Use Of Clevite® engine bearing, MAHLE Original® gasket, piston and piston ring, filter, turbocharger and thermostat products in aircraft or other specialty equipment may be a violation of Local, State or Federal Regulatory Agency laws, rules and regulations.

These products are intended solely for automotive applications. Under absolutely NO circumstances should these products ever be used in non-automotive applications including, without limitation, aircraft engines, medical equipment, atomic energy devices or reactors.

“Federal, State and local laws restrict the removal, rendering inoperative, or in some cases the modification of factory installed emission devices or systems. California restricts the use of parts which could increase emissions in vehicles designed for use on public streets or

highways. The sale or installation on emission controlled vehicles of certain emission control components not approved by the California Air Resources Board, which alter or modify the original design or performance of such vehicle's emission control system is prohibited. Some of the parts listed and offered for sale in this catalog may fall within the above restrictions. Such parts are intended only for use on off-road vehicles competing in competitive events or on other types of vehicles which are exempt from the applicable emission control laws. Installation of these parts on vehicles subject to emission control laws may be prohibited.

MAHLE Aftermarket recommends that the applicable emission control laws be reviewed before considering the installation of add-on or modified parts.”

How To Use This Catalog

The Master Gasket Catalog is listed in alphabetical order by manufacturer. Listings are arranged by liter size in ascending order in the main gasket and miscellaneous gasket sections.

Select the appropriate model from the model index and locate the applicable engine. Proceed to the applicable engine in the engine index, which precedes each vehicle listing. Refer to the block shown for that engine, check the "Engine Heading" and select the part type, the applicable year, the model and then the part number. Models are called out only noted when necessary.

VIN / Engine Codes

With this catalog you will find late model vehicle identification code listing (VIN Codes) with each catalog listing. These VIN codes will be helpful in identifying late model engines. The VIN codes may be easily identified from the vehicle identification plate located on the dashboard and may be viewed through the windshield on the driver's side of the vehicle.

Engine designations (Engine Codes) may be contained within the VIN which will be called out as VIN Code or may be not noted separately as Engine Code this may be found on the engine block, consult manufacturer specific materials for further detail.

With over 9,000 gasket part numbers fitting several thousand engines, it is extremely important that you do the following: 1) Know the exact year, make, model engine size and VIN code for the engine you are working on. 2) Read the foot notes and additional information listed for the particular gasket or gasket set you desire. The descriptions below are broadly accurate, but cannot take into account all the possible variations encountered from engine to engine and manufacturer to manufacturer.

Each engine listing is divided into the following: **Main gasket section** includes major gasket sets and related items and is arranged by popularity.

Miscellaneous gasket section includes all engine gaskets and seals not listed in main section and is arranged in alphabetical order.

Each block has the following pertinent information to that part number:

1. Block no.
2. Engine Application Detail
3. Product Category
4. Product Description
5. Year Range
6. VIN and Engine Codes
7. Product and Application Notes
8. Part Number
9. Per Engine Quantity

What is a QR code and how do you use it?

What were originally developed in the early 1990's to track parts in vehicle manufacturing, Quick Response Codes (QR codes) can today be seen virtually everywhere, such as in this catalog and will soon be included on the labels of MAHLE Aftermarket products.

QR Codes are two-dimensional bar codes, but instead of a traditional bar code – consisting of a series of only vertical lines – QR codes are made up of a grid of tiny black squares on a white background in both vertical and horizontal, arranged in the form of a square pattern. QR Codes often direct users to product websites where they can then learn about a particular item or place. They can also be used to provide tracking information for products, routing data on a product label, or contact information on a business card. In order to translate the code, free QR code reader apps for Smartphone devices can

be downloaded and used to uncover the encoded information. Open the reader you downloaded and position your phone over the QR code. Scan it using the camera on your phone. Depending on the QR code reader installed, you will then be shown a link to the web address associated with the QR code, or directed to the page it is linked to.

MAHLE Aftermarket Inc. is committed to being at the forefront of electronic capabilities and the inclusion of QR codes on product labels is the latest of this initiative. Rather than simply taking the user to the MAHLE Aftermarket website, the QR codes placed on MAHLE Original and Clevite product packaging will automatically direct the end-user to a search page – here they can input a product part number to instantaneously retrieve specifications on that particular part.

All the Gaskets Needed to Replace the Intake Manifold

When servicing the intake manifold on late model engines, technicians often need to buy additional gaskets that are not normally found in traditional intake manifold gasket sets. These may include valve cover gaskets, injector o-rings, water and

emissions connections, and other miscellaneous gaskets. MAHLE Original MIS kits include all of the gaskets and seals needed for a technician to properly re-install the intake manifold.

For All Your Tough Sealing Problems...

MAHLE Aftermarket is devoted to providing you the most complete line of sealing products available in the aftermarket.

MAHLE Original® gaskets offer your Solution™ for all your tough sealing problems. Our one-page Solutions™ technical bulletins provide innovative resolutions to today's most difficult sealing problems.

Solutions™ bulletins:

- Define the problem
- Offer resolution
- Give you the part number and applications

If you are looking for the solution for your sealing problem, Solutions™ bulletins are available from your local MAHLE Aftermarket Account Manager, or on the web at www.mahle-aftermarket.com.

A Step Above the Competition...

MAHLE Aftermarket employs application engineering to design engine gaskets as a system. This involves research and testing to apply the optimum mix of materials and technology to each engine application.

The Demand the Best flyers are designed to highlight the benefits MAHLE Original gaskets offer over the competition. Demand the best

from MAHLE Original, with their unmatched engineering resources and experience to being first in technical innovation and service information.

Demand the Best™ flyers are available from your local MAHLE Aftermarket Account Manager, or on the web at www.mahle-aftermarket.com.

MAHLE Original has a Black Diamond™ coated 5-LAYER MULTI-LAYERED STEEL HEAD GASKET for the Ford Power Stroke® engine!

These MAHLE Original® head gaskets, with advanced Black Diamond™ coating technology are:

- Constructed of (5) five stainless steel layers
- Utilizing patented integrated push rod locators
- Coated with a fluoroelastomer (rubber) coating

MAHLE ORIGINAL **OE**

The 6.4L MAHLE Original gasket has 5 layers.
The 6.4L OE gasket has only 4 layers.

ORIGINAL

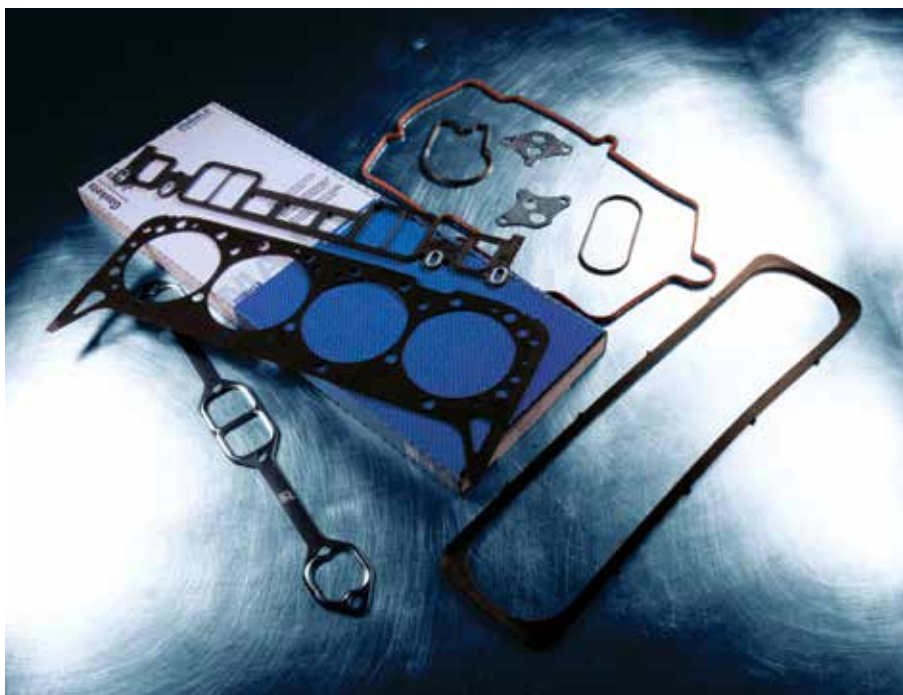

The Company That's Been Behind Your Gaskets is Now The Brand On Them

The gasket product team at MAHLE Aftermarket has worked for decades to bring gaskets to the independent aftermarket under the Victor Reinz brand. Most of this team pre-dates the acquisition of Dana's engine parts division in 2007. Since that 2007 transaction, and the commitment from MAHLE to develop the very best in gasket quality and coverage, the Victor Reinz brand (under license from Dana) surged to the forefront of the gasket aftermarket providing the best in product and service. As MAHLE moves on from the Victor Reinz brand, the expansion of the MAHLE Original brand to include gaskets brings with it all of the hallmarks that made MAHLE Aftermarket one of the top gasket suppliers in the industry. All of this intellectual property remains with MAHLE,

including product images, set contents (bills of materials), part numbers and UPC codes, even cataloging and other data management items remain within MAHLE Aftermarket and will be at the forefront of the MAHLE Original gasket line.

Exploration of the value proposition for MAHLE Original gaskets reveals many attributes important to all channel partners. While every one of them is important, the biggest focus is on the MAHLE Original Gasket core competencies:

- OE Form, Fit, and Function
- Coverage
- Set Contents
- Packaging

General Gasket Installation Tips

1 **CLEAN** Mating Surfaces

All foreign material should be removed from sealing surfaces. Debris not removed can prevent a good seal. Sometimes, debris can even damage the block, gasket, and head. You also may wish to use a degreaser. On iron components, use a scraper and wire brush. Use a non-metallic scraper on aluminum surfaces since they are easily damaged. Careful when using conditioning discs. Some discs contain aluminum oxide, a very hard and aggressive abrasive. Cover oil and coolant ports when using and clean surfaces with a cleaning solution.

2 **CHECK** Surface Finish

Preparing the engine surfaces is crucial to sealing. Utmost care must be utilized to insure OEM mating surface finish and flatness is maintained. The use of any tool that alters the surface is strongly discouraged. High speed pneumatic or electrically powered rotary tools that utilize surface preparation discs or brushes can quickly damage the mating surfaces. Rigid metal scrapers can also scratch when cleaning aluminum or plastic surfaces and must be avoided. This is especially true when installing Multi-Layered Steel (MLS) gaskets. The flatness and surface finish is important to sealing the engine, the aesthetic appearance of the surface is not. If surfaces are to be re-machined insure OEM surface quality is maintained.

3

REPLACE *TTY Fasteners*

Most modern engines use Torque-to-Yield cylinder head bolts. Engine manufacturers specify this design to obtain a more accurate clamping force on the surface of the gasket. These bolts use a “Torque turn” method of tightening. Typically, the bolts are torqued to a specification, then are turned an additional specified number of degrees. This stretches the bolt to its yield point for optimal application of clamp load. **DO NOT attempt to reuse a Torque-to-Yield bolt.** Used Torque-to-Yield bolts are permanently stretched and will not apply the proper load to the gasket to maintain a long term seal.

4

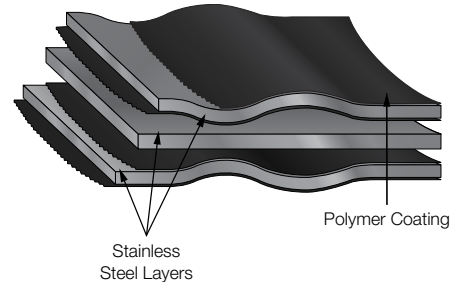

CAUTION *Install Dry*

MAHLE Original head gaskets are designed to be installed dry. Do NOT apply a sealant of any kind to MAHLE Original head gaskets. Supplemental sealants will attack the precision elastomer coatings and result in an improper clamping force on the gasket. **USE RTV ONLY WHEN DIRECTED!**

Head & Manifold Gaskets

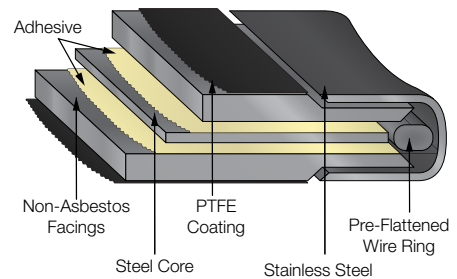

Multi-Layered Steel Head & Manifold Gaskets

- Maintains all OE tolerances and requirements
- Polymer coated for positive fluid seal
- Ultimate temperature resistance
- Lower clamping force means less bore distortion

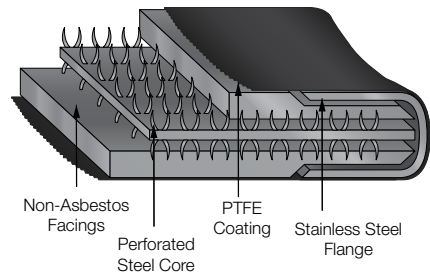

Solid Core Composite Head and Exhaust Manifold Gaskets

- Made of PTFE coated non-asbestos facing material
- Chemically bonded to a solid steel core
- Solid steel core provides superior radial strength
- Pre-flattened wire ring withstands higher cylinder pressures

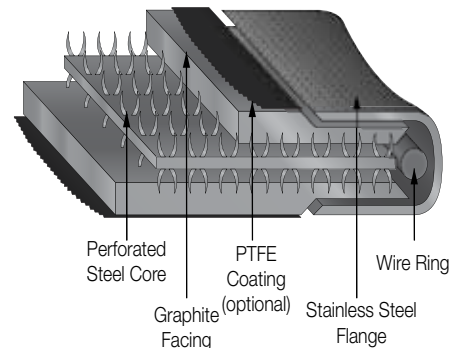

Composite Manifold Head Gaskets

- PTFE coating ensures a secure seal through thermal expansion
- Removes clean from block without sticking
- Never need to re-torque
- Stainless steel core available for marine applications

Graphite Head and Manifold Gaskets

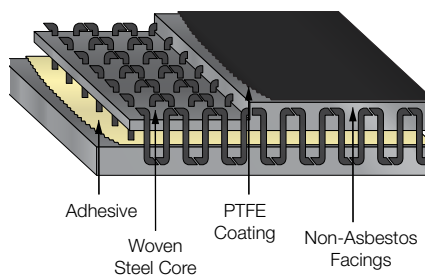

- Stays cool at temperature up to 1800° F
- Designed to seal minor surface irregularities
- No re-torque required
- PTFE coating optional

Valve, Timing Cover, Oil Pan & Other Gasket

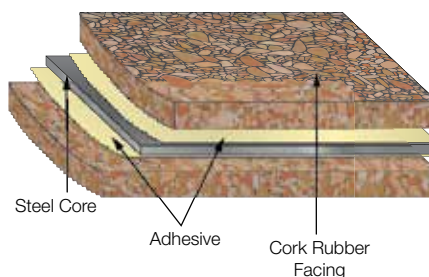

Performance Composite Timing Cover, Water Pump and Differential Gaskets

- Contains a woven, perforated steel core
- Chemically and mechanically secured to composition facing
- Provides superior strength for sealing irregular surfaces
- PTFE coated to resist fretting

Cork Oil Pan, Valve Cover and Differential Gaskets with Metal Carrier

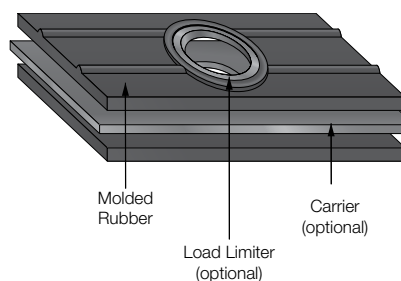

- Prevents over-tightening
- Improves torque retention
- Simplifies installation
- Highly chemical resistant

Molded Rubber Valve Cover and Oil Pan Gaskets

- No joints means increased durability
- Sealants not required*
- Compression limiters prevent over-tightening
- No torque loss or shrinkage

*Except at t-joints

Gasket Terminology

Head Set

Contains all the gaskets necessary to remove and replace a cylinder head on an engine.

Lower Set

When combined with a Head Set, contains all the gaskets necessary to completely assemble an engine unless otherwise noted.

Engine Kit Gasket Set/Full Set

Contains all the gaskets necessary to completely assemble an engine.

Cylinder Head Gasket

OE style, replacement head gasket for the model years listed. Head gaskets are sold individually. Some engines use a left and right gasket and some engines require gaskets of a specific thickness, so be sure to have all the details when you spec the gasket part number.

Cylinder Head Bolt Set

Contains all the head bolts necessary to replace one cylinder head.

Valve Cover Set

Contains the valve cover gasket(s), spark plug tube seals when required and any grommets required to remove and replace the valve cover. One set does both valve covers on V6, V8, and V10 engines. On some popular engines, valve cover gaskets are sold individually. When sold individually, tube seals and grommets are not included.

Valve Stem Oil Seal, Exhaust/Intake

This kit contains enough valve stem seals to replace all the exhaust and/or intake seals on one engine.

Manifold Set, Exhaust/Intake

This set contains the gaskets needed to replace an exhaust/intake manifold for a V6, V8 or V10 engine.

Manifold Master Set, Intake

Also referred to as a Manifold Installation Set, this set contains premium intake manifold gaskets, valve cover gaskets and all associated and related gaskets needed to replace an intake manifold.

Intake Manifold Bolt Set

Original equipment style replacement manifold bolt set for engines requiring the technician replace the manifold bolts when removing the intake manifold.

Plenum Chamber Gasket

For engines having a plenum chamber (upper intake manifold), this is an original equipment style replacement gasket.

Oil Pan Gasket

Contains the gasket(s) required to remove and replace an oil pan.

Rear Main Seal Set

Contains both the rear main seal/rear main seal carrier and the rear main seal carrier gasket when required.

Timing Cover Set

Contains the timing cover seal and where required, the timing cover gasket(s). Many popular engines have the timing cover seal and gaskets available separately as well as in a set, so check your engine listing.

L'utilisation de coussinets et de pièces de moteur Clevite®, de segments de piston et de joints d'étanchéité MAHLE Original® dans des avions ou d'autres types d'équipement spécialisé peut contrevenir aux lois et aux différentes réglementations municipales, provinciales ou fédérales.

Ces produits sont conçus uniquement pour les véhicules automobiles. Ces produits ne doivent en AUCUN cas être utilisés pour des applications autres que les véhicules automobiles, y compris, mais sans s'y limiter, des moteurs d'avion, du matériel médical, des instruments ou des réacteurs d'énergie atomique.

Les lois municipales, provinciales et fédérales restreignent le retrait, la mise hors de fonctionnement et, dans certains cas, la modification des dispositifs ou des systèmes antipollution installés en usine. L'État de Californie limite l'utilisation de pièces qui pourraient accroître les émissions polluantes des véhicules conçus pour circuler sur les voies

ou autoroutes publiques.

Il est strictement interdit de vendre — ou d'installer sur des véhicules dotés d'un système antipollution — certains composants antipollution non approuvés par le California Air Resources Board et qui modifient la conception ou la performance d'origine du système antipollution de ces véhicules. Certaines des pièces figurant dans ce catalogue peuvent être assujetties à de telles restrictions. Ces pièces sont destinées uniquement aux véhicules hors route utilisés dans des épreuves de compétition ou à d'autres types de véhicules non touchés par les lois en vigueur sur le contrôle des émissions. L'installation de ces pièces sur des véhicules assujettis aux lois sur le contrôle des émissions peut être interdite.

MAHLE Aftermarket recommande de prendre connaissance des lois en vigueur sur le contrôle des émissions avant de procéder à l'installation de pièces complémentaires ou modifiées.

Téflon et Viton sont des marques déposées de DuPont Corporation.

Comment utiliser ce catalogue

Le catalogue principal des joint d'étanchéité est classé en ordre alphabétique croissante, par fabricant. Ensuite les applications sont listées en ordre croissant de cylindrée dans la section principale de joint et dans la section joints divers.

supplémentaire au sujet du jeu de joints dont vous pensez avoir besoin. Les descriptions suivantes sont générales, et ne peuvent tenir compte de toutes les variations rencontrées d'un moteur à l'autre et d'un fabricant à l'autre.

Sélectionner le modèle à partir de l'index et localiser le moteur approprié. Ensuite procéder à l'index des moteurs

Chaque liste de moteur est divisée en deux sections:

Numéros de série et codes moteur

Ce catalogue vous permet d'identifier les modèles récents par Numéro d'identification de véhicule (No. de série) Les N.I.V. se trouvent facilement sur chaque véhicule, habituellement par le pare-brise du côté du conducteur.

La section "Joints principales" inclut les joints les plus courants et sont identifiés en ordre de popularité.

La section "Joints divers" inclut tous les joints non-listés dans la section principale et classés en ordre alphabétique.

Les codes de moteur peuvent être contenus dans le N.I.V. ou séparément sur le moteur, habituellement sur le bloc moteur. Consulter le fabricant pour plus de détails.

Chaque composant l'information suivante:

1. Numéro du block
2. Détails application moteur
3. Catégorie de produit
4. Description de produit
5. Années de productions
6. No. de série et code moteur
7. Notes sur produits et applications
8. No. de pièce
9. Quantité par moteur

Avec au delà de 9,000 numéros de joints couvrant plusieurs dizaines de milliers de moteurs, il est extrêmement important que vous connaissiez: 1. L'année exacte du moteur, marque, modèle, cylindrée et le code du moteur du véhicule sur lequel vous travaillez. 2. Lisez toutes les remarques et l'information

Qu'est-ce qu'un code QR et comment l'utiliser?

Le code QR fût développé originalement pour l'identification de pièces pendant l'assemblage et la construction d'automobiles. Les codes QR (Quick Response Codes) sont maintenant utilisés presque partout, tel que dans les catalogues et sur les emballages des produits MAHLE Aftermarket.

Les codes QR sont bi-dimensionnels, contrairement aux codes barres traditionnels qui sont constitués de lignes verticales seulement, les codes QR sont formés de petits carreaux noirs sur fond blanc, dans les deux directions horizontales et verticales placés en forme carré. Les codes QR dirigent les utilisateurs vers des sites WEB, où ils peuvent trouver de l'information pertinente aux produits, par le biais d'un téléphone intelligent, ou

d'un lecteur de code QR. Ils peuvent aussi fournir de l'information pour le suivi, et l'étiquetage. De nombreuses applications pour téléphone intelligents peuvent être téléchargées et utilisées pour découvrir de l'information supplémentaire. À partir de votre téléphone intelligent, ouvrez votre logiciel de lecture, ensuite lire le code QR, votre téléphone intelligent vous amènera à l'adresse internet associée à ce code.

MAHLE Aftermarket Inc. innove toujours en vous offrant les possibilités d'utiliser la technologie. Les codes QR ont l'avantage de vous amener sur notre site web à l'endroit précis du produit ou de l'information que vous cherchez, en vous référant au code QR de nos catalogues ou produits.

Tous les joints requis pour le remplacement de collecteurs d'admission

Lors du service de collecteur d'admission sur les nouveaux modèles de véhicules, les techniciens ont souvent besoin d'acheter des joints supplémentaires qui ne sont pas inclus dans les jeux de joints de collecteur d'admission traditionnels. Ces pièces sont souvent de joints toriques, des joints pour les couvercles de soupapes etc. Les kit MAHLE Original MIS inclus toutes les pièces requise pour compléter le travail.

Pour tous vos problèmes d'étanchéité persistant...

MAHLE Aftermarket s'engage à vous fournir la gamme la plus complète de produits d'étanchéité disponible sur le marché d'après-vente.

Les produits d'étanchéité MAHLE Original offre une solution à tout vos problèmes d'étanchéité. Nos bulletin d'une page "Solution" fournissent des solutions innovatrices pour les problèmes les plus difficiles.

Bulletins "Solutions"

- Définition du problème
- Options de résolution
- Applications et numéros de pièces

Si vous êtes à la recherche de solutions pour vos problèmes d'étanchéité, les bulletins Solutions sont disponibles par le biais de votre représentant locale MAHLE Aftermarket, ou sur notre site web au www.mahle-aftermarket.com sous la rubrique Produits et Soutiens.

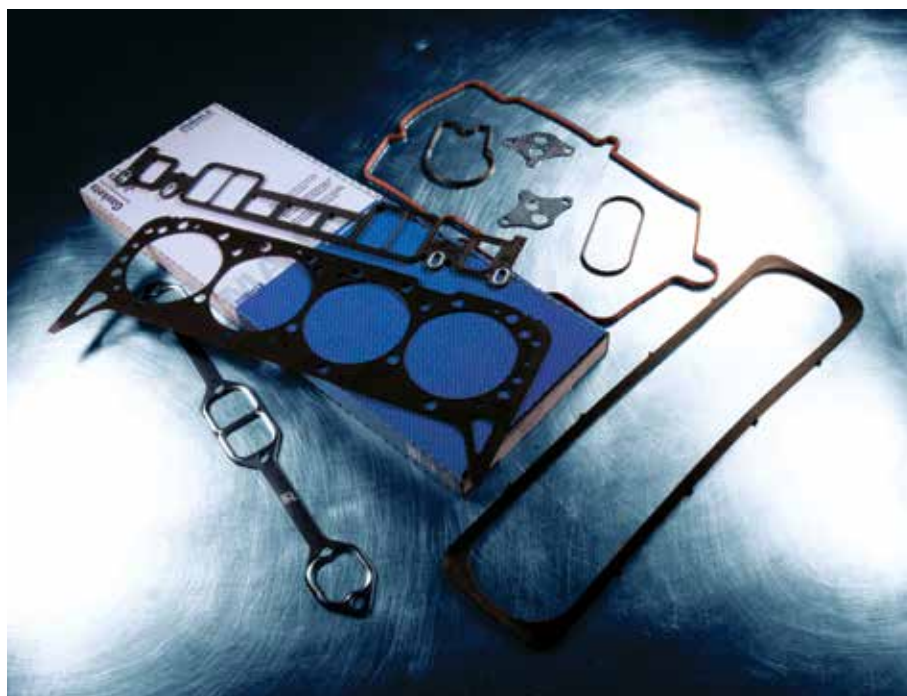

La société qui se cachait derrière vos joints est maintenant la marque de confiance

L'équipe en charge des joints chez MAHLE Aftermarket a travaillé pendant des décennies pour fournir des joints sous la marque Victor Reinz. Cette équipe a été formée bien avant l'acquisition de la division des pièces de moteur de Dana en 2007. Depuis cette transaction 2007, l'engagement de MAHLE pour développer la meilleure qualité des joints et des applications, la marque Victor Reinz (sous licence de Dana) a fait un bond dans le domaine à l'après-vente de joints, et au niveau des meilleurs produits et du service. Comme MAHLE quitte la marque Victor Reinz, l'expansion de la marque MAHLE Original pour inclure des joints apporte avec elle toutes les caractéristiques qui ont fait de MAHLE Aftermarket l'un des fournisseurs de joints les plus qualifiés dans l'industrie. Tout cela la propriété intellectuelle reste avec MAHLE, y compris des images de produits, les ensembles de joints (nomenclatures), les numéros de pièce

et les codes CUP, même les catalogues et les autres éléments de gestion des données restent dans MAHLE Aftermarket et sera à la fine pointe de ligne de joints MAHLE Original.

Exploration de la proposition de valeur pour les joints MAHLE Original révèle de nombreux attributs importants pour tous les partenaires des distributions. Bien que chacun d'eux est important, le plus grand accent est mis sur les compétences de base MAHLE Original:

- Forme, fonctionnalité et conformité au produits d'origine
- Couverture
- Contenu des ensembles
- Emballage

Conseils généraux d'installation des joints de culasse

1

NETTOYER

Les surfaces de contact

Toute matière étrangère devrait être enlevé des surfaces d'étanchéité. Tout débris peut nuire à l'étanchéité. Il est même possible que des débris endommagent le bloc, le joint, et la culasse. Il est préférable d'utiliser un dégraissant. Sur les éléments en fer, utiliser un grattoir et une brosse métallique. Utiliser un grattoir non métallique sur les surfaces en aluminium, car elles s'endommagent facilement. Attention lors de l'utilisation de disques de reconditionnement. Certains disques contiennent de l'oxyde d'aluminium, un abrasif très dur et agressif. Couvrir les orifices d'huile et de liquide de refroidissement pendant l'utilisation et nettoyer les surfaces avec une solution de nettoyage.

2

VÉRIFIER

Le fini de surface

La préparation des surfaces du moteur est cruciale pour l'étanchéité. Le plus grand soin doit être porté pour assurer que la finition de la surface d'accouplement et la planéité d'origine sont maintenues. L'utilisation de tout outil pouvant altérer la surface est fortement déconseillée. Les outils pneumatiques ou électriques rotatifs à haute vitesse qui utilisent des disques de préparation de surface ou des brosses peuvent rapidement endommager les surfaces de contact. Les grattoirs métalliques rigides peuvent également rayer lors du nettoyage des surfaces en aluminium ou en plastique et doivent être évités. Cela est particulièrement vrai pour l'installation de joints en acier multicouches. La finition des surfaces et la planéité sont importantes pour l'étanchéité du moteur, l'aspect esthétique des surface ne l'est pas. Si les surfaces doivent être ré-usinées s'assurer que la qualité d'origine de la surface est maintenue.

3

REEMPLACER

Les fixations à déformation

La plupart des moteurs modernes utilisent des vis de culasse à déformation. Les fabricants de moteurs utilisent cette conception pour obtenir une force de serrage plus précise sur la surface du joint. Ces vis se fixent selon la méthode dite « de serrage supplémentaire ». En règle générale, les vis sont serrées selon les spécifications, puis on leur donne un tour supplémentaire d'un nombre spécifié de degrés. Cela étire la vis à son point de limite élastique pour une application optimale de la charge de serrage. NE PAS tenter de réutiliser une vis à déformation. Les vis à déformation s'étirent de façon permanente et ne seront pas en mesure d'appliquer la couple de serrage correcte au joint pour maintenir une étanchéité à long terme.

4

ATTENTION

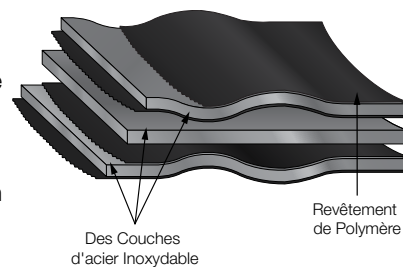

Installer à sec

Les joint de culasse MAHLE Original sont conçus pour être installés à sec. N'appliquer AUCUN produit d'étanchéité à un joint de culasse MAHLE Original. Tout produit d'étanchéité supplémentaire attaquera les revêtements élastomères de précision et provoqueront un couple force de serrage incorrecte sur le joint de culasse. **N'APPLIQUER AUCUN ENDUIT (RTV) SAUF SUR L'INSTRUCTION DU MANUFACTURIER!**

Jointts tête de collecteur

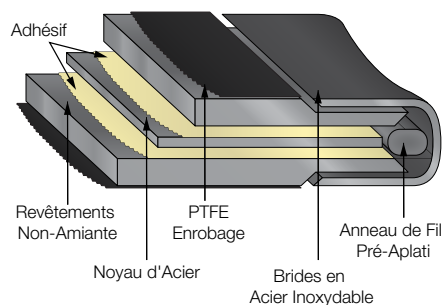

Jointts en acier à couches-multiples pour culasse et collecteur d'échappement

- Offre les mêmes exigences que l'équipement d'origine
- Couche de scellement au polymère Intellicoat
- Ultime résistance à la chaleur
- Force de serrage réduite résultant à mois de distortion

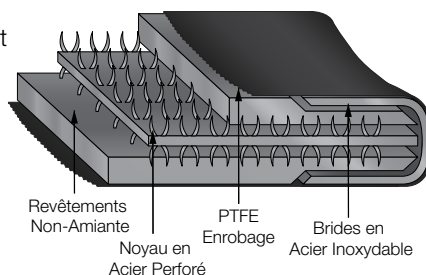

Tête noyau composite solide et d'échappement jointts de collecteur

- Surface de scellement fait de PTFE sans amiante
- Monté sur acier pour assurer une force radiale accrue
- Anneau métallique pré-formée pour retenir la pression provenant des cylindres

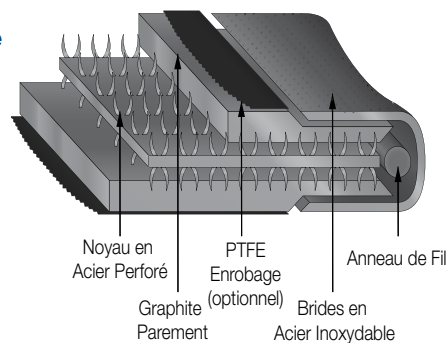

Jointts de culasse de composite

- Surface en PTFE pour assurer un scellement résistant aux expansions thermiques
- S'enlève facilement du bloc sans laisser de résidus
- Aucun besoin de resserrage
- Disponible en acier inoxydable pour les applications marines

Jointts de culasse et de collecteur en graphite

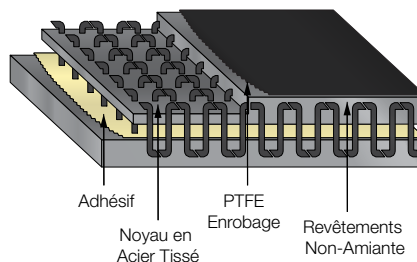

- Résiste à des températures de 1800F
- Conçu pour sceller les surface avec petites imperfections
- Pas de resserrage requis
- Surface au PTFE optionnel

Matériaux pour joints de soupape, distribution, carter d'huile et autres

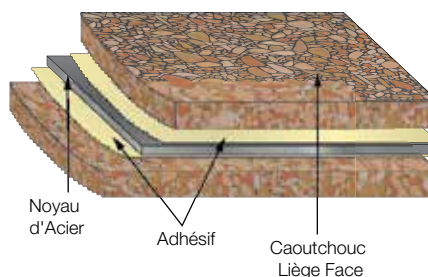

Couvercle de distribution en composite, pompe à eau et joints de différentielles

- Contient du métal tissé
- Matériel chimiquement et mécaniquement attaché
- Offre force supérieure pour sceller des surface irrégulières
- Enduit de PTFE pour résister à l'usure PTFE enduit

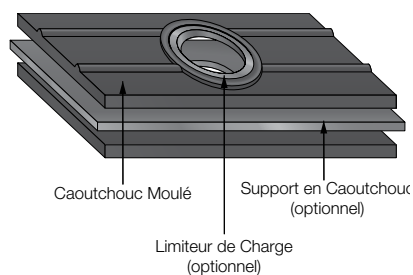

Joints de carter d'huile de liège, couvercle de différentielles avec support métallique

- Prévient le serrage excessif
- Améliore la retenue de serrage
- Simplifie l'installation
- Très résistant aux produits chimiques

Joints de couvercle de soupape, carter d'huile en caoutchouc moulé

- Sans joint augmente la durabilité
- Aucun scellant requis
- Limiteurs de compression pour éviter un surplus de serrage
- Aucune perte de serrage ou diminution

Terminologie Joints

Jeux pour culasse

Contient tous les joints nécessaires pour enlever et remplacer une culasse sur un moteur.

Jeux de joints inférieurs

Lorsque combiné avec un ensemble de joints de culasse, ils contiennent tous les joints nécessaires pour re-assembler un moteur, sauf indication contraire.

Jeux de joint pour moteur complet

Contient tous les joints nécessaires pour assembler un moteur complet.

Joint de culasse

Conforme au produit d'origine pour les modèles listés. Les joints de culasse sont vendus individuellement. Certains moteurs utilisent un joint gauche et droit et requiert une certaine épaisseur. Assurez-vous d'avoir tous les détails avant de commander.

Jeux de boulons pour culasse

Contient les boulons nécessaires pour remplacer une culasse.

Jeux de joints de couvercle de soupape

Contient les joints de couvercle de soupape, les joints de tube de bougie d'allumage en cas de besoin et de tout œillets nécessaires pour enlever et remplacer le couvercle de soupape. Un ensemble couvre les V6, V8 et V10. Sur certains moteurs populaires, les joints de couvercle de soupape sont vendus individuellement. Lorsqu'ils sont vendus individuellement, joints tubulaires et œillets ne sont pas inclus.

Joints pour tiges de soupapes et collecteur d'échappement

Ce jeu comprend suffisamment de joints pour tiges de soupape pour le remplacement complet (admission et échappement) sur un moteur.

Jeux pour joints de collecteur d'admission et d'échappement

Cet ensemble contient les joints nécessaires pour remplacer un échappement / collecteur d'admission pour un V6, V8 ou V10.

Jeux d'installation pour collecteur d'admission

Connu aussi sous le nom de "Manifold Installation Set" ce jeu contient toutes les pièces requises pour son remplacement.

Jeux de boulons pour collecteur d'admission

Ces boulons sont de style "Équipement d'origine" pour les moteurs nécessitant le remplacement.

Jeux de joint pour carter à l'huile

Contient le ou les joints nécessaires pour remplacer le carter à l'huile.

Jeux pour joint principal arrière

Contient les deux joints arrière principaux, porte-joint si requis.

Jeux pour joints de couvercles de distribution

Contient les joints pour le couvercle si requis. Des joints individuels sont souvent disponibles pour plusieurs moteurs et sont vendus séparément.

El uso de productos MAHLE Original y Clevite en aeronaves u otro tipo de equipo especial, puede ser una violación de leyes locales, estatales o de la Agencia Federal de Regulaciones.

Estos productos están destinados exclusivamente para aplicaciones automotrices. Bajo ninguna circunstancia deben utilizarse en aplicaciones que no sean automotrices, incluyendo sin limitaciones a motores de aeronaves, equipos médicos, aparatos de energía atómica y reactores.

Leyes federales, estatales y locales restringen el retiro, hacer inoperante o en algunos casos la modificación de los dispositivos o sistemas de emisiones de fábrica. El estado de California restringe el uso de componentes que puedan incrementar emisiones en las unidades utilizadas en calles o carreteras públicas, además de la

venta o instalación de ciertos componentes no aprobados por el "California Air Resources Board," los cuales alteran o modifican el diseño original del sistema de control de emisiones. Algunos de los componentes indicados y ofertados para venta en este catálogo pueden encontrarse dentro de las restricciones antes descritas. Tales componentes están destinados a utilizarse en vehículos todo terreno (off-road) que participan en diferentes competencias o en otro tipo de vehículos que están exentos de las leyes aplicables para el control de emisiones. La instalación de estos componentes en vehículos sujetos a dichas leyes pueden estar prohibidos.

MAHLE Aftermarket recomienda revisar las leyes aplicables para el control de emisiones antes de considerar. La instalación de este tipo de componentes o partes modificadas.

Teflon y Viton son marcas registradas de DuPont Corporation.

Como Utilizar este Catálogo

El Catálogo Master de Juntas se encuentra en orden alfabético por fabricante. Los listados están organizados por el tamaño en litros de forma ascendente en las secciones principales para juntas y miscelaneos.

Seleccione el modelo apropiado desde el índice y localice el motor que aplica. Diríjase al motor que aplica de acuerdo al índice, el cuál precede a cada lista de vehículos. Refiérase al bloque que muestra el motor, revise el "Título del Motor" y elija el tipo de pieza, el año de aplicación, el modelo y posteriormente el número de parte. Los modelos son mencionados solo cuando es necesario hacerlo.

Código de Motor / VIN

Con este catálogo podrá encontrar los códigos de identificación (Códigos VIN) con cada lista del catálogo. Estos códigos VIN serán útiles al identificar motores muy recientes. Los códigos VIN pueden ser fáciles de identificar en la placa de identificación del vehículo ubicada sobre el tablero y puede verse a través del parabrisas del lado del conductor.

La designación del motor (Código de Motor) puede estar contenida dentro del código VIN o puede encontrarse de forma separada como Código de Motor, esto puede ser localizado en el bloque del motor, consulte materiales específicos por cada fabricante para más detalles.

Con más de 9.000 números de parte en juntas y

cubriendo varios miles de motores, es de suma importancia hacer lo siguiente: 1) Conocer la fecha exacta, marca, modelo, tamaño y el código VIN del motor que se está trabajando. 2) Leer las notas al pie de página y la información adicional para alguna junta en particular o para algún juego de juntas que usted desee. Las siguientes descripciones son en gran medida exactas, pero no se puede tener en cuenta las posibles variaciones encontradas de motor a motor y de fabricante a fabricante.

Cada listado de motores esta dividido como sigue: **La sección principal de juntas** incluye los juegos más importantes y los artículos relacionados, los cuales están organizados por popularidad.

La sección de miscelaneos incluye todas las juntas y sellos que no aparecen en la sección principal, además de encontrarse ordenadas en orden alfabético.

Cada bloque tiene la siguiente información para cada número de parte:

1. No. de Bloque
2. Detalles de la Aplicación
3. Categoría de Producto
4. Descripción de Producto
5. Rango de Años
6. Código de Motor / VIN
7. Notas Adicionales

¿Que es y como utilizar un código QR?

Lo que fue desarrollado originalmente en la década de 1990 para rastrear partes en la fabricación de vehículos, los Códigos de Respuesta Rápida (códigos QR) hoy en día se pueden ver en todas partes, como en este catálogo y muy pronto se incluirá en las etiquetas de los productos MAHLE Aftermarket.

Los Códigos QR son básicamente dos códigos de barras en dos dimensiones, pero en lugar de un código tradicional - consistente de series de líneas verticales - los códigos QR están costitudos por una rejilla o pequeños cuadron negros sobre un fondo blanco hacia ambos lados horizontal y vertical, dispuestos en forma de un patrón cuadrado. Los códigos QR regularmente dirigen al usuario al sitio web del producto donde se puede obtener más información de los mismos. Pueden de igual forma ofrecer información de rastreo de productos, rutas o información de contacto en una tarjeta de presentación. Para traducir el código, existen aplicaciones gratuitas

para Smartphones que pueden descargarse y ser utilizadas para leer la información codificada. Abra dicha aplicación y coloque su telefono sobre el código. Escanee el código utilizando la camara de su telefono. Dependiendo del código en cuestión, se mostrará un link hacia la pagina web o será dirigido directamente al sitio.

MAHLE Aftermarket Inc. esta comprometido en estar a la vanguardia de las capacidades electronicas y la inclusión de estos códigos sobre las etiquetas de sus productos es la más reciente de ellas. En lugar de llevar al usuario solo al sitio de MAHLE Aftermarket, el código QR situado en las etiquetas de los empaque envia al usuario a la sección de busqueda correspondiente a los productos MAHLE Original o Clevite – aquí ellos pueden ingresar un número de parte para obtener de forma instantánea especificaciones de ese número en particular.

Todas las Juntas necesarias para reemplazar el Múltiple de Admisión

Cuando se le da mantenimiento al Múltiple de Admisión en motores recientes, los técnicos a menudo necesitan comprar más componentes que no se encuentran comunmente en los juegos de juntas tradicionales. Estos pueden incluir las juntas para tapas de punterías, o-rings

para inyectores, juntas para toma de agua o conexiones y otro tipo de miscelaneos. Los juegos MAHLE Original MIS incluyen todas las juntas y sellos necesario para que un técnico re-instale adecuadamente el múltiple de admisión.

Para Todos los Problemas de Sellado

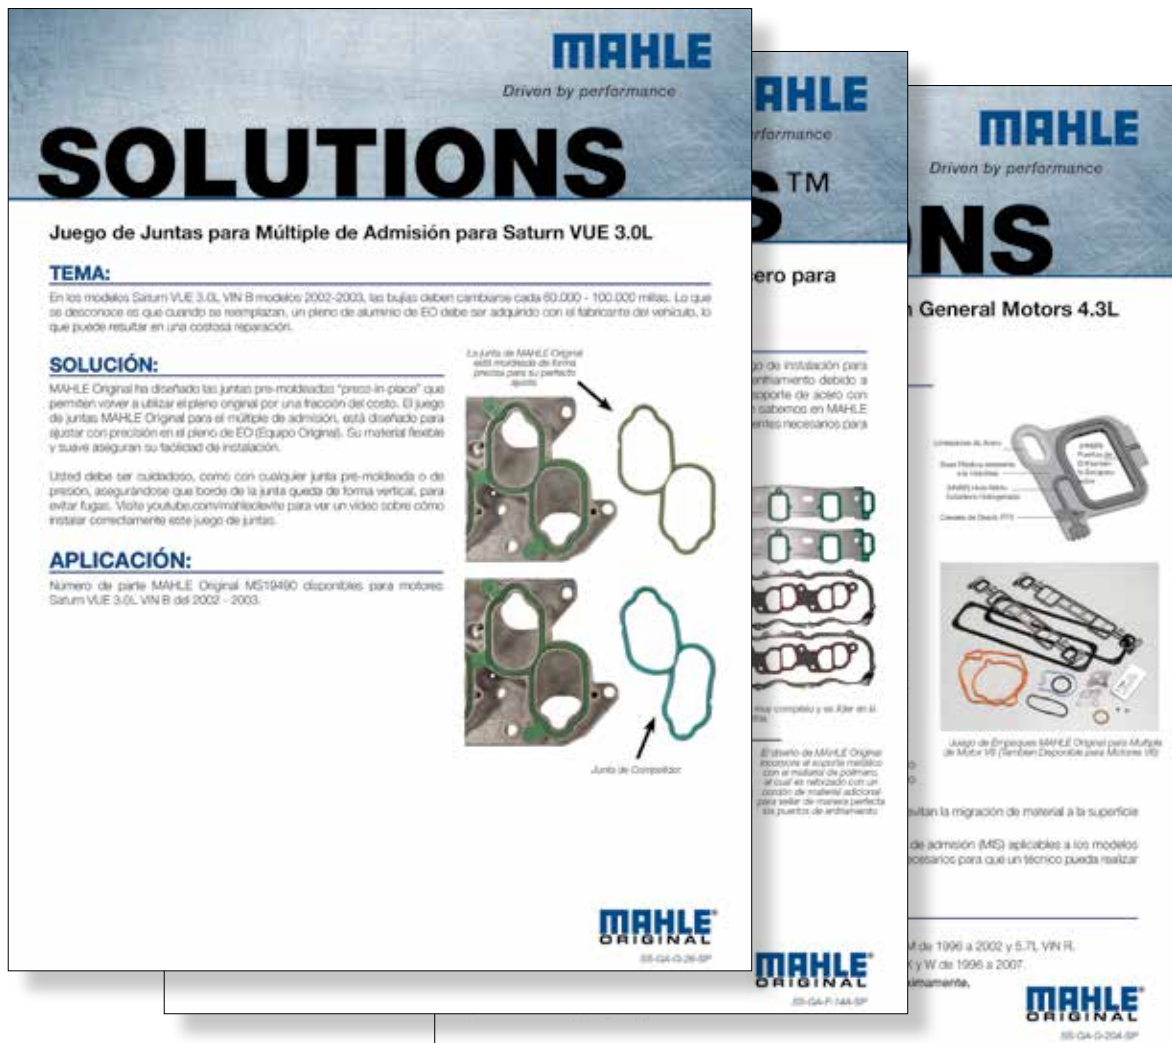

MAHLE Aftermarket esta dedicado a proporcionar la línea de productos para sellado más completa y disponible del mercado.

Las juntas MAHLE Original® tienen la Solución (Solution™) para todos los problemas de sellado. Nuestro boletín técnico Solutions™ proporciona soluciones innovadoras para los problemas de sellado más difíciles de hoy día.

Boletines Solutions™:

- Definen el problema
- Ofrecen una solución
- Le dan el número de parte y aplicaciones

Si busca la solución a diferentes problemas de sellado, los boletines Solutions™ están disponibles a través de su asesor MAHLE, o a través de www.mahle-aftermarket.com.

Siempre Un Paso Adelante...

Victor Reinz utiliza ingeniería aplicada para desarrollar sistemas y juntas para motor. Esto implica el desarrollar y probar diferentes materiales para aplicar la mezcla optima en materiales y tecnología a cada motor.

Los folletos Demand the Best son diseñados para resaltar los beneficios que MAHLE Original ofrece sobre sus competidores. El concepto

Demand the best de MAHLE Original, con sus inmejorables recursos de ingeniería y experiencia, se encuentra a la cabeza en servicios de innovación e información.

Los folletos Demand the Best™ estan disponibles a través de su asesor MAHLE Aftermarket, o a través de www.mahle-aftermarket.com.

DEMAND THE BEST

¡MAHLE Original tiene la junta para cabeza del motor Power Stroke® de Ford con el recubrimiento Black Diamond™ y 5 capas de acero!

Estas juntas para cabeza de MAHLE Original®, con su avanzada tecnología en su recubrimiento Black Diamond™ son:

- Construidas con (5) cinco capas de acero inoxidable
- Utilizan localizadores de varillas de empuje integrados y patentados
- Protegidas con un recubrimiento fluoraelastómero (polímero)

MAHLE ORIGINAL	EO
	
La junta MAHLE Original para el motor 6.4L tiene 5 capas.	La junta de EO para el motor 6.4L tiene solo 4 capas.

En el fotograma se muestra el no. de parte 54037454L, en número 5403545354 (EO) también están disponibles.

La capa adicional ayuda a reducir el levantamiento de la cabeza y mantener un sello superior para la combustión.

MAHLE ORIGINAL

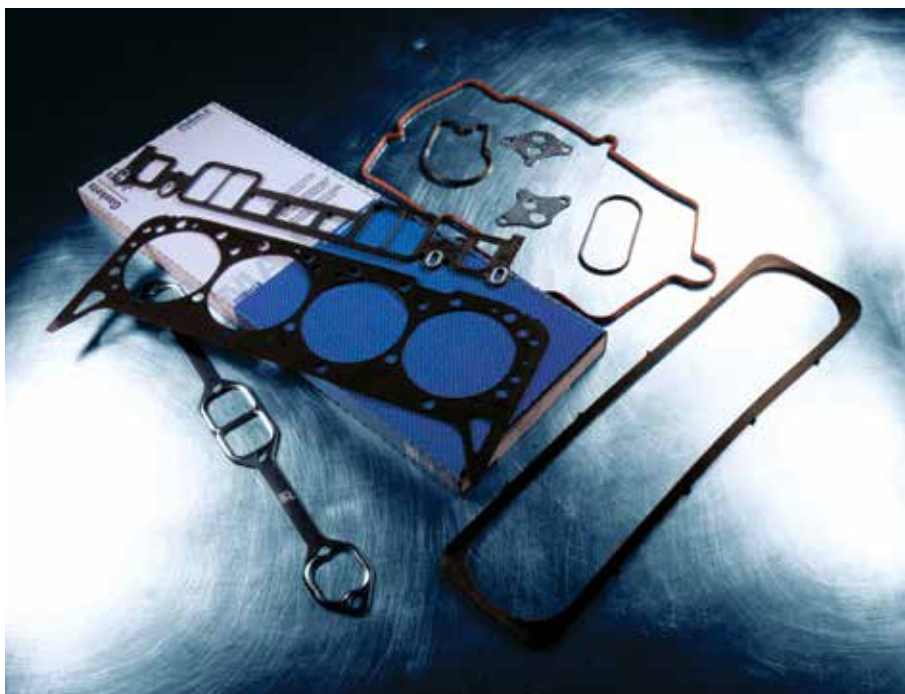

La empresa que ha estado detrás de sus Juntas es ahora La Marca En Ellas

El equipo de desarrollo de producto de juntas en MAHLE Aftermarket ha trabajado durante décadas para traer juntas al mercado independiente de posventa bajo la marca Victor Reinz. La mayor parte de este equipo es el mismo de antes de la adquisición de la división de componentes de motor de Dana en 2007. Desde esa transacción en 2007, y el compromiso de MAHLE para desarrollar juntas con la mejor calidad y cobertura, la marca Victor Reinz (bajo licencia de Dana) estuvo a la vanguardia del mercado de posventa de juntas, proporcionando el mejor producto y servicio. MAHLE deja la marca Victor Reinz, y expande la marca MAHLE Original para incluir juntas, trayendo consigo el sello de calidad que ha hecho de MAHLE Aftermarket uno de los mayores proveedores de juntas en la industria. La propiedad intelectual permanece con MAHLE, incluyendo imágenes

de productos (listados de materiales), números de parte y códigos UPC, incluso los sistemas de catalogación y datos permanecen con MAHLE Aftermarket y estarán en el primer plano de la línea de juntas MAHLE Original.

El análisis de la propuesta de valor de las juntas MAHLE Original muestra muchos atributos importantes para los socios de todos los canales. Si bien cada uno de ellos es importante, la mayor atención se centra en las características principales de las juntas MAHLE Original:

- OE – Form, Fit and Function (Forma, ajuste y funcionamiento OE)
- Cobertura
- Contenido de los juegos
- Empaque

Consejos generales de instalción de la junta

1

LIMPIAR

Emparejar superficies

Debe eliminar todas las sustancias extrañas de las superficies a sellar. Los restos que no elimine pueden impedir que selle bien. En ocasiones, los restos incluso pueden dañar el bloque, la junta y la cabeza. También le conviene usar un desengrasante. En componentes de hierro, use un raspador y un cepillo de alambre. Use un raspador no metálico en superficies de aluminio, ya que estas se dañan fácilmente. Tenga cuidado al usar discos de acondicionamiento. Algunos discos contienen óxido de aluminio, un abrasivo muy duro y agresivo. Cubra los puertos de aceite y refrigerante cuando los use y limpie las superficies con una solución limpiadora.

2

REVISAR

el acabado de la superficie

Preparar las superficies del motor es muy importante para el sellado. Debe tenerse el máximo cuidado para asegurarse de mantener el acabado de las superficies de sellado y la planicidad del fabricante. Se aconseja no utilizar ninguna herramienta que altere la superficie. Las herramientas rotatorias de alta velocidad, ya sean neumáticas o eléctricas, que utilicen discos o cepillos para preparar la superficie, pueden dañar rápidamente las superficies. Los raspadores rígidos de metal también pueden arañar al limpiar superficies de aluminio o de plástico y deben de evitarse. Esto se aplica especialmente cuando se instalan juntas de acero de capa múltiple (MLS). La planicidad y el acabado de la superficie son importantes para el sellado del motor, no el aspecto estético. Si las superficies se deben re-trabajar asegúrese de que se mantenga la calidad de la superficie del fabricante.

3

REEMPLAZAR

Tornillos de Torque-a-Ceder

La mayoría de los motores modernos usan tornillos de cabeza de Torque-a-Ceder. Los fabricantes de motores especifican este diseño para obtener mayor fuerza de sujeción en la superficie de la junta. Para apretar estos tornillos se usa un método de “giro de torsión”. Por lo general, los tornillos se aprietan hasta cierta especificación, después se gira un número adicional de grados. Esto estira al tornillo hasta su punto límite con lo que se logra una aplicación óptima de carga de sujeción. NO TRATE de reutilizar un tornillo de torsión al límite. Los tornillos de Torque-a-Ceder usados se estiran permanentemente y no aplican la carga apropiada a la junta para mantener un sellado de largo plazo.

4

PRECAUCIÓN

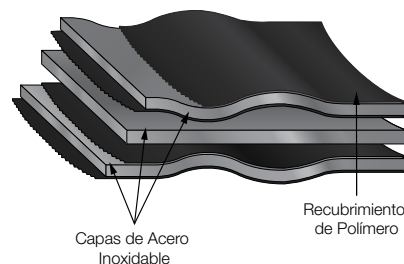

Instálese en seco

Las juntas de cabeza MAHLE Original están diseñadas para instalarse en seco. NO APLIQUE sellador de ningún tipo a las juntas de cabeza MAHLE Original. Los selladores adicionales atacan los revestimientos de precisión de elastómeros y producen una fuerza de sujeción inadecuada en la junta. **¡USE RTV SOLAMENTE CUANDO SE LE INDIQUE!**

Juntas para Cabeza y Múltiple de Admisión

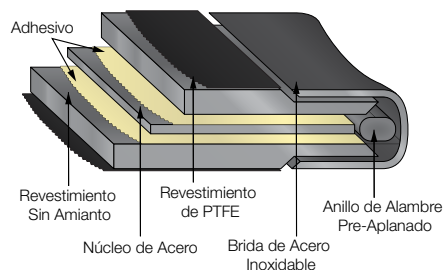

Juntas de Acero Múlti-Capas para Cabeza y Múltiples

- Mantiene todas las tolerancias de equipo original
- Recubrimiento Intellicoat™ para un sello positivo de fluidos
- Máxima resistencia a temperaturas
- Menor fuerza de sujeción inferior para una menor deformación

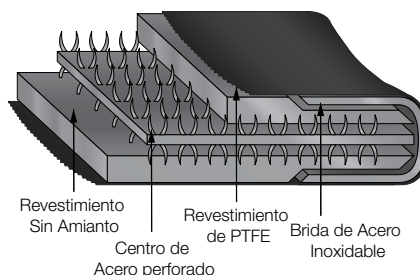

Juntas de Cabeza y Múltiple de Escape de Compuesto Sólido

- Fabricadas con un recubrimiento de Teflon® libre de asbesto
- Químicamente unido a un núcleo de acero sólido
- El núcleo de acero ofrece una fuerza radial superior
- Anillo pre-aplanado resistente a las altas presiones de los cilindros

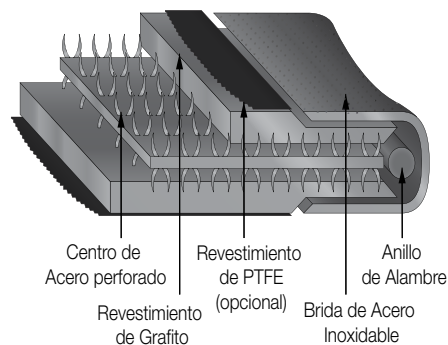

Juntas de cabeza y múltiples compuestas

- Recubrimiento de Teflon® asegura un sellado adecuado en cualquier condición de la expansión térmica
- No deja residuos en las superficies
- No es necesario el re-torque
- Núcleo de acero inoxidable para aplicaciones marinas

Cabeza de Grafito y Juntas del Colector

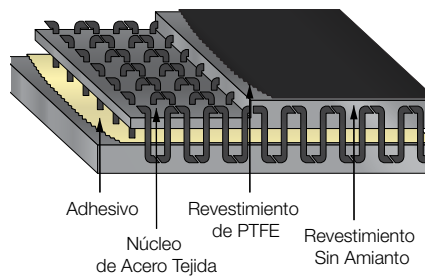

- Mantiene una temperatura estable incluso en condiciones superiores a 1800° F
- Diseñadas para sellar pequeñas irregularidades en la superficie
- No es necesario el re-torque
- Recubrimiento opcional de PTFE

Tapa de punterías, Tapa de Distribución, Cáster y Otras Juntas

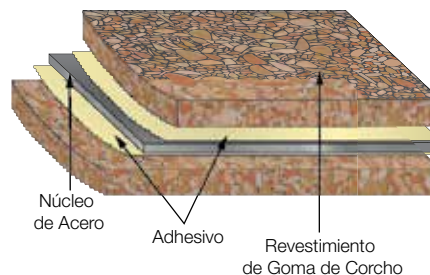

Composición de alto rendimiento en juntas de tapa de distribución, bomba de agua y diferencial

- Contiene un núcleo perforado tejido de acero
- Química y mecánicamente fijado a su estructura
- Ofrece mayor sellado para superficies irregulares
- Resiste el deslizamiento

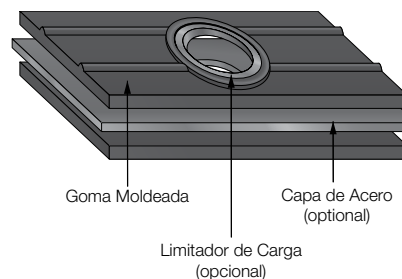

Juntas de corcho para cárter, diferencial y tapa de punterías con soporte metálico

- Evita el exceso de apriete
- Mejora la retención del torque
- Simplifica la instalación
- Altamente resistente a productos químicos

Juntas de cárter y tapa de punterías cubierta de caucho

- Sin uniones que incrementan durabilidad
- No son necesarios selladores
- Limitadores de compresión para evitar un exceso de apriete
- No hay pérdida de torque por contracción

Terminología de Juntas

Juego Superior

Contiene todas las juntas necesarias para retirar y sustituir una culata de cilindro en un motor.

Juego Inferior

Cuando se combina con un conjunto de cabeza, contiene todas las juntas necesarias para montar un motor completamente a menos que se indique.

Juego Completo/Juego de Juntas para Motor

Contiene todas las juntas necesarias para ensamblar un motor completamente.

Junta para Cabeza

Estilo EO, reemplazo para los modelos mencionados. Las juntas para cabeza se venden de forma individual. Algunos motores utilizan juntas izquierdas y derechas o bien de un espesor determinado, verifique los detalles de acuerdo al número de parte.

Juego de Tornillos para Cabeza

Contiene todos los tornillos necesarios para reemplazar una cabeza.

Juego de Tapa de Punterías

Contiene todo lo necesario para extraer y sustituir las juntas de la cubierta de la válvula. Un conjunto es suficiente para que tanto la válvula cubre el V6, V8 y V10. En algunos motores populares cubierta de la válvula en conjunto se vende por separado. Cuando se vende por separado, juntas y arandelas de pipeta de la bujía no están incluidos.

Sellos de Válvulas, Admisión/Escape

Este kit contiene suficientes junta de vástago de válvula para reemplazar todos los sello de escape y / o sellos de admisión de un motor.

Juego para Múltiple, Admisión/Escape

Este juego contiene juntas para múltiples de escape estilo equipo original, o en motores V6 o V8, las juntas necesarias para reemplazar un múltiple de admisión/escape.

Juego Master para Múltiple, Admisión

Este grupo se compone de las juntas necesarias para reemplazar un colector de escape / admisión para un motor V6, V8 o V10.

Juego de Tornillos para Múltiple de Admisión

Diseño de tornillos de Equipo Original para cuando es necesario que el técnico reemplace los tornillos cuando se desmonte el múltiple de admisión.

Juntas para Pleno

Para motores que tienen un pleno (múltiple de admisión superior), estas juntas son del mismo diseño de equipo original.

Juntas para Cáster

Contiene las juntas que se requieren para desmontar y reemplazar un cáster.

Juego de Retén Trasero

Contiene tanto el sello trasero principal, su guía y su junta cuando sea requerida.

Juego para Tapa de Distribución

Contiene el sello de la tapa de distribución y cuando se requiera, las juntas de la tapa de distribución. Muchos motores populares tienen los componentes de forma separada y en juego, así que revise sus componentes.

GRAPHITE A pure non-oxidizing graphite facing material on a pierced steel core designed specifically for use on exhaust applications. It has a temperature rating of 1300°F in the clamped state.

FLAT PACKED (One Sheet Per Package)

MA54F SMALL GASKET SERVICE CENTER

- Easy to stock - easy to use
- Stocks all your small gaskets
- Extra heavy duty construction
- P & W series gaskets can be stocked in the easy to use rack on the bottom shelf
- Drawers are mounted on rollers (with stops) for your convenience

MA54F MINI CENTRE DE SERVICE

- Facilite l'utilisation et l'entreposage
- Organiser tout vos petits joints d'étanchéité
- Construction durable et solide
- Joints de série P et W peuvent être rangés facilement sur la tablette du bas
- Tiroirs montés sur roulement (avec arrêts) pour usage facile et sécuritaire

CENTRO DE SERVICIO PARA JUNTAS PEQUEÑAS
MA54F

- Fácil de colocar - fácil de usar
- Almacena todas sus juntas pequeñas
- Construido de manera resistente
- Las juntas de series P & W pueden ser almacenadas de manera sencilla en la parte inferior
- Para su comodidad los cajones estan montados sobre rodamientos (con escalones)

MA159 WIRE STOCKING RACK

Perfect for stocking larger flat gaskets like valve cover, manifold and head gaskets. Organize your inventory, maximize space and keep popular stock numbers in an easy-to-access file system. Consists of five enameled wire racks.

Color - Gray

Dimensions - 5" H x 12-1/8" W x 46" L

MA159 SUPPORT MÉTALLIQUE

Idéal pour entreposage de joints en empaquetage plat tels que joint de culasse, collecteurs etc. Garder votre inventaire en ordre. L'ensemble comprends 5 supports.

Dimensions: 5" H x 12 P x 46" L

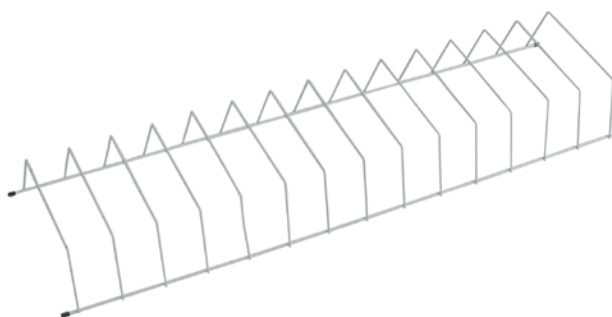

RACK DE ALAMBRE MA159

Perfecto para el almacenaje de juntas largas como para tapa de punterías, múltiples o cabezas. Organiza su inventario, maximiza el espacio y mantiene un inventario de los números más populares con un sistema de fácil acceso. Consiste de cinco bastidores de alambre esmaltado.

Color - Gris

Dimensiones:

5" Alto x 12-1/8" Ancho x 46" Largo

JV-1

An assortment of cork/rubber, paper with rubber binder, and paper gasket materials in small, easy-to-use sheets. Its perfect for homeowners' DIY projects or for small repair jobs in auto shops.

JV-1

Un assortiment de liège / caoutchouc, papier avec un liant en caoutchouc, et les joints de papier dans de petites feuilles faciles à utiliser. Il est parfait pour les projets de bricolage de propriétaires ou pour les petits travaux de réparation dans les magasins d'automobiles.

JV-1

Un surtido de corcho / caucho, papel con la carpeta de caucho y materiales de junta de papel en hojas pequeñas y fáciles de usar. Es perfecto para proyectos de bricolaje de propietarios de viviendas o para pequeños trabajos de reparación en talleres de automóviles.

JOBBER STOCKING BOXES

These sturdy, white corrugated display/stocking boxes are made to organize small gaskets on stockroom shelves or in retail displays. The chart below will help you determine the sizes you need.

Part No.	Size (inches)	Series
BX1	5-1/2H x 6-1/8W x 12D	B, C & D
BX2	7-1/2 H x 7-1/2 W x 12 D	F, G & H
BX3	9-3/4 H x 10 W x 12D	J, K & L

BOITES POUR INVENTAIRES GROSSISTES

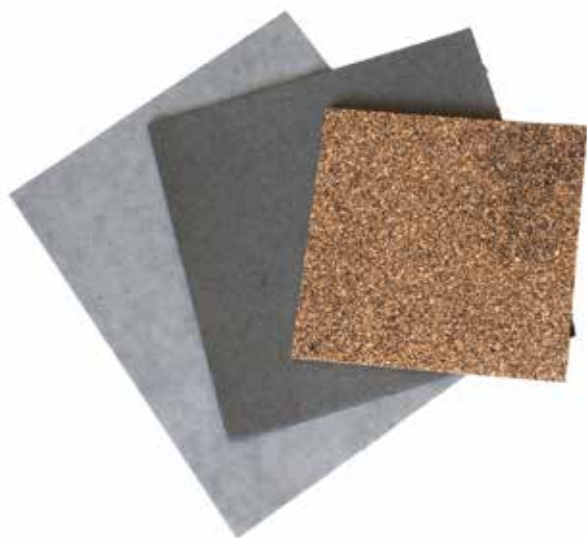

Ces boites sont fabriquées de carton ondulé, et servent à organiser votre inventaire, ou pour merchandising. Voici les grandeurs disponibles.

JV8 - Aluminum Silicone Sealant

JV8 is a high temperature resistant, low volatile RTV-gasket material developed specifically for use on engines. It meets the low volatility specifications required of engines equipped with oxygen sensors. The temperature rating for JV8 is -75° to 500° intermittent service. JV8 can be used as a supplement to conventional gaskets, such as oil pan and manifold end seals. Or it can be used as a replacement for most paper type gaskets, such as timing cover and water outlet gaskets. Its aluminum color more closely matches today's engine components while providing higher temperature capabilities. JV8 is an 80ml tube that can be hung for display or it can stand up right on it's cap for display in your retail sales area. Sold in a 12 pack.

JV8 - Le scellant

JV8 est un scellant à haute température, faible volatilité, conçu pour utiliser avec les moteurs. Il rencontre les normes de volatilité requise pour les sondes à oxygène. Résiste aux températures entre -75F à 500F et service à intermittence. Le JV8 peut être utilisé comme supplément aux joints conventionnels tels que les carter d'huile, et collecteurs, couvercles de distribution, ou il peut être utilisé comme substitut au joints de papier. Sa couleur est aluminium et s'harmonise avec les composantes moteur. 80ml peut être accroché ou placé sur une tablette pour présentation. Vendu en paquet de 12.

Sellador de Silicón tipo Aluminio - JV8

El JV8 es resistente a altas temperaturas, baja volatilidad del material de la junta-RTV desarrollado específicamente para uso en motores. Cumple con las especificaciones requeridas por los motores equipados con sensores de oxígeno. El rango de temperatura para el JV8 es de -75° a 500° de servicio intermitente. El JV8 puede ser utilizado como suplemento de juntas convencionales, como cárter y los sellos finales de múltiples. También puede ser utilizado como un reemplazo para las juntas de papel más populares, como tapa de distribución y tomas de agua. Su color aluminio es más compatible con los componentes de los motores actuales mientras que proporciona una mayor resistencia a temperaturas. El JV8 es un tubo con 80ml que puede ser manejado a través de un display o de forma directa en su anaquel. Es vendido en un paquete de 12 piezas.

Engine Gaskets

Cylinder Head Gasket Set	1993 - 1995	(Exhaust Pipe Gasket not Included, without Cylinder Head Bolts)	HS4955	1
Conversion Gasket Set	1993 - 1995	(Use with Head Set to Make Full Set)	CS4955	1
Full Gasket Set	1993 - 1995		95-3554	1
Cylinder Head Gasket	1993 - 1995	Graphite	4955	2
Cylinder Head Bolt Set	1993 - 1995	(Right Bank, Contains Head Bolt With Receiver Threads)	GS33232	1
	1993 - 1995	(Left Bank, Contains Head Bolt With Stud)	GS33413	1
Valve Cover Gasket Set	1993 - 1995	Cork-Rubber	VS50019	1
Valve Stem Oil Seal Set	1993	(Intake and Exhaust, O-Ring Type, Contains 8, Priced as a Set)	SS45229	2
Valve Stem Oil Seal Set, Intake	1993 - 1995	(Positive Type, Contains 4, Priced as a Set) Fluoroelastomer	SS45418	2
Exhaust Manifold Gasket Set	1993 - 1995	Composite	MS15310	1
Intake Manifold Gasket Set	1993 - 1995	(Requires Valve Cover Set) Composite	MS15307	1
Fuel Injection Plenum Gasket	1993 - 1995	Composite	MS14162	1
Oil Pan Gasket Set	1993 - 1995	Molded Rubber	OS32497	1
Main Bearing Gasket Set	1993 - 1995	PTFE	JV1633	1
	1993 - 1995	(11mm Wide) Rubber	JV544	1
Timing Cover Seal	1993 - 1995	(3/8in Wide) Rubber	49328	1
