, oil, and water spots. Water based.

Foaming polish/cleaner clings to vertical surfaces for maximum penetration and is water based.

Polishing wipes clean, polish, and brighten. They also prevent water marks and corrosion. Wipes are solvent based, supplied in a center-pull dispenser, and measure 9¾″×10½″.

Heavy duty cleaners fully restore the corrosion resistance of stainless steel. Powerful, acid-based products remove rust, stains, slag, scale, and tarnish.

Sterile clean room polish/cleaner is for use in Class 100 clean rooms and leaves a residue-free finish.

32-oz. Glaze	95805T32	49.62	44.37
32-oz. Liquid Wax	95805T51	28.32	25.33

Floor Strippers, Finishes, and Cleaners

For use on hard, nonporous surfaces, unless otherwise indicated.

Floor Finish Stripper

Quickly strip multiple layers of acrylic and urethane floor finish. Formula is water based.

1 gal.	7093T22	$15.01
5 gal.	7093T26	62.61

Baseboard Stripper

Clings to baseboards and wall tile to remove soil and wax buildup. Stripper is water based and does not leave a residue. Not for use on painted surfaces. Comes in 16-oz. (net wt.) aerosol can.

32975K9	1-11	$5.43	12-Up	$4.98

Acrylic Floor Finish and Finish/Sealer

These tough finishes have excellent detergent resistance. They are water based and dry to a clear, hard, high gloss film. Recommended for vinyl, linoleum, terrazzo, and sealed wood surfaces. Coverage is up to 2,000 sq. ft. per gallon.

Finish/sealer provides one-step finishing and sealing. It can be used on concrete and dries to a slightly thicker coating.

	Finish		***Finish/Sealer***	
1 gal.	7108T11	$25.51	7108T21	$25.00

1 gal.	6625T501	$12.60	4	$45.36
5 gal.	6625T7	42.14	—	—

Buffing Spray

Remove scuffs and restore your floor's high gloss acrylic finish with this water-based buffing spray. Can also be used with high-speed equipment such as burnishers.

32-oz. Trigger Spray	3704T71	$5.52
1 gal.	3704T72	15.68

Floor Mastic/Adhesive Remover

This soybean-based adhesive remover is safe, easy to use, and virtually odorless. Remover evaporates slowly, allowing it to work for up to 24 hours. Coverage is up to 200 sq. ft. per gallon.

32 oz.	7663T11	$16.75
1 gal.	7663T2	43.14

Adhesive and Silicone Removers

Removers are solvent based, except silicone remover, which is water based. These products are compliant under all state VOC rules in effect on October 1, 2009.

Adhesive, Tape, and Gum Remover—Works on oil-based residue on all hard surfaces, painted surfaces, vinyl, carpet, and fabric.

Citrus-Based Adhesive, Label, and Gum Remover—Utilizes the power of citrus to remove stickers, labels, tape residue, and gum from metal, plastic, cement, and wood. Also known as Goo Gone, it even works on carpets, upholstery, and painted surfaces. For oil- and solvent-based residue.

Silicone Remover—Removes silicone, foam sealants, caulk, wet or dry latex-based foams, and construction adhesives. Safe for use on plastics, fiberglass, and most metals.

4¼″×7″×1½″	6	7309T3	10.50	9.44

Lint-Free Sponge

This completely lint-free sponge can hold up to 10 times more liquid than standard sponges. It resists mildew, grease, oil, detergents, and most solvents. Color is white. Each sponge is individually wrapped.

Size		Each 1-5	Each 6-Up
3″×6¾″×1⅜″	7271T32	$10.53	$9.45

Natural Sponges

Nature's original sponge has excellent water absorption. Sponges are sized when wet. Color is tan.

Approx. Dia.		Each 1-11	Each 12-Up
7″	7362T16	$15.14	$13.49
8″	7362T15	20.14	17.95
9″	7362T14	24.05	21.45

Eraser Sponge

No need for special cleaners—just add water and these sponges are ready to remove ground-in dirt from walls, doors, floors, and more. Clean with simple rubbing action. Sponges are reusable; rinse after each use and let air dry. Color is white.

Size	Sponges/ Pkg.		Pkg. 1-6	Pkg. 7-Up
2⅜″×4 11/16″×1″	6	9361T11	$7.32	$6.57

Scratch-Free Scouring Block

Aggressive cleaning without scratching, this scouring block is made of a chemical-resistant foam block with a 10″ long wood handle. Color is yellow.

Size		Each 1-23	Each 24-Up
2″×3″×4″	7278T11	$3.23	$2.94

Mesh Scrubbing and Scouring Sponge

Covered in durable mesh, this foam sponge scrubs and scours without scratching. Mesh is white and sponge is blue.

Size	Sponges/ Pkg.		Pkg. 1-5	Pkg. 6-Up
5½″×3¼″×1″	6	73055T25	$7.71	$6.92

Scouring Sponges

Double Faced

Combine the aggressive cleaning action of a scouring pad with the absorbency of a sponge.

Single-faced sponges consist of a scouring pad on one side and a sponge on the other. *Light-abrasion* sponges have a yellow, nonscratching pad with a beige sponge. *Medium-abrasion* sponges have a white pad with a yellow sponge. *Heavy-abrasion* sponges have a green pad with a yellow sponge.

Double-faced sponge has a yellow foam sponge between a light-abrasive, nonscratching, white scouring pad on one side and a heavy-abrasive, green pad on the other.

Scrub Brushes with Long-Reach Handles

Standard

Also known as deck brushes, these are our most economical long-handled scrub brushes. Brushes have one tapered handle hole and one threaded hole. They are 2 7/8" x 10" and include a 60" tapered wood handle, except the durable natural-bristles brush is 2 1/2" x 10" and includes a 60" threaded wood handle. All have approximately 2" long bristles. Bristles are stiff. Block is wood.

Durable Natural Bristles	7199T75	$16.22
Chemical- and Temperature-Resistant Natural Bristles	7199T74	15.95
Chemical-Resistant Plastic Bristles	7199T76	15.45

Multi Angle

With Squeegee

The only brush you need to scrub floors and clean under counters and equipment. Bristles remain on the floor whether you're standing or bending. Both come with a plastic block, chemical-resistant plastic bristles, and a 60" threaded wood handle.

Corner

Cone-shaped bristles make this brush ideal for reaching into corners and crevices. It has chemical-resistant plastic bristles and a 60" wood handle (with threaded metal tip). Length without handle is 12"; block is plastic.

Brush Dia.	Bristle Lg.	Bristle Firmness		
2 1/4"	1 1/2"	Soft	72215T21	$17.86

Heavy Duty Swivel Block

Tackle any tough cleaning job with this scrub brush. Bristles are highly durable plastic enhanced with abrasive grit for aggressive cleaning. Block is plastic and swivels 360°. Comes with a 60" threaded wood handle.

Brush Size	Bristle Lg.	Bristle Firmness		
3 3/4" x 8"	3/4"	Stiff	7426T59	$47.22

Choose-a-Color with Swivel Head

With a round brush face and 180° swivel head, this brush hugs curved surfaces. It has chemical- and temperature-resistant plastic bristles and a 42" fiberglass handle. Block material is plastic.

To Order: Please specify bristle color: blue, green, red, white, or yellow.

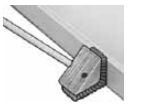
Brush Size	Bristle Lg.	Bristle Firmness		
7 1/2" Dia.	2"	Medium	6706T81	$43.34

Floor Drain

Scrub the gunk out of floor drains and mop sinks. Brush has nonabsorbent, chemical-resistant plastic bristles for deep cleaning action. Also has a 36" plastic handle imprinted with the words "Use for floor drain only."

Brush Size	Bristle Firmness		
4" Dia. x 5 3/4" Lg.	Stiff	70375T5	$27.68

Baseboard



Triangular block keeps bristles snug against baseboards for thorough cleaning. The stiff, chemical-resistant, plastic bristles are set in a 3" Wd. x 4 1/2" Ht. wood block that has two threaded handle holes. Bristle length is 1". Includes a 54" threaded wood handle.

74435T21 ... $38.48

Hygienic Scrub Brushes with Long-Reach Handles

General Purpose

Also known as deck brushes, these brushes are made from FDA-compliant materials and include a 51" fiberglass handle. Bristles are chemical- and temperature-resistant plastic; block is plastic. Color is white.

Swivel block has angled bristles for easy cleaning in hard-to-reach areas.

Block Style	Brush Size	Bristle Lg.	Bristle Firmness		
Fixed	2 1/2" x 11"	1"	Stiff	71135T51	$51.74
Swivel	3" x 8"	1 1/2"	Soft	71135T61	79.69
Replacement Handle				71135T91	26.69

Choose-a-Color

Assign a different color brush to each task to prevent cross-contamination. Brushes have matching block, bristles, and handle color. All bristles are medium firm and made of chemical- and temperature-resistant plastic. Block is plastic. Both include a 51" fiberglass handle. **To Order:** Please specify color: blue, green, red, white, or yellow.

Multi angle allows bristles to remain on the floor whether you're standing or bending.

Window- and Vehicle-Washing Scrub Brushes

These soft-bristle brushes are durable enough to remove dirt and grime, yet gentle enough so they won't scratch most surfaces.

Soft Scrub Brushes

Plastic Bristles— Bristles are soft plastic to provide a soft washing surface. Block is plastic and has one threaded handle hole.

Natural Bristles— Good for highly polished surfaces. Bristles are chemical and temperature resistant. Hardwood brush block has a wrap-around bumper to protect surfaces and two handle holes: one tapered and one threaded.

Bristle Material	Brush Size	Bristle Lg.	Handle Lg.		1-11	12-Up

Plastic	2 1/2" x 10"	2 1/2"	60"	7452T34	25.08	22.45
Natural	2 7/8" x 12"	2 1/2"	54"	7452T35	30.94	27.70

Flow-Through Fountain Brushes

Telescoping Handle

Water flows through these brushes for one-step scrubbing and washdown. All have a 3/4" female garden hose (GHT) connection, a plastic block, an aluminum handle, and a bumper guard on the block to protect surfaces.

Telescoping Handle— Bristles are natural and resist chemicals and temperatures.

Telescoping Handle with Flow Control Valve— You can use the flow control valve to vary or shut off water flow. Bristles are soft plastic to provide a soft washing surface. Handle has a foam covering.

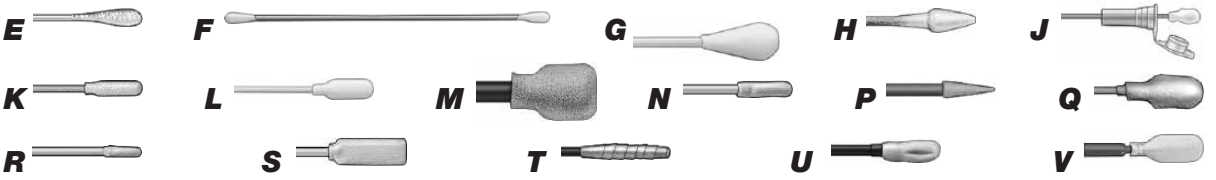
Swabs



Cotton—Offer excellent absorption. *Low-lint* swabs resist tearing. *Sterile with protective cap* allows you to protect collected samples.

Polyurethane Foam—Shred and lint resistant. *Antistatic* swabs dissipate static electricity. *Clean room* swabs are adhesive and lint free and are suitable for Class 1000 clean rooms. They have excellent particle entrapment and the best solvent-holding ability of any swab.

Polyurethane Foam Over Cotton—Combine the strengths of cotton and polyurethane foam. *Chemical-resistant* swabs withstand most cleaning chemicals and solutions.

Polyester—Generate less lint than cotton or foam swabs, making them perfect for sensitive equipment. All are soft, nonscratching, and have excellent chemical resistance. *Clean room* swabs are our cleanest swabs. They are adhesive and lint free and are suitable for use in Class 100 clean rooms.

Microfiber—Offer effective particle entrapment and are chemical resistant.

Rayon—Highly absorbent and lint free.

Roll Dispenser

Easily store and unroll just the amount of wipes you need—works with all the wipe rolls we carry. Dispenser measures 33″ Ht.×16¾″ Wd.×18½″ Dp. and is made of steel. Color is black.

9852T12 ..... $39.38

Roll not Included

Chamois

Dry, polish, and clean without streaking or smearing.

Natural—Made of oil-tanned sheepskin. Sizes are approximate. Color is tan.

Synthetic—This nylon-reinforced cloth outlasts natural chamois, yet absorbs just as well. Color is yellow.

Size			
Natural	3 sq. ft.	7359T12	$15.70
Natural	4½ sq. ft.	7359T16	23.40
Synthetic	27″×17″	7286T1	10.10

Heavy Duty Wipes

All are low linting.

General Purpose

An economical alternative to cloth, these paper-based wipes are as strong and durable as cloth, plus soft as tissue. They resist solvents and are nonscratching. They can be washed up to five times. Color is blue. *Roll* is perforated.

Pop-Up Box *Bucket*

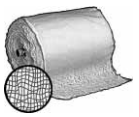
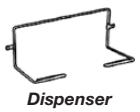
Cheesecloth



Cheesecloth



Dispenser

Loosely woven from 100% purified cotton, this silicone-free cloth is low linting and won't scratch.

Sheet rolls are individual sheets rolled together.

Unbleached—Perfect for cleaning up particles, this three-ply, off-white cloth is woven to be softer, less abrasive, and lower linting than bleached cloth.

Bleached—Four-ply weave means there's more cloth for better straining, filtering, and polishing than unbleached cloth. Color is white.

Dispenser—Mount to wall or bench for easy dispensing of sheet rolls. Made of steel with a white finish and is 11⅜″ Wd.×6½″ Dp.×5″ Ht. Has two ⅛″ dia. mounting holes (mounting fasteners not included).

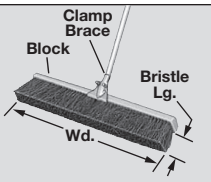
Towel Wringer

Easily squeeze liquid out of towels, rags, and wipes with this zinc-plated steel wringer. Rollers have a rubber coating and adjust to open up to ½″. Mounts on a 25- to 55-gal. drum and includes a drainboard to direct liquid into your container. Overall size (excluding handle and top adjustment pressure screw) is 11¼″ Ht.×14⅜″ Wd. Handle length is 10½″.

7135T16 ..... $154.41

About Brooms



Smooth-surface brooms sweep away fine to medium dust and dirt on nonporous surfaces such as tile, wood, linoleum, and smooth concrete.

Semi-smooth-surface brooms handle heavier debris on surfaces such as sidewalks and driveways.

Rough-surface brooms move heavy, wet, and hard-to-move debris on asphalt and rough concrete such as street pavement.

Push Brooms

All brooms include a 60″ long handle. Those 24″ and wider include a clamp-style brace for handle support, unless noted.

Smooth-Surface Push Brooms

Brooms have a threaded handle.

Plastic Bristles—Come in two styles. *Standard* have a wood handle, wood block, and blue bristles. *Chemical-resistant* have a black, plastic-coated steel handle with an aluminum tip, plastic block, and gray bristles.

Horsehair Bristles—All bristles are soft for fine sweeping. They have a wood handle, wood block, and black bristles.

Semi-Smooth-Surface Push Brooms

Brooms have a threaded wood handle, a wood block, and black bristles.

Natural Bristles—Resist solvents and heat.

Blended Bristles—All are made of blended soft horsehair and plastic bristles. The 14″ through 24″ wide brooms also have a natural bristle center to dislodge heavier dirt.

Rough-Surface Push Brooms

All have a wood handle and a wood block.

Natural Bristles—Color is reddish brown.

Plastic Bristles—Resist solvents, acids, and chemicals. *Standard bristles* are blue. *Long bristles* are black.

Brooms *with standard bristles*, also known as garage brooms, sweep heavy soils and debris. All have a threaded handle.

Brooms *with long bristles* are also known as street brooms. These stand up to the heaviest debris and move large, bulky trash. Handle is tapered.

Broom *with heavy duty long bristles* is the same as the long-bristled brooms above, except it has stiffer and thicker bristles.

Heavy Duty Brooms

Broom

Scraper

Strong and secure—bristles are housed in a steel cap and held with a wire band, making these brooms ideal for sweeping heavy debris. Bristles are plastic and resist most acids, oil, and chemicals. Handle is wood, 39½″ long, and has a protective steel sleeve at its base.

Broom with scraper, also known as a railroad track broom, has a steel scraper on one end for removing snow, ice, and caked-on debris.

Steel-Wire Push Broom

Our best broom for dislodging heavy accumulations on rough, irregular surfaces such as concrete, stone, and brick. Broom has a tapered wood handle, a wood block with one handle hole, and flat steel wire bristles.

Broom Wd.	Bristle Lg.	Handle Lg.		
16″	5″	60″	7156T73	$51.37

Angle Brooms

Dual Angle

Extra Wide

Choose-a-Color

Perfect for accessing corners. All handles are threaded.

Dual Angle— Both brooms have two threaded holes in the block that let you select the best sweeping angle for your job. Block is black plastic. All bristles are plastic and resist acids, solvents, and chemicals. *Smooth-surface* bristles are designed for fine sweeping. Handles are black; bristles are blue. *Semi-smooth-surface* handles and bristles are black.

Extra Wide— Our widest angle broom. Handle is red steel. Block is black plastic. Bristles are black chemical-resistant plastic and are designed for fine sweeping. Can also be used on semi-smooth surfaces.

Choose-a-Color with Hygienic Block— Assign specific bristle colors to different tasks and areas. Bristles are fused to the white block, giving contaminants nowhere to hide. Block and bristles are made of chemical-resistant plastic, and they won't absorb liquids or odors. They are also unaffected by detergents and solvents.

Choose an economical wood handle or a white, hygienic, telescoping, fiberglass handle.

To Order: Please specify bristle color: blue, red, or white.

Sweeping Compounds

Sprinkle these dust-absorbing compounds over floors before sweeping.

Oil Based— Contains wood fiber with oil and sand. Use on wood, concrete, and metal floors. Color is red.

Water Based— Contains wood fiber with water and sand. Use on unfinished concrete and wood floors. Color is tan.

Wax Based— Contains wood fiber and wax. Use on resilient floors such as rubber and cork tile, as well as on fine finishes such as linoleum and waxed floors. Color is red.

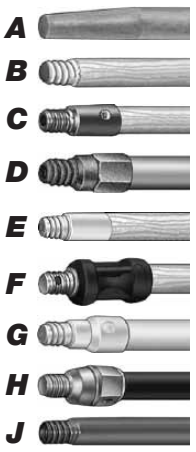
Handles



(C) Wood with Metal Tip— Tip is cast zinc to strengthen threads.

(D) Wood with Abrasive-Coated Metal Tip— Tip is coated with aluminum oxide to lock handle tightly into your broom's block.

(E) Wood with Metal Tip and Foam Grip— Tip is cast zinc to strengthen threads while the foam grip adds comfort.

(F) Wood with Flexible Metal Tip— An adapter between the aluminum tip and handle flexes when an object is struck to prevent handle from breaking.

(G) Fiberglass with Flexible Plastic Tip— Tip is plastic and absorbs shock to extend the life of the handle. Handle is white.

(H) Plastic-Coated Steel— Tip is die cast aluminum. Handle is black.

(J) Steel— This is our strongest handle. Handle is green.

Handle Adapters

Threaded-to-Tapered

Aluminum Threaded

Nylon Threaded

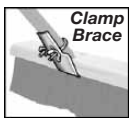
Don't waste your money on a new handle—convert or replace your handle tips.

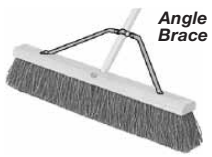
Threaded-to-Tapered Tip— Convert your threaded handle to a tapered handle by screwing on this tip.

Threaded Tips— Convert tapered handles to threaded handles or replace damaged threads by sawing off the old tip and attaching a converter. Use on any 15/16″ dia. handle. *Aluminum* model clamps tight with screw (included). *Nylon* model has internal ribs that grip the handle.

Adapter Style	Material		1-11	12-Up
Threaded-to-Tapered Tip	Black Plastic	7555T76	$3.97	$3.53
Threaded Tip	Aluminum	7555T77	4.88	4.33
Threaded Tip	White Nylon	7555T78	2.84	2.53

Handle Braces





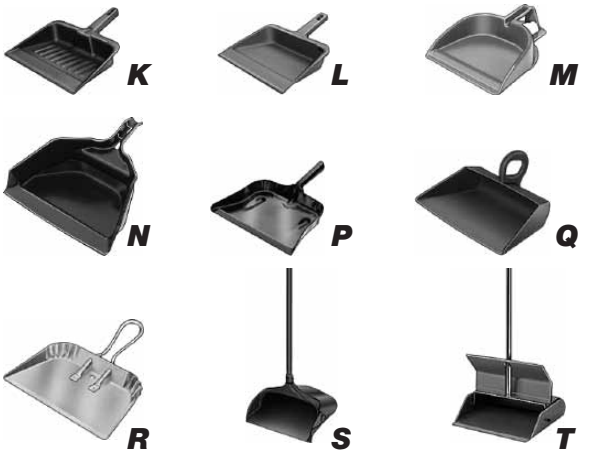
Strengthen your push broom handles and prevent damage with these braces.

Clamp Brace— Brace is aluminum and locks the handle to the block with the included U-bolt. Works with all blocks.

Angle Brace— Brace is made of steel and has legs that screw onto the block and clamp around the handle for extra stability and durability (mounting hardware included). Center-to-center leg spread is 16 1/4″.

		1-11	12-Up
Clamp Brace	7182T8	$4.34	$3.76
Angle Brace	7182T9	4.54	4.03

Dust Pans



(K) Economy Plastic— Handle has a hole for hanging. Color is black.

(L) Choose-a-Color Hygienic— Avoid cross-contamination by using different colored dust pans for specific areas. Handle has a hole for hanging. **To Order:** Please specify color: blue, red, or white.

(M) Foot Controlled— Step on the convenient foothold to keep this dust pan in place without bending over. For easy storage, pan snaps onto a 7/8″ or 15/16″ dia. broom handle. Color is blue.

(N) Large Capacity— Our largest plastic dust pan scoops up all the dirt you can push its way. Color is black.

(P) Economy Steel— Handle has a hole for hanging. Color is black.

(Q) Wet and Dry— Thin, tapered edge forms a seal to pick up anything from liquids to sawdust. Includes a hoop for hanging and has a painted, corrosion-resistant finish.

(R) Big Grip— Pan is lightweight, corrosion resistant, and has a large looped handle.

(S) No Spill— To prevent spills, enclosed pan snaps into upright position when lifted. Rear wheels won't scratch floors. Color is black.

(T) Self Closing— Lid opens automatically when you place these pans on the floor and shuts when lifted. *Steel* pan has a tan finish.

Dust Mops

Keep your floors sparkling with these dust- and dirt-removing mops. Backing is tightly secured to the frame with two or more tie straps, yet still allows for easy mop changes.

Cotton Mop Heads— The industry standard and our most economical. Color is off-white. *Washable refills* are 4-ply cotton with excellent dust retention and will withstand multiple launderings. *Disposable refills* are cotton with a dust mop treatment that stops dust and debris from scattering during shakeout.

Nylon Mop Heads— Act as a dust magnet, picking up and holding dust without using a dust mop treatment. Nylon is extremely durable and won't lint or fray, even after multiple launderings. Color is blue.

Complete Mops— Include a steel frame, a 54″ long swivel wood handle, and a washable mop head. Mops with 48″, 60″, and 72″ wide frames have brace bars for added strength.

Also Available: Replacement mop frames. Please ask for 7305T65 and specify depth (3¼″ or 5″) and width (18″ to 72″ in sizes below).

Wet Mops

About Wet Mops

***Ply*—**The number of yarn threads twisted together to make a single strand in a mop head. The greater the ply, the more durable the mop.

***Weight*—**Sometimes referred to as a mop's size, this is the actual weight of the dry mop head. The heavier the mop head, the more liquid it can hold.

***Headband*—**Located at the top of the mop head, this strip of fabric holds the mop strands together and is used to attach the mop head to the handle.

***Tailband*—**Located at the bottom of the mop head, this strip of fabric secures the mop head strands to prevent them from tangling and allows the strands to lay flat for wide, even mop coverage.

Wet Mop Heads

The economical choice for wet-mop heads. They can't be laundered; just toss them out when worn.

Cotton Cut-End Mop Heads

Our most popular cut-end mop heads, these are off-white and offer good absorption. Headband is 1¼″ deep. Handle sold separately; see styles A-C on page 2085.

♦ Prices are approximately 10% lower when you purchase 12 or more.

Washable Wet Mop Heads

All mop heads have a tailband and come with looped ends—no cut ends to fray or unravel. They are lower linting than cut-end mop heads and can be laundered and reused.

Choose-a-Color Cotton-Blend Mop Heads

Assign different colored mops to different areas to eliminate cross contamination. Made of a 4-ply blend of cotton and synthetic material for durability. They have a 5″ deep headband. Handle sold separately; see style D on page 2085. **To Order:** Where necessary, please specify color: blue or green.

Wet-Mop Handles

(A) Spring Head with Clamp—Lift the easy-opening spring latch, insert the mop head, and snap the latch down.
(B) Swing-Away Bar—Loosen the nut, swing the bar away, insert the mop head, swing the bar back into place, and retighten the nut.
(C) Adjustable Bar—Loosen the nut, slide the center bar up, insert mop head between the bar and the handle end, and retighten the nut.
(D) Clamp Jaw—Plastic jaws clamp down on wide headbands for a secure hold. Turn the adjustment sleeve to loosen the jaws, insert the mop's headband between the jaws, and retighten the sleeve.
(E) Snap Bar—Unhook the bar, insert the mop head, then swing the bar back and snap it in place.

Plastic Mop Buckets and Wringers

Bucket/Wringer Combinations and ***Buckets—***All buckets have a handle, pour spout, measuring graduations, a universal "Caution" warning on the outside wall, and casters with nonmarring wheels. **To Order:** Where necessary, please specify color: blue or yellow.
Easy-empty styles let you drain water from the bottom of the bucket. The 35-qt. bucket has a self-draining spigot and a sediment screen to trap dirt. The 44-qt. bucket has a foot-operated lever.
Wringers—*Sideward-pressure wringer* has a side-mounted handle that moves an inner wringer plate forward against the wet mop. *Downward-pressure wringer* has an off-center-mounted handle that moves two wringer plates downward against the mop to squeeze out more water than the sideward-pressure wringer. **To Order:** Please specify color with capacity: blue (26 or 35 qt.) or yellow (26, 35, or 44 qt.).

35-qt. Standard Bucket/Wringer Combination *44-qt. Easy-Empty Bucket/Wringer Combination* *Sideward-Pressure Wringer* *Downward-Pressure Wringer*

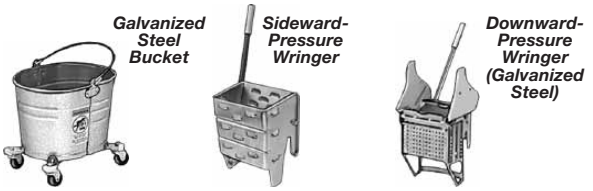
Galvanized Steel and Stainless Steel Mop Buckets and Wringers

The heavy duty favorites. *Galvanized steel* models resist corrosion, while *stainless steel* models provide maximum corrosion resistance.
Buckets—All have a handle, measuring graduations, and casters.
Wringers—*Sideward-pressure wringer* has a side-mounted handle that moves an inner wringer plate forward to wring out the mop. *Downward-pressure wringers* have a center-mounted handle that moves two inner wringer plates downward to wring out more water than sideward-pressure wringers. Use *galvanized steel wringers* with galvanized steel buckets, and use the *stainless steel wringer* with the stainless steel bucket.



Galvanized Steel Bucket *Sideward-Pressure Wringer* *Downward-Pressure Wringer (Galvanized Steel)*

Buckets

Material	Cap., qt.	Inside Size, Wd. × Lg. × Ht.		
Galvanized Steel	26	12″ × 16 1/2″ × 10 3/4″	**7306T16**	$101.64
Galvanized Steel	35	12″ × 17 1/2″ × 14″	**7306T17**	121.90

Downward	Stainless Steel	16-24 oz.	**3622T72**	321.50

Self-Wringing Sponge Mops

Simply pull on the lever handle to squeeze out excess dirt and water from the mop head.

Polyurethane Sponge Mops—Good resistance to cleaning solutions. Sponge remains soft whether wet or dry. A single wringer on each side of the mop head forces out water. Mops with stainless steel handles are autoclavable.

PVA (Polyvinyl Alcohol) Sponge Mops—Both are lint free, highly absorbent, and have high chemical resistance. Soft when wet, but hard when dry. Two wringers on each side of the mop head squeeze out more water than polyurethane sponge mops.

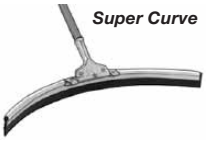
Spark-Resistant Floor Squeegees

Straight



Super Curve

Spark-resistant aluminum frames allow you to safely move volatile liquids. Blades are black and resist oil, gasoline, and most chemicals. All come with a 60″ long tapered wood handle.

Squeegees ***with straight blade*** have a single-ply, neoprene blade.

Squeegee ***with super-curve blade*** has a rubber blade. Curved blade collects more liquid within the width of the blade, and the handle flips for pushing or pulling.

Combination Sweeper/Squeegee

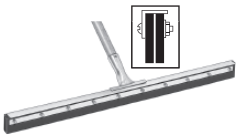
Made of one-piece molded rubber, this sweeper/squeegee is 12″ wide and has 1″ long bristles. Blade and bristles are blue. Includes a 48″ long steel handle.

Sweeper/Squeegee 8814T5 $18.11

Fast-Dry Floor Squeegees

Blades are double foam-rubber, making them ideal for uneven surfaces and for moving more liquid so floors dry quickly. All blades are black, unless otherwise indicated. Neoprene resists oil, grease, and chemicals.

Standard



All have a galvanized steel frame. Choose a 60″ long tapered wood handle or 54″ long aluminum handle.
Rubber with neoprene blade is red.

Replacement Handle	7505T13	28.00	

Window Squeegees

Use these metal-frame squeegees alone or with tapered handles (sold separately on this page).

Steel Frame— Have double-ply blades (one flexible blade that stays in constant contact with the surface and one cushion blade for support). Frame is zinc-plated steel. Squeegees ***with standard blade*** have two red rubber blades. Squeegees ***with chemical-resistant blade*** resist ink, oils, coolants, and most solvents. The wiping blade is neoprene and is supported by a cushioned vinyl blade. Both blades are white.

Stainless Steel Frame— Blade is single ply and made of flexible black rubber. Frame is corrosion-resistant stainless steel. *Replacement blades* include a stainless steel channel.

Food-Grade Window Squeegees

Debris can't hide in these hygienic, channel-free squeegees. All blades are tapered.

Squeegees without handle are low-profile, lightweight, nonscratching, and dishwasher safe. Blade is single-ply, white PVC. Gripping portion is blue, 1¼″ high, and plastic.

Choose-a-color squeegee with handle helps avoid cross contamination between areas. Blade is single-ply rubber and has a splash guard. Handle is 6½″ long and plastic. Blade and handle are the same color. **To Order:** Please specify color: blue, green, red, white, or yellow.

Conformable-Blade Window Squeegee

Wipe irregular and rounded surfaces. This squeegee has a nonscratching, silicone blade. Blade is clear and is 11″ wide.

4137T51 ..... $15.61

Combination Sponge/Squeegee

Clean with the sponge and then wipe dry with the attached squeegee. One side has a sponge with nylon mesh; the other has a soft, black rubber squeegee with a zinc-plated steel frame. Blades are single ply.

Telescoping aluminum handle locks at the desired length.

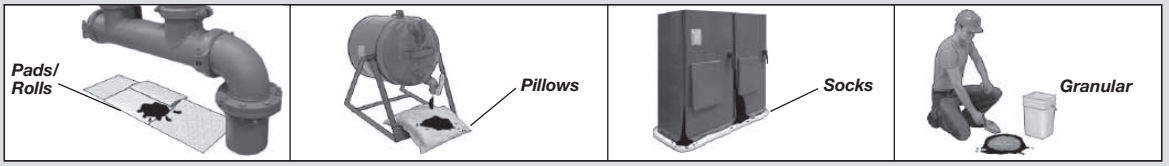
About Sorbents



As their name implies, sorbents absorb spilled liquids and keep them from spreading. Depending on the type of spill, you can choose from two categories of sorbents: oil only and universal.

Oil-only sorbents absorb oils, fuels, and any other petroleum-based product. They repel water, making them effective on both land and water.

Universal sorbents absorb oils, chemicals, coolants, and water. Recommended for land spills only.

Sorbents come in different shapes for different uses.

Pads— Pads absorb small spills and can be used to wipe off equipment.

Rolls— Rolls allow you to choose the amount you need. Some have perforations, while others can be cut to length. Perfect for large floor spills and leaks around equipment.

Pillows— Thicker than pads, pillows soak up more liquid. Ideal for positioning under drips and in corners.

Socks— A narrow diameter and long length let you wrap them around irregular surfaces, corners, and machines.

Granular— Simply pour or sprinkle sorbent onto the spill, work it into the spill with a broom, and let it absorb. Then pick up the soaked sorbent.

Sorbents

Sorbents handle all your general absorption needs. All are polypropylene.

Perforated— Perforations make it easy to tear off what you need. Pads are perforated up the center and rolls are perforated every 12″ and up the center.

Oil-Only Sorbents

Size	Absorption Cap., gal./unit		Each	Pkg. Qty.

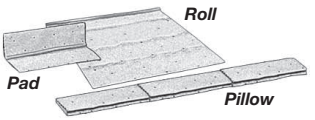
Multi-Shape Polypropylene Sorbents



No need to stock several sorbent sizes—these unfold for use as a pad, roll, or pillow. Sorbents are approximately 5″ Wd. × 50′ Lg. when folded (20″ wide unfolded) and are perforated every 16″. Supplied in a dispenser box.

Color	Absorption Cap., gal.		1-2	3-Up
Oil Only White	10	29595T11	$43.03	$38.55
Oil and Water Only Gray	10	29595T22	44.86	39.88
Universal Yellow	10	29595T33	59.07	53.34

Camouflage Universal Polypropylene Sorbents

The camouflage top layer masks ugly spills and draws moisture to the gray bottom layer. These universal sorbents are durable and abrasion resistant. Pad is perforated up the center, the 15″ Wd. × 150′ Lg. roll is perforated every 12″ and up the center, and the 30″ Wd. × 150′ Lg. roll is perforated every 15″ and up the center.

Specialty Sorbents

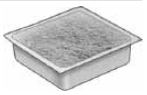
Corn-Cob Universal Sorbent Sock

This extremely flexible, universal sock molds easily around corners and conforms to uneven surfaces to soak up spills. Color is gray.
Note: Not for use with aggressive liquids, such as hydrochloric acid.

Size	Absorption Cap., gal.		1-39	40-Up
3″ Dia. × 42″ Lg.	0.5	7201T11	$2.29	$2.06

Polypropylene Universal Sorbent Drip Pan

Place this sorbent-filled pan under any drip to collect water, oil, coolants, and other nonaggressive liquids. Pan is polyethylene and comes with a cover to prevent liquids from splashing. Color is yellow.



Size	Absorption Cap., gal.		1-11	12-Up
10½″ Lg. × 10½″ Wd. × 3″ Ht.	1	42005T55	$6.83	$6.14

Drum-Top Polypropylene Sorbent Pads

Place on 55-gallon drum tops to eliminate messy leaks and drips. Pads are 22″ dia. and have two perforated bung hole cutouts. ***Oil-only*** pads are white; ***universal*** pads are gray.

	Absorption Cap., gal.		1-24	25-Up
Oil Only	0.3	43955T12	$3.33	$2.90
Universal	0.3	43955T13	3.38	2.97

Spill-Control Sorbent Kits

11-Gallon Absorption-Capacity Kit

Mercury Kit

Everything you need when a spill occurs, even bags for disposal.

5-Gallon Absorption-Capacity Kit

Packed in a plastic bag. Includes:
- (10) 15″ × 19″ pads
- (2) 3″ × 48″ socks
- (1) Pair nitrile gloves
- (1) Disposal bag

Oil Only	71305T12	$37.33
Universal	71305T15	38.83

11-Gallon Absorption-Capacity Kit

Packed in a 20-gallon plastic drum with a resealable lid. *Note:* Not for use with hydrofluoric acid. Includes:
- (5) 15″ × 19″ pads
- (6) 4″ × 48″ socks
- (7) 10″ × 10″ pillows
- (3) Disposable bags
- (2) 1¾-lb. cartons of granular sorbent

Universal	71305T14	$177.31

38-Gallon Absorption-Capacity Kit

Packed in a 55-gallon plastic drum with a resealable lid. Includes:
- (50) 15″ × 19″ pads
- (4) 3″ × 144″ socks
- (8) 18″ × 18″ pillows
- (1) Pair nitrile gloves
- (5) Disposal bags
- (1) Pair goggles
- (1) Emergency response handbook

Oil Only	71305T13	$363.58
Universal	71305T16	378.13

Battery Acid Spill Kit

Packed in a plastic case. Includes:
- (10) 12″ × 12″ pads
- (1) Plastic scoop and scraper
- (1) Pair nitrile gloves
- (1) Disposal bag
- (1) Pair goggles
- (1) 1-oz. solidifier
- (1) Apron
- (2) 1-qt. liquid acid neutralizer
- (1) Trigger sprayer

71305T21	$77.43

Mercury Kit

Prevent toxic vapor contamination by properly cleaning up mercury spills. Packed in a corrugated box. Includes:
- (1) 250 ml cleaning solution
- (1) Mercury aspirator
- (1) 250 ml vapor-reducing spray
- (1) Pair goggles
- (1) Pair safety gloves
- (2) Hazardous waste bags
- (1) Disposal container

71435T68	$150.00

Harsh-Chemical Universal Sorbents

Pick up virtually any spill, even fuming acids and strong oxidizers. These universal sorbents have a polypropylene covering. Color is white.
Note: Not for use with hydrofluoric acid.

Size	Absorption Cap., gal./unit		Each	Pkg. Qty.	Pkg.
Pillow 4″ Wd. × 11″ Lg.	0.1	6314T651	$1.47	40	$52.40

Granular Universal Sorbents

General Purpose

Sorbents are low-dust clay that reduces slipping and won't break down, cake, or mat under heavy traffic. They are nonflammable and absorb oil, grease, and water.
20-lb. Pail—Specially formulated, smaller granules offer higher absorbency per container.

	Absorption Cap., gal.		1-9	10-Up
20-lb. Pail	4	7266T1	$11.34	$10.16
50-lb. Bag	4	7266T2	10.71	9.60

Easy-Clean

Made of a blended compound, these reusable sorbents completely encapsulate most liquids for easy cleanup. Color is gray. Not rated for absorption capacity. *Note:* Not for use with hydrofluoric acid.
Sifting screen separates the used, encapsulated sorbent from the unused sorbent so there's no wasted product.

10-lb. Bucket	62895T11	$17.70
40-lb. Bag	62895T13	20.90
65-lb. Pail	62895T15	107.61
Sifting Screen	62895T34	7.18

Slip-Resistant

This dust-free, powder-like blend of minerals provides traction on slippery surfaces. Sorbents are nonflammable and absorb water, oil, solvents, and most chemicals. Color is gray. *Note:* Not for use with hydrofluoric acid.

	Absorption Cap., gal./unit		Each	Pkg. Qty.	Pkg.
2½-lb. Carton	0.3	6311T713	$2.23	12	$23.04
25-lb. Box	3	6311T73	18.27	—	—
40-lb. Box	5	6311T78	32.42	—	—

Highly Absorbent

This corn-cob sorbent quickly absorbs more cutting oils, grease, water, and similar liquids than other granular sorbents. Color is brown.
Note: Not for use with aggressive liquids, such as hydrochloric acid.

	Absorption Cap., gal.		1-9	10-Up
40-lb. Bag	8.5	63655T76	$15.14	$13.10

Multipurpose Vermiculite

These lightweight sorbents do more than just absorb and hold water, oil, and solvents. You can also use them as insulation, filling, chemical packaging, or packing material for fragile items. Both resist heat and fire and are supplied in a 4-cu. ft. bag. Color is brown. *Grade #3* is similar in size to a grain of rice; *grade #4* is similar to a grain of sand.

Grade	Texture	Absorption Cap., gal.		1-9	10-Up
#3	Medium	19	63415T64	$25.58	$22.69
#4	Fine	23	63415T74	20.17	17.88

Acid and Base Spill Neutralizers

Now cleaning up acids—even battery acids—and bases is safer. Just place these neutralizers on the spill, and they will change color when the neutralization is complete.

Liquid *for acids* is purple; liquid *for bases* is red.

Powder neutralizers are concentrated and neutralize approximately twice as much as liquid neutralizers. Powder *for acids* is white; powder *for bases* is purple.

Pad is pink and should not be exposed to water. *Note:* Not for use with hydrofluoric acid.

	Size	For Acids	Each	For Bases	Each
Liquid	32 oz.	4235T12	$12.42	4235T21	$12.88

Pad (5/Pkg.)	11″ × 12″	4235T16	$12.50		

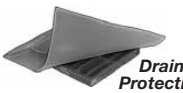
Sewer Drain Grate Guard

Catch oil, sediment, and other pollutants with this durable polypropylene guard. Simply remove the grate, place guard over the opening, and put grate back in place. Guard has filter strips to absorb incoming pollutants and can hold up to 1 3/8 gal. of oil. Overall size is 48″ Lg. × 36″ Wd. × 18″ Dp. Can be used with grates up to 44″ Lg. × 32″ Wd.

8261T25 ..... $58.93

Spill-Control Drain Plugs, Covers, and Dike

Drain Plug



Drain Protective Cover

Dike with Optional Connector

Prevent spills from spreading or going down your drain with these flexible polyurethane spill-control products. They resist oil, water, and most chemicals, and are nonabsorbent, washable, and reusable.

Drain Plugs

All have a zinc-plated steel eyebolt, making it easy to insert and remove the plug. Color is yellow.

For Drain	Plug Ht.	O'all Ht.		
2″ Dia.	4 1/4″	5″	2014K22	$46.82
3″ Dia.	4 1/2″	5 1/4″	2014K23	55.44
4″ Dia.	4 7/8″	5 5/8″	2014K21	70.00

Drain Protective Covers

Keep spills from going down floor drains, grates, and manholes. Covers are 1/8″ thick and are reversible. Color is red.

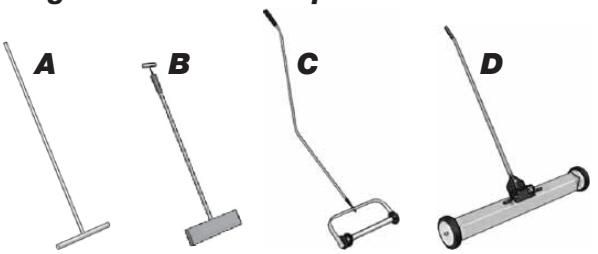
Size		
12″ Dia.	4205T91	$51.82
18″ × 18″	4205T92	85.45
24″ × 24″	4205T93	118.18
36″ × 36″	4205T94	243.64
48″ × 48″	4205T95	372.73

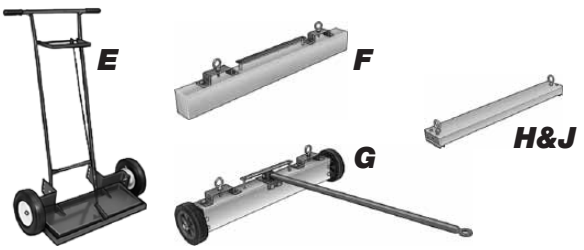
Dike

Create a barrier to stop spills from spreading. Dike bends to form almost any shape you need. You can cut it, or use the optional connectors (sold separately below) to create longer lengths. Size is 10′ Lg. × 4″ Wd. × 2 1/4″ Ht. Color is orange.

Dike	4287T21	$471.43
Optional Connector	4287T22	37.07

Magnetic Floor Sweepers





Keep shop floors, parking lots, and other surfaces free of metal debris. All have an aluminum housing, unless otherwise indicated.

A ***Hand-Held Sweepers—*** Compact sweepers slip into places mobile sweepers can't. To clean, wipe debris off with a rag or gloved hand. Housing is stainless steel. Handle is 40″ long.

B ***Self-Cleaning Hand-Held Sweepers—*** Pull release on top to clean sweeper without touching the debris. Handle is 31″ long.

C ***Low-Profile Mobile Sweepers—*** These lightweight sweepers are easy to maneuver and have an offset handle to reduce bending and reaching, making them ideal for tight areas under machinery and work stations. Wheels are 2 5/8″ dia. and made of rubber. To clean, slide rubber ring (included) along tube. Handle is 46″ long.

D&E ***Self-Cleaning Mobile Sweepers—*** Quick-release feature lets you clean sweepers without touching the debris.

Style D has a pull-handle release and 7″ dia. rubber wheels. Handle is 43″ long. *Style E* have a lever release near the handgrip so you don't have to bend and 10″ dia. cushioned rubber wheels. Housing is stainless steel and steel. Handle is 42″ long.

F-J Sweep larger areas by attaching these sweepers to your forklift or vehicle with a chain (chain sold separately on page 1465).

(F) Self-Cleaning Forklift-Mounted Sweeper— To attach, simply slide forks into sweeper's fork pockets and tighten the 1 1/4″ ID eyebolts. Fork openings are 5″ Wd. × 1 1/8″ Ht. on 30″ centers. For easy cleaning, lift the top hand lever to release debris.

(G) Self-Cleaning Tow-Behind Sweepers— Attach to vehicles with the 1 3/16″ ID tow ring at the handle end. Maximum towing speed is 3 to 8 mph. All have 8″ dia. cushioned rubber wheels, a 46″ long removable handle, and 1 1/8″ ID eyebolts. To clean, simply lift the top hand lever to release the debris.

(H&J) Vehicle-Mounted Sweepers— Bottom-mounted plastic wear bars protect the sweeper bottom. Also come with 1 1/8″ ID eyebolts. Pick up operating speed should not exceed 10 mph. To clean *Style H*, wipe off debris with a rag or gloved hand. To clean *Style J*, press the toe plate to release the debris.

Floor and Baseboard Cleaning Machines

Floor Cleaning Machines

Make your floors look like new again. These machines have triggers on their handles to ensure safe operation—machine stops when the triggers are released. All have nonmarking wrap-around bumpers and 50-ft. power cords with three-prong plugs. Operate on 115 VAC, 60 Hz.

Note: Machines do not include brushes, pads, or pad holders (unless otherwise indicated), which are all sold separately on this page.

General Purpose— Scrub, strip, and buff floors. Great for wet and dry applications on hard floors and carpet. Have a plastic apron, a steel motor housing, and two 5″ dia. polyurethane wheels. Handle is steel, 38″ long, and can be adjusted to different angles for comfort. 7279T62 comes with pad holder. Optional *4-gal. solution tank* is plastic.

High-Speed Burnisher— Polishes hard floors to a high-gloss finish. It has a plastic apron, a steel motor housing, two 5″ dia. polyurethane transport wheels, and two 5″ dia. polyurethane operating wheels. Handle is steel and is 38″ long. Also includes a flexible pad holder that conforms to uneven floors.

Note: Burnisher can only be used with pads, not with brushes.

20″	1,500	15	1½	7424T3	1,319.95

Mini Floor/Baseboard Cleaning Machine

This compact cleaner gets into tight spots, such as corners and behind toilets. It can also be used to clean baseboards and stairs.

Includes a 6″ dia. pad holder with plastic block, a 6″ dia. baseboard brush that has durable plastic bristles coated with an abrasive grit for aggressive cleaning, and a 6″ power cord with three-prong plug. Housing is cast aluminum. Handle is 42″ long and plastic. Motor operates on 115 VAC, 60 Hz.

Optional floor pad is 6½″ dia. **To Order:** Please specify pad style: stripping, buffing, or polishing.

Optional floor brush is 8″ dia. and has soft bristles.

	Base Dia.	rpm	Amps	hp		
Mini Cleaning Machine	6″	765	1.7	⅛	73905T41	$525.00
Optional Floor Pad					73905T5	4.68
Optional Floor Brush					73905T47	131.79

Pads and Pad Holders for Floor Cleaning Machines

Pads strip, scrub, and buff floors. They are 1″ thick, and both sides are usable. *Note:* A pad holder is required when using a pad. Not for use with larger machines. For brushes for floor scrubbers and sweepers, see Floor Sweeper and Scrubber Brushes on page 2092.

General Purpose Pads— For use on hard surfaces and for machines operating at 175-350 rpm except white pads, which can be used up to 3,000 rpm.

To Order: Please specify pad color from choices below:

- Black—For aggressive wet stripping of finish and sealer.
- Blue—For moderate wet scrubbing.
- Brown—Use for wet or dry stripping.
- Green—Use wet for heavy duty scrubbing to remove dirt and scuff marks.
- Red—Use wet or dry to buff, restore shine, and remove scuff marks.
- White—For polishing clean floors to a high-gloss finish. Use on dry or lightly misted floors.

High-Speed Burnishing Pad— For polishing hard or soft surfaces to a high-gloss finish. For machines operating at 1,000-3,000 rpm. Color is off-white.

Pad Holders— Also called pad drivers, these hold pads in place with ½″ plastic bristles. Holders are plastic and are 1″ thick at the center and taper to ¾″ thick at the outer edge. They have a 17/16″ riser block, 5″ center hole, and a clutch plate that attaches to most machines.

Also Available: Pad holders with other clutch plates. Please ask for 7561T999 and specify machine make, model, and base diameter.

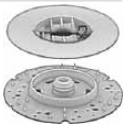
♦ Choose a pad holder that is 1″ smaller than your machine base diameter.

Pad Centering Device



This plastic 6⅛″ dia. device has two halves with spikes to sandwich the cleaning pad and keep it from slipping off center. Bottom half has stainless steel clips to keep it in place. Mounts to any pad holder (hardware included).

7022T1 ..... $20.04

Brushes for Floor and Carpet Cleaning Machines

Significantly more durable than pads, brushes are the perfect choice if your floor is uneven or contains grout lines. All have a plastic block, 5″ center hole, and universal clutch plate that attaches to most floor machines. All brushes can be used on hard surfaces. *Note:* Not for use with larger machines. For brushes for floor scrubbers and sweepers, see Floor Sweeper and Scrubber Brushes on page 2092.

Steel Wire— For stripping and scrubbing concrete. Bristles are 19/16″ long.

Natural Fiber— Perfect for heavy duty scrubbing. Bristles are 1¾″ long.

Plastic— Economical yet durable, this brush is good for general scrubbing. Bristles are 1¾″ long.

Nylon— More flexible and will last longer than plastic. Can also be used on carpet. Bristles are 1¾″ long. Brushes for 15″ dia. machines and larger have holes for use with solution tanks. *Note:* Before using on carpet, break in brush by briefly running machine over a rough, dry surface.

Nylon with Aggressive Grit— This nylon brush is very aggressive and contains silicone carbide. It strips finishes from tile and linoleum and is excellent for heavy buildups. For wet applications only. Bristles are 1½″ long.

Also Available: Brushes with other clutch plates and base diameters and in different materials. Please ask for 7258T999 and specify machine make, model, base diameter, and brush material.

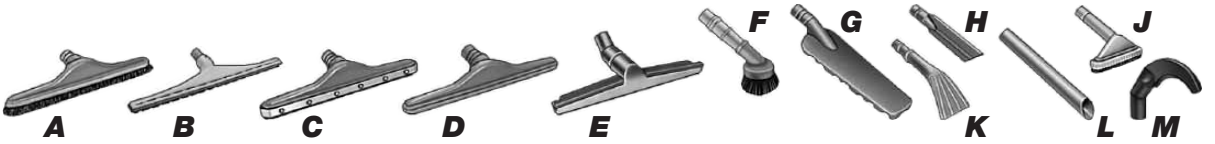
Floor Sweeper and Scrubber Brushes

Scrubber Brush

Sweeper Brush

We offer different sweeper and scrubber brushes for your floor-cleaning machine. **To Order:** Please ask for 7114T888 and specify manufacturer (such as Tennant, American Lincoln, Power Boss, etc.), machine or brush model number, type of brush (scrubber or sweeper), and bristle material.

Vacuum Accessories



Use with 1½″ dia. or 2″ dia. vacuum hose or compatible extension wand (sold separately), unless noted. Accessories are plastic or aluminum, unless noted. Plastic accessories are economical and lightweight. Aluminum accessories are more durable and withstand heavier use. For compatible wand, match the number in the "Use with Wand No. Below" column to the wand number listed under "Extension Wands."

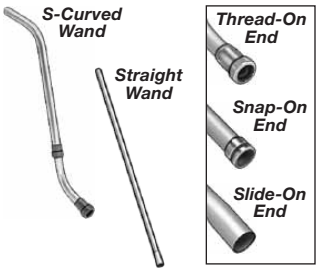
Extension Wands



Use with the compatible vacuum accessories above. All wands, except for wands with slide-on ends, allow accessories to swivel once they are attached.

Thread-on end has a threaded opening that screws onto the accessory.

Snap-on end has a grooved end to snap on the accessory.

Slide-on end slides onto the tool for a tight friction fit.

Vacuum Accessories

Accessories for Hard-to-Reach Areas

Miniature Accessory Kit

Low-Profile Crevice Tool

Miniature accessory kit fits 1¼″ dia. hose. It includes a hose adapter, round brush, oval brush, crevice tool, straight extension, and curved extension. All accessories are plastic.

70075T11 ..... $19.54

Low-profile crevice tool is 25″ long × 5⁄8″ thick for fitting under equipment. The tool fits 1¼″ dia. hose and is plastic.

70075T12 ..... $17.86

Pickup Kits

Standard Dry Pickup Kit

Both kits attach to 1½″ dia. hose. All accessories are plastic, except the handles and wands are chrome-plated steel. Both include square dust brush, crevice tool, carpet/hard floor tool, and upholstery tool.

Standard dry pickup kit also comes with a 19¼″ extension wand and a telescoping wand that adjusts from 24¾″ to 38½″.

4178T21 ..... $52.98

Wet/dry pickup kit also includes a two-piece 52½″ wand and a floor squeegee.

4178T41 ..... $81.82

Floor and Carpet Sweeper

This galvanized steel and plastic sweeper has a bumper to protect walls and furniture. Base is 2½″ Ht. × 9¾″ Wd. × 11¼″ Dp.

Includes a 40″ steel handle, brushes for fine to heavy debris, and dual dirt collection pans. Capacity is 36.8 cu. in.

7038T46 ..... $86.36

Hand-Held Cordless Vacuums

Wet/Dry Pickup

Heavy Duty Dry Pickup

The ultimate in mobility, these plastic vacuums have an easy-to-empty dust cup and a 120 VAC, 60 Hz battery charger. UL listed. Cannot be sold in California or Oregon.

Note: Not rated for hp.

Wet/dry pickup vacuum runs for 10 minutes on a 16-hour charge. Battery charger has a 6-ft. power cord with two-prong plug and draws 130 mA. A wall-mount bracket and a squeegee tool are also included.

Heavy duty dry pickup vacuum has an 8-position pivoting nozzle and a crevice tool. Runs up to 30 minutes on a 24-hour charge. Battery charger has a 5½-ft. power cord with two-prong plug. *Note:* Charger not rated for amps.

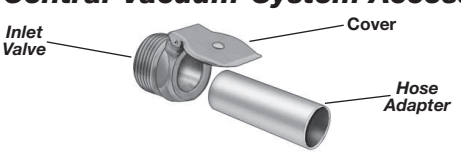
Central-Vacuum-System Accessories



Use these accessories to hook your 1½″ dia. or 2″ dia. hose to your central vacuum system.

Inlet valves have a 2″ NPT male connection and self-closing cover. Both are made of cast zinc with a zinc-plated steel cover. For more information about NPT pipe size and threads, see pages 2-3.

Note: Hose adapter (sold separately) is required to connect a hose to this valve.

Hose adapters are made of zinc-plated steel.

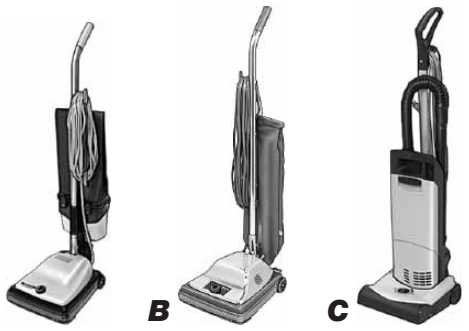
Upright Vacuum Cleaners



(A) Light duty vacuum cleans a 12″ wide path. Base is plastic with a vinyl bumper. Handle is chrome-plated steel and 44″ long. Has a reusable plastic dirt collection cup—no replacement bags needed. Also has a 30-ft. power cord with three-prong plug and four wheels. Vacuum operates on 120 VAC, 50/60 Hz. UL listed.

(B) Heavy duty vacuum has a plastic base and bumper and cleans a 12″ wide path. Handle is chrome-plated steel and 37″ long. Includes a 50-ft. power cord with three-prong plug and four wheels. Vacuum operates on 120 VAC, 60 Hz. UL listed.

Attachment kit (sold separately) is for use with Styles A and B. It includes: 1¼″ Dia. × 6-ft. Lg. vinyl hose with adapter, two 19″ extension wands, round dusting brush, crevice tool, and upholstery tool.

(C) Fine-filtration vacuum has a HEPA filter that is 99.97% efficient at 0.3 microns. Vacuum cleans a 12″ wide path. Housing is plastic. Handle is aluminum with a plastic grip and adjusts from 45″ to 48″. Includes a built-in 1″ Dia. × 3-ft. Lg. plastic hose, 25″ wand, crevice tool, upholstery tool, a 40-ft. power cord with three-prong plug, and two wheels. Vacuum operates on 120 VAC, 60 Hz. UL listed.

Air-Powered Hand-Held Vacuums

These hand-held vacuums make it easy to clean workstations, machinery, and much more. Air inlet connection is ¼″ NPT female.

Wet/Dry Vacuum

Switch from dry to wet pickup by replacing the collection bag with the optional discharge hose (sold separately). Vacuum body is aluminum. Comes with utility nozzle, swivel brush, and reusable collection bag with zipper opening for easy emptying.

Note: Vacuum accepts 1¼″ dia. accessories.

Inlet Air, cfm @ psi	Cap., qt.	Lg. × Ht. (without bag)

Nook-n-Cranny Vacuum for Dry Pickup

The flexible 1 5/16″ Dia. × 16″ Lg. steel hose gives you access to blind holes in tanks, bins, and barrels. Hose stays put in any position. Vacuum has an aluminum body and reusable collection bag with zipper opening for easy emptying.

Inlet Air, cfm @ psi	Cap., qt.	Lg. × Ht. (without bag and nozzle)		
29 @ 100	1	6″ × 7¼″	7491T2	$135.32
Replacement Reusable Collection Bag			7276T21	26.08

Vacuum/Blowguns for Dry Pickup

Use these units as either a vacuum or a blowgun—just change the airflow direction to switch functions. Ideal for cleaning up dirt, dust, metal chips, glass, and more. Made of plastic, each has a 1¼″ dia. nozzle. Vacuuming requires the use of the reusable collection bag with clamp or the discharge hose (both sold separately).

Vacuum/blowgun with blowout tube simultaneously dislodges and vacuums debris such as metal chips.

Attachment kit comes with a brush nozzle, upholstery nozzle with brush attachment, two 19″ extension tubes, and a crevice tool.

Vacuum/Blowgun with Blowout Tube

Hand-Held Vacuum/Blowers

Vacuum/blowers include a shoulder strap and are UL listed. Styles D and F include a micro tool kit consisting of an adapter, 6⅜″ flexible extension wand, dust brush, and crevice tool.

(D) Light duty vacuum/blower gets into narrow openings. Made of steel. Includes a 1¼″ Dia. × 19″ Lg. plastic hose, mini blower nozzle, round brush, crevice tool, and a 12-ft. power cord with three-prong plug. Operates on 110 VAC, 60 Hz.

(E) Standard duty vacuum/blower tackles larger jobs than Style D. Made of plastic. Includes a 1¼″ Dia. × 6-ft. Lg. plastic hose, 20″ extension wand, utility nozzle, reducer to attach accessories directly to unit, round brush, crevice tool, and 35-ft. power cord with three-prong plug. Operates on 120 VAC, 60 Hz.

(F) Fine-filtration vacuum/blower is 99.97% efficient at 0.3 microns and is more powerful than the above units. It is made of steel and can pick up printing toner. Its two-speed motor provides low power for cleaning intricate areas and maximum power for heavy duty cleanups. Comes with a 1¼″ Dia. × 6-ft. Lg. plastic hose, two 20″ extension wands, two tapered nozzles, dust brush, crevice tool, utility tool, and 12-ft. power cord with three-prong plug. Also includes a permanent cloth bag. Operates on 115 VAC, 60 Hz.

Fine-Filtration Canister Vacuum

When you need a vacuum with a greater capacity than hand-held vacuums, choose this canister vacuum that has a HEPA filter that is 99.97% efficient at 0.3 microns. Vacuum is made of plastic. Includes two HEPA collection bags, HEPA filter, 1¼″ Dia. × 6-ft. Lg. plastic hose, telescoping wand (24″ to 36″), round brush, upholstery nozzle, crevice nozzle, floor brush, carpet brush, built-in carrying handle, a 20-ft. retractable power cord with two-prong plug, two rear wheels, and one front swivel caster. Operates on 120 VAC, 60 Hz.

No-Mess Static-Control Vacuums

A&B

C

No need to worry about touching dirty filters—the filters in these vacuums are self-contained in a canister, eliminating messy changes. Simply pull the canister out and replace with a new one. Vacuums are grounded and ESD- (electrostatic discharge) safe, meaning they can be used around sensitive electronic equipment. All have a 1¼″ dia. retractable thermoplastic rubber hose, 16″ wand, crevice tool, crevice tool brush, and a 10-ft. power cord with three-prong plug. Operate on 110 VAC, 50/60 Hz.

(A&B) Hand-Held Vacuums

Both include a retractable hose (stretches from 2½ ft. to 6 ft.) and a molded plastic case.

Style A also comes with a round dust brush and a standard filter that is 99.865% efficient at 5 microns. The optional HEPA filter is 99.97% efficient at 0.3 microns.

Style B has a standard filter that is 99.865% efficient at 0.3 microns. Optional HEPA filter is 99.97% efficient at 0.3 microns. Optional ULPA filter is 99.99% efficient at 0.12 microns. UL listed.

Backpack Vacuums

Vacuum

Fine-Filtration Vacuum

Stop dragging a vacuum around. Get the ultimate in cleaning maneuverability with these lightweight vacuums you wear on your back. All have a plastic housing and padded harness.

Vacuum and Vacuum/Blower

Both include a 1½″ Dia. × 4½-ft. Lg. plastic hose, extension wand, floor nozzle, round dust brush, crevice tool, and a 50-ft. power cord with three-prong plug. Operate on 120 VAC, 60 Hz.

Note: Not rated for hp.

Vacuum also includes an upholstery nozzle. Vacuum/blower easily converts to a blower and provides more power than the vacuum. It includes a blower nozzle.

Cordless Mini-Tank Wet/Dry Vacuum

Get the power of an electric wet/dry vacuum without the hassle of a cord. Vacuum is battery powered and runs up to 30 minutes on a full 60-minute charge (battery and charger sold separately). Also operates on 120 VAC using the included 5-ft. power cord with two-prong plug. Tank and motor housing are plastic. Vacuum has a HEPA wet/dry filter that is 99.99% efficient at 1 micron. Also includes a 1¼″ Dia. × 5-ft. Lg. heavy duty plastic hose, utility nozzle, and crevice tool.

Note: Not rated for hp.

Whisper Quiet Wet/Dry Vacuums

8 Gallon

Quiet enough for office areas, yet powerful enough for demanding jobs. Tank and motor housing are plastic, and all vacuums have a liquid overflow shut-off sensor. Vacuums also have a 1⅜″ Dia. × 13-ft. Lg. plastic hose, two 20″ extension wands, carpet/floor nozzle with squeegee, utility nozzle, brush, crevice tool, 16-ft. power cord with three-prong plug, and four swivel casters. Operate on 120 VAC, 60 Hz.

A coupling is also included so you can attach the vacuum hose to a power tool's dust port. Vacuum housing has a power outlet that accepts a power tool with a three-prong plug. An automatic on/off switch allows the vacuum to turn on when you turn your power tool on. Use with tools and accessories up to 6 amps.

Vacuums ***with HEPA filter*** come with a HEPA filter that is 99.97% efficient at 0.3 microns.

Air-Powered Heavy-Suction Wet/Dry Vacuums

15 Gallon

Pick up the heaviest debris with these continuous-duty vacuums—they have the highest suction power of any wet/dry vacuums we offer. All have an aluminum venturi head. They include two 24″ extension wands, floor nozzle, crevice tool, filter, a 20-ft. rubber air supply hose with universal couplings, and a wheeled steel dolly. Tank is steel, unless noted.

Note: Liquid overflow shut-off valve (sold separately below) is recommended for wet pickup.

15-Gallon and ***20-Gallon Capacity*—**Both vacuums have a 1½″ Dia. × 20-ft. Lg. plastic hose, ½″ ID air supply hose, two rear wheels, and two front swivel casters.

30-Gallon and ***55-Gallon Capacity*—**Have a 2″ Dia. × 20-ft. Lg. plastic hose (unless noted), ¾″ ID air supply hose, and four swivel casters.

***Accessories*—**The *filter bag* extends filter life. The *HEPA filter* is 99.97% efficient at 0.3 microns. The *extra-silent muffler* reduces vacuum noise without reducing performance.

Wet-Pickup Vacuums with Automatic Pump-Out

No need to manually empty the water from these vacuum tanks—these vacuums pump the water out for you.

Economy Wet/Dry-Pickup Automatic Pump-Out Vacuums

20 Gallon

Vacuums can pick up and pump out water at a rate of 6 gpm. Motor housing is plastic. Both vacuums have a tool holder, collection bag, and an 18-ft. power cord with three-prong plug. Also have a liquid overflow shut-off valve, standard ¾″ garden hose thread (GHT) male connection for attaching a drainage hose, and drain for manual emptying. Operate on 120 VAC, 60 Hz. UL listed.

Note: For dry pickup, remove the pump unit.

Both come with 1¼″ dia. accessories: 8-ft. plastic hose, two 20″ extension wands, and combination floor nozzle for wet/dry pickup. They also include 2½″ dia. accessories: 6-ft. plastic hose, two 20″ extension wands, combination floor nozzle for wet/dry pickup, utility nozzle, and crevice tool.

Stainless Steel Tank—Vacuum has two rear wheels and two front swivel casters.

Plastic Tank—Vacuum has four swivel casters.

The ULPA filter in these vacuums is 99.999% efficient at 0.12 microns. Vacuums include a 48″ extension wand, carpet/floor nozzle, utility nozzle, round brush, crevice tool, and 50-ft. power cord with three-prong plug. Operate on 115 VAC, 60 Hz.

6-gal. vacuum has a 1¼″ Dia.×8-ft. Lg. plastic hose and four swivel casters. Tank and motor housing are plastic. UL listed.

15-gal. vacuum has a 1½″ Dia.×10-ft. Lg. plastic hose, two rigid rear wheels, and two front swivel casters. Tank is steel; motor housing is plastic.

Drum-Top Vacuums

Economy Wet/Dry Vacuum

This economical vacuum attaches to an open-head 55-gallon drum (sold separately on page 1740; minimum 24-ga. drum required). Vacuum has a plastic housing and a liquid overflow shut-off valve. Includes a 1½″ Dia.×12-ft. Lg. plastic hose, claw nozzle, and a 35-ft. power cord with three-prong plug. Operates on 120 VAC, 60 Hz.

Dia.×Ht.	hp	Amps

Repl. Nozzle			7494T11	16.41

Heavy Duty Vacuums

An indicator light tells you when the filters are losing efficiency and should be cleaned or replaced. Vacuums attach to an open-head 55-gallon drum (sold separately on page 1740; minimum 18-ga. drum required). Both have a steel housing. Come with a 1½″ Dia.×10-ft. Lg. plastic hose, 53″ extension wand, crevice tool, and 50-ft. power cord with three-prong plug. Operates on 115/120 VAC, 50/60 Hz.

Also Available: Replacement parts. Please ask for 74805T888 and specify part.

Heavy duty wet/dry vacuum has a squeegee tool and a liquid overflow shut-off valve.

Heavy duty fine-filtration dry-pickup vacuum has a HEPA filter that is 99.97% efficient at 0.3 microns. Includes a round brush, upholstery nozzle, and floor brush.

Air-Powered Drum-Top Vacuums

Mini Wet-Pickup Vacuum

Our smallest drum-top vacuum is great for cleaning up minor liquid spills—just attach it to a 5-gallon pail (sold separately). This continuous-duty vacuum has a steel housing. Also has a liquid overflow shut-off valve. Air inlet connection is ⅜″ NPT female. Comes with a 1¼″ Dia.×6½-ft. Lg. plastic vacuum hose, round suction nozzle, and crevice tool.

Inlet Air, cfm @ psi	Dia.×Ht.

Heavy-Suction Wet/Dry Vacuums

Single Head

These have the most suction power of any drum-top vacuum we offer—great for picking up heavy debris. Attach these continuous-duty vacuums to an open-head 30- or 55-gallon drum (sold separately on page 1740; minimum 22-ga. drum required). Vacuum housing is steel. Air inlet connection is a ¾″ universal coupling. Vacuums come with a 48″ extension wand, nozzle, and crevice tool.

Optional liquid overflow shut-off valve is recommended for wet pickup.

Optional filter bag extends the life of the cartridge filter.

Optional HEPA cartridge filter is 99.97% efficient at 0.3 microns.

Optional extra-silent muffler reduces vacuum noise without reducing vacuum performance.

Dry-Pickup Vacuum for Chips and Powders

Pick up wet or dry chips, powders, and other light particles that create problems in other vacuums. This continuous-duty vacuum attaches to an open-head 55-gallon drum (sold separately on page 1740; minimum 16-ga. drum required). Housing is aluminum. Air inlet connection is ⅜″ NPT female.

Furnished with a 1½″ Dia.×10-ft. Lg. plastic vacuum hose, 24½″ extension wand, two 19″ extension wands, crevice tool, round brush, squeegee nozzle, and utility nozzle. The filter is external and measures 10″ Dia.×22″ Ht.

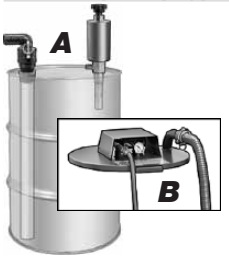
Wet-Pickup Sump Type Vacuums



Remove coolant, sludge, slurries, and metal chips from sumps and other liquid reservoirs with these wet-pickup continuous-duty vacuums. All have a liquid overflow shut-off valve.

(A) Bung-Hole Wet-Pickup and Pump-Out— Mount in the two openings of a 55-gallon drum with cover (sold separately on page 1740; minimum 16-ga. drum required). Vacuum pumps both in and out at 30 gpm; simply turn the knob to change mode from filling to emptying. Housing is stainless steel. Air inlet connection is ¼″ NPT male. Vacuum comes with a 1½″ Dia.×10-ft. Lg. plastic vacuum hose, 18″ extension wand, and 90° quick-disconnect elbow.

(B) Standard Wet-Pickup — Mounts to an open-head 55-gallon drum (sold separately on page 1740; minimum 16-ga. drum required). Pumps in at 40 gpm. Housing is steel. Air inlet connection is ½″ NPT male. Comes with a 1½″ Dia.×10-ft. Lg. plastic vacuum hose, utility nozzle, round flexible nozzle, round crevice tool, and a 20-ft. oil-resistant rubber air-supply hose.

Heavy Duty Mobile 55-Gallon Collection Drum for Drum-Top Vacuums

Works with open-head 55-gallon drum-top vacuums that have a minimum diameter of 23½″ (not compatible with 6305T41 or 7789T11 drum-top vacuums sold separately above). Made of 12-ga. steel, drum has a valve for draining liquid, an 8″×10″ bottom door for removing debris, and 7″ Wd.×2½″ Ht. forklift pockets that are 19½″ center-to-center. Four casters (two rigid and two swivel) provide mobility. For more 55-gallon open-head steel drums, see page 1740.

Ht.×Wd.×Dp.		
46″×27″×31″	7119T5	$1,085.53

Mobile Single-Stage Dust Collectors

Here's a great combination of simple operation and effective performance in one flexible system designed for wood dust collection. The base has wheels, so you can move the unit around the shop for connection to different systems. All wood dust particles collect in cotton/polyester filter bags (included) that are 95% efficient for wood dust particles 25 microns and larger. Collectors are 15- to 24-ga. steel. Motors are totally-enclosed, fan-cooled (TEFC).

696 cfm collector has a two-bag system and includes a 3-ft. cord with three-prong plug.

1,400 cfm collectors have a two-bag system and include an adapter to connect to multiple runs of duct, allowing you to easily use one collector for several pieces of equipment. 2168K56 includes a 6-ft. cord with three-prong plug. 2168K32 has four 6-ft. wire leads for hardwiring.

2,431 cfm collector has a four-bag system and includes an adapter to connect to multiple runs of duct, allowing you to easily use one collector for several pieces of equipment. Comes with four 3-ft. wire leads for hardwiring.

Also Available: Additional replacement parts. Please ask for 2168K888 and specify the McMaster-Carr part number of the dust collector and the replacement part needed.

★ Filter area is the number of square feet of fabric area of an inflated filter bag.

Drum-Mount Two-Stage Dust Collectors

Often called cyclone dust collectors, these powerful units mount on drums for two-stage dust collection (drums not included; use steel drums sold separately on page 1740). In the first stage, larger particles fall into the drum. In the second stage, smaller particles go into the filter bag. Since the larger particles don't pass through the blower, there is less wear on the blower and filter bag. Blowers have a 14-ga. steel housing and a cast aluminum blower wheel. Inlet hose is 5 feet long. *Note:* Not for use with combustible metal dust, including aluminum, magnesium, and titanium. All motors are totally-enclosed, fan-cooled (TEFC). 115 VAC units have an 8-ft. cord with three-prong plug, unless noted. 230/460 VAC units have nine wire leads.

450 cfm collectors come with a cotton filter bag that is 99% efficient for particles 10 microns and larger. ***700 cfm*** and ***1,100 cfm collectors*** come with a polyester filter bag that is 99% efficient for particles 5 microns and larger. ***1,300 cfm collector*** uses the 2133K16 Large-Capacity Dust Bag Kit (sold separately).

Optional ***wheeled dollies*** (sold separately) provide easy movement from job-to-job.

Also Available: Drum-Mount Two-Stage Dust Collectors with a three-phase hazardous location motor. Operate on 230/460 VAC, 60 Hz. Please ask for 2114K66 and specify horsepower.

★ Filter area is the number of square feet of fabric area of an inflated filter bag. ◢ Also compatible with most 20/24-gal. drums.

■ Operates on 115/230 VAC, 60 Hz and has nine wire leads for hardwiring.

Large-Capacity Filter Bag Kits

These polyester fabric bags are 99% efficient for particles 5 microns and larger. Furnished with a mounting kit that includes 5 feet of 6″ diameter hose to attach the bag to the dust collector outlet. 450 cfm dust collectors require the adapter kit (sold separately).

Drum-mount bag kits attach to a 55-gal. drum (not included). They're supported by a hook at the top of the bag; the bottom of the bag tightens around the top of the drum with a belt and quick-release buckle for easy emptying.

Ceiling-mount bag kit includes a suspension ring and hooks. Bag empties from a zipper at bottom.

Drum-Mount Filter Bag Kit

★ Filter area is the number of square feet of fabric area of an inflated filter bag.

High-Volume Two-Stage Dust Collector

Move large quantities of air and dust through long runs of pipe at higher static pressures than the Drum-Mount Two-Stage Dust Collectors on this page. Also known as a cyclone dust collector, this powerful unit separates most waste material in the airflow and deposits it into a dust storage barrel (sold separately). Because less dust passes through the blower, there is less wear on it. Collector is made of airtight, welded 16-ga. steel with steel braces and supports. Motor is totally-enclosed, fan-cooled (TEFC) and has nine 6″ wire leads for hardwiring. Motor and fan assemblies are easily detached for maintenance. If you wish to recycle the air, an optional ***filter assembly*** should be used to collect fine particles not separated by the collector. It has an attached drum to eliminate extra handling of waste material. Filter bags are made of polyester and are 99% efficient for particles 5 microns and larger.

Collector with Optional Filter Assembly

★ Filter area is the number of square feet of fabric area of an inflated filter bag. ♦ Does not include filter assembly.

Fine-Filtration Cartridge Dust Collectors

Maximize dust collection. The cartridges in these collectors are 99.99% efficient for particles 0.5 microns and larger—great for picking up fine dust such as graphite and talc. Cartridges are cleaned automatically each time the dust collector shuts off and are enclosed to minimize contamination from particles that pass through the collector. The 550 cfm and 1,243 cfm collectors are made of 16-ga. steel; 3,000 cfm collector is 14-ga. steel. All have a three-phase, totally-enclosed, fan-cooled (TEFC) motor with nine 6″ wire leads for hardwiring. Operate on 208-230/460 VAC, 60 Hz. Units have three inlet adapters for connection to multiple machines.

An automatic shaker mechanism cleans the filter media and drops particles into a drawer for easy collection and disposal. The shaker motor is 1/8-hp, single phase, and operates on 115 VAC, 60 Hz, 3.5 amps.

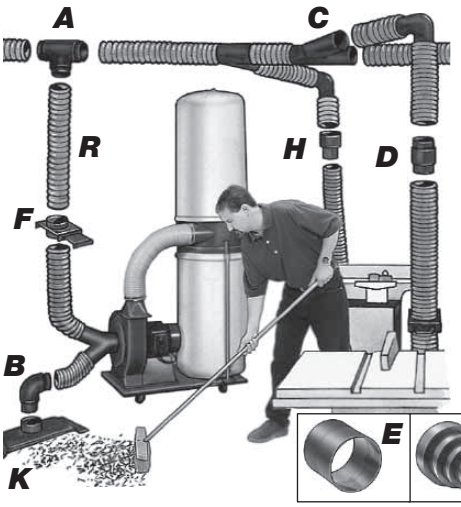
Dust Collector Duct System



We've got everything you need to put together a system to collect sawdust, chips, shavings, and granular material from wood-working operations. The system shown features our Single-Stage Dust Collector (2168K56 sold separately on page 2101); however, the components of this system are compatible with all of our dust collectors.

All components are sold separately—order the parts you need to create a custom system. For hose clamps, see 5415K on page 302. For maximum safety and to avoid a dangerous buildup of static electricity, you must use the ***grounding kit*** (sold separately).

If you need more information on designing and installing a dust collection system, order our book "Dust Collection Basics" (sold separately).

(E) Quick-Disconnect Duct Fitting— Use in place of a hose clamp. Attach to the end of a 4″ dia. hose and then press on to any dust hood for a quick and easy friction fit.

(G) Universal Duct Reducer— This adapter has seven outside dia. step sizes: 1″, 2″, 2½″, 3″, 4″, 5″, and 6″. Cut away unneeded steps with a hacksaw.

(J) Duct Reducer with Mounting Flange— Fits over a 3″ dia. hole and is angled upward for easy connection between the machine and a shop vacuum. Has four ¼″ dia. mounting holes (fasteners not included).

(Q) Adjustable Nozzle with Steel Stand— Position the nozzle exactly where you need it. Ideal for use with table saws, lathes, drill presses, and portable power tools. Nozzle is cast aluminum, rotates 360°, and can be angled 180° in any position between straight up and straight down. Stand adjusts from 24″ to 43½″ high.

Band Top Filter Bag

Filter Cartridge, Open on Both Ends

Need to replace your dust collector's bag or cartridge? Just match the specs to one that we have here.

Filter bags are polyester. Choose from unfinished top (also known as a raw top) or a Type 301 stainless steel band top. ***Filter cartridges*** are offered open on both ends, or open on one end and closed on the other. The closed end has a ½″ dia. mounting hole (hardware not included).

Pressure Washers

Turn ordinary garden-hose water into pressurized water to power away dirt and grime. All pressure washers have the following:

- High-pressure wire-reinforced rubber hose
- ¾″ garden hose thread (GHT) connection
- Thermal relief valve to protect pump from overheating
- Adjustable pressure (psi), unless otherwise indicated
- Low-pressure soap injector

Electric Pressure Washers

The choice for indoor use, these pressure washers are quieter than gasoline-powered models. All have a 3-ft. wand with trigger gun. They also have a power cord with three-prong plug and ground fault circuit interrupter (GFCI), unless noted.

(A&B) Carry Style—A built-in handle makes these pressure washers easy to carry. They include a high/low pressure nozzle with 0° to 60° adjustable spray angle. CSA certified.

Style A is light duty. It has a rust-, corrosion-, and impact-resistant plastic housing.

Style B is heavy duty. It has a steel mounting plate with rubber feet.

(C) Cart Style—This self-contained pressure washer is made of rust-, corrosion-, and impact-resistant plastic to protect the pump and motor. Cart has two wheels to provide mobility plus convenient storage areas for hoses and a 1-gal. soap container (not included). Comes with a high/low pressure nozzle with 0° to 60° adjustable spray angle.

(D) Wall-Mount Style—To save valuable floor space and provide a permanent location for cleaning in your plant, mount these stainless steel pressure washers on a wall. They require 31″ Ht.×28″ Wd.×22″ Dp. of space and come with brackets with eight ½″ dia. mounting holes (fasteners not included). Ideal for food-processing plants.

Both pressure washers include 0°, 15°, 25°, and 40° spray angle high-pressure nozzles and a low-pressure soap nozzle. All nozzles are quick-disconnect.

Also Available: Replacement parts. Please ask for part number listed below and specify nozzle, pressure washer hose, trigger gun, wand, valve repair kit, or seal repair kit.

★ Pressure washer has a three-phase motor. Plug sold separately, see pages 816-822.

Gasoline-Powered Pressure Washers

With more cleaning power than our electric washers and no power cord to tie you down, these washers are perfect for heavy duty outdoor jobs. All have a Honda engine with pull-cord starter, 3-ft. wand with trigger gun, low-pressure soap nozzle, heavy duty steel frame, and two pneumatic wheels.

2,500-psi Model—Has fixed pressure and 15° and 25° spray angle high-pressure quick-disconnect nozzles.

2,700-psi Model—Has fixed pressure and 0°, 15°, 25°, and 40° spray angle high-pressure quick-disconnect nozzles.

3,500-psi Model—Has 0°, 15°, 25°, and 40° spray angle high-pressure quick-disconnect nozzles. Also has a steel roll cage for extra protection.

Also Available: Replacement parts. Please ask for part number listed below and specify nozzle, pressure washer hose, trigger gun, wand, valve repair kit, or seal repair kit.

Hot-Water Pressure Washers

Great for sanitizing jobs, all of these washers have a burner system that heats water up to 180°F to blast away your toughest grease, oil, dirt, and grime. The burner system has a corrosion-resistant, plastic fuel tank that uses fuel oil, #2 diesel fuel, or kerosene. An on/off heater switch lets you switch between hot and cold water. Washers come with a 3-ft. wand with trigger gun, one low-pressure soap nozzle, and 0°, 15°, 25°, and 40° spray angle high-pressure quick-disconnect nozzles. All have a heavy duty steel frame. For use in well-ventilated areas.

(E) Electric-Powered/Fuel-Heated—These pressure washers run quieter than gas models. Both include a 36-ft. long power cord with three-prong plug and ground fault circuit interrupter (GFCI), and four pneumatic wheels.

(F) Gasoline-Powered/Fuel-Heated—This pressure washer doesn't require an outlet, so it's easier to move around. A Honda engine with pull-cord starter supplies power to the pump and runs the burner system that heats the water. Includes an adjustable thermostat for applications that require lower-temperature hot water, an hour meter for preventative maintenance, a 1.4-gal. capacity gas tank for the engine, a low-oil shut-off feature, and four pneumatic wheels.

Also Available: Replacement parts. Please ask for part number listed below and specify nozzle, pressure washer hose, trigger gun, wand, or seal repair kit.

Steam Cleaner and Pressure-Washer Cleaner/Degreaser

Cuts quickly through grease, oil, and heavy dirt on hard, nonporous surfaces, then rinses clean without leaving a residue. Cleaner is water based and has built-in corrosion inhibitors.

		Each
5 gal.	3219K21	$77.37
55 gal.	3219K23	588.14

Pressure-Washer Replacement Hose

Hose is made of wire-reinforced rubber and has plated-steel fittings with 3/8" NPT thread connections (rigid male on one end; swivel male on the other end). Hose diameter is 3/8".

Standard hose is black. ***Nonmarring*** hose is blue.

Hose Lg.	Max. Pressure	Max. Temp.	*Standard*	Each	*Nonmarring*	Each
30 ft.	3,000 psi	200° F	53115K61	$109.00	53115K81	$97.32

Pressure-Washer Extension Wand

To clean hard-to-reach areas, attach this wand to your pressure washer, extend it to your desired height, and lock it in place. Wand has a 3/8" female quick-disconnect connection to fit most pressure washers and a 1/4" female quick-disconnect nozzle connection. It is made of aluminum and has a fiberglass handle with trigger spray gun. Maximum pressure rating is 3,000 psi. For nozzle (not included), see 31905K on page 2114.

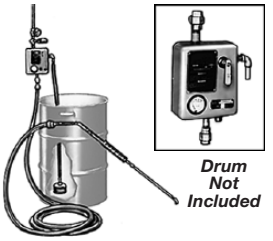
Retracted Lg.	Extended Lg.	Each
6 ft.	18 ft.	32075K84 $163.83

Water Broom

Attach this broom to a garden hose to sweep away dirt and dust—its brass water jets turn your hose water into pressurized water for quick, easy cleaning. Also has a brass ball valve with shut-off lever, two swivel casters, and a 3/4" garden hose thread (GHT) female connection. Broom is 36" wide with a 48" handle. Maximum temperature is 100° F. Made of steel.

Max. Flow	Max. Pressure	Each
3 gpm	180 psi	7041T11 $249.79

Steam Cleaning Systems



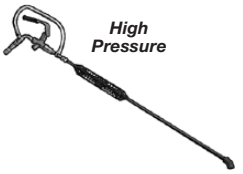
Connect these systems to existing 60- to 125-psi steam lines to remove dirt, grease, and heavy oils from most surfaces in your plant. No electrical connections required—connect to a 3/4" NPT female steam outlet with a maximum steam temperature of 350° F and siphon detergent from a drum (not included).

Both steam cleaning systems have an 8 1/2" Ht. × 7" Wd. × 3 1/2" Dp. steel control panel with pressure gauge. Use the control panel to regulate the steam/detergent mixture and change the temperature and velocity of the solution being discharged. Discharge capacity is 2 to 3.2 gpm.

Systems come with a steam gun with 45" steel wand and swivel handle, two spray nozzles, a 1/2" dia. wire-reinforced rubber steam hose, and a 5-ft. detergent siphon hose. *Note:* The steam gun must be within inches of your surface for effective cleaning.

		Each
Steam Cleaning System with 25-ft. Hose	3157K2	$1,608.39
Steam Cleaning System with 50-ft. Hose	3157K4	1,729.95

Steam Guns for Inline Steam Systems



Standard Pressure— Guns have a 3-ft. stainless steel wand with plastic trigger handle, a brass nozzle with 40° flat spray angle, a 1/2" dia. wire-reinforced rubber steam hose, two hose clamps, and two barbed hose fittings.

High Pressure— The choice for heavy duty cleaning, these guns have a 3-ft. steel wand with zinc-plated steel lever handle, stainless steel valve, a 45° angled nozzle holder (nozzle not included; sold separately), and 1/2" NPT female inlet connections.

	Max. Pressure	Max. Temp.		Each

Nozzle for High-Pressure Guns			9450T57 **Each**	$101.82

High-Pressure Wash Guns

Add one of these guns to your pressure washer or high-pressure spray system. All guns have a front trigger, impact-resistant nylon housing, high-pressure 25° angle spray nozzle, and a trigger guard that protects the trigger from damage.

(A-C) Wash Guns with Front Inlet Connection— All guns have a trigger lock that prevents accidental discharge. *Styles A* and *B* have an internal brass valve body. *Style C* has an internal stainless steel valve body for added durability and corrosion resistance.

(D&E) Wash Guns with Rear Inlet Connection— Have an internal brass valve body. *Style E* has a brass swivel inlet connector for easier gun handling and to prevent hose from kinking.

Maintenance Kits— Include replacements for parts prone to wear.

Optional Extensions— Get into those hard-to-reach areas with these 18" and 36" long extensions. Extensions are nickel-plated steel and include a 25° angle spray nozzle.

Optional Swivel Inlet Connectors— Provide easier gun handling and prevent hose from kinking. Connectors are brass.

Replacement Spray Nozzles— For use with wash guns. Nozzles will not fit optional extensions.

High-Flow Wash Guns

Use these wash guns for washdown, rinsing, and general cleanup. *Note:* These guns should not be connected to steam lines.

Swivel inlet connector provides easier gun handling and prevents hose from kinking.

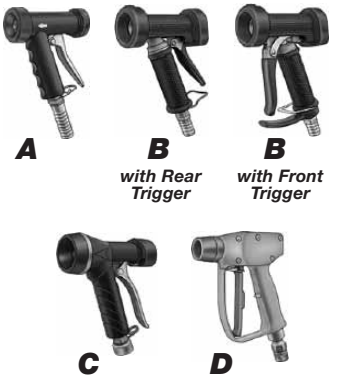
Bronze body wash guns are the economical choice. *Aluminum body* wash guns are lightweight and durable. *Stainless steel body* wash guns are corrosion resistant and more durable than bronze and aluminum.

(A) Miniature— Half the weight of Style B models, these smaller guns have a rubber cover that protects you from exposure to high water temperatures and minimizes damage to the gun if dropped. Both have a 3/4″ ID barbed hose inlet connection.

(B) Standard— Have the same rubber cover design as the miniature guns. All have a 3/4″ ID barbed hose inlet connection, except the *25 gpm bronze* models, which have a 1/2″ NPT female inlet connection.

(C) Adjustable Flow— Change out the spray cap to switch the water flow. Trigger adjusts the spray from a solid stream to a broad cone. All have a rear trigger and a rubber cover to protect you from exposure to high water temperatures. Guns come with a 3/4″ garden hose thread (GHT) female swivel inlet connector with a ring to hold the trigger in place for continuous spraying. If connector is not used, inlet connection is 1/2″ NPT female.

(D) Insulated with Trigger Guard— Insulated handle keeps your hand cool, even when spraying hot solutions. Guns have a trigger guard to protect trigger from damage. Trigger changes the spray from solid stream to broad cone and can be locked into place. The *15.5 gpm* model has a 3/8″ NPT female connection. The *21 gpm* model has a 1/2″ NPT female connection and a safety sleeve to cover hot, exposed fittings.



Maintenance Kits— Have replacements for parts that are prone to wear.

Extended Reach Wash Guns with Trigger Guard

Access hard-to-reach areas with the brass extension. Guns have a trigger guard to protect trigger from damage. *Nylon body* wash guns are impact resistant and have a 1/4″ NPT female inlet connection. *Aluminum body* wash guns are lightweight and durable. They have a 1/4″ National Pipe Straight (NPS) thread male inlet connection.

Maintenance Kits— Have replacements for parts that are prone to wear.

Gun Body Material	Max. Flow	Max. Pressure	Max. Temp.	Trigger Style	Wash Guns	Each	Maintenance Kits	Each

Economy Wash Gun with Trigger Guard

Gun has a trigger lock to prevent accidental discharge, a trigger guard to protect trigger from damage, and a 25° angle spray nozzle. Has a 1/4″ NPT female inlet connection and an 11/16″-16 Unified National (UN) pipe thread male outlet connection.

Maintenance Kits— Have replacements for parts that are prone to wear.

Gun Body Material	Max. Flow	Max. Pressure	Max. Temp.	Trigger Style	Wash Gun	Each	Maintenance Kits	Each
Plastic	5 gpm	150 psi	120° F	Front	6835T11	$58.70	6835T12	$18.01

Air- and Water-Powered Wash Guns

The powerful combination of air and water creates a high-velocity, atomized spray. These guns also can be used to siphon. All have a 1/4″ NPT female air inlet and 3/4″ garden hose thread (GHT) female connections.

Standard— Air and water controls adjust individually. Gun is brass and has a rubber body that flexes for flow control.

Extended Reach— The 12″ stainless steel nozzle gets to hard-to-reach places. Guns have a cast aluminum head assembly, an insulated handle, and a shut-off valve that lets you control water flow.

	Inlet Air, cfm @ psi	Max. Flow	Pressure Range	Max. Temp.		Each
Standard	12 @ 60	4 gpm	35-175 psi	200° F	5448K16	$143.80
Extended Reach	15 @ 100	0.36 gpm	0-120 psi	150° F	3306K86	137.43
Replacement 8-ft. Siphon Hose					5448K33	23.38

Wash Guns & Garden Hose Nozzles

Air-Powered Siphon Wash Guns

Guns can be used to clean as well as apply chemicals and solvents.

Squeeze-Grip Wash Guns

Squeeze the handle to spray. All have a rubber grip, and you can remove the 8-ft. siphon hose to operate in air-only mode. **To Order:** Please specify 1/4", 3/8", or 1/2" NPT female air inlet connection.

Styles A and ***B*** are made of nickel-plated brass with an oil-resistant rubber siphon hose. *Style A* has a straight extension. *Style B* has an angled extension.

Style C delivers more solvent than the other siphon wash guns. It is made of brass and has a heavy duty reinforced rubber siphon hose.

Inlet Air, cfm @ psi	Nozzle Lg.	Max. Flow	Pressure Range	Max. Temp.		Each
With Brass Nozzle						
A	11 @ 80	6 1/4"	0.16 gpm	35-175 psi	140° F	**5447K11**	$86.31
B	11 @ 80	9 5/8"	0.16 gpm	35-175 psi	140° F	**5447K12**	99.74
C	16 @ 80	2 1/4"	0.50 gpm	35-175 psi	140° F	**5447K13**	106.44
With Stainless Steel Nozzle						
A	11 @ 80	6 1/4"	0.16 gpm	35-175 psi	140° F	**5447K14**	103.06
B	11 @ 80	9 5/8"	0.16 gpm	35-175 psi	140° F	**5447K15**	117.62

Trigger-Grip Wash Gun

Pull the trigger to blast away dirt or to spray insecticides and coatings. Comes with a 12" brass and aluminum extension nozzle, 6-ft. plastic siphon hose, and 1/4" NPT female air inlet connection. Gun is aluminum. *Note:* Do not use in air-only mode.

Inlet Air, cfm @ psi	Max. Flow	Max. Pressure	Max. Temp.		Each
9 @ 100	0.26 gpm	150 psi	♣	**31125K61**	$66.43

♣ For cold water use. Not temperature rated.

Wash/Foam Guns with Dispenser

Wash Gun

Connect these guns to your garden hose and automatically dispense solution without dragging around a siphon hose. The nozzle has a 3/4" garden hose thread (GHT) female connection and insulated handle. Use the attachment to adjust the spray pattern from mist to solid stream. Both have a brass mixing head and 1-qt. plastic bottle.

Wash Gun— The rinse lever allows you to instantly change from using the wash solution to rinsing with clean water. Set to mix 2 oz. of cleaner per gallon of water.

Foam Gun— Creates a thick foam. Gun mixes up to 12 oz. of foaming chemicals per gallon of water.

	Max. Flow	Pressure Range	Max. Temp.		Each
Wash Gun	3 gpm	40-90 psi	160° F	**3154K11**	$51.64
Foam Gun	1.5 gpm	40-90 psi	160° F	**3239K12**	67.02

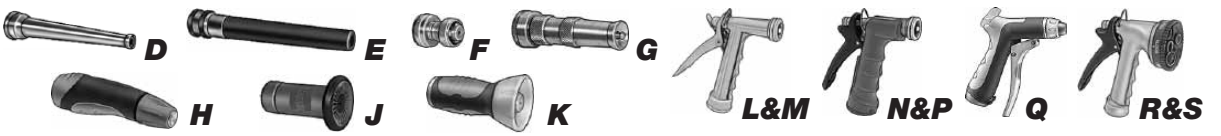
Underwater Vacuum

Easily remove muck, debris, and sediment (even small pebbles and leaves) from underwater surfaces. This vacuum uses water pressure from your garden hose (not included) to create suction for vacuuming. Debris enters through the handle and exits through the discharge hose.

Vacuum has a 3/4" garden hose thread (GHT) female connection and requires a minimum pressure of 50 psi. Comes with a 1 1/4" Dia. × 10 ft. Lg. plastic discharge hose, 36"-72" long aluminum telescoping handle, on/off switch, brush, and hose adapter to connect additional discharge hose.

		Each
Vacuum	**7153T11**	$127.08
Repl. Discharge Hose	**7153T12**	16.67

Garden Hose Nozzles



All nozzles have 3/4" garden hose thread (GHT) female connections and include washers.

(D&E) Continuous-Flow Nozzles

These nozzles provide a constant, fixed stream of water.

D Full Force— Made of brass. Use if a shut-off valve isn't needed.

Nozzle Lg.	Max. Flow	Max. Pressure	Max. Temp.		Each
2"	4.5 gpm	100 psi	195° F	**7678T1**	$3.41
6"	4.5 gpm	100 psi	195° F	**7678T2**	16.13

E Water Saver— Squeeze the nozzle end to start water flow; release the nozzle to stop flow. Neoprene nozzles are chemical resistant.

Standard-flow nozzles provide full water flow.

Jet-flow nozzles offer a concentrated stream while using less water.

Nozzle Lg.	Max. Flow	Max. Pressure	Max. Temp.	Nozzle Material		Each
Standard Flow						
8 7/8"	6.5 gpm	125 psi	150° F	Rubber	**3880T21**	$30.24
8 7/8"	7 gpm	125 psi	150° F	Neoprene	**3880T24**	39.44
Jet Flow						
8 7/8"	4.5 gpm	80 psi	150° F	Rubber	**3880T22**	31.63
8 7/8"	5 gpm	125 psi	150° F	Neoprene	**3880T25**	43.47

(F-K) Adjustable-Flow Nozzles

Twist the barrel to adjust spray pattern from mist to full stream.

F Mini— Solid brass body with integrated rubber washer.

G Standard— Have a solid brass body that's rugged and reliable.

H Insulated— Has a die cast zinc body with a brass tip and an insulated thermoplastic rubber cover.

J&K With Protective Guard— *Style J* has a plastic body and a protective plastic guard at the nozzle end. *Style K* has a plastic body with a zinc coupling and an insulated rubber handle. It also has a protective rubber guard at the nozzle end.

	Nozzle Lg.	Max. Flow	Max. Pressure	Max. Temp.		Each
F	1 3/4"	5.5 gpm	400 psi	175° F	**7261T12**	$10.56
G	4"	12 gpm	150 psi	200° F	**7484T1**	10.60
G	6"	12 gpm	150 psi	200° F	**7484T5**	21.71
H	6 3/8"	10 gpm	200 psi	100° F	**7484T8**	10.12
J	4 3/4"	8 gpm	100 psi	♣	**7641T34**	11.56
K	5"	10 gpm	60 psi	♣	**7641T44**	11.78

♣ For cold water use. Not temperature rated.

(L-S) Lever-Activated Nozzles

The squeeze lever controls both the flow and the spray pattern, unless otherwise indicated. All have a locking clip to hold nozzle open for continuous spraying.

L Economy— Body is die cast zinc. Has a 3/4" garden hose thread (GHT) male connection at the spray end for attaching hose-end accessories.

M Marine Grade— Specially designed for use around salt water, this nozzle has an impact-resistant plastic body and a stainless steel internal spring for corrosion resistance. Has a 3/4" garden hose thread (GHT) male connection at the spray end for attaching hose-end accessories.

N&P Insulated— Grip is insulated to protect your hands from extreme water temperatures. Body is die cast zinc. Has a 3/4" garden hose thread (GHT) male connection at the spray end for attaching hose-end accessories.

Style N has a plastic molded contour grip.

Style P has a cushioned vinyl molded contour grip. It includes a protective thread cover. Water flow is controlled by the lever; spray pattern is controlled by the brass nozzle.

Q Insulated with Adjustable Spray Pattern— Simply twist the spray head to adjust the spray pattern. Body is plastic, and tip is aluminum. Nozzle has a metal coupling and an insulated nylon handle.

R&S Dial Select— Turn the dial to select a spray pattern. Both nozzles have a five-position dial with seven spray patterns: shower, jet, cone, mist, stream, full, and flood. Body is die cast zinc.

Style S has a cushioned vinyl grip to protect hands from extreme water temperatures.

	Max. Flow	Max. Pressure	Max. Temp.		Each
L	8.8 gpm	100 psi	140° F	**7445T12**	$4.76
M	7 gpm	60 psi	100° F	**7488T17**	5.60
N	8.8 gpm	100 psi	140° F	**7239T11**	8.70
P	6 gpm	120 psi	160° F	**7433T53**	11.09
Q	4 gpm	60 psi	100° F	**7557T71**	6.36
R	8.8 gpm	100 psi	100° F	**7447T11**	12.65
S	8.8 gpm	100 psi	150° F	**7447T12**	13.78

Garden Hose

Hose has a smooth interior and threaded fittings on each end (one male and one female). Fittings are brass, unless noted, and include a washer. They have 3/4″ garden hose threads (GHT) except the 1″ ID hose, which has 1″ National Pipe Straight Hose (NPSH) threads. Suitable for outdoor use.

Economical Hose—Made of lightweight, nonmarring PVC. Color is green.

Flexible Hose—Blends the flexibility of PVC with the durability and abrasion resistance of rubber. It is lightweight and nonmarring. Color is green, unless noted.

Weather-Resistant Hose—Offering excellent UV and ozone resistance, this EPDM rubber hose is a good fit for outdoor applications. Color is black.

Continuous-Flow Hose—Designed to ensure water keeps flowing even if the hose kinks. Hose is PVC and has brass-plated aluminum threaded fittings on each end. Color is black with a yellow stripe.

Abrasion-Resistant Lightweight Hose—Lighter than rubber and more flexible than PVC, this polyurethane hose stands up to the wear and tear of daily use. Color is brown.

Hose for Hot Water—When your process requires hot water, reach for this rubber hose. Color is red.

★Color is red. ■ Has anodized aluminum threaded fittings.

Retracting Garden Hose

Let go of this hose and it retracts back to its original coiled form. Hose is polyurethane with a smooth interior and threaded fittings on each end (one male and one female). Fittings are nickel-plated brass and have 3/4″ garden hose threads (GHT). Female fitting includes a washer. Hose coil is 4 1/8″ dia. Color is yellow.

Hose ID	Extended Hose Lg.	Retracted Hose Lg.	Max. psi @ 72° F	Max. Temp.		
3/8″	25 ft.	15″	135	165° F	7118T4	$61.20
3/8″	50 ft.	30″	135	165° F	7118T6	93.47

Manual-Winding Reels with Garden Hose

Turn the hand crank to rewind the hose. Reel is enclosed to protect your hose when it's not in use. The included nozzle cannot be used with other reels or hose.

Hose is lightweight, nonmarring PVC. It is orange and has a smooth interior. Hose has a plastic male outlet nozzle and a 60″ inlet hose. Inlet hose has a plastic female fitting with 3/4″ garden hose threads (GHT) and a washer. Not rated for temperature.

Reel is black ABS and has a carrying handle. Wall-mount bracket has three 5/32″ dia. mounting holes (fasteners not included).

Reel Ht.	Reel Wd.	Reel Dp.	Hose ID	Hose Lg.	Max. psi @ 72° F		
14″	13 1/4″	4″	1/2″	50 ft.	75	7671T1	$59.56

Automatic-Winding Reels with Garden Hose

Pull the hose out slowly and it catches so you only unwind the length you need. Give it a quick tug and the hose rewinds. Reel is enclosed to protect your hose when it's not in use.

Hose is lightweight, nonmarring PVC. It is white and has a smooth interior. Hose outlet has a zinc-plated brass male threaded fitting. Inlet hose is 60″ and has a brass female easy-install threaded fitting. Fittings have 3/4″ garden hose threads (GHT). The *easy-install female threaded fitting* swivels 360° until tightened and has a washer. Temperature range is 40° to 140° F.

Reel is gray polypropylene and has a carrying handle. The wall-mount bracket allows the reel to swivel and has four 9/32″ dia. mounting holes (fasteners not included).

Reel Ht.	Reel Wd.	Reel Dp.	Hose ID	Hose Lg.	Max. psi @ 72° F		
18 1/2″	11″	19 1/2″	5/8″	50 ft.	140	7138T12	$180.82

Garden Hose Holders & Fittings

For faucets with garden hose threads, see page 490.

Garden Hose Holders and Reels

(A-C) Garden Hose Holders

A

B

C

Drape your hose over these holders to keep it out of your way. Hose capacity is based on 5/8″ ID hose (not included).

(A) Wall-Mount Steel Holder—An economical choice. Has two 1/2″ dia. mounting holes (fasteners not included). Color is green.

(B) Wall-Mount Heavy Duty Stainless Steel Holder—Made of stainless steel for corrosion resistance. Has two 5/16″ dia. mounting holes (fasteners included).

(C) Wall-Mount High-Capacity Stainless Steel Holder—As corrosion resistant as Style B, but this model holds more hose and can tilt and swivel for easier hose removal. Has two 5/16″ dia. mounting holes (fasteners included).

	Ht. × Wd. × Dp.	Hose Cap.		
A	8 1/4″ × 9 1/4″ × 8″	100 ft.	53325K35	$6.60
B	8 1/2″ × 8″ × 8″	150 ft.	53325K33	33.37
C	13″ × 5″ × 5″	200 ft.	53325K36	71.46

(D-G) Garden Hose Reels

D

E&F

G

Wind your garden hose around these reels to keep it neat and organized. Reels include a faucet-connection hose that has a 3/4″ GHT connector with washer to attach directly to your water source.

(D) Wall-Mount Plastic Reel—This reel includes a hose guide, storage tray, mounting fasteners, and a 36″ long, 5/8″ ID faucet-connection hose. Hose winds perpendicular to the wall. Color is dark brown.

(E) Wall-Mount Steel Reel—Reel comes with a 60″ long, 5/8″ ID faucet-connection hose. Hose winds perpendicular to the wall. Reel has eight 1/2″ dia. mounting holes (fasteners not included). Color is tan.

(F) Wall-Mount Stainless Steel Reel—The same as the wall-mount steel reel, but more corrosion resistant.

(G) Mobile Steel Reel—Take your garden hose wherever you need it—this reel has four pneumatic tires for mobility. Includes 60″ long, 5/8″ ID faucet-connection hose. Color is tan.

	Ht.	Wd.	Dp.	For Hose Lg.		
D	19″	22 1/2″	20 1/2″	175 ft.	63165T37	$54.36
E	18″	17 1/2″	16 1/2″	200 ft.	7079T18	109.52
F	18″	17 1/2″	16 1/2″	200 ft.	7079T28	227.27
G	34 3/4″	24″	32 1/4″	300 ft.	75225T31	186.76

Garden Hose/Faucet Fittings

Garden Hose Shut-Off Valves

Save trips to the faucet to shut off the water by attaching these fittings to the end of your garden hose. Valves have 3/4″ garden hose thread (GHT) connections on each end (one male and one female) and include washers.

Material	Max. Pressure	Max. Temp.		
Plastic	60 psi	100° F	7082T24	$2.54
Zinc	125 psi	♣	7082T14	3.18
Brass	60 psi	100° F	7082T34	7.40

♣ For cold water use. Not temperature rated.

Garden Hose Multi-Faucet Fittings with Shut-Off Valves

Two-Outlet Brass Fitting

Convert one faucet into two or four convenient outlets. Each outlet has individually operated shut-off valves.

Fittings have 3/4″ garden hose thread (GHT) male and female connections. Washers are included.

Material	Max. Pressure	Max. Temp.		
Two Outlets				
Plastic	60 psi	100° F	6308T12	$3.26
Zinc	60 psi	100° F	6308T13	5.17
Brass	60 psi	100° F	7459T11	10.79
Four Outlets				
Brass	60 psi	100° F	7459T21	22.71

Garden Hose Savers

Flexible Connector

Gooseneck Swivel

Connect these fittings between your hose and faucet to extend the life of your garden hose and eliminate kinks. Connections are 3/4″ garden hose thread (GHT) on each end (one male and one female). Washers are included.

Flexible Connector—Has a reinforced-vinyl connector hose, brass ends with a female plastic coupling, and a flexible steel outer liner.

Gooseneck Swivel—Has a solid brass fitting that swivels 360° to prevent the hose from kinking at the faucet. Fitting has a shut-off valve.

	Lg.		
Flexible Connector	6 1/4″	6221T11	$7.43
Gooseneck Swivel	3″	73935T74	8.89

Quick-Disconnect Garden Hose Couplings

Brass

Plastic

Couplings consist of a quick-disconnect male plug and a quick-disconnect female socket. They have 3/4″ GHT threads.

Open-flow couplings do not have a shut-off valve to stop the flow when the coupling is disconnected.

Single-shut-off style couplings have a valve in the socket, but not the plug. *Single-shut-off style plastic coupling* includes an extra male plug.

Brass couplings have good corrosion resistance. **Plastic** couplings are lightweight and economical.

Open-Flow Brass Coupling	71095T9	$10.72
Single-Shut-Off Style Brass Coupling	71095T11	10.59
Single-Shut-Off Style Plastic Coupling	7470T25	5.25

Garden Hose End Caps

End Cap

End Cap with Chain

These caps have 3/4″ GHT female connections. Both caps include a washer.

End cap is brass.

End cap with chain is zinc and includes a 12″ chain with 1/4″ dia. mounting hole (fastener not included).

End Cap (2/Pkg.)	63745T92	$3.98
End Cap with Chain	63745T94	4.27

Garden Hose Fitting Washers

Washer with Screen

Washers are rubber and fit any 1/2″, 5/8″, or 3/4″ ID garden hose that has a 3/4″ thread size.

	OD	ID	Thick.	Pkg. Qty.		Pkg.
Washer	1″	5/8″	1/8″	10	62215T78	$1.37
Washer with Screen	1″	9/16″	1/8″	3	62215T88	1.80

Barbed Garden Hose Fittings with Threaded End

Also known as hose menders, these can be used to replace damaged or worn hose fittings. Cut off the current fitting and secure a new, compatible fitting to the hose. All have 3/4" garden hose threads (GHT). The screw-on clamp fittings and gripper fittings include a washer.

Screw-On Clamp Fittings

Fittings have an internal barb. Clamp to your hose and tighten with included screws. They provide a more secure hold than clamp fittings. **Nylon** fittings are lightweight with excellent impact and abrasion resistance. **Zinc** fittings have good corrosion resistance.

Male Female

	For 1/2" Hose		For 5/8"-3/4" Hose	
Nylon				
Male	6222T23	$1.80	6222T13	$1.80
Female	6222T24	2.20	6222T14	2.00
Zinc				
Male			6222T33	6.55
Female			6222T34	7.37

Clamp Fittings

Barbed shanks grip the hose; use worm-drive hose clamps to secure the hose to the fitting. Made of brass. The male/female set includes one male and one female coupling.

Male Female
